Welcome from the President

Welcome from the President

Dear Students,

Welcome to Commonwealth University! I, along with the entire leadership team, am so pleased you're here. No matter which campus you call home, our mission is for you to grow as an individual, develop lifelong knowledge and skills, and pursue your passion. As you learn, live, and study on our campuses we will focus on ensuring you feel welcome, safe, supported, and encouraged to do your best.

Our exceptional faculty and staff are here for you. Their number one priority is to support and guide you throughout your educational journey – helping you harness the grit and determination you possess to succeed as you focus on graduation. There is no prouder moment for me as President than to watch you walk across the stage at graduation and receive your hard-earned diploma.

The information provided in this handbook sets the foundation for a positive, healthy, inclusive, and responsible campus experience that gives you the opportunity to realize your potential and fulfill your educational goals. I urge you to take the time to familiarize yourself with the information, expectations, policies, and procedures.

If you have questions regarding any of the information in the handbook, please reach out to the office of the Dean of Students at DeanOfStudents@commonwealthu.edu or 570.389.4734.

Have a great year!

Dr. Bashar W. Hanna, President

Non-Discrimination Policy

Non-Discrimination

DEI

The Office for Diversity, Equity, and Inclusion leads and supports university-wide initiatives across all locations, Bloomsburg, Lock Haven, and Mansfield together as Commonwealth University. The priority focus of these initiatives is the recruitment and retention of a diverse faculty, staff, and student body, while fostering an inclusive and equitable campus and university community. The positive change achieved through focused initiatives, purposeful activities and events helps to create and sustain an inclusive learning, living and working environment where all members of the Commonwealth University community feel that they are welcomed, valued, and supported.

PRP 3506 - CLASS ATTENDANCE POLICY

Issued by: James K. Krause, Interim Provost and Senior Vice President of Academic Affairs
Effective Date: Fall 2018
Notes: Approved by BUCC, 4/24/85. Revised by BUCC, 2/20/87. Revision, page 2, approved by BUCC, 12/7/88.This policy voids PRP 3231, 3232, and 3234. Revised by BUCC, 11/20/96. Revised by BUCC, 1/20/10. Reported to the Forum 1/27/10. Revised by BUCC, 5/2/12. Revised by BUCC, 5/8/13. Revised by BUCC 13 April 2016. Reported to Forum 9/28/2016. Revised by BUCC 14 April 2018.

Policy: Regular classroom attendance is expected of all students. However, when class work is missed, a student will be afforded reasonable assistance by a faculty member when:

- Class work is missed as a result of extenuating circumstances beyond the student's control
- The student communicates the need for special arrangements as soon as the need for an absence is known
- Official documentation is provided to verify the reason for absence if requested by the instructor

Extenuating circumstances may be, but are not limited to: personal illness, death or critical illness in the immediate family, participation in a university-sponsored activity, participation in a short-term, obligatory military or military reserve activity, observation of a religious holiday, or civic and legal mandatory obligations.

The instructor is not required to give makeup examinations or review other class work missed as a result of unauthorized absences.

A faculty member, with departmental approval, may adopt a reasonable alternative policy if class members are provided that policy in writing during the first week of classes.

PRP 3333 - UNDERGRADUATE (DEGREE AND NON-DEGREE) ADMISSIONS POLICY

Issued by: Dr. Carol J. Matteson, Interim Provost And V.P. for Academic Affairs
Effective Date: August 28, 1995
Notes: Approved by BUCC, 3/19/86. Approved by Council of Trustees, 6/11/86. Amended by BUCC 4/12/95. Presented to University Forum 4/19/95.

Criteria:

- Admission to Bloomsburg University is determined by the applicant's academic and personal qualifications. Decisions are reached without regard to race, age, color, creed, national origin, sex or physical handicap.
- Applicants other than those eligible for early admission must be graduates of or seniors in accredited secondary schools or must have secondary school equivalency as determined by the Credentials Evaluation Division of the Pennsylvania Department of Education.
- Acceptance is determined by the Director of Admissions upon evaluation of secondary school preparation, achievement, scores on either the Scholastic Assessment Test (SAT) or American College Test (ACT), personal characteristics, and institutional capacity.
- Acceptances are tentative if based on evaluation of transcripts which show work in progress; final action is taken after complete transcripts have been received and evaluated.

Procedures:

- To be a candidate for admission, one must complete and submit an official application with the appropriate non-refundable application fee to the Office of Admissions. The applicant is responsible for requesting the proper official of his/her secondary school to submit a transcript and personal evaluation to the Director of Admissions.
- An applicant must provide scores of the SAT or ACT. It is the responsibility of the applicant to arrange for the test and to request the forwarding of the scores directly from the Testing Service. A photostatic copy of the test report on an official high school transcript is also acceptable. No other standardized test will serve as a substitute for the SAT or ACT.

Special Categories:

- **Early Admissions** - Outstanding high school students may apply for consideration for admission prior to completion of high school. In addition to strong achievement and high aptitude, applicants for early admission must have the unqualified endorsement of the high school to receive consideration.
- **ACT 101/Educational Opportunity Program (EOP)** - Any individual with a high school diploma or certificate of equivalency is eligible to apply for admission to the program. Non-traditional criteria are applied in estimating potential of an applicant when it appears that the environmental background may have adversely affected grades and/or standardized test scores. The Director of Admissions may require an applicant for the ACT 101/EOP to file supplementary information as needed for proper consideration. Students admitted through the ACT 101/EOP are expected to participate in a summer enrichment experience prior to the first semester of their attendance, where special assistance in tutoring and counseling is given to address specific academic, financial and/or social problems. This requirement can only be altered by the Director of ACT 101/EOP.
- **Transfer Students** - An applicant who was previously enrolled, or at the time of application is enrolled, in another college or university is a transfer student. The criteria and procedures above apply to transfer applicants. SAT or ACT results are not required from applicants who have successfully completed 30 or more semester hours of college credit. Transfer applicants must supply an official transcript from each college attended to the Director of Admissions, regardless of whether credit was earned at the other institution(s). For a transfer student to be considered for admission, he/she must be certified as in good standing academically and otherwise in the college last attended and must have an overall quality point average of 2.0 or better on a 4.0 system for all courses in which passing and/or failing grades were recorded.
- **Readmission of Former Students** - Students, who, having been formally admitted to degree study and attended Bloomsburg University, fail to enroll or withdraw for any academic semester, regardless of the reason, must apply for readmission. Readmitted students are responsible for the graduation requirements and academic policies which exist at the time of reentrance. The Director of Admissions may require an applicant for readmission to file a letter containing such supplementary information as needed for proper consideration. Students under academic dismissal are ineligible for readmission for one calendar year. They should present evidence of successful achievement at another college or university as part of any application for readmission. Readmitted students who were formerly dismissed for academic deficiency have two final grading periods in which to regain minimum academic progress or good academic standing. These students are not eligible for academic probation and if dismissed the second time may not attend the University for additional degree or non-degree credit study.
- **Non-Degree Admission** - Admission to the non-degree credit program is open to all high school graduates or those holding GED credentials, standardized test scores are not required. Application forms may be obtained from the Office of Admissions or the Office of Adult Advisement. Non-degree categories with their credential(s) requirement are as follows:

Adults who desire to enroll as part-time students must submit to the Office of Adult Advisement: completed application for don-degree admission. Must submit evidence of high school graduation of GED completion prior to enrolling for a second semester or session.

A student approaching the final year of high school who desires to combine university work with the last year of high school must submit to the Office of Admissions: high school transcript, junior year SAT or Act scores, a letter of recommendation from the high school counselor, and letters of recommendation from two high school instructors in the academic area of intended pursuit, and completed application for non-degree admission.

Students with an earned baccalaureate degree who wish to complete the requirements for Level I or Level II teacher certification. Credential requirement: a transcript from the institution granting the baccalaureate degree and a completed application for non-degree admission

Senior citizens who are retired, over 60 years of age, legal citizens of the U.S. and residing in the Commonwealth of Pennsylvania are eligible to apply for waiver of tuition fees through the School of Extended Programs. Students in this category may be admitted to classes on a seat available basis only. Credential requirement: proof of age, retirement, United States Residency, and a completed application for non-degree admission. Must submit evidence of high school graduation of GED completion prior to enrolling for a second semester or session.

Students seeking enrollment in a certificate program. Credential requirement: official high school transcript of GED, a completed application for non-degree admission, and the signature of the Coordinator of Adult Advisement.

RP 3463 - GRADUATE ADMISSIONS, WITHDRAWAL, COURSE REPEAT, TRANSFERS, AND GRADUATION REQUIREMENTS

Issued by: Dr. James Mackin, Provost and VPAA
Effective Date: Fall 2008
Notes: Endorsed by Graduate Council. 12/1/00 Approved by Bloomsburg University Curriculum Committee, 2/14/01. Endorsed by Graduate Council. 12/11/06 Approved by Bloomsburg University Curriculum Committee, September 26, 2007. Endorsed by Graduate Council. 1/25//08. Presented to BUCC 02/06/08 as Information Item. Presented at University Forum 2/27/08 as Information Item.

1. Graduate Admissions

A. Admission

Admission to the Graduate School at Bloomsburg University is determined by the applicant's academic and program specific qualifications. Decisions are reached without regard to race, color, religion, sex, age, national origin, ancestry, sexual orientation, or disabilities.

Applicants must be graduates of, or seniors in, bachelor's programs at accredited four-year colleges or universities.

International applicants must have the equivalent of a bachelor's degree from a recognized foreign institution.

Acceptance to a graduate program is determined by the Dean of Graduate Studies upon recommendation of the graduate program coordinator.

Acceptances are tentative if based on evaluations of transcripts that show work in progress; final action is taken after complete transcripts have been received and evaluated.

B. Entrance Requirements

Entrance requirements to graduate studies at Bloomsburg University vary according to program. Minimum requirements for applicants for graduate study include a baccalaureate degree from an accredited college or university or the equivalent degree from a foreign institution, and a minimum undergraduate quality point average (G.P.A.) of at least 3.0 on a 4.0 scale. Some programs require either the Graduate Record Exam (GRE), Miller Analogies Test (MAT), National Teacher Examination (PRAXIS), or the Graduate Management Admissions Test (GMAT) as required by the program. Any testing fees must be paid by the student. Students not meeting the minimum admission requirements may be admitted with provisional status upon the recommendation of the graduate program coordinator and the Dean of Graduate Studies.

C. Initial Teaching Certification

Students seeking initial certification through a graduate program must have an overall GPA of 3.0 for their bachelor's degree. These students must complete the admission to teacher education packet. For secondary education initial certification, the graduate student must pass the Praxis I and Praxis II tests prior to admission to teacher education. For an initial K-12 certification (e.g., business education, elementary, early childhood, foreign languages, special education, deaf/HOH, speech-language pathology), the graduate student must pass Pennsylvania Praxis I tests prior to admission to teacher education. The student must pass the Pennsylvania Praxis II tests before graduation.

D. Certificate Programs

Admission to post-baccalaureate certificate programs requires a bachelor's degree from an accredited college or university with a minimum GPA of 2.5 (on a four point scale). Admission to post-master's certificate programs requires a master's degree from an accredited college or university with a minimum GPA of 3.0 (on a four point scale). Credits earned as a non-degree graduate student or in a master's program may not be applied towards the requirements of a certificate program. Credits earned in a post-baccalaureate certificate program taken at Bloomsburg University may be applied towards a master's degree program with the permission of the graduate program coordinator and the graduate dean as long as the credits taken in the master's program are not reduced below 21.

2. Special Categories

International Students:

Individuals from foreign countries must complete a separate Graduate Admissions Application for International Students which is available in the Office of Graduate Studies or Office of International Education. This form can also be downloaded from the BU web page. International applicants must have official results from the Test of English as a Foreign Language (TOEFL), the Test of Spoken English (TSE), or the International English Language Testing System (IELTS) submitted directly to the Office of Graduate Studies. A minimum score of 550 on the paper-based TOEFL, 213 on the computer-based TOEFL, and 79 on the internet-based TOEFL or equivalent scores from other testing systems, taken within two years prior to the date of submission, is required. All international applicants must have their applications complete at least four months prior to the start of the semester for which they are applying.

Admissions Categories:

In addition to regular admission to graduate programs, several other admissions categories are available:

Provisional - A student may be admitted as provisional in a degree program when the student possesses a baccalaureate degree but does not meet the criteria for regular admission as specified by the program. The reasons for a student's provisional status will be specified in the letter of admission. When these specified conditions are met, transfer to regular student status is automatic upon certification by the student's advisor. If the conditions are not met, the student may be dismissed.

Transfers - The criteria and procedures described under admissions also apply to transfer students. Transfer of credit is described under section three.

Non-Degree - Students may be admitted to the Graduate School with non-degree graduate status for the following purposes:

- taking graduate-level university instruction with no intention of pursuing a master's degree;
- auditing graduate courses;
- taking courses for Act 48 credit only;
- taking courses before applying for regular admission or without having completed the regular admission process prior.

A non-degree student may apply to the Graduate School for transfer to provisional or regular status. However, no more than 12 semester hours earned as a non-degree student may be applied toward a master's degree, except when special permission is granted by the Dean of Graduate Studies.

Adjunct - An adjunct student is one who enrolls in off-campus graduate courses without being admitted to a program. He/she may take 6 semester hours of graduate course work in this status before applying for regular or non-degree status.

Readmission - If a graduate student has not enrolled in a graduate course for a two-year period, the student's record is marked "withdrawn" and placed in the inactive files. A new application and application fee must then be submitted for reactivation.

Graduate Courses in Senior Year - A current Bloomsburg University undergraduate may register for graduate course work under the following conditions: first, graduate courses may be taken only during the student's senior year; second, a recommendation from the student's faculty advisor must be presented to the office of graduate studies; and third, the graduate courses may not be applied to the undergraduate degree. An undergraduate student wishing to take graduate courses must follow the regular application process for non-degree graduate students. A maximum of 12 graduate credits is allowed.

Audits - Courses may be audited for self-improvement. Students must follow the regular graduate application process, pay all the required fees, and obtain the approval of the Dean of Graduate Studies. Students auditing a course are not required to take tests. Upon completion of an audited course, a grade of V is recorded on the student's transcript.

Transfer of Credits

Internal transfer of credits

Internal transfer of credit (attained with a grade of B (GP of 3.0 on a 4.0 scale) or better, generally as a non-degree or adjunct student) is limited to 12 credits of course work. They must be relevant to the degree program the student is pursuing and must be approved by their program coordinator and Dean of Graduate Studies.

Under certain conditions, credits applying to an earned degree may apply to a subsequent degree. Courses transferred must be relevant to the program in which the student is matriculating. The transfer must be approved by the graduate program coordinator and the Dean of Graduate Studies. Transferred credits must not reduce the number of credits earned in the program below 24. Credits transferred in this manner do not contribute to the GPA when determining academic standing.

External transfer of credits

Students may transfer up to nine hours of graduate course work, in which a grade of B (GP of 3.0 on a 4.0 scale) or higher is earned, from another college or university, with the approval of their graduate program coordinator and Dean of Graduate Studies. Credits applied to an undergraduate degree may not be applied to a graduate degree. Credits earned in non-degree status or credits earned in a program from which the student has withdrawn, may apply to a degree program.

After formal admission to graduate school, all requests to take and transfer graduate credits must be pre-approved by the program coordinator. The content of the course(s) must match the required areas of study in the student's master's program at Bloomsburg. Transfer credit must have been earned with a grade of at least B, must be capable of counting toward a graduate degree at the sponsoring institution, be appropriate to the Bloomsburg University program, and be completed no more than six years before the expected date of graduation. Pass/fail grades not acceptable.

Workshop courses

In general, workshop format courses are not acceptable in transfer; however, if the workshop fulfills the following requirements, it may be considered for transfer to Bloomsburg University:

Must consist of 42 contact hours per semester for a three credit course;

Must include exposure to the disciplinary research literature appropriate to the course;

Must include the opportunity for outside work such as term or research papers or other major assignments appropriate to a graduate course;

Must be taught as part of a master's degree curriculum of the university at which the course was taken. Professional development workshops are not acceptable;

Duration of the course must be at least one week for each credit (e.g., three weeks for a three credit course).

4. Graduate Course and University Withdrawal

During the Fall and Spring semesters, after the schedule change period and continuing until the end of the tenth week of the semester, if a student withdraws from a course, a grade of "W" will be recorded. As a means of notification to the instructor of the intent to withdraw, a student is required to obtain the instructor's signature and the signature of the program coordinator on the withdrawal form. No withdrawals will normally be permitted after the end of the tenth week of the semester. For summer sessions and courses not taught on a regular semester basis, the Registrar will prorate the date appropriately.

Prior to the last week of classes, in exceptional circumstances, for compelling, justified and documented reasons, the Dean of Graduate Studies and Research may waive these restrictions. Poor academic performance will not constitute grounds for late withdrawal. If withdrawal is granted after the deadline, the grade is W providing the student is passing the course, and E otherwise.

A limit of two (2) withdrawals during the degree program will be permitted. Re-registration for withdrawn courses requires the approval of the program coordinator.

Students withdrawing from the university may exceed the two course withdrawal limit. Faculty are encouraged to include the university late withdrawal policy on the syllabus distributed to students at the beginning of the semester.

5. Graduate Course Repeat

A maximum of two different courses may be repeated. The initial grade and all subsequent grades for a repeated course remain on the transcript as part of the student's permanent record. The most recent grade (regardless of whether it is higher or lower) will be the grade used for QPA calculation. An individual course may be repeated only once. A course taken at Bloomsburg University in which a grade of less than C (G.P. less than 2.0) has been earned must be repeated at Bloomsburg University.

6. Graduation Requirements

In addition to the program specific graduation requirements, the following Graduate School graduation requirements must be met:

Students must have a minimum GPA of 3.0 for all graduate work taken.

The minimum credits earned in a program must be:

- Certificate Programs - 12
- Master's Programs - 30
- Doctoral Programs -- 100

No more than 40% of the credits applied to a program may be in swing courses.

The maximum number of experiential learning credits that may be applied to a program is nine.

The maximum number of thesis or dissertation credits that may be applied to a program is six. If a student earns thesis credits but then selects a non-thesis option, then the maximum thesis credits that may be applied to the program is three.

No more than 15 credits combined of experiential learning and transfer credits may be applied to the degree requirements.

Student Conduct Policy

Student Code of Conduct

The Office of Student Conduct is committed to developing students and supporting the campus and University culture of respect and responsibility through the application of a fair and equitable educational process. Our goal is to promote your development by creating a supportive environment to prepare you to meet lifelong ethical, social, and professional challenges. This is accomplished through the fair, equitable, and progressive application of the Student Code of Conduct.

In short, helping you learn from mistakes and restoring the community is the focus of our work.

Student Code of Conduct

Overview

The University Community is an academic community whose membership includes Students, faculty, staff, and administrators. The University Community exists for the pursuit of learning, the transmission of knowledge, the development of Students as scholars and citizens, and ultimately, for the general well-being of society. Freedom of inquiry, speech, action, and expression is indispensable in the attainment of these goals. Students, as members of the University Community, are encouraged to engage in a sustained, critical, and independent search for knowledge.

The student conduct program supports this endeavor through policies that balance the freedom of the individual Student with the interests of the University Community as a whole, and procedures that apply these policies in an equitable and consistent manner.

As members of the University Community, all Students are expected to uphold and abide by the standards set forth in the Student Code of Conduct. These standards are reflective of the University's core values: respect, responsibility, and integrity.

The student conduct process attempts to teach civic principles within the context of the academic mission. The process views Students as adults, and as such, expects them to be aware of applicable local, state, and federal laws, as well as all published University policies, procedures, and rules.

Violation of the Student Code of Conduct may subject a Student to action through the student conduct process. Where warranted, violations may also

be referred for action through appropriate law enforcement agency or court. The University may initiate an investigation and proceed with resolution within the scope of its authority, responsibility, and jurisdiction, without regard to the commencement or disposition of any civil or criminal court proceeding.

Jurisdiction

Matters subject to conduct jurisdiction may be resolved through the student conduct system, regardless of any actions that may be brought in civil or criminal court systems. The University's jurisdiction over alleged conduct violations extends to actions committed by Students and Student Organizations:

• at any place of university operation, including all campuses, satellite, and remote locations;

• while attending or participating in university events, activities or programs, either in-person or otherwise;

• when otherwise off-campus and where the action: o significantly breaches the peace (i.e., results in initiation of a criminal action by law enforcement authorities);

o substantially infringes upon the personal or property rights of another member of the University Community; or

o is otherwise detrimental to the educational mission and/or a substantial interests of the University.

The University retains jurisdiction over conduct violations occurring while an individual is a Student, regardless of any withdrawal, leave of absence, or graduation.

Applicability

This Code of Conduct is issued pursuant to 22 Pa. Code Chapter 505 and Board of Governors Policy 1984-13-A, and applies to all Students and Student Organizations. It is intended to be consistent with any referenced University policies and will be construed to avoid inconsistency; however, to the extent that there is an irreconcilable conflict between this Code of Conduct and any University policy, the document with the latest approval date will control.

Areas of Responsibility

The Vice President for Student Success and Campus Life serves as the President's designee for the general oversight of Student conduct matters. Specific responsibility for the administration of conduct matters is delegated to the Executive Director of Student Conduct. The Executive Director of Student Conduct may further delegate responsibility to various Student conduct bodies and administrative staff.

The University Title IX Coordinator coordinates compliance with Title IX and responds to Reports of Student conduct matters involving sexual misconduct, sexual harassment and/or sexual discrimination.

Specific rules for the use of University resources or participation in University functions may be developed in addition to this Code of Conduct. These rules may be dealt with by the offices in charge of the resources or functions or referred to the Office of Student Conduct as deemed appropriate by the University based on the nature of the action.

Communication

University-issued electronic mail (email) is the official means of communication on all matters pertaining to the Student Conduct System. If a party to a Student conduct matter is no longer a Student or employee of the University, notifications will be directed via reasonable means. Students are expected to check their University email accounts on a daily basis. Further, Students are responsible for updating the Office of Student Conduct of any email address or other changes to the means of contact with respect to conduct matters.

Definitions

Except as otherwise provided herein, the language contained in this document shall be construed according to ordinary common usage.

Advisor

An individual who may be present to support a party throughout the conduct process. The Advisor may be a member of the University Community, an attorney, or other individual selected by the party. The Advisor may

accompany the party they are supporting to any hearing or meeting that the party is required to attend. Each party is responsible for coordinating and scheduling with their choice of Advisor.

In all conduct matters except those addressed through the Sexual Misconduct Policy processes, the Advisor may communicate only with the party they are supporting and may not otherwise speak for, or on behalf of, the party. The Advisor may not be a party or witness in the matter.

In conduct matters addressed through the Sexual Misconduct Policy processes, the Advisor may not speak for the Party, except for purposes of cross-examination. If a Party does not attend the hearing, the Party's Advisor may appear and ask questions or conduct cross-examination on the Party's behalf. If a party does not have an Advisor of choice present for a hearing, the University will appoint an Advisor for the limited purposes of asking questions and conducting cross-examination.

Confidential Resources

University employees and off-campus organizations who are not required to Report identifiable Student information regarding an incident of sexual misconduct to the Title IX Coordinator. A comprehensive list of on-campus and off-campus confidential resources is available online at the University Title IX website.

Consent

(For purposes of the Prohibited Behavior Definitions relating to Sexual Misconduct) a knowing and voluntary agreement to engage in specific sexual activity at the time of the activity communicated through clear actions and/or words that are mutually understood.

In order to be valid, Consent must be active, present and ongoing.

Consent is not present when it is the result of coercion, intimidation, force, or threat of harm. Consent is not present when an individual is incapacitated due to alcohol, drugs, or sleep, or otherwise without capacity to provide consent due to intellectual or other disability or other condition. Consent can be withdrawn at any time and consent to one form of sexual activity is not necessarily consent to other forms of sexual activity.

When alcohol is involved, incapacitation is a state beyond drunkenness or intoxication. When drug use is involved, incapacitation is a state beyond being under the influence of or impaired by the use of the drug. Alcohol and other drugs impact each individual differently. Determining whether an individual is incapacitated requires an individualized determination. When determining whether a person has the capacity to provide consent, the University will consider whether a sober, reasonable person in the same position knew or should have known that the other party could or could not consent to the sexual activity.

When determining whether consent has been provided, all the circumstances of the relationship between the parties will be considered.

Day

For purposes of measuring days within which an event is required under the Student Code of Conduct (e.g., scheduling a hearing, issuing a Student conduct decision, or filing an appeal), days are defined and counted as calendar days.

Determination

The adjudication of an alleged violation of the Student Code of Conduct.

Educational Outcome

An outcome imposed based upon a finding of responsibility for a violation of the Student Code of Conduct, including any modifications of a Student or Student Organization status or standing, and any additional assigned requirements.

Good Disciplinary Standing

Students enrolled at the University who are not currently under disciplinary probation, suspension or expulsion, and who do not have any outstanding, overdue incomplete Educational Outcomes.

Hearing

The resolution method facilitated by a University Conduct Board or a Hearing Officer involving the parties, witnesses and evidence with the Referred Party having a right to appeal.

Hearing Officer

A single decision-maker given the authority to review and issue a determination in a Student conduct matter other than a matter involving charges where the possible educational outcome is suspension or expulsion. Student conduct matters involving possible educational outcomes of suspension or expulsion are determined by the University Conduct Board.

Investigator

An individual employed or appointed by the University to conduct an investigation in Student conduct matters.

Referral

A written Report of alleged Student Code of Conduct violations, excluding sexual misconduct violations made by a member of the University Community against a Student or Student Organization.

Referring Party

A member of the University Community who has submitted a Referral alleging a violation of the Student Code of Conduct. University Community members making Referrals as part of their duties will act as witnesses in the process.

Report

An allegation, other than a Referral, of a violation of the Student Code of Conduct made against any Student or Student Organization.

Reporter

An individual who submits a Report to the University alleging a violation of the Student Code of Conduct. University Community members making Reports as part of their duties will act as witnesses in the process.

Referred Party

The Student(s) or Student Organization alleged to have violated provisions of the Student Code of Conduct.

Sexual Misconduct Investigator

The Title IX Coordinator or the individual designated by the Title IX Coordinator to perform an investigation under the Sexual Misconduct Policy. The Investigator may not have a conflict of interest or bias for or against an individual party, or for or against Complainants or Respondents in general. The Investigator may not serve as a Decision Maker, Appeals Officer or Advisor to any Party in the same matter.

Student

Any person: (1) admitted to the University, or (2) eligible to register or schedule for classes,

The term “Student” shall include Employees, Volunteers and Officials where the Employee, Volunteer or Official otherwise meets the enrollment criteria set forth in this definition.

Student Conduct Conference

This meeting provides the Referred Party with the opportunity to: discuss the allegations that led to the Report or Referral; review and discuss additional information about the Student conduct process, including information regarding their rights and options and, where appropriate, the availability of informal resolution; receive information regarding the range of potential Educational Outcomes for the charged violation(s), should the charges be substantiated.

Student Organization

Any organized group, that has complied with, or is in the process of complying with the University’s requirements for registration or recognition; receives funds from the University or auxiliary services; or is formed through University academic, athletic, or other departments.

Title IX Coordinator

The individual designated by the University, with assistance of the Deputy Title IX Coordinators, to coordinate the University's compliance with Title IX and the Violence Against Women Act ("VAWA") and to respond to Reports of violations. The Title IX Coordinator may not have a conflict of interest or bias

for or against an individual party, or for or against Complainants or Respondents in general. The Title IX Coordinator may serve as the Investigator of a Formal Complaint. The Title IX Coordinator may serve as the Investigator of a Formal Complaint for Formal Complaints against Respondents who are Employees. The Title IX Coordinator may not serve as a Decision Maker or Appeals Officer.

University

Commonwealth University of Pennsylvania, including Bloomsburg University, Lock Haven University (including Clearfield campus), and Mansfield University (including Sayre campus).

University Community

The students and employees (including faculty) of the University. For purposes of Referrals, the University Community also includes guests and visitors of the University, and employees of the University's affiliated entities.

University Conduct Board

A group of trained individuals representing the University community that hear the facts of a Student conduct matter from all involved parties. Based on the facts, the board determines a decision of "responsible" or "not responsible" and recommends appropriate Educational Outcomes when required.

University Property

All objects, items and real estate owned or controlled by the University, starting from the curbed edge inward, as well as sidewalks and building entrances.

Prohibited Conduct

Academic Integrity

Academic Integrity refers to the adherence to agreed upon moral and ethical principles when engaging in academic and scholarly pursuits. An act of academic dishonesty involves fraud, deceit, or misrepresentation in attempting to obtain academic credit or influence the grading process by means unauthorized by the course instructor or inconsistent with university policy. Academic honesty is breached when a student willfully gives or receives assistance not authorized in course work, and/or intentionally fails to

adhere to, or assists others in failing to adhere to, the university policy on academic honesty. The university's academic integrity policy is part of an effort to nurture a community where trust, honesty, and personal integrity guide all of our dealings with one another. Personal integrity is vital to our pursuit of educating and becoming educated. Faculty are expected to instruct students in ways of avoiding these forms of academic dishonesty.

Alcohol

(a) Underage use or possession (including constructive possession); (b) public intoxication; (c) distributing, selling, or furnishing of alcoholic beverages without a license or to underage individuals; (d) driving or operating a vehicle under the influence; (e) possession of open containers of alcoholic beverages; *(f) paraphernalia used for consumption of alcohol;* or (g) use, possession, or consumption of alcohol over 21 years of age on University property.*

**Violations apply except as expressly permitted by law and the University's Policies.*

PLEASE NOTE: The University maintains a Medical Amnesty Policy, which provides limited exceptions to charges under this section in the interest of encouraging Students to seek help for drug- or alcohol-related medical emergencies.

Medical Amnesty The Commonwealth University of Pennsylvania's priority is for the safety and well-being of its students and visitors. Consistent with the intent of Pennsylvania's Medical Amnesty Law, This Medical Amnesty Policy is intended to encourage students to seek emergency medical assistance without fear of conduct violations for alcohol and drug use, including hazing-related instances. In order for a student to receive medical amnesty, the student seeking assistance for themselves or another must:

1. Call 911, Police, Emergency Services, or notify Residence Life personnel based on a reasonable belief that someone, including themselves, is in need of immediate medical assistance;Reasonably believe that they were the first person to make the call or notification; **2.** Provide their own name to 911, Police, Emergency Services, or Residence Life personnel, as well as any additional relevant information;

3. Remain with the person needing medical assistance until Emergency Medical Service Providers and/or the Police have arrived and released the student from the scene; and **4.** Cooperate with any post event outreach.

The Medical Amnesty Policy does not excuse or protect individuals or students that repeatedly and deliberately violate University policy. It should be noted that this provision does not preclude the University or other appropriate authorities from taking disciplinary action for other University policy violations (i.e. vandalism, physical violence, or harassment), nor does this policy exempt students from any criminal or other legal proceedings associated with the use of alcohol and/or drugs, other than as provided for under Pennsylvania's Medical Amnesty Law.

University Officials within the Office of Student Conduct will make the determination as to whether or not, based upon the totality of the circumstances, this Medical Amnesty Policy will be applied in each case.

Complicity

(a) Actively assisting in the commission of a violation; or (b) actively supporting or encouraging the violation.

Disruptive Conduct

Actions that are disorderly, unnecessarily disturb others, or are disruptive to the normal University activities, operations or functions.

Drugs

(a) Use, possession, constructive possession, sale, and/or use of controlled substances; (b) possession of drug paraphernalia; (c) possession of a significant quantity, manufacturing, distribution, or sale of any controlled substances; (d) driving or operating a vehicle under the influence; (e) administering any prescribed, controlled, or illegal substance to another person without their consent; (f) misuse of prescribed or controlled substances, except as expressly permitted by law and the University's Drug Policy.

• Commonwealth University of Pennsylvania Drug Policy

Failure to Comply

(a) Failure to follow the reasonable directive(s) of University officials made in the performance of their duties, including providing identification, (b) failure to comply with an Educational Outcome or condition issued in connection with a Student conduct action.

False Information

(a) Making, using, or possessing any falsified document or record; (b) knowingly making a false Report or providing false information in connection with a University inquiry or investigation; (c) altering or forging any University document or record, including identification, meal or access cards, and parking permits; or (d) other intentional misrepresentation to, or deception of, a University official.

Gambling

Engaging in any gambling activities except as authorized by state or federal law.

Harassment

Engaging in conduct with the intent to harass, annoy, or alarm another person. This provision is not intended to prohibit constitutionally protected activity. The following behaviors are examples of harassing conduct when engaged in with the requisite intent: following another person in a common or public space; repeated communication during extremely inconvenient hours or after the other person objects to further communication; and otherwise engaging in a course of conduct that serves no legitimate purpose. This includes, but is not limited to, conduct in person or delivered by direct or indirect means via notes, phone calls, and/or use of social media or other electronic media.

Hazing

Engaging in conduct by any individual or organization that is prohibited by the Anti-Hazing Law of Pennsylvania, and/or the University's Anti-Hazing Policy. A copy of the University's Anti-Hazing Policy can be found at:

• Commonwealth University of Pennsylvania Anti-Hazing Policy

Information Technology Policy

Engaging in conduct that violates the University's acceptable use policy, a copy of which can be found at:

• **Commonwealth University of Pennsylvania Acceptable Use Policy**

Law

Conduct resulting in: (a) evidence of violation of local, state or federal criminal laws as substantiated through the University/College's conduct process; or (b) disposition of local, state or federal criminal charges that have resulted in a finding of guilt, regardless of whether the finding is the result of a guilty plea, no contest (also known as nolo contendere) plea or finding of guilt at trial.

Misuse of University Brand

Unauthorized use of the University name, logo, insignia, trademarks or other protected marks of the University.

Physical Harm

Intentionally or recklessly engaging in conduct that causes physical harm or that creates a substantial risk of harm to the health or safety of another person.

Residence Life Policies

Engaging in conduct that violates the University's residence life agreement, addendums and policies, which can be found at:

• Bloomsburg University Residence Life Policy

• Lock Haven University Residence Life Policy

• Mansfield University Residence Life Policy

Retaliation

Any action, directly or through others, including but not limited to, intimidation, threats, coercion, or discrimination, which is engaged in for the purpose of

interfering with any right or privilege secured by Title IX of the Education Amendments of 1972 or its implementing regulations; or because the individual has made a Report or Referral, testified, assisted, or participated or refused to participate in any manner in an investigation, proceeding or hearing regarding an incident of alleged misconduct, including sexual misconduct. A finding of responsibility for retaliation is not dependent on a finding that the underlying misconduct occurred.

Safety

Engaging in conduct that violates University fire and safety regulations, policies and rules. Prohibited conduct includes:

• setting intentional or unintentional unauthorized fires;

• blocking or obstructing University walkways, roadways, and paths of ingress/egress;

• use and/or possession of prohibited incendiary or combustible materials and devices (for example, candles, torches, vaping equipment, e-cigarettes);

• unauthorized use of electrical devices or chemical agents, regardless of whether such unauthorized use results in fire or damage to University or personal property;

• failure to evacuate when directed by an official, alarm, or other reasonable means

• creating any hazardous condition that endangers the health and safety of themselves or others;

• tampering or improper use of fire safety systems and equipment;

• tampering or improper use of other safety equipment (e.g., AEDs, Emergency Phones, First-Aid kits, opioid or other medication rescue materials) or devices (e.g., safety signage, door locks, etc.)

• initiating bomb threats or false reporting of a bomb, fire or other emergency.

Sexual Misconduct

The University prohibits all Sexual Misconduct violations, as defined below, and as set forth in the University's Sexual Misconduct Policy. This prohibited conduct can affect all genders, gender identities and sexual orientations. Some of these prohibited forms of conduct may also be crimes under Pennsylvania or federal law. Please refer to the University's Sexual Misconduct Policy for a full statement of definitions and procedures related to complaints of sexual misconduct.

Prohibited Conduct:

• **Dating Violence** – (as defined in the Violence Against Women Act (VAWA) amendments to the Clery Act) includes any violence committed by a person: (A) who is or has been in a social relationship of a romantic or intimate nature with the Complainant; and (B) where the existence of such a relationship shall be determined based on a consideration of the following factors: (i) the length of the relationship; (ii) the type of relationship; and (iii) the frequency of interaction between the persons involved in the relationship. Dating violence includes, but is not limited to, sexual or physical abuse or the threat of such abuse. Dating violence does not include acts covered under the definition of Domestic Violence. Dating Violence is categorized as Regulatory when it occurs in the United States, within an Education Program or Activity and when the Complainant is participating or seeking to participate in an Education Program or Activity at the time of the filing of the complaint. Otherwise, Dating Violence will be categorized as Non-Regulatory.

• **Domestic Violence** – (as defined in the VAWA amendments to the Clery Act), includes any violence committed by a current or former spouse or intimate partner of the Complainant, by a person with whom the Complainant shares a child in common, by a person who is cohabitating with or has cohabitated with the Complainant as a spouse or intimate partner, by a person similarly situated to a spouse of the Complainant under Pennsylvania's domestic or family violence laws or by any other person against an adult or youth Complainant who is protected from that person's acts under the domestic or family violence laws of Pennsylvania. Domestic Violence is categorized as Regulatory when it occurs in the United States, within an Education Program or Activity and when the Complainant is participating or seeking to participate in an Education Program or Activity at the time of the filing of the complaint. Otherwise, Domestic Violence will be categorized as Non-Regulatory.

• **Sexual Assault –** (As defined in the Clery Act) – This includes any sexual act directed against another person, without the consent of the Complainant, including instances where the Complainant is incapable of giving consent. Sexual Assault may be one of the following categories:

• **Sexual Penetration Without Consent** – Any penetration of the mouth, sex organs, or anus of another person, however slight by an object or

any part of the body, when consent is not present. This includes performing oral sex on another person when consent is not present. • **Sexual Contact Without Consent** – Knowingly touching or fondling a person's genitals, breasts, buttocks, or anus, or knowingly touching a person with one's own genitals or breasts, when consent is not present. This includes contact done directly or indirectly through clothing, bodily fluids, or with an object. It also includes causing or inducing a person, when consent is not present, to similarly touch or fondle oneself or someone else.

• **Statutory Sexual Assault** – The age of consent for sexual activity in Pennsylvania is 16. Minors under the age of 13 cannot consent to sexual activity. Minors aged 13-15 years old cannot consent to sexual activity with anyone who is 4 or more years older than they are at the time of the activity. Minors aged 16 years of age or older can legally consent to sexual activity, as long as the other person does not have authority over them as defined in Pennsylvania's institutional sexual assault statute[1]. Sexual Assault is categorized as Regulatory when it occurs in the United States, within an Education Program or Activity and when the Complainant is participating or seeking to participate in an Education Program or Activity at the time of the filing of the complaint. Otherwise, Sexual Assault will be categorized as Non-Regulatory.

• **Sexual Exploitation** – Engaging in sexual behaviors directed toward or involving another person or use of another person's sexuality for purposes of sexual gratification, financial gain, personal gain or personal advantage when consent is not present. This includes, but is not limited to, the following actions, including when they are done via electronic means, methods or devices: *Sexual voyeurism or permitting others to witness or observe the sexual or intimate activity of another person without that person's consent; Indecent exposure or inducing others to expose private or intimate parts of the body when consent is not present; Recording or distributing information, images or recordings of any person engaged in sexual or intimate activity in a private space without that person's consent; Prostituting another individual; Knowingly exposing another individual to a sexually transmitted disease or virus without that individual's knowledge; and Inducing incapacitation for the purpose of making another person*

vulnerable to non-consensual sexual activity. • **Regulatory Prohibited Conduct** – For purposes of this Policy, the term includes the defined violations of Regulatory Quid Pro Quo, Regulatory Hostile Environment Sexual Harassment, Regulatory Dating Violence, Regulatory Domestic Violence, Regulatory Sexual Assault and Regulatory Stalking. Regulatory Quid Pro Quo Sexual Harassment – An Employee conditioning the provision of aid, benefit or service of the University on an individual's participation in unwelcome sexual conduct.

• **Non-Regulatory Quid Pro Quo Sexual Harassment** – An official, volunteer or Student conditioning the provision of aid, benefit or service of the University on the individual's participation in unwelcome sexual conduct.

• **Regulatory Hostile Environment Sexual Harassment – Unwelcome conduc**t, on the basis of sex, that a reasonable person would determine is so severe, pervasive, and objectively offensive that it effectively denies a person equal access to the University's Education Program or Activity.

• **Non-Regulatory Hostile Environment Sexual Harassment** – Unwelcome conduct, on the basis of sex, that a reasonable person would determine is sufficiently severe, pervasive, and objectively offensive that it unreasonably interferes with, limits, or deprives an individual from participating in or benefitting from any educational, employment, social or residential program offered in connection with the University.

• **Stalking** – (as defined in the VAWA amendments to the Clery Act) means engaging in a course of conduct directed at a specific person that would cause a reasonable person to fear for their safety or the safety of others; or suffer substantial emotional distress. A course of conduct is when a person engages in two or more acts that include, but are not limited to, acts in which the person directly, indirectly, or through third parties, by any action, method, device, or means, follows, monitors, observes, surveys, threatens, or communicates to or about a person in a prohibited way, or interferes with a person's property. Stalking includes the concept of cyberstalking, in which electronic media such as the Internet, social networks, blogs, cell phones, texts, email or other similar devices or forms of contact are used to pursue, harass, or to make unwelcome contact with another person in an unsolicited

fashion. Stalking is categorized as Regulatory when it occurs in the United States, within an Education Program or Activity and when the Complainant is participating or seeking to participate in an Education Program or Activity at the time of the filing of the complaint. Otherwise, Stalking will be categorized as Non-Regulatory.

Theft

(a) The unauthorized possession, removal, and/or receipt of property without the express consent of the owner; or (b) the attempt to possess, remove or receive without the express consent of the owner.

Threat of Harm

Intentionally or recklessly engaging in physical, verbal or written conduct that creates a reasonable fear of infliction of physical pain or injury to another person or damage to property. This includes a single threat, or a course of conduct, regardless of whether such incidents are in person or conveyed through electronic means.

Unauthorized Access

Access, entry, presence, or use of buildings, rooms, property, and/or accounts (electronic or otherwise) without permission.

University Policy

Violation of any published University policy or rule (official University policies can be found at:

• **Commonwealth University of Pennsylvania Policies**

Vandalism

intentional, reckless and/or unauthorized damage, destruction or defacement of property of another, including University property.

Weapons

Violations include the following:

• The use, possession, and/or transportation of:

• fireworks;

• a paintball, air soft, and/or BB gun;

• explosives;

• any item designed and/or used in such a way to threaten, inflict bodily harm, and/or physical damage

• The unlawful or unauthorized use, possession, or transportation of (i) a firearm and/or (ii) firearm ammunition.

A copy of the University's rules regarding use, possession, and transportation of firearms on campus can be found at:

• Bloomsburg Firearms Policy

• Lock Haven Firearms Policy

• Mansfield Firearms Policy

Student Conduct Process (non-Sexual Misconduct Matters)

Refer to the University's Sexual Misconduct Policy for a statement of the processes and procedures associated with Reporting and adjudicating matters of sexual misconduct.

Overview

The University believes strongly in providing a fundamentally fair and impartial Student conduct process. To that end, the Referred Party will receive reasonably specific advanced written notice containing a description of the alleged violations of the Student Code of Conduct, including time, date, and place of occurrence and a description of the alleged prohibited conduct.

Reports of alleged sexual misconduct, including those involving a mixture of both non-sexual misconduct and sexual misconduct charges, will follow the process outlined in the Sexual Misconduct policy.

Note regarding matters involving a mixture of both non-sexual misconduct and sexual misconduct charges: If all of the alleged sexual misconduct violations are dismissed, and the remaining underlying allegations, if true, would violate the Student Code of Conduct, the matter may be referred for further action by the University's Office of Student Conduct, as appropriate.

Burden of Proof

The University bears the burden of establishing any charged violation of this Code. The Referred Party does not have the burden to prove that a violation did not occur. A Referred Party may decide not to participate in the hearing or an investigation. Neither of these decisions shifts the burden of proof away from the University.

Standard of Proof

The University is responsible for establishing any charged violation by a "preponderance of the evidence" standard. This means that the University must show that it is more likely than not that the Referred Party engaged in the charged violation of the Student Code of Conduct.

Use of Advisors

Parties are permitted to have an Advisor accompany them to any hearing or meeting that the party is required to attend. Each party is responsible for coordinating and scheduling with their choice of Advisor. The Advisor may be a member of the University Community, an attorney (retained at the Student's own expense), or another individual selected by the party.

In all conduct matters except those addressed through the Sexual Misconduct Policy processes,[1] the Advisor may not speak or participate directly in any aspect of the conduct process, but rather can only consult and interact privately with their Student. An Advisor may not be a party or potential witness in the matter.

While the University will consider information regarding Advisor schedules and availability, the scheduling of meetings and hearings throughout the Student conduct process is at the discretion of the University.

Submitting a Referral

While any individual may make a Report of an alleged violation of the Student Code of Conduct by a University Student or Student Organization, only a member of the University Community may submit a Referral to the Executive Director of Student Conduct or designee. Formal action under the student conduct process will occur only upon the submission of a Referral. In instances where a member of the University Community makes a Report of an

alleged violation of the Student Code of Conduct, but elects not to submit a Referral, the Executive Director of Student Conduct or designee will review the Report and may, as deemed appropriate, initiate a Referral. Similarly, in instances where a Referring Party cannot be identified or wishes not to participate, the University may, at its discretion, initiate a Referral against a Referred Party. If a Referring party remains anonymous, the University will be limited in response.

All Referrals must be in writing and should be submitted as soon as possible after the events on which the Referral is based. Referrals, other than those relating to alleged sexual misconduct, must be submitted to the Office of Student Conduct.

Referrals may be submitted electronically:

• Bloomsburg University Student Conduct Incident Report

• Mansfield University Student Conduct Incident Report

• Lock Haven University Student Conduct Incident Report

Referral Review

The Executive Director of Student Conduct or designee will review Referrals to determine if sufficient information is alleged to indicate that the Referred Party has engaged in behavior constituting a violation of the Student Code of Conduct.

If the Executive Director of Student Conduct or designee determines that sufficient information is alleged to indicate that a violation or violations occurred, the Referral will proceed and appropriate interim measures may be imposed. Should further investigation be required, additional information and evidence will be gathered prior to a determination.

If the Executive Director of Student Conduct or designee determines that no violation of the Student Code of Conduct is indicated, the Referral will be dismissed. There will be no appeal of this dismissal decision.

Evidence

Only evidence that is admitted during the Student Conduct Conference or hearing shall be considered in judging the matter.

The University is not bound by formal rules of evidence. Evidence or information that may not be admissible in a court of law may be admissible in a conduct hearing or as part of an investigation; however, hearsay evidence may not be used to establish a fact necessary to support a decision in a case. The Hearing Officer or the Chairperson of the University Conduct Board will decide what information is admissible as part of a hearing.

Court documents, including affidavits of probable cause, preliminary hearing transcripts, and other relevant court and public records, may be utilized at a Student conduct hearing given their inherent reliability, even when the person that prepared them is not available to testify or answer questions.

The Executive Director of Student Conduct or designee has discretion to control the methods of presentation of evidence or physical appearance of participants (e.g., remote presentation of evidence) in order to ensure orderly and efficient presentation of evidence and the integrity of the hearing process. A party wishing to request a modification relating to the hearing should do so prior to 48 hours of the scheduled hearing time.

Notice of Charges

Where the Executive Director of Student Conduct or designee determines that sufficient evidence exists to support a possible finding of responsibility for a violation of the Student Code, the Executive Director of Student Conduct or designee will issue a Notice of Charges to the Referred Party. Where the Referred Party is a Student Organization, the Notice will be directed to the identified officers or representatives of the organization.

The Notice will contain a description of the alleged violations of the Student Code of Conduct, including time, date, and place of occurrence and a description of the alleged prohibited conduct. The Notice will also include the date, time, and location of a meeting scheduled by the Office of Student Conduct or the Office of Residence Life to review the Notice of Charges and next steps in the conduct process. Alternatively, the Notice may request that the Referred Party contact the assigned Administrator to set up such a meeting.

Where the alleged acts of misconduct require investigation, issuance of the Notice may be deferred by the Executive Director of Student Conduct or designee pending completion of the investigation.

Investigation

Depending upon the complexity of the matter, the Executive Director of Student Conduct or designee may appoint an Investigator. The Investigator may recommend interim action to the Executive Director of Student Conduct or designee at any point in the investigation. All investigations will be completed promptly.

The Investigator will determine the best method and order of information gathering, which may include interviews with the Reporting Party, Referred Party, and any identified witnesses, as well as review of relevant documents or other evidence. Where a Referred Party fails or refuses to participate in the investigation process, the matter will proceed based upon evidence collected during the investigation process.

Student Organizations

In matters involving a Student Organization, the Investigator may require a group meeting or a series of individual meetings. Students who fail to appear for investigative interviews or who fail to cooperate in good faith during investigative interviews may be subject to action under the Student Code. Future recognition of the Student Organization may be assessed based on the Student members' cooperation.

Students' cell phones or similar electronic communication devices may be collected and/or use may be restricted during any investigative interview in order to ensure the integrity of the investigation; however, the cell phones will not be subject to search without Student permission or warrant.

The Student Conduct Conference

The Student Conduct Conference will be facilitated by a University/State System administrator designated by the Executive Director of Student Conduct or designee. Referred Students will be provided notice of the date, time, and location of the Student Conduct Conference, as scheduled by the Office of Student Conduct or the Office of Residence Life. Alternatively, it may be requested that the Referred Student contact the assigned Administrator to set up a Conference by an established deadline.

During the Student Conduct Conference, the Referred Party will receive additional information about the Student conduct process, including information relating to: resolution options available through the conduct process; the hearing process; and the range of potential Educational Outcomes for the charged violation(s).

The facilitating administrator will give the Referred Party the opportunity to:

• come to mutual resolution during the Conduct Conference, waiving the right to a Formal Hearing and the right to an appeal;

• request a hearing; or

• accept responsibility for the charge(s) but request further hearing on the Educational Outcomes. In this event, the statement of responsibility will be accepted and the matter will be referred for a hearing on the Educational Outcome only. There will be no appeal of the finding of responsibility. Where a hearing is held on the Educational Outcome only, and the matter involves a possible Educational Outcome of suspension or expulsion, the Educational Outcome hearing will be held before the University Conduct Board. All other Educational Outcome hearings will be held before a Hearing Officer.

If a Referred Party fails to attend the Student Conduct Conference, the matter will be scheduled for a hearing. A letter will be sent to the Referred Party informing them of the hearing date/time.

Scheduling the Hearing

The Executive Director of Student Conduct or designee will provide the parties with written notice of the hearing at least five (5) days in advance of the hearing. At the discretion of the Executive Director of Student Conduct or designee, any matters not involving possible Educational Outcomes of suspension or expulsion may be scheduled and heard informally before a Hearing Officer. Where the matter will be heard before a Hearing Officer, the hearing may be scheduled for an earlier date if the Referred Party agrees.

In matters where the Educational Outcomes may include suspension or expulsion, or in those matters where the Dean of Students/designee exercises discretion not to schedule the matter before a Hearing Officer, the matter will be scheduled as a formal hearing before the University Conduct Board.

The hearing notice will contain a statement of:

• the date, time, and place of the hearing;

• a statement of the date, time, place and alleged acts of misconduct;

• a statement of the specific charges pending against the Referred Party; and

• an identification of the Hearing Officer or University Conduct Board Members, as appropriate

While every effort will be made to schedule the hearing at a time convenient for all parties, final scheduling authority rests with the Executive Director of Student Conduct or designee. When multiple Referrals involving the same Student are received, each Referral will be considered separately in determining whether a conduct process should be initiated. Multiple charges against the same Referred Party will generally be investigated and adjudicated separately; however, at the discretion of the Executive Director of Student Conduct or designee, multiple charges may be investigated and adjudicated together under appropriate circumstances, which may include, but are not limited to, consent of the parties, similar or related conduct, and the administrative burden of considering the charges separately. The Executive Director of Student Conduct or designee also has the authority, when a matter involves more than one Referred Party, to hold a single hearing for all Referred Parties, or hold separate hearings for each Referred Party.

Hearing Procedures

If a Referred Party fails to attend the Hearing, the matter will be heard in their absence.

At the discretion of the Executive Director of Student Conduct or designee, any matters not involving possible Educational Outcomes of suspension or expulsion may be scheduled and heard informally before a Hearing Officer. Procedures for hearings before Hearing Officers are less formal; however, as set forth more fully below, the following provisions apply to both informal hearings before a Hearing Officer and formal hearings before the University Conduct Board.

Closed Hearings

All hearings are closed to the public. Hearings are open only to the parties identified by the University. Witnesses are not permitted to remain in the hearing room except as directed.

Hearing Attendance

The Referred Party and any identified parties with knowledge of the incident, are expected to appear at a hearing. However, in the event that a key witness or affected party fails to attend a Student conduct hearing, the Executive Director of Student Conduct or designee reserves the right to dismiss the matter, or to proceed with the hearing. If a Referred Party fails to appear, the hearing may be conducted in their absence. In extraordinary circumstances the Executive Director of Student Conduct or designee has sole discretion to reschedule the hearing.

The Referred Party has the right to challenge the designation of a Hearing Officer or University Conduct Board member for: personal bias; or prior involvement with parties or circumstances surrounding the matter. A challenge to a Hearing Officer or University Conduct Board member for cause must be presented to the Office of Student Conduct in writing at least two (2) days before the scheduled hearing. The party making the challenge must provide all facts supporting their challenge. A ruling on the challenge will be issued in advance of any hearing.

Witnesses

The Referred Party is required to notify the Office of Student Conduct of the names and contact information of their respective witnesses at least three (3) days prior to the scheduled hearing time. Character witnesses are not permitted.

The Referred Party is responsible for arranging for the attendance of their witnesses at the hearing.

Witnesses are only allowed in the hearing room during their period of testimony or when called to answer questions. The Hearing Officer or University Conduct Board reserves the option of limiting the number of witnesses providing statements at a hearing.

In matters of Student Organization misconduct, individuals who provide information as part of an investigation may remain confidential throughout the conduct process, provided their identities are known to the University and the investigator serves as a witness.

Hearing Outcomes

If a decision of "not responsible" is reached, the matter is closed with no right of appeal.

If a decision of "responsible" is reached, the Hearing Officer or University Conduct Board will make a recommendation to the Executive Director of Student Conduct or designee of Educational Outcomes based upon the nature of the code of conduct violation. Past violations of the Student Code of Conduct will be factored into the determination of the Educational Outcomes after a decision of responsibility has been reached. Previous conduct will not be considered in establishing whether a Referred Party is "responsible" or "not responsible" of the current charges.

A written decision will be issued, setting forth the findings on the charge(s) and the Educational Outcomes imposed. Absent extenuating circumstances, the written decision will be issued as expeditiously as possible but in no event later than thirty (30) days after conclusion of the hearing. The determination letter will include factual findings and rationale for the decision, and present a complete description of the educational outcomes, if any. Appeal criteria and procedures will be outlined as well.

All hearings before the University Conduct Board are recorded. Hearings before the Hearing Officer may be recorded at the discretion of the Hearing Officer. Where audio or video recording is not made, a written summary of the hearing will be made. Any additional video, audio, stenographic, or photographic recording of any hearing is prohibited.

Educational Outcomes

Educational Outcomes are utilized to help Students and Student Organizations develop more productive patterns of behavior, to support the integrity of the academic mission, and to protect the members of the University Community.

Stipulations may be attached to all Educational Outcomes as deemed appropriate in the interest of supporting the principles outlined above. The Executive Director of Student Conduct or designee, has final authority in determining completion of assigned stipulations. Registration holds may be

placed pending receipt of required evidence of completion of assigned stipulations.

Individual Student Educational Outcomes

Disciplinary Warning: Official notice that specific behavior or activity was in violation of the conduct code and that further violations may result in more serious disciplinary action. Students receiving a Disciplinary Warning remain in good disciplinary standing.

Disciplinary Probation: Official notification of a specified period of review and monitoring. Further violations of the conduct code may result in more severe disciplinary action, including an examination of continued status as a Student. Students on Disciplinary Probation are not in good disciplinary standing.

Final Disciplinary Probation: Final Disciplinary Probation is imposed only in very serious cases or in response to progressive discipline stipulating that a Student, in lieu of University suspension, is being allowed to remain at the University provided that the Student adheres to certain conditions, as set by the Board or Hearing Officer. A Student on Final Disciplinary Probation is denied the privilege to represent the University in any organized capacity including intercollegiate varsity, non-varsity or club events or to hold office in any Student Organization. Students on Final Disciplinary Probation are not in good disciplinary standing.

Suspension: Official notification involving a disciplinary separation from the University for a specified period generally not less than one semester and generally not exceeding two years. Suspension involves denial of all affiliated privileges and rights, including the privilege of using University facilities. A Student may not attend classes or be enrolled in online or distance education, take exams, earn grades, attending University activities or be on University property except for University business during the suspension period. University business must be approved in advance by the Executive Director of Student Conduct or designee.

Further violations of the conduct code may result in more severe disciplinary action, including an examination of continued status as a Student. Students on Suspension are not in good disciplinary standing. All stipulated conditions shall be completed before re-enrollment.

Expulsion: Official notification of permanent separation and termination of the Referred Party's status as a Student, and exclusion from University property, privileges, and activities. Students on Expulsion are not in good disciplinary standing.

Individual Student Stipulations

Restitution: Reimbursement for damage to, or destruction of, University property.

Housing Reassignment: Movement from a current residential assignment to another location in campus housing. Housing rates may be impacted.

Housing Removal: Removal from campus housing for a specified period of time. Access to campus housing including visitation is prohibited. Should circumstances warrant, housing removal could be permanent. In accordance with Residence Life policy, in such instances there will be no refund of housing fees.

Alcohol/Other Drug Education: Completion of an assigned substance education program as directed. A fee may be charged for the service component.

Restriction of Privileges: Exclusion from, or limits on, participation in specified services and activities or specified campus facilities. Prohibition of participation in campus co-curricular activities or use of campus services, e.g., intramural participation, room reservation privileges, leadership

Educational Activities: Completion of a specified activity, service project, educational program, event, assignment, papers, meetings or other educational and/or restorative assignment.

Fees: Students found responsible for student conduct violations with assigned Educational Outcomes, such as educational modules, consultations, workshops or other programs are required to pay preset fees to cover the cost of that programming. Those fees will be applied to the individual's student account as follows:

• $25 – assigned Judicial Educator module(s).

• $50 – assigned consultations, such as BASICS/CASICS workshops and other programs.

Fines: Fines are applied in the following instances:

• $75 – Failure to Comply with assigned educational outcomes.

• $100 – Findings of responsibility for fire safety violations within campus residence halls, including tampering with or improper use of fire safety systems and equipment. This fine is in addition to any assigned Educational Outcomes.

No Contact Directive: Official written expectations issued by a University administrator restricting or prohibiting contact between individuals, and may also include other restrictions.

Student Organization Educational Outcomes

Organization Disciplinary Warning: Official notice that specific behavior or activity was in violation of the conduct code and that further violations may result in more serious disciplinary action. It is intended to communicate or remind the organization of its responsibility to the University Community.

Organization Disciplinary Probation: Organization Disciplinary Probation is a period of time during which the group must demonstrate the ability to comply with University rules, regulations, and other requirements as stipulated by the Educational Outcome. During this time, the organization may be required to complete an educational component or service project. A Student Organization will remain on probation through the date indicated or until the date all assigned Educational Outcomes have been completed, whichever occurs later. Educational outcomes that restrict privileges may also be imposed.

Organization Final Disciplinary Probation: A final probation status means that any violation of the Code of Conduct by the organization, during this time, may result in the organization's immediate suspension. A Student Organization will remain on Final Probation at least through the date indicated or until the date all assigned educational outcomes have been completed, whichever occurs later.

Organization Disciplinary Suspension: A suspended Student Organization loses all rights and privileges associated with being a recognized Student Organization, must cease any organizational activity or function, and is prohibited from engaging in any organizational activity or function until the suspension is completed.

Disciplinary Organization Disestablishment: The organization loses its formal campus recognition and is permanently prohibited from conducting any and all group activity on- or off-campus. All events must be canceled immediately.

Student Organization Stipulations

Educational Activity: The required participation by the organization in specified group activity, service projects, educational programs, or other assignments.

Restriction of Privileges or Activities: The loss of the use of services or privileges as a Student Organization or the loss of the privilege to participate in an activity or event for a specified period of time.

Note: Examples of privileges that can be lost include, but are not limited to: recruitment freeze, suspension of the Student Organization's funds, suspension of access to the organization's web space, suspension of the ability to reserve rooms on campus, suspension of the ability to apply for Student activity fee funding, suspension of fund-raising activities, suspension of access to office space, and others.

Membership Review: The organization is required to review and affirm each person's commitment to the expectations of organization membership. This may involve one-on-one interviews with each member and a member of the national or international staff, and/or a University Advisor or administrator.

Member Intake and Recruitment Review: The organization is required to submit a plan on how it will emphasize values during the intake process. The plan should include details of the expected date and time of activities, goals, participant learning outcomes, and the event assessments.

Organization Restitution: Reimbursement for actual damage to or destruction of property, including that of the University.

Interim Measures

Interim measures are temporary steps taken by the University through the Office of Student Conduct in an effort to maintain the safety of the campus community and an environment conductive for academic success. Interim measures do not replace the regular conduct process, which shall proceed on

the normal schedule. Once a final decision has been made on a Student conduct matter, the interim measure will be lifted. Interim measures may include, but are not limited to, administrative directives, a loss of privilege/s, a residence hall room reassignment, or restriction from parts of campus. The Executive Director of Student Conduct or designee, as designated by the University President, may approve or institute the following interim actions without a prior hearing:

Interim No Contact Order

A written directive issued by a University administrator restricting or prohibiting contact between individuals, and may also include other restrictions. An Interim No Contact Order is not an indication of responsibility for a violation of University policy; rather, it is intended to protect any Student or other individual in the University Community. The Interim No Contact Order remains in effect until a determined date, or pending the outcome of the student conduct process.

Interim Removal from University Housing

A Student who is notified of an interim removal from University housing must immediately relocate from on-campus housing to an off-campus location. The Student is prohibited from entering/visiting any campus residence hall or apartment during the interim removal period. The Student may attend classes and University activities.

Interim Student Organization Restriction/s

The organization is prohibited from conducting any activities, events, meetings or social functions. Participation in university organizations or holding office in organizations or other privileges can also be included under this Educational Outcome as deemed appropriate by the hearing officer or board based on the incident.

Interim Student Organization Suspension

A written directive issued to recognized Student organizations directing the group to cease all operations. The organization may not conduct business, hold meetings, host events, attend events as a group, or continue with any philanthropic activities until further notice. Any requests for exceptions must be communicated to the Office of Student Conduct. A letter from the

organization's National Headquarters, if the group is associated, must also accompany the request for exception.

Interim Suspension

This measure is taken if it is determined the Student's continued presence constitutes an immediate threat of harm or safety to other Students, university personnel or university property.

Interim Suspension from the University

A Student who is notified of an interim suspension must immediately leave University property. The Student may not return to campus or participate in any university programs or activities, including classes, during the interim suspension period.

Interim Suspension Review Process

A Student issued an interim suspension will be afforded a hearing on the interim suspension within fourteen (14) days. If extenuating circumstances warrant an extension of the review, it will be communicated to the Student.

The purpose of the hearing is to review the interim suspension only. The University Conduct Board will determine if Student's continued presence constitutes an immediate threat of harm to other Students, University personnel or to University property. If it is determined that continuation of the interim suspension is not warranted, the Student will be reinstated immediately. The reversal of an interim suspension shall not be construed as finding a Student "not responsible" of underlying alleged violations of the Code of Conduct. The hearing on the interim actions will not address the underlying misconduct. A hearing will be scheduled to address the violations.

Appeals

In matters reviewed under the Sexual Misconduct Policy, please refer to the processes and procedures set forth in that Policy for appeals.

All appeals must be submitted in writing no later than five (5) days after the date noted on the outcome letter. Appeals must be submitted via the online Student Conduct Outcome Appeal form.

- Bloomsburg University Student Conduct Outcome Appeal
- Mansfield University Student Conduct Outcome Appeal
- Lock Haven University Student Conduct Outcome Appeal

The original Educational Outcomes and stipulations will be stayed pending a decision on the appeal. However, the Executive Director of Student Conduct may, under extenuating circumstances, continue the Educational Outcomes imposed while an appeal is in process.

In cases of Organization Disciplinary Suspension or Organization Disciplinary Expulsion, the appeals by groups who are affiliated with a national or international organization must be accompanied by a letter of support for the appeal.

An appeal may be sought on the following grounds:

1) A procedural irregularity under the University policy or procedures that affected the hearing outcome. **2)** New evidence that was not reasonably available through the exercise of reasonable diligence at the time of the hearing that could affect the outcome of the matter. **3)** The University Conduct Board Member/Hearing Officer(s) had a conflict of interest or bias for or against an individual party that affected the outcome of the matter.

The appealing party must set forth the grounds for the appeal, and include any supporting documentation. If the grounds for an appeal asserts a procedural irregularity, existence of new evidence, or conflict of interest/bias, the appealing party bears the burden of establishing by a preponderance of evidence that the outcome of the matter was affected.

The University allows one level of appeal review. No further appeals are permitted.

Appeal of hearing decisions will be submitted to the Executive Director of Student Conduct or designee. The appeal will be forwarded in a timely manner to the appropriate person for review.

The appeal will be reviewed to determine if the merits of the stated basis for appeal are met. If the appeal grounds have been met, all related documentation and evidence will be reviewed within the scope of the appeal.

The role of the University Appeals Officer is not to reweigh the evidence. The Appeals Officer will confine their review to the basis of appeal alleged and may modify the Educational Outcome or stipulations or in the event of new information, remand back to the original hearing board to reweigh the new evidence.

After review, the Appeals Officer shall inform the appealing party in writing of one of the following determinations:

• Uphold the original decision;

• Affirm or modify the imposed Educational Outcome;

• Overrule the original decision and modify the outcome or dismiss the case based solely on the submissions of the appeal; or

• Overrule the original decision and remand the case back to the board or hearing officer of original jurisdiction for rehearing to correct a procedural or factual defect.

Decisions on the appeal will be issued within thirty (30) days, absent extenuating circumstances,

Disclosure of Discipline Records & Records Retention

Disclosure of Disciplinary Records

All Students' disciplinary records are kept in accordance with the Family Educational Rights and Privacy Act (FERPA) of 1974 (the "Buckley Amendment"), 20 U.S.C. 1232g. In accordance with these provisions, all disciplinary files are confidential and may only be disclosed:

• To the Student;

• To a person or agency possessing a signed consent from the Student authorizing the release to the designated person/agency. Signed consents must meet the requirements of FERPA. Consent forms are available at the University Registrar's Office.

• Records may also be disclosed to the following individuals without consent of the Student: o To the parents of a dependent Student (as defined by the Internal Revenue Service);

o To the parents or guardians of a Student under the age of 21 who has been found responsible, or accepted responsibility for an alcohol or drug violation. In such instances, the parents/guardians may be notified of the violation(s).

o To a court official, agency, or other designated individual in order to comply with a subpoena or court order served upon the University. When served with a subpoena or court order, the University will notify the Student in writing that it is complying with the court order.

o To a requesting individual where the Student has been found responsible, or accepted responsibility, under the Student Code of Conduct for a violation relating to a crime of violence or a non-forcible sex offense, as provided in FERPA (34 C.F.R. § 99.39).[1] In such instances, only the final results (the name of the Student, the violation committed, the Educational Outcome imposed, date of decision and duration of Educational Outcome) will be disclosed. The names of other Students, including any Reporting or complaining Student and witnesses, will not be disclosed without the consent of the Referred Party Student.

o To the victim of a Referred Party alleged to have committed a crime of violence or non-forcible sex offense. In such instances, a finding of responsibility is not required; however, the University will disclose only the final results (the name of the Student, the violation committed, the Educational Outcome imposed, date of decision and duration of Educational Outcome) of the disciplinary proceeding.

o To others within the University with a legitimate need to know and for compliance with other University policies and Reports.

Consistent with the University Sexual Misconduct Policy, the University will disclose the outcome of a disciplinary proceeding alleging sexual misconduct to both the Complainant and the Respondent. The University may also disclose the results of a disciplinary proceeding brought against the alleged perpetrator to the alleged complainant of any crime of violence, as that term is defined in 18 U.S.C. 16.

The release of records relating to the Student Organization Discipline Process will be managed by the Office of Student Conduct. There may be times when it is appropriate or necessary to release the interim status or outcome of a particular conduct meeting/hearing to those both within and outside of the University. Those types of decisions will be made on a case-by-case basis. FERPA requires the confidentiality of individual Student records.

Records Retention

The University maintains disciplinary records of Students. These records are maintained separately from the Student's official academic records. The University shall retain academic integrity violations and all other discipline records for seven years after incident. All records related to Student Organization conduct will be kept in the Student Organization's official file indefinitely and the organizational outcomes may be shared or published at the University's discretion. Records involving suspensions and expulsions are kept indefinitely.

PRP 4650 - HAZING POLICY

Issued by: Dione Somerville, Vice President for Student Life
Notes: Reviewed by the Student Life Standing Committee 10/17/97; Reviewed by Student Life Standing Committee 4/2/2019, Interim Policy by VP for Student Affairs on 4/24/2019, Approved by Forum 9/25/2019
Effective: 9/25/2019

Introduction

The most damaging instrument to student groups and organizations (social, honor, service, athletic, fraternity, sorority, music) is hazing. This counterproductive and hazardous act has no rightful place in any student group or organization.

Hazing at Bloomsburg University is strictly prohibited and will not be tolerated. Hazing risks human lives, brutalizes everyone involved, and jeopardizes the very existence of student groups and organizations on the Bloomsburg University campus.

Definition

Hazing – Bloomsburg University defines hazing as intentionally, knowingly or recklessly, for the purpose of initiating, admitting, or affiliating an individual into or with an organization, or for the purpose of continuing or enhancing an individual's membership or status in an organization, causing, coercing or forcing an individual to do any of the following:

1. Consume any food, drink, liquid, alcoholic liquid, drug, or other substance which subjects the individual to a risk of emotional or physical harm.
2. Endure any brutality or act of a physical nature, which may include but is not limited to whipping, beating, branding, paddling, kicking, pushing, shoving, tackling, calisthenics, or exposure to the elements.
3. Endure brutality or act of a mental nature, which may include but is not limited to activity adversely affecting the mental health, or dignity of the individual, sleep deprivation, exclusion from social contact, or conduct which could result in extreme embarrassment or degradation.
4. Any activity which has the potential to be frightening, morally compromising, degrading, and/or unduly deceptive, including deception designed to convince the individual of impeding pain, injury, or non-initiation including but not limited to promoting servitude, berating or verbally harassing individuals, throwing items at or on individuals, forcing individuals to carry items or wear apparel which is undignified, requiring public stunts such as forcing individuals to yell when entering or departing a physical structure or in the presence of designated individuals, forcing individuals to use designated entrances or exits, requiring individuals to run personal errands, intentionally creating labor or clean-up work, and requiring individuals to wear scant clothing or to be nude.
5. Endure brutality or an act of a sexual nature.
6. Any activity which endangers or has the potential to endanger the academic performance of the individual, such as not allowing adequate time for, or interfering with academic commitments; activities conducted between the hours of midnight and 8:00 a.m., and forced exclusion from social or verbal contact with any other individual.
7. Any destruction or removal of public or private property.
8. Any violation of federal, state, or local law or rule or University policy.

Organization – The term organization in this policy refers to organizations, both sponsored and unsponsored by the University, including but not limited to chapters, teams, clubs, colonies, units, or groups of students, alumni, or advisors, or other persons associated with the University.

Recognized Organization – A "recognized organization" is one that has fulfilled all of the registration requirements set forth by the Community Government Association (CGA) and is fully recognized by the University, CGA, the Committee on Student Organizations, and the Community Activities Office.

Sponsored Organization – A "sponsored organization" is defined as any organization that receives human, financial, and/or material support, guidance, or benefit from the University or its affiliates.

Presumptions

1. New member-related activities by nature must reflect the best interests of the new members, members of the organization, the University, and the Bloomsburg community.
2. Training and education that have clear objectives and relevance to the tasks and responsibilities of an organization's members are not considered hazing.
3. Hazing shall not include reasonable and customary athletic, law enforcement or military training, contests, competitions, or events.
4. All University students, employees, advisors, and organizations are responsible for abiding by this policy, both on campus and off campus, including privately-owned facilities or property.
5. Organizations are responsible for any activity in violation of this policy by any individual or group associated with the organization, unless it is proven that the group or individual activity was independent of, and occurred without the knowledge or consent of the organization. Such responsibility will apply equally to situations in which one or more individuals associated with the organization know or should have known of the activity and failed to make every reasonable attempt to prevent or stop it.
6. The filing of charges at Bloomsburg University against an organization does not preclude the filing of charges at the University against an individual student or the filing of civil or criminal charges against the organization or individual.

Implementation

1. The leader(s), which may be either elected officer(s) or designated leader(s) within an organization, are responsible for informing individuals associated with the organization of this policy. This policy should be clearly communicated by the leader(s) to the membership at the first meeting of the organization each semester and to the new members prior to the commencement of the first new member activity.
2. Organizations must submit a completed Anti-Hazing Compliance Agreement to the Center for Leadership and Engagement within seven days of the commencement of fall semester classes or before beginning any organization related activities, whichever comes first, and at the election or appointment of new officers or leaders, to certify acknowledgement of all conditions of this policy. Failure to submit the completed form within the deadline will result in interim suspension of recognition until the completed form is received.
3. Wherever possible all organizations should strive not to interfere with the academic success with their participants and therefore care should be taken not to interfere with student academic requirements and conclude activities which are non-academic in nature at least seven days prior to the first day of the final examination period each semester and remain discontinued through the end of the final examination period. All non-academic initiation must occur during the fall and spring semesters while classes are in session.
4. The University shall provide a copy of this policy, including the University's rules, penalties, and program of enforcement to each organization. The University shall ensure that students are informed of this policy, including the rules, penalties, and program of enforcement.

Jurisdiction and Procedures

1. Charges of violations of this policy by an organization should be referred to the Office of the Dean of Students for investigation and adjudication.
   a. In all cases of alleged violations of this policy, the organization advisor, University department/associate, and general headquarters of the organization (when applicable) will be notified.
   b. During the period of formal investigation or adjudication of alleged violations of this policy, all new member-related activities, organization activities, and University recognition or sponsorship of the organization may be placed on interim suspension.
2. Charges of violations of this policy by a student should be referred to the Office of the Dean of Students for investigation and adjudication conducted in accordance with the Student Code of Conduct and Judicial Process.
3. The University, organizations, and individuals may also be criminally charged under applicable laws.

Filing Complaints

The following groups or individuals may lodge a complaint in regard to this policy:

- Any student organization as a group.
- Any individual member of a student organization.
- Any pledge/associate member of a student organization.
- Any probationary student organization as a group.
- Any probationary member.
- Advisor of a student organization.
- Alumni of a student organization.
- Any individual affiliated with the university.

Sanctions

1. Possible sanctions include but are not limited to:
   a. Educational Sanctions – Educational sanctions typically include one or more of the following: program, workshop, personal development workshops, community service, behavioral contract, administrative referral, and other related educational assignments. These sanctions are designed to promote self-awareness of behavior, awareness of appropriate/inappropriate behavior, awareness of institutional expectations, and to educate the organization in the specific area of their violation.
   b. Written Warning – A written reprimand noting that a policy violation occurred emphasizing that further violations would result in progressive sanctioning. An organization may also be issued a written warning in unique circumstances when a policy violation has not been formally proven, but questionable conduct has occurred. An organization receiving a written warning shall continue to exercise the rights and privileges of an organization in good standing.
   c. Organizational Probation Level One – An imposed probationary status, noting that a policy violation occurred, thus rendering an organization not in good disciplinary standing with Bloomsburg University. Further violations could result in progressive sanctioning, suspension or revocation of University recognition. Additional stipulations may be imposed that are consistent with the nature of the offense.
   d. Organizational Probation Level Two – An imposed probationary status, noting that a policy violation occurred specific to a progressive or more serious violation. Thus, rendering an organization not in good disciplinary standing with Bloomsburg University. Further violations could result in progressive sanctioning, suspension or revocation of University recognition. Additional stipulations may be imposed that are consistent with the nature of the offense.
   e. Suspension in Abeyance – The highest probationary status rendering an organization not in good disciplinary standing with Bloomsburg University. Further violations will most likely result in suspension or revocation of University recognition. Additional stipulations may be imposed that are consistent with the nature of the offense. This is an organization's last opportunity to make serious changes in behaviors in order to remain a recognized organization at Bloomsburg University.
   f. Suspension of University Recognition – Suspension of recognition is an organization's immediate loss of all rights and privileges associated with University recognition, complete suspension of all organizational activities, and may include conditions for reinstatement of recognition. The organization will be notified that the University no longer recognizes them for a specified period. An organization that violates the terms of the suspension may be subject to permanent revocation of recognition.
   g. Revocation of University Recognition – Revocation of recognition includes an organization's permanent loss of University recognition. Organizations that violate policies and regulations or the terms of any previous disciplinary action are subject to permanent loss of recognition.

2. Any reasonable sanction(s) may be imposed by the Office of the Dean of Students at the conclusion of an adjudicative process. Additional sanctions not listed above may be imposed, if reasonable, upon the approval of the Dean of Students.
3. In order to determine appropriate sanction(s), mitigating or aggravating circumstances may be considered.

University Antihazing Program

The University will maintain an Antihazing Program within the Office of the Dean of Students for purposes of ensuring the University's rules, penalties, annual reporting, organizational training, antihazing policy dissemination and posting.

The University will maintain records of hazing allegations, violations, and adjudication within the Office of the Dean of Students for a minimum of five years.

Please Note:

Any student who participates in hazing is subject to the Student Code of Conduct and may be suspended or expelled from the University. Hazing is a criminal offense. Any student who participates in hazing may be arrested and prosecuted. Convictions may result in applicable penalty under the Pennsylvania Crimes Code.

REFUND POLICY AND PROCEDURE

PA State System of Higher Education

Board of Governors

Effective: Fall Semester 2009

POLICY 1983-19-A: REFUND OF TUITION AND FEES

See Also: Adopted: June 20, 1983

Amended: October 18, 1990; January 21, 1993; July 20, 1995; July 13, 2000; and January 10, 2008.

A. Policy

Each university shall establish a refund policy in accordance with Board policy.

1. Advance deposits credited toward the basic fee (tuition) and the technology tuition fee shall be non-refundable. Other amounts paid and credited toward the basic fee shall be refundable in full for students who withdraw for approved reasons prior to the first class day.

2. Students who reduce their credit hour load after the end of the drop period so as to qualify for billing as part-time students shall not be eligible for a refund of the amount paid which exceeds the part-time rate. After the drop period, refunds for the basic fee shall be made only for full semester withdrawal.

B. Procedure

1. The refunds for tuition (the basic fee) will be based on the following schedule for all university sessions, including summer and winter sessions, adjusted to the nearest whole number of days.

REFUND PERIOD (% OF ENROLLMENT PERIOD COMPLETED)	REFUND PERCENTAGE	DURATION (ILLUSTRATION OF ESTIMATED WEEKS IN TYPICAL SEMESTER)
0-8.50%	100%	Through "drop period"
8.51-12.50%	80%	Through week 2
12.51-19.44%	60%	Through week 3
19.45-26.39%	50%	Through week 4
26.40-33.33%	40%	Through week 5
Greater than 33.33%	0%	

2. Each university is responsible for notifying all students of its refund policy.

3. Full-time students who are concurrently enrolled in both the regular session and late-starting sessions will be treated as regular session students for the purposes of this policy. If the student drops a late-starting course prior to the beginning of the course, refund for the course will be provided in accordance with the university's registration policy.

4. Full refund of tuition shall be granted to students of State System universities who are military reservists or members of the National Guard and are ordered to active military service by the President of the United States or the Governor of the Commonwealth of Pennsylvania.

5. University refund policies shall address the refund of university-based mandatory student fees. If university policies require the refund of mandatory student fees, the refund will be determined by the tuition refund schedule.

6. Refunds on student activity fees shall be within those regulations and procedures established by the student organization, as approved by the president. All approved student activity fee refunds will be determined by the tuition refund schedule.

7. Each president may approve refunds of amounts paid and credited toward room and board, special fees, and other fees, in accordance with the university's refund policy. If special and other fees are to be refunded, the refund will be determined by the tuition refund schedule.

8. A student is eligible for consideration for a refund for any reason approved by the president or his/her designee.

C. Effective Date

Fall Semester 2009.

Commonwealth University's mandatory fees will follow the PASSHE tuition and fees refund policy #1983-19-A listed above. Refunds will only be granted for a full withdrawal. No refunds will be granted if a student drops from full time to part time after the drop/add period.

Students are responsible for all tuition and fees due to the institution and for meeting their financial aid requirements. Please contact the Financial Aid Office and/or the Student Billing Office for information concerning the ramifications of your withdrawal.

PRP 2550 - ACCEPTABLE USE OF TECHNOLOGY POLICY

Issued by: Dr. Richard H. Rugen, Vice President for Administration and Finance
Effective Date: April 21, 2010

Purpose:

This policy addresses the use of university issued/owned information technology resources.

Bloomsburg University provides numerous information technology resources for use by the university's students, faculty and staff. The term Information technology resources includes, but is not limited to, all university computing equipment, personal data assistants, cellular phones, storage devices and any electronic device issued by the university and intended for business purposes, as well as software, systems and networks. These resources are provided to support the university's mission and institutional goals. The use of these systems is a privilege and all users are expected to act responsibly and to follow the university's policies and any applicable local, state and federal laws (e.g. copyright, criminal use of communication device, harassment, etc.) related to the use of these resources.

Scope:

This policy applies to all users including faculty, staff, students, contractors and guest users of the Bloomsburg University computer network resources, equipment, or connecting resources. Use of the university's information technology resources signifies agreement to comply with this policy.

While the university recognizes the role of privacy in an institution of higher learning and every attempt will be made to honor that ideal, there should be no expectation of privacy of information stored on or sent through university-owned information technology, except as required by state or federal law. For example, the university may be required to provide information stored in its information technology resources to someone other than the user as a result of court order, investigatory process, or in response to a request authorized under Pennsylvania's Right-to-Know statute (65 P.S. §67.101 et seq.). Information stored by the University may also be viewed by technical staff working to resolve technical issues.

This policy is subject to the terms and conditions of the various collective bargaining agreements that apply to faculty and staff.

Policy:

A. Acceptable Use Of Information Technology Resources

Responsibilities of User of University Information Technology Resources:

1. Respect the intellectual property rights of authors, contributors and publishers in all media;
2. Protect user identification, password, information and system from unauthorized use;
3. Report lost or stolen devices, including devices that contain private or university information to IT within 24 hours of discovery of the loss;
4. Adhere to the terms of software licenses and other contracts. Persons loading software on any University computer must adhere to all licensing requirements for the software. Except where allowed by the university site licenses, copying software licensed for university use for personal use is a violation of this policy;

   Adherence to all other applicable university policies and/or terms of any collective bargaining agreement;

   To use the university information technology resources in a manner that complies with State and Federal law.

B. Prohibited Uses of University Information Technology Resources:

1. Providing false or misleading information to obtain a university computing account, or hiding or disguising one's identity to avoid responsibility for behavior in the use of information technologies;

   Unauthorized use of another user's account;

Attempting to gain or gaining unauthorized access to university information technology resources, or to the files of another;

Performing any act(s) that impede the normal operation of or interfere with the proper functioning of university information technology resources;

Interfering with the security mechanisms or integrity of the university's information technology resources;

Use of the university information technology resources to transmit abusive, threatening, or harassing material, chain letters, spam, or other communications prohibited by state or federal law;

Copyright infringement, including illegal file sharing of video, audio, software of data;

Excessive use that overburdens the information technology resources to the exclusion of other users;

Excessive or prohibited personal use by employees;

Use of the university information technology resources for personal profit, commercial reasons, non-university fundraising, political campaigns or any illegal purpose;

The prohibition against using university information technology resources for personal profit does not apply to:
i. Scholarly activities, including the writing of textbooks or preparation of other teaching material by faculty members; or
ii. Other activities that relate to the faculty member's professional development.
iii. Other activities as approved by the University President

Non-authorized solicitations on behalf of individuals, groups, or organizations are prohibited;

Intentionally or knowingly installing, executing, providing to another, a program or file, on any of the university's information technology resources that could result in the damage to any file, system, or network. This includes, but is not limited to computer viruses, Trojan horses, worms, spyware or other malicious program(s) or file(s).

Enforcement:

A university employee or student who violates this policy risks a range of sanctions imposed by relevant university disciplinary processes, ranging from denial of access to any or all information technology resources up to and including termination (for an employee) or dismissal (for a student). He or she also risks referral for prosecution under applicable local, state or federal laws.

Study Abroad Description

Commonwealth University's offers year-long exchange programs that are “bed for bed” exchanges and some full exchange programs. For "bed to bed" exchanges, students from CU pay tuition and fees at CU and pay room and board at our partner institution. In the case of full exchange, students will pay everything to Commonwealth University (tuition, fees, housing, and meals) and be offered everything at the host university.

CU has about 20 partners around the world including University of New England, Australia; Chungnam National University -South Korea; Loyola University-Spain; University of St. Mark and St. John-England; IHECS-Belgium; and others.

Commonwealth University also offers short-term faculty led programs in the summer, spring break, and winter intersession. Destinations include Jamaica, Belize, England, and Italy. Course availability varies by year.

Additional affiliate programs and internships are available in numerous countries through third-party providers.

PRP3234 Distance Education

PRP 3234 - EXPEDITED APPROVAL FOR DISTANCE EDUCATION OPTION FOR EXISTING COURSES

ISSUED BY: Dr. Diana Rogers-Adkinson, Academic Affairs
NOTES: Presented to Forum 11/18/20
Effective Date: 11/30/20

1. RATIONALE FOR POLICY

In light of current and anticipated future demand for greater flexibility in course delivery, and in light of the call for expedited approval in Article 41.E in the 2019-2023 Collective Bargaining Agreement between the Pennsylvania State System of Higher Education (PASSHE) and the Association of Pennsylvania State College and University Faculty (APSCUF), this policy allows for expedited approval of existing courses at Bloomsburg University.

2. KEYWORDS/DEFINITIONS

Definition of Distance Education: **Distance Education** is an educational process in which the instruction occurs with the instructor and student in different locations. Distance Education makes use of one or more technologies to deliver 80% or more of the instruction for the course to students who are separated from the instructor and to support interaction between the students and the instructor synchronously or asynchronously.

3. BACKGROUND INFORMATION

Courses which are current in terms of structure and content and which have not been previously approved for distance education are eligible for expedited approval of distance education delivery as defined in PRP 3233 Required Format for Master Course Syllabi for BUCC Approval.

4. POLICY

- All undergraduate and graduate courses at Bloomsburg University (unless already approved for distance education) shall be eligible for expedited approval for distance education.
- Academic departments will assemble lists of courses meeting the above-referenced criteria.
- A single form may be submitted for multiple courses from a single academic department requesting expedited approval.
- No other changes to documents P, Q, and/or R may be made through the expedited approval of distance education process.
- Expedited approval for courses falling under this policy shall be made by: Academic Department Chair, College Dean, Provost. Information addressees will be College Curriculum Committee, BUCC, and Enrollment Services.
- Expedited approval will as described in Item 4.e above will be executed as follows:

o Academic departments will identify all courses not yet approved for Distance Education

o Academic Departments should indicate if course is seeking an Interim (one semester only) or Permanent approval for Distance Education.

o Academic departments will complete one Document PQ covering all courses identified in Item 4.f.i. above

o Short title of proposal should read “Secure expedited approval of distance education delivery for enclosed courses from (academic department)”

o Check Box 17 (Other) on Document P

o In Document Q, contact person should be department chair. Q-1 should read along the following lines: (Department) wishes to pursue expedited approval of (list of courses) for distance education delivery.

o Q-2 should refer to expedited approval under University PRP 3234 and Article 41.E of the PASSHE-APSCUF collective bargaining agreement. Q-3, Q-4, and Q-5 should be left blank, and Document R for the affected courses need not be included.

o In lieu of Document R, departments should append a list of submitted courses, indicating whether Interim or Permanent approval is sought for each course

Commonwealth University Council of Trustees

The Commonwealth University Council of Trustees, appointed by the Governor of Pennsylvania and approved by the Senate, are charged with reviewing the administration, fiscal management and physical plant of the university.

Trustee Roles

The Trustees also conduct an annual evaluation of the president, which is given to the Chancellor for submission to PASSHE's Board of Governors. Based upon recommendations from the president, the Council of Trustees reviews and approves standards for:

- the admission, discipline, and expulsion of students
- policies and procedures governing use of institutional facilities and property
- the creation of schools and academic programs
- annual operating and capital budget requirements
- charges for room and board, other fees (except student activity fees)

Council of Trustees Members

Honorable John E. Wetzel, Chair

Ms. Karen Russell, Vice Chair

Mr. Michael K. Hanna Jr., Secretary

Mr.Daniel P. Elby, At Large Officer

Ms. Amy Brayford

Mr. Krystjan K Callahan

Mr. Steven Crawford

Mr. Patrick Henderson

Ms. Susan Kefover

Dr. Brian D. O'Donnell

Ms. Angela C. Smith

Mr. Raymond Zaborney

Ms. Jessica Dodge, Student Trustee

Ms. Janeyda Ortiz, Student Trustee

Mr. Marvens Ravix, Student Trustee

Council of Trustees

Policies - Granting Credit for Previous Education and Training

PRP 3343 - UNDERGRADUATE STUDENT TRANSFER POLICY

ISSUED BY: Diana Rogers-Atkinson, Provost & Senior Vice President for Academic Affairs
EFFECTIVE DATE: 11/15/21
NOTES: Previous Version Effective Fall 2018 Issued by James K. Krause, Ed.D., Interim Provost & Senior Vice President for Academic Affairs; Approved by the Faculty Senate, May 12, 1971. Amended by BUCC 4/12/95. Presented to the University Forum 4/19/95. Amended by BUCC 2/2/00. Presented to the University Forum 2/9/00. Amended by BUCC 1/28/04. Reported to the University Forum 2/4/04. Amended by BUCC 11/8/06. Reported to the University Forum 11/15/06. Amended by BUCC 9/19/18. Reported to the University Forum 9/26/18.

RATIONALE FOR POLICY

Bloomsburg University is committed to maximizing the acceptance and application of college-level credits awarded by postsecondary institutions with institutionally recognized accreditation.

This student transfer policy operates in accordance with PASSHE Policy (1999-01-A, July 14, 2021) to ensure that "competencies and learning outcomes developed and documented through prior learning are the basis of recognition of transfer credit."

In keeping with the recommendations of the Middle States Commission on Higher Education (MSCHE) and other public policy advocates for transfer students, Bloomsburg University is committed to procedures and practices that enable transfer students to "complete their education without unnecessary repetition of learning successfully completed at another institution."

The purposes of this policy are:

1. To facilitate transfer of undergraduate and graduate students and their prior learning to Bloomsburg University.
2. To ensure that students can complete their education without unnecessary duplication of coursework.
3. To assist non-diploma and non-degree-holding students who have earned college-level credits from a previously attended PA community college earn an associate degree or other credential by "reverse transferring" their current Bloomsburg University credits back to their PA community college.

KEYWORDS/DEFINITIONS

Transfer Student: An undergraduate transfer student to Bloomsburg University has graduated from high school or earned a General Education Development (GED) diploma and has attempted one or more college courses at a post-secondary institution with institutionally recognized accreditations. Students who have taken college credits through dual enrollment during high school will "transfer" in credits to the University, however they will be classified as "new first year students" rather than transfer students.

Transcript - Official v. Unofficial: Undergraduate and graduate students transferring credits from another institution to Bloomsburg University must provide the Admissions Office with official transcripts from all previous institutions. An official transcript is marked as such and carries security enhancements. It is sent directly from an institution to another institution and must be delivered to the receiving institution electronically or in a sealed envelope for credit transfer. An unofficial transcript is often printed from a student portal, has little security, may be marked as "unofficial" and is commonly issued directly to the student and may not be used for credit transfer.

Undergraduate Credit Requirements: Bloomsburg University requires the successful completion of 120 credits to award an undergraduate bachelor's degree. https://www.bloomu.edu/prp-3604-undergraduate-graduation-requirements Bloomsburg University of Pennsylvania recognizes the "credit hour" as the basic institutional measure of instruction and rigor. A credit hour is defined as an amount of work represented in intended learning outcomes and verified by evidence of student achievement both in and out of classroom work. https://www.bloomu.edu/prp-3603-credit-hour-definition Bloomsburg University converts Quarter Hour credits to Semester Hour credits by multiplying the Quarter Hours by 0.666. Resulting credit hours valued as a fraction or percentage, 2.33, 2.5, etc., may be used to meet requirements.

General Education: Bloomsburg University calculates undergraduate general education requirements through general education points rather than credits. General education courses receive both credits toward the 120 required for degree completion and points required for general education fulfillment; some CLE (co-curricular learning experience) courses may receive points only towards general education but not be credit bearing.

Goals and Outcomes

Students having completed their general education in an CHEA accredited Associate's Degree will have their general education completed at Bloomsburg University.

Directed General Education (Prescribed General Education): General Education courses that are required for the major are considered "directed general education" or "prescribed general education." If a transfer student has not completed a "prescribed general education" course, they may have fulfilled the general undergraduate education requirements of the University but not of their major program of study.

Remedial/Developmental Coursework: While the majority of undergraduate courses offered at colleges and universities are considered college level, most institutions offer remedial courses that are considered pre-college level. These courses are often designated in the course number or title. For institutions using undergraduate 100-400 course numbering systems, pre-college level courses are usually designated by numbers less than 100 (i.e. Math 105 = college level, Math 060=pre-college level). These courses do not typically count towards a degree and will not typically be transferred in for credit.

Accredited v. Unaccredited Institutions: Institutional Accreditation refers to the institutional bodies recognized by the US Department of Education to accredit public and private, mainly nonprofit and degree-granting two- and four-year institutions in the US. The regional bodies are listed in the Council for Higher Education Accreditation (CHEA) directory. Regional accreditation differs from national or trade accreditation, which encompass predominantly for-profit institutions offering vocational, career or technical programs. The acceptance or denial of transfer credit is NOT determined exclusively on the accreditation of the sending institution. Transfer credit is not usually awarded for work from unaccredited or non-regionally accredited institutions. In certain instances, credit may be considered for admitted students but will require independent review. Such consideration will require documents certifying course content such as catalog descriptions and course syllabi. Credit is subject to academic department approval.

Prior Learning Assessment (PLA): Refers to learning that occurred prior to enrollment at Bloomsburg University. Students can document prior learning through transfer credits earned at previous college classes, credits earned for non-college experiences and training in the military, credit earned with a standardized or BU exam https://www.bloomu.edu/testing, credit for non-college training in business, industry, and government, and credit earned through non-college experience demonstrating college-level learning through portfolio documentation.

Below are programs accepted by Bloomsburg University as documentation for the evaluation of prior learning credit:

Advanced Placement Course Credit (AP): The University will accept appropriate undergraduate credits earned through Advanced Placement Program Tests completed during high school. Students must request official Advanced Placement test results be sent directly to the Office of the Registrar. Prospective students who desire further information about policies and procedures for awarding AP credit should view score requirements and other related information on the Registrar Resources Page.

American Council on Education (ACE) Training Programs: ACE National Guide to College Credit for Workforce Training publishes its recommendations for training students can obtain. https://www.acenet.edu/national-guide/Pages/default.aspx

College Level Examination Program (CLEP) General Examination: The CLEP allows students to take exams for a fee to attempt to "test out" of general and subject specific areas of undergraduate knowledge. Find out more about the CLEP scores are accepted at Bloomsburg University by visiting the Registrar Resources Page.

Register to take an exam through Bloomsburg University's Testing Center.

Credit by Exam: An undergraduate student may petition to establish credit in a course or courses listed in the undergraduate catalogue through a comprehensive examination given by the department instead of through registration and class attendance or independent study of the course content. The student's petition must be approved in sequence by the department chairperson and the dean of the college. Approval in either case is not automatic. A department or college may decline to award credit by examination in certain courses. A student may not petition for an examination in a course audited, nor in a course in which a failing grade has been recorded. A maximum of 15 credits may be earned by Credit by Exam. A student must present evidence of equivalent experience if the course involves laboratory or studio work. https://www.bloomu.edu/prp-3450-undergraduate-credit-department-examination

International Baccalaureate Program (IB): The University will award credit for subjects in which students score appropriate scores on IB examinations.

Military Academic Credit Review Board (MAC-RB): The MAC-RB is the University defined process supporting the approval of academic credit for military occupations, training, and deployments equivalent to BU courses required for the undergraduate student's major, minor, or General Education requirements. The process determines the appropriate and academically justifiable BU course equivalencies. https://www.bloomu.edu/military-academic-credit-review-board-mac-rb

PASSHE Transfer Student Programs:

Dual admission programs at Pennsylvania community colleges guarantee undergraduate student admission to BU (excluding, but not limited to Nursing, ASL, Medical Imaging, Engineering 3+2) upon completion of an A.A. or A.S. in an approved major between the community college and BU. Students must also meet the standard undergraduate admission requirements for the BU major. https://www.bloomu.edu/articulation-agreements Students should contact the transfer center or advising area at their community college start the dual admission process.

The Transfer and Articulation Oversight Committee: TAOC developed a process and timeline for implementing the statewide undergraduate program-to-program articulation agreements. TAOC created a transfer credit framework for 30 credits of foundational courses in six areas as well as the guidelines for program articulation from 2-year to 4-year institutions. Representative community college and 4-year college faculty developed Program to Program (P2P) transfer articulation understandings for academic major programs. https://www.patrac.org/Administrators/TAOC-Policies

Program to Program: P2P refers to a Pennsylvania statewide undergraduate program-to- program major articulation agreement that provides a clear transfer pathway into a State System university for community college students who have selected a transferable major program. Associate of Arts and Associate of Science degrees that are part of the P2P articulation contain a minimum of 30 hours of liberal arts among the following six fields of study: Composition, Public Speaking, Humanities &

Arts, Behavioral/Social Sciences, Sciences, and Mathematics and 21 credits of major program coursework. Universities may designate additional programs as precursor or parallel programs by reason of articulation agreement or similarity in disciplinary content or student outcomes, as indicated by 4-digit CIP code. https://www.bloomu.edu/articulation-agreements

The link to search for P2P eligible degrees https://www.patrac.org/

Reverse Transfer: Refers to a credit review of undergraduate degree seeking students who transferred from a PA community college to a four-year Pennsylvania State System University without having earned their associate degree. Transfer students will be notified by the registrar of their potential for reverse transferring credits to receive an associate degree credential. PA's State System of Higher Education Universities and the 14 Pennsylvania Community Colleges have a signed and executed statewide Reverse Transfer Agreement.
https://www.bloomu.edu/admissions-aid/how-to-apply/transfer

PASSHE Visiting Student: Any Bloomsburg University undergraduate or graduate student wishing to take a course at another PASSHE institution may apply for the PASSHE Visiting Student program by completing the PASSHE Visiting Student Application. Students are eligible to participate in the visiting student program only if they have completed a minimum of 12 credits and are in good academic standing.

University Degree Designations:

Undergraduate Degrees:

1. **Associate's Degrees:** An associate degree indicates that the holder has developed proficiencies sufficient to prepare for upper-division collegiate work or to enter directly into a specific occupation. Associate degrees are awarded only for completion of a coherent program of study designed for a specific purpose. They reflect satisfactory achievement of a minimum of 60 semester hours of credit, in two parts: a general education component and an area of concentration or major component. Examples of associate degrees include Associate of Arts, Associate of Science, and Associate of Applied Science.

2. **Bachelor's Degrees:** A Bachelor's degree is a four-year degree that consists of two principal components, general education and in-depth study in a major, which, taken together, are designed to prepare the student for a productive career, informed citizenship, and continuous growth.

3. **Graduate Degrees:**

1. **Master's Degrees:** A master's degree represents advanced study beyond the baccalaureate degree and signifies mastery in a discipline or professional field. A master's program requires a minimum of 30 semester credit hours and usually includes three basic components: (a) a common core of courses related to the discipline or field of study; (b) a concentration or specialization in a focused area of the discipline; and (c) cognate courses which broaden perspective or mastery or provide special skills.

2. **Doctorate Degrees:** The doctorate is the highest academic degree awarded (although in some disciplines a master's degree might be the terminal degree awarded) in American higher education and is of two types: the Doctor of Philosophy (Ph.D.) and the Professional Doctorate. Though the primary distinction is that the Ph.D. is a research degree whereas professional degrees are applied degrees, most doctoral programs include both research and applied studies.

3. **Certificates:** A certificate is a formal credit-based credential designated on the academic record and awarded by an educational institution to indicate completion of an organized program of study at the postsecondary level that does not culminate in a degree.

BACKGROUND INFORMATION

Transfer policy and procedures at Bloomsburg University are guided by policies and procedures established by the Pennsylvania State System of Higher Education (PASSHE), the Pennsylvania Transfer and Articulation Legislation (TAOC), and Middle States Commission on Higher Education (MSCHE) Transfer Credit guidelines.

In 2008, legislation amended the Public School Code of 1949 by adding Article XX-C "Transfer of the Credits between Institutions of Higher Education" and established the Statewide Transfer and Articulation System so that students could transfer Associate of Arts (AA) and Associate of Science (AS) degrees into parallel bachelor's degree programs at State System universities with junior standing.

PASSHE policy and agreements:
https://www.passhe.edu/inside/policies/BOG_Policies/Policy%201999-01-A.pdf

Academic passport PASSHE:
www.passhe.edu/academic-passport

A Transfer and Articulation Oversight Committee (TAOC) developed a process and timeline for implementing statewide Program to Program (P2P) articulation agreements. TAOC created a transfer credit framework for 30 credits of foundational courses in 6 areas as well as the guidelines for program articulation from 2-year to 4-year institutions. Representative community college and 4-year college faculty developed Program to Program transfer articulation understandings for academic major programs.

POLICY

Recognizing the intent of PASSHE per Policy 1999-01-A to “maximize the application of degree requirements of college-level credits awarded by CHEA-accredited institutions” Bloomsburg University has established the following:

s per PASSHE Policy 1999-01-A, Bloomsburg University "will accept all undergraduate college-level credits from postsecondary institutions with CHEA-recognized accreditation in transfer, regardless of how the prior learning was acquired." Courses passed in another institution on a pass-fail basis are acceptable for transfer credit, if they conform to the conditions for such grades at Bloomsburg University.

1. First-time bachelor's degree-seeking students must **complete at least 30 of the last 60 credits and at least 50 percent of the credits in their major** at Bloomsburg University. (PAASHE Procedure/Standard #2016-24: https://www.passhe.edu/inside/policies/Policies_Procedures_Standards/Graduation%20Residency%20Requirements%202016-24.pdf)

2. Credit is awarded for acceptable course transfers. Credits are transferable, but grades and quality points are not, unless PASSHE Board of Governors policy 1991-03-A (Visiting Student Program within the PASSHE) is applicable.

3. If the grade received in transfer does not allow a student to progress they may be required to repeat the course at BU in order to proceed. Some majors may require grades of C or better in certain courses to demonstrate proficiency in the subject matter. Please note that undergraduate students are limited to six repeats at Bloomsburg University and no more than three repeats per course per PRP https://www.bloomu.edu/prp-3452-course-repeat

4. Specific disciplines may apply time limits on transfer eligibility (i.e. computer science, biology, physical sciences, nursing, international policy). Students will be evaluated on the catalog year they are following. Credit will be awarded based on content of the course at the time it was taken.

5. If transferring from a quarter to a semester, the following conversion will apply: Multiply 4 quarter hours by 67% to convert from quarter to semester; and 2.68 semester hours (converted from 4 quarter hours) as satisfying 3 semester hours

6. 100-200 level course work will typically transfer in as 100-200 level equivalencies, and 300-400 level coursework will typically transfer in as 300-400 level equivalencies unless the academic content and rigor indicated by review of course materials suggest an alteration of credit levels.

7. Remedial/developmental coursework does not typically count towards degree and will not typically be transferred in for credit.

8. Transfer credit will be deleted if the student subsequently registers for courses which substantially duplicate the content of courses accepted for transfer. When such deletion occurs students will be notified by the Office of the Registrar.

9. Learning from **non-accredited institutions** will be evaluated by the University on a student-by-student basis. To ensure consistency and equity in the application of credit from non-accredited institutions the following procedures will be followed:

1. When the substitution of transfer credit for a required course is in question because the course was taken in an unaccredited institution or because the description of standards of the course is unclear, a student is entitled to an opportunity to validate the course by submitting a course description or syllabus and in consultation with the appropriate academic department.

2. The University may award credits for prior learning not acquired through coursework completed at post-secondary accredited institutions. Bloomsburg University students who would like to initiate the process to **review possible credit for prior learning** should contact the Office of the Registrar.

3. Other sources of Prior Learning include:

1. Military Credit – MAC-RB

2. National Recognized Examinations – CLEP, AP, IB, DSST

3. Employment Based Training- Certifications, ACE CREDIT

4. Individualized Assessment of Experiential Learning – Portfolio

5. Oral Proficiency Interview (OPI)

10. In **acceptance and application of undergraduate transfer college-level credits**, Bloomsburg University will first apply as many college-level credits as possible toward the satisfaction of general education requirements, then to the requirements in the major, and finally to elective credits. Every effort will be made in the evaluation of transfer credits to avoid awarding "empty" transfer credits that will not assist the transfer student in progressing towards degree completion in a timely fashion.

1. Students **may challenge a course equivalency or evaluation** by appealing directly to the Office of Admission (INSERT FORM), who will consult with the appropriate College Dean, who will facilitate the Department/Program review. Students may be requested to provide additional materials to determine equivalencies (e.g., syllabus, schedule of topics). Unless otherwise needed for accreditation, courses equivalencies are established when 70% content in the courses is found to match.

2. If a course is not transferable, it is the **responsibility of the department/program to provide documentation indicating the reason for rejecting transfer** which will be provided to the student and maintained by the Registrar's Office.

11. As per PASSHE Policy 1999-01-A, students who transfer to Bloomsburg University from a postsecondary institution with CHEA-recognized accreditation with an Associate of Science or an Associate of Arts degree, or having completed general education requirements for a bachelor's degree, an Associate of Science or an Associate of Arts degree, shall have satisfied the general education requirements at the Bloomsburg University. Exceptions may be made for the following, provided that these exceptions do not extend the student's time to the degree:

1. One signature general education course (up to 3 credits), if applicable;

2. Any prescribed general education course required for the major, if not satisfactorily completed;

3. General education overlays satisfied in advanced courses in the major.

12. As per PASSHE Policy 1999-01-A, undergraduate students who transfer into the Bloomsburg University with an Associate of Arts, an Associate of Science, Associate of Applied Science degree from a postsecondary institution with CHEA-recognized accreditation in a parallel academic program or as part of the **P2P Statewide agreements** will be awarded full junior standing and shall not be required to satisfactorily complete more than 60 credits to earn a 120-credit baccalaureate degree in a P2P or other parallel program, regardless of the courses they took to earn the Associate degree; they will have the same requirements for admission to a particular academic program and for retention as students who began their education at Bloomsburg University. Students transferring into a program with accreditation or licensing/certification standards may be required to take limited additional credits to meet those standards.

13. **Graduate students** may transfer one-third of the equivalent graduate-level credits required in a graduate program

14. Bloomsburg University **guarantees admission for undergraduate students transferring from a Pennsylvania Community College with an associate degree and for students transferring from one State System University to another State System University**, subject to the following

1. Students with an Associate of Science or Associate of Arts in a parallel academic program or as part of the P2P Statewide agreements are guaranteed admission to the P2P or parallel academic program, subject to capacity, as long as the student meets the criteria for admission required of students who began their education at Bloomsburg University.

2. Bloomsburg University **designates certain majors or programs of study due to limited access** for reasons of accreditation-, clinical-, or resource-based capacity. An updated list of limited access majors and programs can be found at

15. **Criminal Conviction of a Felony Offense or Dismissal from a Previous Institution for Disciplinary Reasons may limit** the ability to enroll and/or to complete certain academic majors/programs and may affect approval to live in university-owned or university-affiliated housing. These will be handled on a case-by-case basis.

Transfer Procedures:

Transfer Students Applying for Admission to Bloomsburg University:

1. Transfer students must fill out and submit the regular application for admission to Bloomsburg University. A fee waiver is available for transfer students. https://www.bloomu.edu/admissions-aid/how-to-apply/transfer

2. A minimum 2.0 GPA is required for transfer application, some majors may have higher entry requirements.

3. Students are required to submit official transcripts from all colleges attended. If they have completed less than 12 college credits, they are required to send an official copy of their high school or GED transcripts.

4. Transcripts can be sent electronically or mailed directly to the Admissions Office. (High School or GED transcripts are only required if the applicant has earned fewer than 12 college credits.)

5. Transfer applicants are reviewed on a rolling basis until the major or semester reaches capacity.

6. If students have earned less than 12 college credits, they are evaluated on both their high school/GED and college transcripts and must meet the minimum admission guidelines for first-year students.

7. The evaluation of credit earned at other institutions for new transfer students is recommended by the Office of Admissions to the Office of the Registrar with oversight for content and quality undertaken by the academic department of the transfer course.

8. Students will receive a preliminary transfer credit evaluation with their acceptance letter.

Current Bloomsburg University students transferring in course from other institutions:

1. Degree-seeking students at Bloomsburg University may take courses in other 2- and 4- year accredited institutions and submit credits for transfer, provided the courses satisfy the criteria stated above. (PRP 3604 concerning Graduation Requirements) https://www.bloomu.edu/prp-3604-undergraduate-graduation-requirements

2. To ensure proper placement of transfer credits taken at another institution, students enrolled at Bloomsburg University are strongly encouraged to follow the **Prior Credit Transfer Approval procedure** when electing to take courses at another institution for transfer back to Bloomsburg University.

3. Discuss all transfer course decisions with your academic advisor.

4. Complete the Prior Approval Form though their MyHusky Account. See the E-Form tutorial for assistance.

Students should use the BU Course Equivalencies tool to look for course equivalencies previously articulated by the University.

http://adminapps.bloomu.edu/CourseEquivalency/ce

If transferring courses from a PASSHE school students may fill out the Undergraduate Visiting Student Application.

Visiting Student PASSHE.pdf

Graduate students should refer to PRP 3463 when transferring Graduate credits. https://www.bloomu.edu/prp-3463-graduate-admissions-withdrawal-course-repeat-transfers-and-graduation-requirements

Appealing a Transfer Course Decision:

1. Students may appeal transfer credit equivalencies.
2. Appeals of transfer credit equivalencies should be made via the webform on the admissions and registrar page.
3. The appeal must be made for new students by the end of their first semester of attendance and for current students within 60 days of the evaluation of the transfer credit and the college (department chairperson and dean) will have 30 days to respond with a decision regarding the appeal.
4. The appeal must include the following:
5. the student's first and last name and student number
6. the specific transfer course(s) that are being questioned;
7. the Bloomsburg University course(s) that the student believes are equivalent; and
8. support documentation (course descriptions, syllabi, etc.)

Internal Process for Evaluating Coursework:

1. Routine course equivalencies will be made by a designee in the Admissions coordinating with the Registrar's Office.
2. New course equivalencies will be coordinated by the designee in the Admissions Office and Registrar's Office with the appropriate College Dean in consultation with the Academic Department Chairperson of the course.
3. Course equivalencies once designated will be posted online on the University Website Course Equivalency Tool on the Transfer page for easy access and transparency.
4. Course equivalencies should generally have a minimum of 60% matching of content to determine equivalency to the course unless otherwise needed for specific accreditation.
5. Course equivalencies should be reviewed on a routine basis by academic departments and programs utilizing the TES online course system. Where necessary to determine equivalencies, departments may request materials such as course syllabi and schedules of topics.
6. The Registrar's Office will maintain a database of rejected transfer courses with documentation indicating the reasons for the rejection.
7. The university will conduct accuracy audits of equivalencies by assessing student completion following transfer.

PRP 3344 - EVALUATION OF MILITARY EXPERIENCE FOR ACADEMIC CREDIT

ISSUED BY: Dr. Diana Rogers-Adkinson, Provost & Vice President for Academic Affairs
NOTES: Approved by BUCC 11/13/2019; Interim Policy by Provost & Vice President for Academic Affairs on 12/17/2019; Presented at University Forum 2/19/2020 as Informational Item
Effective Date: December 17, 2019

1. RATIONALE FOR POLICY

This policy was established to explain procedures for the formal review of U.S. military training and experience for academic credit at Bloomsburg University.

2. KEYWORDS/DEFINITIONS

Military students. Veterans. Academic credit review. MAC-RB

BU Office of Military and Veterans Resources

3. BACKGROUND INFORMATION

The Military Academic Credit Review Board (MAC-RB) process has been under development since 2015. MAC-RB reports to the Provost (or designee) and reviews/translates military training and experience into appropriate equivalent Bloomsburg University courses. PRP 3344 formalizes the process as university policy.

4. POLICY

Introduction
Bloomsburg University values the learning, experience and contributions of veterans of the United States armed forces, and of students with military training and/or active-duty status. The university community demonstrates that value, and its commitment to the "military friendly" distinction, by granting academic credit for the experiential learning of military students and veterans through an individualized, discipline specific analysis of their military career. The university community values the academic quality and integrity of its programs. Protecting the academic integrity of Bloomsburg University degree programs and serving all students appropriately, including military students, are inseparable values.

Procedures
Military students and student veterans generally receive some credit hours and general education recognition as described in PRP 3612. Additional course equivalencies and credit hours may be granted through the **Military Academic Credit Review Board (MAC-RB)**. The procedures established provide a system whereby the unique and widely variable training, work, and experiences of military students and veterans can be professionally and systematically analyzed to provide—for every individual who desires it—a college/discipline specific, individualized analysis of their military record. This analysis will be conducted by academic faculty experts and others with deep knowledge of the Bloomsburg University curriculum. The group conducting the analysis is known as the **MAC-RB**.

Military Academic Credit Review Board (MAC-RB) Process
Upon initial expression of interest in enrollment (or actual enrollment, whichever comes first) at Bloomsburg University, all military students and student veterans will be encouraged to meet with the Director of the **BU Office of Military and Veterans Resources (BU-OMVR)** and/or the faculty liaison with the BU-OMVR for three purposes: to identify their armed forces service occupation, to be briefed on the process of determining their likely experiential learning credits (including **MAC-RB**), and to initiate (if desired) the process of military document retrieval for review.

Military students may voluntarily choose to have their military training, work, and experiences more closely reviewed by the **MAC-RB**, as explained in the **MAC-RB** bylaws.

Equivalencies approved via the **MAC-RB** process shall be posted to the academic record of the individual military student by the Registrar.

PRP 3450 - UNDERGRADUATE CREDIT BY DEPARTMENT EXAMINATION

Issued By: Patrick J. Schloss Ph.D., Acting President, Provost and Vice President for Academic Affairs
Effective Date: Fall 2004
NOTES: Approved by the Vice President for Academic Affairs, 8/28/75. Amended at BUCC 4/26/95. Presented at the University Forum September 20, 1995. Amended at BUCC 9/17/03. Reported to the University Forum 9/24/03. Amended at BUCC 2/11/04. Reported to the University Forum 3/3/04.

A student may petition for the privilege of establishing credit in a course or courses listed in the undergraduate catalogue through a comprehensive examination given by the department instead of through registration and class attendance or through independent study of the course content.

The student's petition must be approved in sequence by the department chairperson and the dean of the college. Approval in either case is not automatic. A department or college may decline to award credit by examination in certain courses.

A student may not petition for an examination in a course audited, nor in a course in which a failing grade has been recorded.

A student must present evidence of equivalent experience if the course involves laboratory or studio work.

The administration of the examination is the responsibility of the department that offers the course.

The examination must cover the course syllabus in a comprehensive manner. Suitable standardized examinations may be used. The examination must be written or, if oral, subject to transcription. Where skill, such as laboratory technique or artistic performance, is a course requirement, the written and oral aspects must be supplemented by demonstration of skill. A copy of the completed approval form must be placed in the student's advisement file and the original forwarded to the Office of the Registrar.

A maximum of fifteen (15) credit hours may be earned by credit by examination. Credit hours earned by examination are not included in the thirty (30) credit hours that a student must take at the University (PRP3634).

A fee is charged for courses challenged by institutional examination taken for credit, regardless of the number of credits awarded for that course. Upon receipt of approval, this fee is payable at the Business Office. Evidence of payment must be presented to the department before the examination can be administered.

If the student passes the examination, the grade of "P" is assigned for the course. If he/she fails, no record is made. This course does not count in the student's normal quota of pass-fail courses.

Suitable adaptations of the above procedures may be used to validate transfer courses taken in non-accredited colleges. No fee is charged for examination to validate such credit. Examinations may be based upon the syllabi of the courses taken in the previous institution or, in case the student wishes to establish equivalency with courses in this university, upon the syllabi of courses offered in this institution.

Cooperative Training Description

ENGT380 Cooperative Education in Industry

1. Rationale for course: This course provides an opportunity for students to gain fulltime work experience in industry for an extended period of time between their junior and senior years. The cooperative education will take place offsite at industrial facilities in partnership with industries.

A co-op program for the engineering technology students is strongly recommended by the program's *Industrial Advisory Board*. Such programs contribute significantly to professional and personal growth of students facilitating their immediate post-graduate employment, in addition to helping Pennsylvania companies recruit and retain engineering talent in the area.

This is a required course for the ABET-accredited *Electronics Engineering Technology* degree program, supporting the development of students' ability to select and apply the knowledge, techniques, skills, and modern tools of the discipline to broadly defined engineering technology activities.

2. Course Description: Provides full-time work experience for the summer semester and the following fall semester in an industrial or research setting to enhance engineering skills in electronics engineering technology. Requires departmental approval. This is a required course for EET majors and is offered under Pass/Fail Only basis.

Developmental/Remedial/Deficiency Courses Description

MATH101A Math Thinking with Recitation (4 credits) - Presents mathematical topics and applications in a context designed to promote quantitative reasoning and the use of mathematics in solving problems and making decisions. It is suitable for majors in humanities and education and for others seeking a broad view of mathematics. This includes a 1-credit recitation aimed at providing just-in-time review of mathematical concepts in support of the content in MAT101.

MATH110A Concepts of Arithmetic and Number Systems with Recitation (5 credits) - Provides a survey of mathematics aimed at developing skills in the use of numbers, number patterns and operations with numbers for preservice teachers of grades PK-4. Problem solving, sets and number systems are emphasized. Other topics covered are patterns and sequences, elementary number theory and historic number systems. Problem solving methods and manipulatives are used where appropriate. This includes a 2-credit recitation providing just-in-time review of algebraic concepts in support of the content in MATH110.

MATH113A Concepts of Geometry and Statistics with Recitation (5) - Provides a survey of mathematics aimed at developing skills in the use of basic geometry, probability, and statistics for preservice teachers of grades PK-4. Conceptual models and representations are used throughout the course. This class includes a 2-credit recitation providing just-in-time review of concepts in support of the content in MATH113.

MATH118A College Algebra with Recitation (5 credits) - Introduces fundamental algebraic concepts and develops the mathematical and computation skills necessary to apply algebraic techniques to problems in business, economics, the social and natural sciences, and the liberal arts. This includes a 2-credit recitation aimed at providing just-in-time review of algebraic concepts in support of the content in MAT118

MATH120A Mathematics for the Health Sciences with Recitation (4 credits) - Develops the mathematical and computational skills necessary to apply mathematical techniques to problems in the health sciences. Topics include fundamental concepts of algebra, geometry, probability and statistics, measurements, functions, exponential and logarithmic functions, systems of equations and data fitting. This includes a 1-credit recitation aimed at providing just-in-time review of concepts in support of the content in MAT120, some of which may include solving equations, unit conversions, basic statistics, and functions.

MATH130A Finite Mathematics with Recitation (4 credits) - Presents an introduction to binary numbers, hexadecimal numbers, logic, counting techniques, sets, probability, sequences, and finite summations. This includes a 1-credit recitation aimed at providing just-in-time review of algebraic concepts in support of the content in MAT130.

STAT141A Introduction to Statistics with Recitation (5 credits) - Provides an introduction to descriptive and inferential statistics. Topics covered include numerical and graphical summary procedures, basic probability concepts, random variables and distributions, the Central Limit Theorem, confidence intervals, and hypothesis testing. The course contains two credits of extra support for students who did not place into Introduction to Statistics (STA 141). Completion of this course will allow the student to take any class with Introduction to Statistics (STA 141) as a prerequisite.

WRIT101 Foundations in Composition (3 credits) - Offers opportunities to compose a variety of texts for different situations with attention to purpose, audience, context, and conventions. Students will practice analysis and critical reading and thinking with emphasis on college-level research skills and will develop effective processes for reading, writing, and research. Designed for students who nearly meet the placement criteria for WRIT 103 or for students who self-select in order to receive additional support in a required 1-credit corequisite course.

WRIT102 Foundations in Composition Lab (1 credit) - Supports students taking WRIT 101 to fulfill the requirement for a foundational writing class. Focuses on practicing reading and writing strategies as well as self-efficacy, self-regulation, and metacognition. Provides opportunities for hands-on reading and writing activities, goal setting, reflection, and peer tutoring support. Students must pass WRIT 101 in the same semester in order to pass WRIT 102.

Graduate Level: Number of Credit Hours that Constitute Full-Time and Part-Time

PRP 3442 - DEFINITION OF FULL-TIME STUDENT

Issued by: Wilson G. Bradshaw, Vice President and Provost for Academic Affairs
Effective Date: Fall 1995
Notes: Approved by CCAA, March 31, 1982. Accepted by Representative Assembly, 5/5/82. Amended by BUCC 4/26/95. Presented at the University Forum September 20, 1995.

An undergraduate/graduate who is enrolled for twelve/nine or more semester credits is classified as a full-time student throughout the semester. One who enrolled for fewer then twelve/nine semester credits is a part-time student. Where the word "student" appears without clarification either by word or context, "full-time student" is implied.

SATISFACTORY ACADEMIC PROGRESS

To continue receiving federal financial aid as a student at Commonwealth University, you need to maintain a certain grade point average (GPA) and be on track to complete enough classes to successfully complete your degree/certificate program in the required timeframe established here at the university.

The Satisfactory Academic Progress (SAP) Policy includes:

- Undergraduate students must have a 2.0 cumulative grade point average by the end of their second academic year.
- Graduate/Doctoral students must have a 3.0 cumulative grade point average at the end of each academic year.
- Successfully complete 2/3 of all credits attempted. This is also cumulative.
- An incomplete grade, a failing grade, or withdrawal from a course will count as zero credits earned.
- A student will remain eligible for federal aid for up to 150% total attempted credits.
    - All credits transferred to the university and attempted credits will count towards the maximum time frame requirement for satisfactory academic progress.
    - Undergraduate - Maximum time frame is 180 credits
    - Graduate/Doctoral - Maximum time frame will vary by degree completion requirements. The maximum standard will be set at 150 percent of the minimum number of credits needed to complete the graduate degree.
- Course repeat grades will only be counted toward the minimum satisfactory progress if credits were actually earned.
    - A repeat of any passing grade will not be counted as credits earned in two different semesters. However, it will be counted as credits attempted for each session in which the course was taken.
    - Credit will only be awarded during the semester in which the grade was first earned.
    - Federal regulations will permit payment of federal aid for only the first repeat of a previously passed course.
- Students enrolled in a non-degree program must also meet the SAP standards to obtain financial aid in subsequent semesters.
- Progress is reviewed after every spring semester.
    - If you fail to make SAP, you will lose financial aid until you are able to maintain satisfactory progress again.
    - If you have not made SAP and have experienced an exceptional situation in your life that may be a contributing factor, you may appeal.

Appeals

To file an appeal, log into our secure portal at **commonwealthu.studentforms.com**. You must complete the appeal form and upload supporting documentation. If the appeal is granted, additional probationary aid and requirements will be established. If approved, progress will be reviewed in the terms of the academic plan. If progress is not re-established after the review, additional appeals will NOT be considered unless it is due to HIGHLY unusual circumstances.

Multidisciplinary Studies

Degree Designation
Bachelor of Arts

Campuses
Bloomsburg Campus, Clearfield Site, LockHaven Campus, Mansfield Campus

College
Interdisciplinary

Department
Interdisciplinary Studies

Program Description
The multidisciplinary program is a completion program for students who have earned at least 75 credits. The degree provides flexibility for students pursuing a baccalaureate degree. The major/cognate degree requirements include 30 credits with a minimum of 8 credits from each of two disciplines. At least 12 credits of upper-level courses and an internship or capstone experience are required. A minor may be used as part of the 30 credits. This major may not be combined with any other major.

Degree Designation
Undergraduate

Student Outcomes
1. Demonstrate effective competence in written communication
2. Demonstrate competence in information literacy
3. Demonstrate interdisciplinary skills from varied courses of study (relate two or more disciplines)

Program Description
opose a Bachelor of Arts in Anthropology. It is a rigorous major developed with guidance from the American Anthropological Association. Students will understand and be able to apply anthropological theories and methods to the study of humanity past, present, and future. Students will be critical thinkers and effective communicators who are able to address emerging issues faced by humanity. Students will additionally be equipped with a core set of social science methods skills and theoretical perspectives and concepts from specific substantive areas of anthropological inquiry. Anthropology majors will be

Degree Designation
Undergraduate

Student Outcomes
SLO #1 (Diversity): Identify the ways in which diverse worldviews operate and are experienced at individual, cultural, and global levels and how they interact with human behavior, biology, material culture, and the environment.

SLO #2 (Theory): Identify and describe anthropological theories and concepts relating to human biocultural evolution and the impact of historical forces in shaping approaches to understanding the human condition.

SLO # 3 (Professional Ethics) Application of professional ethics to conduct research and apply knowledge in professional contexts.

SLO #4 (Research – Scientific Method): Critically evaluate anthropological hypotheses using scientific data.

SLO #5 (Communication): Demonstrate knowledge of anthropological ideas, ethics, applications, and research through written, visual and verbal analyses to communicate effectively within the discipline and to the public.

SLO #6 (Responsible Decision-Making): Interpret data and apply appropriate analytical techniques to evaluate potential solutions to biological, cultural, and environmental issues to promote informed decision-making and action.

Department
Anthro, Soc, CJ, SocWrk

Program Description
We propose a Minor in Anthropology at Commonwealth University of Pennsylvania. It parallels the major in introducing each of the sub-fields taught at CUP (Archaeology, Biological Anthropology, and Cultural Anthropology). It does not require advanced courses in theory or a capstone course. Students will understand and be able to apply anthropological theories and methods to the study of humanity's past, present, and future. Students will be critical thinkers and effective communicators who able to address emerging issues faces by humanity. Anthropology minors will be well-prepared to enter the workforce in a variety of fields and be better prepared to pursue graduate education.

Degree Designation
Undergraduate

Student Outcomes
Successful Anthropology Minors will be able to
1. Identify the ways in which diverse worldviews operate and are experienced at individual, cultural, and global levels and how they interact with human behavior, biology, material culture, and the environment.
2. Identify and describe anthropological theories and concepts relating to human bio-cultural evolution and the impact of historical forces in shaping approaches to understanding the human condition.
3. Demonstrate knowledge of anthropological ideas, ethics, applications, and research through written, visual and verbal analyses to communicate effectively within the discipline and to the public.
4. Interpret data and apply appropriate analytical techniques to evaluate potential solutions to biological, cultural, and environmental issues to promote informed decision-making and action.

Program Description
We are requesting a change in required courses to reflect changing market demands and upcoming revisions to the Uniform Certified Public Accountant (CPA) Examination. Based upon feedback from employers, beginning in 2024, the CPA Exam will include testing of data analytics in accounting, auditing, taxation, and cost accounting; also, changes include a reduction in the area of finance. To reflect the changes in market demands and the CPA Exam, we would like to require a course in Data Analytics in Accounting (ACCT525) in place of FIN535, such that Finance 535 could be completed as one of two electives in the MAcc program, rather than as a required course.

Degree Designation
Graduate

Student Outcomes
The Master of Accountancy program provides the advanced accounting knowledge and skills necessary to prepare students for successful entry into public accounting and successful completion of the Uniform Certified Public Accountant (CPA) Examination.

International Business - Accounting

Program Code
ACCT-BSBA-Concentration

Degree Designation
Bachelor of Science in Business Administration

Campuses
Bloomsburg Campus, LockHaven Campus, Mansfield Campus

College
Zeigler College of Business

Department
Management

Program Description
The international business program is uniquely designed with a qualitative liberal arts foundation, a business core, an interdisciplinary IB core including a short-term faculty-led study abroad opportunity, and an accounting specialization that provides students with accounting skills in addition to the required business core and IB major knowledge, which increases their job marketability after graduation. Our program strives to meet relevant industry and professional competencies to ensure rigorous attainment of necessary knowledge, skills, and abilities.

Degree Designation
Undergraduate

Student Outcomes
Students who complete the program will be able to:
• Acquire knowledge, skills, and abilities to conduct business in an international setting;
• Recognize the complexity of international business through course work and participation in the study abroad program;
• Develop an appreciation of cultural diversity;
• Apply functional expertise in managing multi-national business enterprises;
• Analyze the challenges expatriates may face in a foreign environment such as security, food, language, cultural and climatic adjustment, medical practices, diversity of ethical practices, diversity of political ideologies, and religious beliefs;
• Build flexibility in dealing with logistics of international travel;
• Demonstrate willingness to learn and show geocentric values and non-ethnocentric disposition.
• Apply accounting knowledge and skills in international business setting.

Zeigler College of Business

Department
Business, Innovation, and Technology

Program Description
The accounting program curriculum is designed to address the demands faced by today's professional accountants. Students develop the critical thinking, problem solving, and technical skills needed to enter and succeed in the accounting profession. Our students learn how to accumulate and summarize information, analyze and interpret results, and communicate information key to decision making and compliance with applicable laws and regulations.

Degree Designation
Undergraduate

Student Outcomes
Students completing the program should possess the critical thinking, problem solving, and technical skills to be able to

1. Accumulate and summarize transactional information
2. Analyze, interpret, and communicate financial information in accordance with accounting rules.
3. Analyze and communicate accounting information for decision making
4. Interpret income tax regulations for planning and compliance.
5. Use audit standards and procedures to determine whether financial statements present fairly in all material respects.
6. Follow professional and ethical standards imposed by law and licensing associations.

Zeigler College of Business

Program Description
The Zeigler College of Business Master of Business Administration Program provides students with a comprehensive educational experience that will prepare current and future business leaders with the knowledge and skills to be influential responsible citizens that perform in every industry.

Degree Designation
Graduate

Student Outcomes
1) Leadership Emergence.
Develop an understanding of an effective leader's critical characteristics and procedures with a group of individuals as they attain a shared goal.

2) Cultural Literacy.
Examine the importance of cultural capital and act as an authentic citizen of change with the ability to participate confidently in cultural spaces.

3) Business Innovations.
Investigate opportunities within the business process to promote organizational relevance and value creation.

4) Adaptability and Problem Solving.
Illustrate the use of adaptable managerial methods to determine the best course of action to solve problems effectively.

5) Analysis and Evaluation.
Utilize data and the application of systems to identify, assess, define, and solve problems across functional areas of business.

Program Description
The Sport Management major curriculum is designed with coursework focusing on the business of sport and is complemented by supporting courses in business, management, accounting, computer technology, and sociocultural and behavioral aspects of sport. Graduates are prepared to pursue careers in Marketing, Public Relations, Sales, Sponsorship, Event Planning, Facility Management, Media, Sports Information, Athletic Administration and Coaching in professional, amateur, educational and community sport settings.

Degree Designation
Undergraduate

Student Outcomes
Students who complete the program will be able to:
1. Examine social, psychological, and international foundations of sport.
2. Apply principles of sport management.
3. Examine leadership in sport organizations.
4. Differentiate sport operations management, and event and venue management.
5. Assess sport governance.
6. Discriminate ethics in sport administration.
7. Apply competencies in sport marketing.
8. Examine principles of sport finance.
9. Apply accounting principles and their application to sport organizations.
10. Apply principles of economics and their application to sport organizations.
11. Interpret legal aspects of sport.
12. External experience - Students will complete an external field participation.
13. Explain and categorize all aspects of the day-today operations of professional setting
14. Discriminate the duties, rules, and responsibilities of professionals in the area of external experience.
15. Apply research methods and the foundations underlying sport science including socio-cultural, philosophical and psychological perspectives.
16. Dissect and synthesize research to develop a full comprehension of current knowledge base and design related investigations.
17. Evaluate the influence of key social institutions (gender, race, social class) on sport management, and to integrate these factors in one's professional work.
18. Interpret philosophical principles and assess ethical issues related to sport; articulate a personal philosophy regarding social responsibility in sport.
19. Classify hierarchies in sport organizations and model how to resolve conflicts between competing parties through effective leadership and personnel management.
20. Develop sport events including planning, evaluating, marketing and public relations.
21. Create the vision and goals, including financial, of an organization and successfully convey and gain commitment to them
22. Differentiate legal issues relevant to sport organizations including sport personnel and the ability to determine appropriate solutions to legal problems.

Program Description
This concentration allows current practicing teachers to learn more depth about the challenging issues many students face in their personal lives that impact their abilities to learn in a traditional school setting.

The program provides students with practical and theoretical knowledge and skills to assist pk-12 students be more successful in school and life. The courses are designed to infuse research based best practices, theory, and real world application of social, emotional, cognitive, and physiological impacts to student learning.

Degree Designation
Graduate

Student Outcomes
Acquire and apply knowledge of alternative education
Acquire and apply knowledge of curriculum and programs available to best support students needing alternative education
Acquire and apply knowledge of classroom management strategies to enhance learning experiences for alternative education youth
Acquire and apply knowledge of transition strategies for students entering or exiting alternative education
Acquire and apply knowledge cognitive, motivation, humanistic, emotional, and social constructs to best enhance student achievement

General

Program Title
MBA Analytics

Program Code
ANYL-MBA-Concentration

Degree Designation
Master of Business Administration

Campuses
Bloomsburg Campus, LockHaven Campus, Mansfield Campus

College
Zeigler College of Business

Program Description
The Zeigler College of Business Master of Business Administration Program provides students with a comprehensive educational experience that will prepare current and future business leaders with the knowledge and skills to be influential responsible citizens that perform in every industry.

Degree Designation
Graduate

Student Outcomes
1) Leadership Emergence.
Develop an understanding of an effective leader's critical characteristics and procedures with a group of individuals as they attain a shared goal.

2) Cultural Literacy.
Examine the importance of cultural capital and act as an authentic citizen of change with the ability to participate confidently in cultural spaces.

3) Business Innovations.
Investigate opportunities within the business process to promote organizational relevance and value creation.

4) Adaptability and Problem Solving.
Illustrate the use of adaptable managerial methods to determine the best course of action to solve problems effectively.

5) Analysis and Evaluation.
Utilize data and the application of systems to identify, assess, define, and solve problems across functional areas of business.

ANYL-Minor - Analytics Minor

General

Program Title
Analytics Minor

Program Code
ANYL-Minor

Campuses
Bloomsburg Campus

College
Zeigler College of Business

Department
Business, Innovation, and Technology

Program Description
The Association to Advance Collegiate Schools of Business (AACSB) accredited Minor in Analytics prepares students to understand and deploy the analytics lifecycle, including data generation, collection, storage, processing, analysis, and visualization. The program leverages various digital tools to explore and practice how analytics can be used for business intelligence.

Degree Designation
Undergraduate

Student Outcomes
The student outcomes include:
- Appraise trends, tools, and challenges of IT and analytics.
- Apply emerging technologies and methods to manage and exploit the value of structured and unstructured data.
- Examine analytics techniques to transform data into insights.
- Analyze strategic innovation in the interface between websites and databases.

Applied Computer Science

Program Code
APCS-BS-Major

Degree Designation
Bachelor of Science

Campuses
Bloomsburg Campus, LockHaven Campus

College
College of Health, Science, & Technology

Department
Math/Computer Sci/Dig Forensic

Program Description
The Applied Computer Science program combines elements of Lock Haven's existing successful programs with an additional track in Web Development. The Applied Computer Science program will have a common core of classes and the following three tracks.
• Data Science
• Mobile and Game Application Development
• Web Development

The overarching goal of the program is to prepare graduates for entry level positions in these various fields.
The Applied Computer Science degree differs from the ABET Computer Science program by focusing on professional development over the theoretical underpinnings of Computer Science. The existing programs that the degree is based on successfully attracted students not interested in an ABET Computer Science degree. It is vital that both programs are available to attract a wide-variety of students to Commonwealth University.

Degree Designation
Undergraduate

Student Outcomes
Three to five years after graduation, our Applied computer science alumni will be:
1. be professionally employed in the computing field
2. communicate and collaborate effectively in a team environment
3. continue to grow professionally by adapting to new technologies and assuming leadership responsibilities

Applied Computer Science Learning Outcomes
Students will be able to
1. Demonstrate strong problem-solving skills using technology appropriate to the problem domain.
2. Design, implement, and evaluate a computing-based solution to meet a given set of computing requirements in the context of the program's discipline.
3. Communicate effectively
4. Recognize professional responsibilities and make informed and equitable judgments in computing practice based on legal and ethical principles.
5. Function effectively as a member or leader of a team engaged in activities appropriate to the program track.

AR2D-BFA-Concentration - Visual Arts - 2 Dimensional Art

General

Program Title
Visual Arts - 2 Dimensional Art

Program Code
AR2D-BFA-Concentration

Degree Designation
Bachelor of Fine Arts

Campuses
Bloomsburg Campus, LockHaven Campus, Mansfield Campus

College
College of Arts, Humanities, Education and Social Sciences

Department
Visual Arts

Program Description
The Bachelor of Fine Arts in Visual Arts will offer students a NASAD accredited professional degree in Visual Arts with a choice of concentration in multiple areas: and (BU/LHU/MU) Art History and Graphic Design; (BU only) Painting; Drawing; Fabric Design; Printmaking; Sculpture; Photography; (LHU/MU only) 2D Media; 3D Media.

Degree Designation
Undergraduate

Student Outcomes
NASAD (National Association of Schools of Art and Design - accrediting body for Visual Arts) Required competencies required of Professional Degrees in Visual Arts:

Students graduating with BFA in Visual Arts degree must possess:
1. Studio Studies:Practice, and experiences in studio subjects are of prime importance in the preparation of students for professional careers in art and design. The excellence of the creative work produced by students is the best determinant of the adequacy of the studio studies offered by an institution. Studio work begins at the freshman level and extends with progressively greater intensity throughout the degree program. Creative work includes, but is not limited to, conceptualization, process, product, and critique.
Irrespective of major or specialization, students must:

a. Gain functional competence with principles of visual organization, including the ability to work with visual elements in two and three dimensions; color theory and its applications; and drawing.

b. Present work that demonstrates perceptual acuity, conceptual understanding, and technical facility at a professional entry level in their chosen field(s).

c. Become familiar with the historical achievements, current major issues, processes, and
directions of their field(s).

d. Be afforded opportunities to exhibit their work and to experience and participate in critiques and discussions of their work and the work of others.

e. Students engage in independent study at the advanced level that includes appropriate supervision and evaluation upon completion.

2. Art History Studies: Student must gain competency in Art/Design History, Theory, and Criticism. Through comprehensive courses in the history of
art/design, students must:

a. Learn to analyze works of art/design from both Western and non-Western cultures perceptively and to evaluate them critically.

b. Develop an understanding of the common elements and vocabulary of art/design and of the interaction of these elements, and be able to employ this knowledge in analysis.

c. Acquire the ability to place works of art/design in historical, cultural, and stylistic contexts.

3. Technology. Students must acquire a working knowledge of technologies and equipment applicable to their area(s) of specialization.

4. Synthesis. While synthesis is a lifetime process, by the end of undergraduate studies students should be able to work independently on a variety of art and/or

design problems by combining, as appropriate to the issue, their capabilities in studio, analysis, history, and technology.

5. Results: Upon completion of the Visual Arts BFA degree program:
a. Students must demonstrate achievement of professional, entry-level competence in the major area of specialization, including significant technical mastery, capability to produce work and solve professional problems independently, and a coherent set of artistic/intellectual goals that are evident in their work.

b. Students must demonstrate their competence by developing a body of work for evaluation in the major area of study. A senior project or final presentation in the major area is required.

3. Students must have the ability to form and defend value judgments about art and design and to communicate art/design ideas, concepts, and requirements to professionals and laypersons related to the practice of the major field. They are able to work collaboratively as appropriate to the area(s) of specialization.

ARAB-BA-Concentration - Languages & Cultures - Arabic Studies

General

Program Title
Languages & Cultures - Arabic Studies

Program Code
ARAB-BA-Concentration

Degree Designation
Bachelor of Arts

Campuses
Bloomsburg Campus, LockHaven Campus, Mansfield Campus

College
College of Arts, Humanities, Education and Social Sciences

Department
Languages, Literature & Writing

Program Description
The languages and cultures program combines general education, professional education, and language-specific courses with multiple field experiences in diverse communities. The Bachelor of Arts in Languages and Cultures prepares students for teaching, graduate study in languages and cultures, research, professional work, as well as service in government, nonprofits, or business. Our graduates are particularly valued for their multilingual and cross-cultural knowledge. B.A. in Languages and Cultures curriculum allows students to focus on either one or two foreign languages, including the option to combine their major with other disciplines as they work with advisers to plan for their future careers. The course work leads majors to explore cultural traditions and historical developments in various parts of the world, and to pursue applied vocabulary and practices that they can use in real-world situations locally, nationally, and globally. Special effort is made to develop intercultural communication competence. All our majors are strongly encouraged to complete a minor or a second major in another field. Concentrations are offered in Arabic, Chinese, French, Russian and East European Studies, Spanish, and Spanish Translation and Interpretation. Minors are offered in Arabic, Chinese, French, German and Central European Studies, Latin American Studies, Russian and East European Studies, and Spanish.

Degree Designation
Undergraduate

Student Outcomes
Communication (Communicate in Languages Other Than English)

Standard 1.1: Students engage in conversations, provide and obtain information, express feelings and emotions, and exchange opinions.
Standard 1.2: Students understand and interpret written and spoken language on a variety of topics.
Standard 1.3: Students present information, concepts, and ideas to an audience of listeners or readers on a variety of topics.

Cultures (Gain Knowledge and Understanding of Other Cultures)

Standard 2.1: Students demonstrate an understanding of the relationship between the practices and perspectives of the culture studied.
Standard 2.2: Students demonstrate an understanding of the relationship between the products and perspectives of the culture studied.

Connections (Connect with Other Disciplines and Acquire Information)

Standard 3.1: Students reinforce and further their knowledge of other disciplines through the foreign language.
Standard 3.2: Students acquire information and recognize the distinctive viewpoints that are only available through the foreign language and its cultures.

Comparisons (Develop Insight into the Nature of Language and Culture)

Standard 4.1: Students demonstrate understanding of the nature of language through comparisons of the language studied and their own.
Standard 4.2: Students demonstrate understanding of the concept of culture through comparisons of the cultures studied and their own.

Communities (Participate in Multilingual Communities at Home & Around the World)

Standard 5.1: Students use the language both within and beyond the school setting.
Standard 5.2: Students show evidence of becoming life-long learners by using the language for personal enjoyment and enrichment.

ARCH-Minor - Archaeology Minor

General

Program Title
Archaeology Minor

Program Code
ARCH-Minor

Campuses
Bloomsburg Campus

College
College of Arts, Humanities, Education and Social Sciences

Department
Anthro, Soc, CJ, SocWrk

Program Description
We propose a Minor in Archaeology at Commonwealth University of Pennsylvania. The Archaeology Minor prepares students for a career or graduate opportunities in archaeological research, Cultural Resource Management, and environmental conservation/management careers. Archaeology, by its very nature, is inter-disciplinary and collaborative; the proposed revisions to the Archaeology Minor will emphasize this, while also offering students greater flexibility in completing the minor and broadening their experiential opportunities in the data collection specialties of their choice.

Degree Designation
Undergraduate

Student Outcomes
Successful Archaeological Minors will be able to
1. Identify the ways in which diverse worldviews operate and are experienced at individual, cultural, and global levels and how they interact with human behavior, biology, material culture, and the environment.
2. Identify and describe anthropological theories and concepts relating to human bio-cultural evolution and the impact of historical forces in shaping approaches to understanding the human condition.
3. Demonstrate knowledge of anthropological ideas, ethics, applications, and research through written, visual and verbal analyses to communicate effectively within the discipline and to the public.
4. Interpret data and apply appropriate analytical techniques to evaluate potential solutions to biological, cultural, and environmental issues to promote informed decision-making and action.

ARTH-BA-Concentration

Degree Designation
Bachelor of Arts

Campuses
Bloomsburg Campus, LockHaven Campus, Mansfield Campus

College
College of Arts, Humanities, Education and Social Sciences

Department
Visual Arts

Program Description
The Bachelor of Arts in Visual Arts will offer students a NASAD accredited liberal arts degree in Visual Arts with a choice of concentration in multiple areas: Painting; Drawing; Fabric Design; Printmaking; Graphic Design; Sculpture; Photography; Digital Media; Ceramics and Art History.

Degree Designation
Undergraduate

Student Outcomes
NASAD (National Association of Schools of Art and Design - accrediting body for Visual Arts) Required competencies required of Liberal Arts Degrees in Visual Arts:

Students graduating with BA in Visual Arts degree with concentrations in Painting; Drawing; Fabric Design; Printmaking; Sculpture; Photography; Digital Media; and Ceramics upon graduation, students must possess:
a. A developed visual sensitivity.

b. The technical skills, perceptual development, and understanding of principles of visual
organization sufficient to achieve basic visual communication and expression in one or more media.

c. Ability to make workable connections between concept and media.

d. Some familiarity with the works and intentions of major artists/designers and movements of the past and the present, both in the Western and non-Western worlds.

5. Students should understand the nature of contemporary thinking on art and design, and have gained at least a rudimentary discernment of quality in design projects and works of art.

Students graduating with BA in Visual Arts degree with concentrations in Graphic Design upon graduation, students must possess:
a. Technical skills, perceptual development, and understanding of design and other principles of visual organization sufficient to achieve basic visual communication using one or more media associated with design.

b. Basic ability to demonstrate how relationships among design principles and the material
qualities of objects are incorporated into the production of design work, and how they contribute in terms of use and interpretation.

c. Functional knowledge of how the design of communication, products, environments, systems, and services both reflects and shapes various aspects of the context in which they are produced.

d. Understanding of the various levels at which design problems can be formulated and
addressed, and the ability to discern observable or potential consequences of specific design action in large, complex systems.

e. Ability to identify differences among audiences/users for design, and an understanding of how audience/user values and behaviors are reflected in the design of communications, products, environments, and services.

f. Understanding of design process, including abilities to consider probable or potential future conditions, think divergently in the generation of multiple solutions,

and use design principles and elements of the design process to converge on ideas and results that are effective in realizing project purposes.

g. Awareness of the critical perspectives in the evaluation of design, including the history of ideas about the role of design in culture and of ideas informing design practice over time.

h. For students emphasizing design scholarship, the ability to use overview knowledge of design practice, history, theory, criticism, and technology and the tools and techniques of research, scholarship, and communication in the production of scholarly analytical work about design.

Students graduating with BA in Visual Arts degree with concentrations in Art History upon graduation, students must possess:
a. A general knowledge of the monuments and principal artists of all major art periods of the past, including a broad understanding of the art of the twentieth century and acquaintance with the art history of non-Western cultures. This knowledge should be augmented by study in greater depth and precision of several cultures and periods in the history of art and concentration in at least one area to the advanced seminar level. Study at the advanced level should include theory, analysis, and criticism.

b. A general knowledge of world history.

c. Knowledge of the tools and techniques of scholarship. Active research and the writing of analytical and critical essays should continue throughout the program.

d. Functional knowledge of the creative process. Normally, this is accomplished through one or more foundation or other studio courses; however, there are many methods of ensuring this competence.

Department
Early Childhood Education and Exceptionality Programs

Program Description
The ASL/English Interpreting Program prepares our students to become interpreting professionals who
1. are critical thinkers
2. can apply ethical standards
3. demonstrate cultural and linguistic competencies in ASL and English
4. are life-long learners, incorporate best practices
5. embrace cultural diversity when serving and promoting social justice for the Deaf, Hard of Hearing, hearing, and DeafBlind in educational and community settings.

Degree Designation
Undergraduate

Student Outcomes
Upon completion of this program, students will perform the following competencies:
1. Interpret in a variety of contexts individually and as a supportive team interpreter in entry-level settings.
2. Assess Deaf and hearing consumers' language/communication preferences and then adjust the interpretation to that consumer's language/communication preferences.
3. Being aware of diversity and individual overlapping sectionality (included but not limited to race, gender, ethnicity, cultural background, language, sociao-economic status).

Athletic Training

Program Code
ATHL-MS-Major

Degree Designation
Master of Science

Campuses
LockHaven Campus

College
College of Health, Science, & Technology

Department
Rehabilitation Sciences

Program Description
The mission of Lock Haven University's Master of Science in Athletic Training Program is to develop healthcare professionals who utilize current best practices and clinical reasoning skills to provide the highest standard of patient-centered care. The program uses academic rigor, real-world experiences, and personal interactions with faculty to transform students into responsible and valued members of the medical community.

Degree Designation
Graduate

Student Outcomes
Student Learning Outcomes
Upon program completion, students will:
1. Achieve academic competency within the domains of athletic training.
2. Integrate didactic knowledge, clinical knowledge, and clinical reasoning skills in order to make independent clinical decisions that are guided by the professional literature.
3. Integrate the professional behaviors and attitudes of a healthcare provider into clinical practice.

Program Outcomes
The athletic training program will:
1. Provide a high-quality and contemporary didactic and clinical curriculum.
2. Produce highly skilled athletic trainers who are prepared to directly enter the workforce.
3. Experience growth in both the number and quality of students entering the program.

Completion Requirements

ATHT Program MS Athletic Training 2022.xlsx, ATTR Track Sheet MS Athletic Training 2016.docx, Grad Dean approval.pdf

AUDI-AUD-Major - Audiology

General

Program Title
Audiology

Program
Audiology

Program Code
AUDI-AUD-Major

Degree Designation
Doctorate of Audiology

Campuses
Bloomsburg Campus

College
College of Health, Science, & Technology

Department
Rehabilitation Sciences

Program Description
Doctor of Audiology (AuD) is a four-year entry-level clinical program placing major emphasis on clinical training and the practical application of research, theory, and technology into clinical practice. Students acquire knowledge and skills in the provision of diagnostic, counseling, and intervention services in a controlled manner. The first two years of the program emphasize didactic instruction and laboratory class work combining theory, practicality, and emerging technology. The emphasis in the final two years is on combining the theory with clinical learning experiences. The fourth year is a full year.

Degree Designation
Doctorate

Student Outcomes
Students will graduate with the Doctorate of Audiology (AuD) from an ASHA accredited program. Immediately upon graduation they will be eligible for state license to practice as an Audiologist. Students will be eligible for the ASHE Certificate of Clinical Competence.

Completion Requirements

Degree Map and Course Sequencing Plan
CSD AuD Program Tracking Sheet 2022.xlsx, CSD AuD Program Current Course Sequence 2022.docx, CSD AuD Program Proposed Course Sequence 2022.docx

AUSL-BS-Major - Audiology & Speech-Lang Path

General

Program Title
Audiology & Speech-Lang Path

Program
Audiology & Speech-Lang Path

Program Code
AUSL-BS-Major

Degree Designation
Bachelor of Science

College
College of Health, Science, & Technology

Department
Rehabilitation Sciences

Program Description
The Department of Communication Sciences and Disorders undergraduate curriculum in Speech-Language Pathology and Audiology is a pre-professional program that provides the student with a broad general education background with courses that introduce undergraduate students to the professions of speech-language pathology and audiology. The curriculum prepares students for graduate education in audiology, speech-language pathology, or intraoperative neurophysiologic monitoring through a comprehensive academic program.

Degree Designation
Undergraduate

Student Outcomes
The students will
1. Complete the Commonwealth University's general education requirements
2. Complete the B.S. in Audiology and Speech-Language Pathology program requirements
3. Meet the requirements to be admitted into an Audiology or Speech-Language Pathology graduate program
4. Be able to discuss the anatomy and physiology of the normal auditory system and speech and language mechanism
5. Be able to discuss the impact of the hearing on the development of speech and language
6. Be able to describe the processes involved in normal language acquisition
7. Be able to explain basic audiological assessment procedures
8. Be able to recognize basic speech and language assessment procedures
9. Be able to summarize basic methods of intervention to assist individuals with hearing loss
10. Be able to describe basis methods of speech and language intervention

Completion Requirements

Degree Map and Course Sequencing Plan
CSD MS SLP Program Tracking Sheet 2022.xlsx, CSD MS SLP Current Course Sequence.docx, CSD MS SLP Proposed Course Sequence.docx

BANK-Minor - Banking Minor

General

Program Title
Banking Minor

Program Code
BANK-Minor

Campuses
Bloomsburg Campus, Mansfield Campus, LockHaven Campus

College
Zeigler College of Business

Department
Business, Innovation, and Technology

Program Description
The Minor in Banking is intended to complement a student's primary major and designed to provide students with the knowledge, skills, and competencies needed for success in banking and related financial services industry. The program will be open to all students, both business or non-business, and will guide students through several fundamental courses to elevate their understanding of bank management and lead to a career path in banking.

Degree Designation
Undergraduate

Student Outcomes
Students who complete the program will be able to:
1. Discuss the importance of financial markets, financial services industry, and regulations.
2. Describe the role of banks in an economy and basic principles of commercial bank management.
3. Evaluate risk management techniques as applied to financial and non-financial entities.
4. Analyze how to implement an integrated enterprise risk management (ERM) program that mitigates risks and maximizes value of the firm.

BIFI-BS-Concentration - Biology: Fisheries

General

Program Title
Biology: Fisheries

Program Code
BIFI-BS-Concentration

Degree Designation
Bachelor of Science

Campuses
Mansfield Campus

College
College of Health, Science, & Technology

Department
Biological and Health Sciences

Program Description
The Commonwealth University of Pennsylvia - Mansfield campus Fisheries program prepares students to meet the highest professional standards in the field of fisheries sciences. Upon graduation students will meet all requirements for certification as an Associate Fisheries Scientists by the American Fisheries Society. This program places a high value on individual-based learning, critical thinking, communication, and problem-solving - making graduates highly competitive for employment or graduate school opportunities throughout the United States. The program is a track within the BS Biology degree program and provides extensive course work in three major areas of Fisheries Science: Aquaculture, Aquatic Ecology, and Fisheries Management. Unique features of the program include summer field courses and an internship. Cooperative agreements with Federal, State, and non government organizations are also integral components of the program.

Degree Designation
Undergraduate

Student Outcomes
1. Demonstrate knowledge of fishery science, with a particular emphasis on the biology, husbandry and management of aquatic organisms.

2. Identify and use appropriate tools for data collection in fisheries science.

3. Apply theoretical and technical knowledge of quantitative (mathematical and statistical) sciences to fisheries research and management problems.

4. Design and conduct quantitative fisheries stock assessments.

5. Write and communicate fisheries management recommendations using quantitative assessment results and management strategy evaluations

Completion Requirements

Degree Map and Course Sequencing Plan
MU biology degree requirements.docx, BS Biology - Fisheries curriculum guide_CUP.docx, BS Biology_Fisheries.xlsx, BS Biology_Fisheries.pdf

BIMB-BS-Concentration - Biology*Marine Biology

General

Program Title
Biology*Marine Biology

Program Code
BIMB-BS-Concentration

Degree Designation
Bachelor of Science

Campuses
Bloomsburg Campus, LockHaven Campus, Mansfield Campus

College
College of Health, Science, & Technology

Department
Biological and Health Sciences

Program Description
The Bachelor of Science Program in Biology provides a rigorous background in Biology, Chemistry, Physics, and Mathematics. The Marine Biology concentration within this degree program presents the necessary information, develop skills, and offer applicaton opportunities in Chemical, Physical, Geological, and Biological areas of Marine Science.

Degree Designation
Undergraduate

Student Outcomes
1. Demonstrate knowledge and comprehension in five core concepts of biology at varying scales (molecules to ecosystems)
2. Demonstrate the ability to apply critical, analytical, and integrative thinking to biological problems both in general and as it apples to the field of marine biology.
3. Apply the scientific method to design and conduct biological research, including analyzing and interpreting biological data in general and as it applies to marine biology.
4. Demonstrate skill and proficiency using appropriate scientific methods and instruments
5. Demonstrate knowledge in all aspects of Marine Science: Biological, Chemical, Physical, and Geological through clear communication of biological ideas with scientists and the general public in both written and oral form.
6. The student will develop techniques and skills for data collection in the field and laboratory as it relates to marine biology
7. The student will utilize knowledge and skills acquired to solve problems in Marine Science.

Completion Requirements

Degree Map and Course Sequencing Plan
BS Biology_Marine Biology.xlsx, BS Biology - Marine Biology curriculum guide_CUP.docx, RE_ Impact statement from EGGS.pdf, BS Biology_Marine Biology 2023.pdf, 3 page Track Sheet Marine Biology 2020_LHU.docx

BIMD-BS-Concentration - Biology: Med. Lab. Sciences

General

Program Title
Biology: Med. Lab. Sciences

Program Code
BIMD-BS-Concentration

Degree Designation
Bachelor of Science

Campuses
Bloomsburg Campus, LockHaven Campus, Mansfield Campus

College
Science and Technology

Program Description
The Bachelor of Science in Biomedical Sciences provides a rigorous background in biology, chemistry, physics, and mathematics. This program will meet the needs of students planning to enter a variety of graduate schools in biomedical sciences, entrance into a NAACLS accredited medical laboratory science program, and those seeking employment in healthcare and government agencies. Students may choose to specialize in one of the six concentrations: medical genomics and counseling, medical laboratory science, pre-physician assistant/associate, pre-medical sciences, pre-pharmacy, and pre-physical therapy.

Degree Designation
Undergraduate

Student Outcomes
Upon completion of this degree program, students will be able to:

1. describe the cellular basis of life.

2. describe the molecular and microbial mechanisms underlying human disease.

3. describe the integration between animal form and function.

4. describe the molecular biology of the gene and central dogma.

5. communicate using the conventions of biomedical sciences.

6. utilize biomedical laboratory tools and techniques to design experiments and analyze data.

7. gain and apply knowledge in specific content areas and proficiency in laboratory skills required of a medical laboratory professional

8. successfully complete a NAACLS accredited clinical program.

Completion Requirements

Degree Map and Course Sequencing Plan

Program
Biology

Program Code
BIOL-MS-Major

Degree Designation
Master of Science

Campuses
Bloomsburg Campus, LockHaven Campus, Mansfield Campus

College
College of Health, Science, & Technology

Department
Biological and Health Sciences

Program Description
Master of Science Biology program offers opportunities for study at the supra-organismal, organismal, cellular, and molecular levels of biology. A broad array of disciplines is represented among the faculty, allowing considerable flexibility in the selection of independent research topics. Thesis research may be carried out on campus, or at an off-campus site. Students can complete graduate level work in a traditional 4+2 format or complete the work in an accelerated 3+2 format. There will be two options for students to complete an MS Biology degree:

Thesis option - This option is recommended for students planning to continue their graduate studies or professional training. Students must complete a total of 30 credit hours of graduate course work, with at least 18 semester hours at the 500 level. A thesis is required for this option. Normally a student in this option will take 6 hours of thesis, and 24 hours of formal classroom course work. The thesis must be defended orally. Students in the Thesis Option do not carry out a Directed Study, as that experience is intended for the Non-thesis Option.

Students must complete a total of 30 credit hours of graduate course work, with at least 18 hours at the 500 level. Students choosing this option will not carry out a thesis. There are two sub-options within the non thesis option.

Sub-options:
Directed Study Sub-option — Students must complete at least 27 credit hours of graduate course work, and 3 credit hours of Directed Study in Biology. A directed study is a hands-on research experience smaller in scope than a thesis. Typically the directed study is completed within one semester. A written report is prepared, and presented orally to the Department.

Departmental Paper Sub-option — Students must complete at least 30 credit hours of graduate course work. They must complete a literature-based paper on a topic selected by the student and the academic advisor or mentor for the paper. The Departmental Paper carries no credit hour equivalent. The paper must be presented orally to the Biology Department.

Degree Designation
Graduate

Student Outcomes
Upon completion of the MS Biology degree students will:
1. Demonstrate advanced knowledge in specialized area of biology
2. Demonstrate quantitative and qualitative skills in the use of data gathering methods and data analysis techniques use for typical analyses in conducting research
3. Produce written and oral communications of professional quality
4. Participate in intellectual and organizational aspects of the profession, including ethical conduct of research

Completion Requirements

General

Program Title
Biology Minor

Program Code
BIOL-Minor

Campuses
Bloomsburg Campus, Mansfield Campus, LockHaven Campus

College
College of Health, Science, & Technology

Department
Biological and Health Sciences

Program Description
A minor in Biology is applicable to many different areas of study both within the College of Science and Technology and in other majors outside of the college. The minor provides depth and breadth of knowledge in the basic biological sciences while also allowing students to select upper level elective courses tailored to their post-graduate education and/or career goals.

Degree Designation
Undergraduate

Student Outcomes
Upon completion of the minor students will be able to:
1. Demonstrate knowledge of core concepts in biology (molecules to ecosystems)
2. Demonstrate the ability to apply critical, analytical, and integrative thinking to biological problems
3. Demonstrate skill using appropriate scientific methods and instruments
4. Clearly communicate biological ideas in both written and oral form

Program Description
The Zeigler College of Business Master of Business Administration Program provides students with a comprehensive educational experience that will prepare current and future business leaders with the knowledge and skills to be influential responsible citizens that perform in every industry.

Degree Designation
Graduate

Student Outcomes
1) Leadership Emergence.
Develop an understanding of an effective leader's critical characteristics and procedures with a group of individuals as they attain a shared goal.

2) Cultural Literacy.
Examine the importance of cultural capital and act as an authentic citizen of change with the ability to participate confidently in cultural spaces.

3) Business Innovations.
Investigate opportunities within the business process to promote organizational relevance and value creation.

4) Adaptability and Problem Solving.
Illustrate the use of adaptable managerial methods to determine the best course of action to solve problems effectively.

5) Analysis and Evaluation.
Utilize data and the application of systems to identify, assess, define, and solve problems across functional areas of business.

Visual Arts - Ceramics

Program Code
CERA-BA-Concentration

Degree Designation
Bachelor of Arts

Campuses
Bloomsburg Campus, LockHaven Campus, Mansfield Campus

College
College of Arts, Humanities, Education and Social Sciences

Department
Visual Arts

Program Description
The Bachelor of Arts in Visual Arts will offer students a NASAD accredited liberal arts degree in Visual Arts with a choice of concentration in multiple areas: Painting; Drawing; Fabric Design; Printmaking; Graphic Design; Sculpture; Photography; Digital Media; Ceramics and Art History.

Degree Designation
Undergraduate

Student Outcomes
NASAD (National Association of Schools of Art and Design - accrediting body for Visual Arts) Required competencies required of Liberal Arts Degrees in Visual Arts:

Students graduating with BA in Visual Arts degree with concentrations in Painting; Drawing; Fabric Design; Printmaking; Sculpture; Photography; Digital Media; and Ceramics upon graduation, students must possess:
a. A developed visual sensitivity.

b. The technical skills, perceptual development, and understanding of principles of visual
organization sufficient to achieve basic visual communication and expression in one or more media.

c. Ability to make workable connections between concept and media.

d. Some familiarity with the works and intentions of major artists/designers and movements of the past and the present, both in the Western and non-Western worlds.

5. Students should understand the nature of contemporary thinking on art and design, and have gained at least a rudimentary discernment of quality in design projects and works of art.

Students graduating with BA in Visual Arts degree with concentrations in Graphic Design upon graduation, students must possess:
a. Technical skills, perceptual development, and understanding of design and other principles of visual organization sufficient to achieve basic visual communication using one or more media associated with design.

b. Basic ability to demonstrate how relationships among design principles and the material
qualities of objects are incorporated into the production of design work, and how they contribute in terms of use and interpretation.

c. Functional knowledge of how the design of communication, products, environments, systems, and services both reflects and shapes various aspects of the context in which they are produced.

d. Understanding of the various levels at which design problems can be formulated and
addressed, and the ability to discern observable or potential consequences of specific design action in large, complex systems.

e. Ability to identify differences among audiences/users for design, and an understanding of how audience/user values and behaviors are reflected in the design of communications, products, environments, and services.

f. Understanding of design process, including abilities to consider probable or potential future conditions, think divergently in the generation of multiple solutions,

and use design principles and elements of the design process to converge on ideas and results that are effective in realizing project purposes.

g. Awareness of the critical perspectives in the evaluation of design, including the history of ideas about the role of design in culture and of ideas informing design practice over time.

h. For students emphasizing design scholarship, the ability to use overview knowledge of design practice, history, theory, criticism, and technology and the tools and techniques of research, scholarship, and communication in the production of scholarly analytical work about design.

Students graduating with BA in Visual Arts degree with concentrations in Art History upon graduation, students must possess:
a. A general knowledge of the monuments and principal artists of all major art periods of the past, including a broad understanding of the art of the twentieth century and acquaintance with the art history of non-Western cultures. This knowledge should be augmented by study in greater depth and precision of several cultures and periods in the history of art and concentration in at least one area to the advanced seminar level. Study at the advanced level should include theory, analysis, and criticism.

b. A general knowledge of world history.

c. Knowledge of the tools and techniques of scholarship. Active research and the writing of analytical and critical essays should continue throughout the program.

d. Functional knowledge of the creative process. Normally, this is accomplished through one or more foundation or other studio courses; however, there are many methods of ensuring this competence.

Chemistry

Program Code
CHEM-BA-Major

Degree Designation
Bachelor of Arts

Campuses
Bloomsburg Campus, LockHaven Campus, Mansfield Campus

College
College of Health, Science, & Technology

Department
Phys and Env Sci and Engr

Program Description
The Bachelor of Arts Program in Chemistry provides a rigorous background in chemistry, physics, and mathematics. This specific degree track is designed for students to create a tailored Bachelor's degree with a strong foundation in chemistry. This track will be important for students seeking dual majors (like Education), several minors, and/or enrolled in future 3+4 agreements with professional schools/programs (PharmD, Medicine, Law, etc.). This degree provides educational experience in the 5 foundational areas of chemistry (Organic, Inorganic, Physical, Analytical, and Biochemistry). The program will meet the needs of students planning to enter the chemical industry field, government chemistry/regulatory areas, professional schools, and some graduate programs.

Degree Designation
Undergraduate

Student Outcomes
1. Demonstrate knowledge and comprehension in the five foundational areas of chemistry (Organic, Inorganic, Physical, Analytical, Biochemistry).
2. Demonstrate the ability to apply critical, analytical, and integrative thinking to chemistry problems
3. Apply the scientific method to design and conduct research/laboratory work, including analyzing and interpreting data
4. Access, utilize, communicate information (information literacy) in an ethical and responsible manner.
5. Understand important safety principles in chemistry laboratories and demonstrate safe use of instrumentation

Department
Phys and Env Sci and Engr

Program Description
The Bachelor of Science Program in Chemistry provides a rigorous background in chemistry, physics, and mathematics. In seeking ACS program approval, this program will provide students experiences in the 5 foundational areas of chemistry (Organic, Inorganic, Physical, Analytical, and Biochemistry), experiences in a majority of upper-divisions of chemistry, and a capstone research/internship experience. The program will meet the needs of students planning to enter the chemical industry field, government chemistry/regulatory areas, professional schools, or graduate or schools in the natural sciences. This is base degree upon will all degree concentrations/options will be built upon.

Degree Designation
Undergraduate

Student Outcomes
1. Demonstrate knowledge and comprehension in the five foundational areas of chemistry (Organic, Inorganic, Physical, Analytical, Biochemistry).
2. Demonstrate the ability to apply critical, analytical, and integrative thinking to chemistry problems
3. Apply the scientific method to design and conduct research, including analyzing and interpreting data
4. Access, utilize, communicate information (information literacy) in an ethical and responsible manner.
5. Clearly communicate chemisrty information with scientists and the general public in both written and oral form
6. Understand important safety principles in chemistry laboratories and demonstrate safe use of instrumentation

General

Program Title
Chemistry Minor

Program Code
CHEM-Minor

Campuses
Bloomsburg Campus, Mansfield Campus, LockHaven Campus

College
College of Health, Science, & Technology

Department
Phys and Env Sci and Engr

Program Description
n Chemistry is designed for non-Chemistry majors to demonstrate additional specialization in the field of chemistry as part of an undergraduate degree. A minimum of 23 credits is required for the Minor.

Degree Designation
Undergraduate

Student Outcomes
Upon completion of the minor students will be able to:
1. Demonstrate proficiency in the laboratory practice in chemistry.
2. Demonstrate knowledge of core concepts in chemistry (symbiosis of structure to molecular activity)
3. Demonstrate the ability to apply critical, analytical, and integrative thinking to chemical problems
4. Demonstrate skill using appropriate scientific methods and instruments
5. Clearly communicate scientific ideas in both written and oral form

CHIN-BA-Concentration - Languages & Cultures - Chinese Studies

Program Title
Languages & Cultures - Chinese Studies

Program Code
CHIN-BA-Concentration

Degree Designation
Bachelor of Arts

Campuses
Bloomsburg Campus, LockHaven Campus, Mansfield Campus

College
College of Arts, Humanities, Education and Social Sciences

Department
Languages, Literature & Writing

Program Description
The languages and cultures program combines general education, professional education, and language-specific courses with multiple field experiences in diverse communities. The Bachelor of Arts in Languages and Cultures prepares students for teaching, graduate study in languages and cultures, research, professional work, as well as service in government, nonprofits, or business. Our graduates are particularly valued for their multilingual and cross-cultural knowledge. B.A. in Languages and Cultures curriculum allows students to focus on either one or two foreign languages, including the option to combine their major with other disciplines as they work with advisers to plan for their future careers. The course work leads majors to explore cultural traditions and historical developments in various parts of the world, and to pursue applied vocabulary and practices that they can use in real-world situations locally, nationally, and globally. Special effort is made to develop intercultural communication competence. All our majors are strongly encouraged to complete a minor or a second major in another field. Concentrations are offered in Arabic, Chinese, French, Russian and East European Studies, Spanish, and Spanish Translation and Interpretation. Minors are offered in Arabic, Chinese, French, German and Central European Studies, Latin American Studies, Russian and East European Studies, and Spanish.

Degree Designation
Undergraduate

Student Outcomes
Communication (Communicate in Languages Other Than English)

Standard 1.1: Students engage in conversations, provide and obtain information, express feelings and emotions, and exchange opinions.
Standard 1.2: Students understand and interpret written and spoken language on a variety of topics.
Standard 1.3: Students present information, concepts, and ideas to an audience of listeners or readers on a variety of topics.

Cultures (Gain Knowledge and Understanding of Other Cultures)

Standard 2.1: Students demonstrate an understanding of the relationship between the practices and perspectives of the culture studied.
Standard 2.2: Students demonstrate an understanding of the relationship between the products and perspectives of the culture studied.

Connections (Connect with Other Disciplines and Acquire Information)

Standard 3.1: Students reinforce and further their knowledge of other disciplines through the foreign language.
Standard 3.2: Students acquire information and recognize the distinctive viewpoints that are only available through the foreign language and its cultures.

Comparisons (Develop Insight into the Nature of Language and Culture)

Standard 4.1: Students demonstrate understanding of the nature of language through comparisons of the language studied and their own.
Standard 4.2: Students demonstrate understanding of the concept of culture through comparisons of the cultures studied and their own.

Communities (Participate in Multilingual Communities at Home & Around the World)

Standard 5.1: Students use the language both within and beyond the school setting.
Standard 5.2: Students show evidence of becoming life-long learners by using the language for personal enjoyment and enrichment.

Completion Requirements

CHLS-ChildLifeSpecialist-Minor - Child Life Specialist Minor

General

Program Title
Child Life Specialist Minor

Program Code
CHLS-ChildLifeSpecialist-Minor

Campuses
Bloomsburg Campus, LockHaven Campus, Mansfield Campus

College
College of Arts, Humanities, Education and Social Sciences

Department
Early Childhood Education and Exceptionality Programs

Program Description
The Department of Early Childhood Education seeks approval of the Minor in Child Life Specialist. Child Life is a well-respected, multidisciplinary, professional field that dates back to the beginning of the 20th century when innovative hospitals began introducing play programs for children as a means to address their unique developmental needs within health care settings. Child life specialists are pediatric health care professionals who work with children and families in hospitals and other settings to help them cope with the challenges of hospitalization, illness, and disability. They provide children with age-appropriate preparation for medical procedures, pain management and coping strategies, and play and self-expression activities. They also provide information, support, and guidance to parents, siblings, and other family members. Currently Child Life has a strong presence throughout North America, the United Kingdom, Japan, Kuwait, the Philippines, South Africa, Serbia, New Zealand, and Australia. Today, some 400 children's hospitals throughout North America provide child life services to pediatric patients and their families. Other common health care venues offering child life services include a variety of outpatient clinics, emergency departments, hospice and palliative care programs, various camps for children experiencing chronic illness, rehabilitation centers, pediatric dental offices, and some funeral homes.

The proposed minor in Child Life Specialist would be the first of its kind in the PSSHE System. Due to its multidisciplinary nature, the minor will appeal to a wide variety of undergraduate students from the College of Education, the College of Liberal Arts, the College of Science and Technology as well as non-degree students throughout PSSHE and beyond.

Through completion of the course sequence, student will learn to understand the competencies, standards, and scope of clinical practices of child life specialists; consider the impact of childhood illness and death within a family systems approach; recognize child and adolescent reactions to stress, illness, and hospitalization based upon developmental theories; and recognize the value of play and psychosocial supportive interventions. The success of the proposed minor in child life specialist will be measured annually through an exit survey and by meeting program recruitment goals.

To gauge the level of interest in the proposed minor, the Office of Planning and Assessment distributed a survey to a random sample of 1,519 students across the College of Science and Technology, College of Education, and College of Liberal Arts. About 98 percent of respondents indicated that they were interested in learning more about the proposed minor in Child Life Specialist, while 93 percent indicated they would consider enrolling in the minor. Overall, the respondents exhibited a high level of interest in the proposed minor in Child Life Specialist.

The United States Department of Labor, Bureau of Labor Statistics tracks occupational employment and wages each year. National estimates for child, family, and school social workers (which is the category in which child life specialists are housed) in 2016 (those providing social services and assistance to improve the social and psychological functioning of children and their families and to maximize the family wellbeing and the academic functioning of children) include 298,840 jobs with a mean annual wage of $47,510. This field is projected to grow 6% from 2014 to 2024. In 2016, Pennsylvania employed approximately 18,500 child, family, and school social workers with a mean annual wage of $41,000.

We propose that students earn a grade of C or better in all the required courses to count toward completion of the minor.

Degree Designation
Undergraduate

Student Outcomes

Program Description
The MS in Clinical Mental Health Counseling (CMHC) is an online, CACREP accredited 60 credit degree program that is designed to be consistent with the requirements for licensure as a professional counselor in Pennsylvania (049 PA Code § 49.13). The program's online, year-round (fall, spring, summer) web-based delivery enables working adults, as well as those with families, the flexibility to progress through the program on a part-time or full-time basis, at a reasonable pace, without interrupting their personal or professional responsibilities.

Degree Designation
Graduate

Student Outcomes
. The following are the SLO's:

1. Appraise key differences between counseling children, adolescents, and adults in the counseling process to include ethical and legal considerations
2. Assess children and adolescent needs to identify various disorders diagnoses that are common in both the children and adolescent population.
3. Apply evidence-based strategies and interventions to address common diagnoses among children and adolescents.
4. Identify strategies, approaches, and barriers to working with parents, guardians, school professionals, and other entities that can make up a multidisciplinary team of children and adolescents.

Counseling & Educational Lead

Program Description
Guided by the American School Counselor Association (ASCA) Standards for School Counselor Preparation Programs, our Pennsylvania Department of Education (PDE) approved graduate program in school counseling is aligned with national and state guidelines for professional practice. The program focuses on the critical work school counselors do in promoting leadership, advocacy, and systemic change to maximize student achievement, social-emotional development, and career readiness for all students in Grades PK-12.

Degree Designation
Graduate

Student Outcomes
1. Develop the identity and professional dispositions of a PK-12 school counselor, as outlined by the American School Counselor Association (ASCA) National Model and the Pennsylvania Department of Education (PDE).
2. Apply the ASCA ethical standards for school counselors to the profession.
3. Demonstrate counseling, interviewing, and case conceptualization skills.
4. Utilize a human development approach in understanding and responding to client concerns.
5. Facilitate individual counseling, group counseling, and classroom guidance interventions with students.
6. Select, administer, and interpret assessments to aid in educational and career planning.
7. Develop a counseling approach that is grounded in theoretical knowledge.
8. Create a developmental, comprehensive school counseling program that is informed by research and implemented using data driven decisions.
9. Adopt a culturally responsive approach in responding to the diverse needs of PK-12 students and their families.
10. Promote academic, social/emotional, and career development for all PK-12 students.

Program Description
This Health and Physical Education minor in Coaching is a collaboration with Sport Management faculty to offer students courses to strengthen their marketability as coaches and to provide a theoretical foundation for students to be successful coaching children, youth, adults and in collegiate and interscholastic athletics.

Degree Designation
Undergraduate

Student Outcomes
SLO 1: Achieve competency in at least one type of tactical sport (invasion sport, net sport, target sport, fielding and striking sport).

SLO 2: Plan and implement progressive and sequential athletic practice tasks that address diverse needs of all athletes.

SLO 3: Evaluate the changing dynamics of the practice and competition environment and adjust tasks and/or plans as needed to enhance athletes' progress.

SLO 4: Describe the historical, philosophical, societal, and social perspectives of sport.

COMM-Minor - Communication Studies Minor

General

Program Title
Communication Studies Minor

Program Code
COMM-Minor

Campuses
Bloomsburg Campus, LockHaven Campus, Mansfield Campus

College
College of Arts, Humanities, Education and Social Sciences

Department
Comm, Media and Journalism

Program Description
The Communication Studies minor is designed to complement any major. Employers are looking for individuals who speak and write well and who can work effectively with others. This minor will help students build those key skills through foundational coursework while allowing them to choose an area of focus through their selection of upper-level minor electives.

Degree Designation
Undergraduate

Student Outcomes
Students who complete the minor will meet all of the following program learning outcomes:

1. Students will present effective and appropriate messages in multiple communication modalities and contexts.
2. Students will integrate theory, research, and practice in a variety of communication contexts.
3. Students will exhibit social responsibility and professionalism in their communicative interactions with others.
4. Students will implement leadership knowledge and skills in a variety of contexts.
5. Students will display the communication skills necessary to engage in competent human relational interaction in multiple contexts.

Bachelor of Science

Campuses
Bloomsburg Campus

College
College of Health, Science, & Technology

Department
Math/Computer Sci/Dig Forensic

Program Description
Our ABET accredited Computer Science degree program is broadly based in core areas of computer science, with an emphasis on the design, analysis, and production of complex and reliable software. It is a rigorous program that meets ABET standards.

Our graduates will be prepared to advance in computing careers and lead in technical endeavors, or to pursue an advanced degree in computer science.

Computer Science Program Educational Objectives

Program educational objectives are broad statements that describe the career and professional accomplishments that the computer science program is preparing graduates to achieve.

Three to five years after graduation, our computer science alumni will be:
1. be professionally employed in the computing field
2. communicate and collaborate effectively in a team environment
3. continue to grow professionally by adapting to new technologies and assuming leadership responsibilities

Degree Designation
Undergraduate

Student Outcomes
The Computer Science Program has ten program learning outcomes listed under six categories.
• Software Engineering
1. Students will demonstrate strong programming skills involving at least two object-oriented languages.
2. Students will be able to write a significant application that efficiently utilizes a database for data storage and retrieval.
3. Students will be knowledgeable about software design processes and methodologies.

• Operating Systems
4. Students will have a strong understanding of operating system concepts.

• Hardware
5. Students will have a strong understanding of computer hardware concepts.

• Problem Solving
6. Students will be able to determine what Abstract Data Type (ADT) should be used to solve a problem and what data structure should be used to efficiently implement an ADT.
7. Students will be able to analyze the complexity of algorithms.
8. Students will be able to solve programming problems.

• Communication
9. Students will demonstrate oral and written communication skills necessary to read, write, and speak effectively about concepts in computing.

• Ethics
10. Students will understand ethical and legal issues involving digital technology.

COST-BA-Major - Communication Studies

General

Program Title
Communication Studies

Program
Communication Studies

Program Code
COST-BA-Major

Degree Designation
Bachelor of Arts

Campuses
Bloomsburg Campus, LockHaven Campus, Mansfield Campus

College
College of Arts, Humanities, Education and Social Sciences

Department
Comm, Media and Journalism

Program Description
Communication Studies is a discipline that involves the investigation and practice of face-to-face, small group, organizational, public, print, and mediated messages. Effective communication has long been recognized as the hallmark of an educated person and is vital to social and career success. The U.S. Department of Labor identifies listening, speaking, creative thinking, decision making, problem solving, reasoning, self-esteem, sociability, self-management, and integrity as qualities for outstanding job performance. Majoring in Communication Studies develops all these skills.

Students will select from one of three concentrations: Interpersonal Communication, Leadership and Public Advocacy, and Organizational Communication. Because faculty with the expertise to teach the upper level courses in the Interpersonal Communication and Leadership and Public Advocacy concentrations are located at the Bloomsburg campus, those two concentrations will be offered at the Bloomsburg campus only. The Organizational Communication concentration will be offered at all three campuses.

Students studying Interpersonal Communication focus on communication in human relations. Students develop competencies that allow them to explore human interactions, assess barriers to communication in relationships, and acquire communication skills necessary for successful personal and professional development. Study in this area prepares students for careers in social and human services such as counseling, public administration, health service management, and the ministry.

Students studying Leadership and Public Advocacy focus on the importance of communication in a democratic society. Students develop competencies that allow them to understand the public deliberative process, to assess and create messages, and to enhance their leadership skills. Study in this area prepares students for careers in law, government, media, international relations, speech writing, lobbying, campaign direction, public information, or elected office.

Students studying Organizational Communication focus on the importance of communication in business and professional settings. Students develop competencies that allow them to understand communication in professional organizations, develop professional communication skills, and to train others to communicate effectively in professional settings. Study in this area prepares students for careers in personnel recruitment and management, sales, corporate communication, development, fundraising, and employee orientation and training.

Degree Designation
Undergraduate

Student Outcomes
Upon graduation, students in all three concentration areas will be able to:

1. Present effective and appropriate messages in multiple communication modalities and contexts.
2. Integrate theory, research, and practice in a variety of communication contexts.
3. Exhibit social responsibility and professionalism in their communicative interactions with others.
4. Implement leadership knowledge and skills in a variety of contexts.
5. Display the communication skills necessary to engage in competent human relational interaction in multiple contexts.

Criminal Justice

Program
Criminal Justice

Program Code
CRJU-BS-Major

Degree Designation
Bachelor of Science

Campuses
Bloomsburg Campus, LockHaven Campus, Mansfield Campus

College
College of Arts, Humanities, Education and Social Sciences

Department
Anthro, Soc, CJ, SocWrk

Program Description
The Criminal Justice program at Commonwealth University prepares students for a career in criminal justice and the legal systems, as well as entry into graduate or law school. Through a career-focused curriculum, students will learn the fundamentals of criminology and criminal justice systems and explore the latest trends and contemporary issues in crime and criminal justice.

Through a combination of classroom study and experiential learning, students will gain an understanding of crime and criminal justice organizational systems while acquiring the ability to analyze and critique emerging research and current trends. The program's core curriculum covers areas such as law enforcement, criminal law, corrections and research methods, with a number of electives based on trends and contemporary issues in crime and criminal justice. The program encourages extra-curricular activities that provide opportunities for students to develop leadership skills which includes national clubs and organizations along with special events with the program. Criminal justice brings together people who are interested in learning and pursuing an academic and professional career in criminology, law enforcement, homeland security, juvenile justice system, corrections, courts, victimology, criminal investigation, criminal law, and other fields under the broad coverage of criminal justice.

Degree Designation
Undergraduate

Student Outcomes
SLO #1 (History): Describe the history and legal development of the criminal justice system and relate the impact of historical forces to the current roles of the police, courts, and corrections in administering justice.

SLO #2 (Communication): Construct coherent arguments, narratives, or explications of issues, problems, or processes to achieve shared understanding of meaning depending on the effective use of language across multiple expressive modes including digital platforms.

SLO #3 (Ethics): Describe basic ethical reasoning perspectives, articulate the origins of personal core beliefs, and critique the influence of ethical perspectives on issues within the criminal justice system.

SLO #4 (Diversity): Identify the ways in which power differentials operate, are experienced, and are reinforced at individual, group, community, institutional, and global levels and how they impact the criminal justice system.

SLO #5 (Theory): Compare and contrast criminological theories to evaluate the causes/correlates of crime as well as how society perceives and responds to criminal behavior.

SLO #6 (Research): Propose a researchable question, identify relevant sources in the academic literature, and formulate hypotheses to explain the causes and correlates of criminal behavior.

SLO #7 (Analysis): Interpret data and apply appropriate analytical techniques to critique criminological research and public policy.

Program Title
Creative Writing Minor

Program Code
CRWR-Minor

Campuses
Bloomsburg Campus, LockHaven Campus, Mansfield Campus

College
College of Arts, Humanities, Education and Social Sciences

Department
Languages, Literature & Writing

Program Description
Commonwealth University's Department of English has examined the pre-integration curricula taught at Bloomsburg University, Lock Haven University, and Mansfield University and created a three-track integrated curriculum.

Degree Designation
Undergraduate

Student Outcomes
Students in all tracks will

a. Interpret critically and analytically a range of literatures from different periods and perspectives. (Core Global Lit requirement, Diversity, Author in Context, and Lit and Culture courses, PDE I.C.)
b. Write clearly and effectively in a variety of creative, professional, and/or scholarly contexts. (Core Lit Studies requirement, Power of Language requirement, and Professionalization/Capstone requirement, PDE I.D.)
c. Research effectively using traditional and emerging resources. (Core Lit Studies requirement, upper division courses, and Professionalization/Capstone requirement, PDE I.F.)
d. Demonstrate an understanding of language, grammars, and linguistics. (Core Grammars requirement and Power of Language requirement, PDE I.A)

CSIT-BA-Concentration - Communication Studies - Interpersonal Communication

General

Program Title
Communication Studies - Interpersonal Communication

Program Code
CSIT-BA-Concentration

Degree Designation
Bachelor of Arts

Campuses
Bloomsburg Campus, LockHaven Campus, Mansfield Campus

College
College of Arts, Humanities, Education and Social Sciences

Department
Comm, Media and Journalism

Program Description
Communication Studies is a discipline that involves the investigation and practice of face-to-face, small group, organizational, public, print, and mediated messages. Effective communication has long been recognized as the hallmark of an educated person and is vital to social and career success. The U.S. Department of Labor identifies listening, speaking, creative thinking, decision making, problem solving, reasoning, self-esteem, sociability, self-management, and integrity as qualities for outstanding job performance. Majoring in Communication Studies develops all these skills.

Degree Designation
Undergraduate

Student Outcomes
Upon graduation, students in all three concentration areas will be able to:

1. Present effective and appropriate messages in multiple communication modalities and contexts.
2. Integrate theory, research, and practice in a variety of communication contexts.
3. Exhibit social responsibility and professionalism in their communicative interactions with others.
4. Implement leadership knowledge and skills in a variety of contexts.
5. Display the communication skills necessary to engage in competent human relational interaction in multiple contexts.

Master of Education

Campuses
Bloomsburg Campus

College
Education and Human Studies

Program Description
The College Student Affairs program in the M.Ed. in Educational Leadership degree offers a unique blend of coursework that prepares students for careers as student affairs educators. Courses may be available face-to-face, on-line, or as hybrid classes to enable students to engage in summer experiences outside of the local area. Students can earn the 36-credit degree in four semesters as a full-time student (9 to 12 credit hours per term) and may begin the graduate program in the fall or spring terms. As a key element of the program, students complete 6 credits (two semesters of 3 credits) of supervised Field Experience.

Degree Designation
Graduate

Student Outcomes
COLLEGE STUDENT AFFAIRS PROGRAM GOALS AND OBJECTIVES

Students completing this graduate program will:

1. Enact a scholar-practitioner philosophy, applying course learning to professional work experience
a. Discuss one's own conceptualization of a scholar-practitioner
b, Explain and demonstrate how a sch

Counseling & Educational Lead

Program Description
The Master of Education in Curriculum and Instruction allows students to have choice in building their degree with current interest and career goals. The program has four core courses (12 credits) and 18 elective credits that can be personalized as a concentration in a variety of areas from across the university program offerings.

Concentration Examples: Social Emotional Endorsement, English as a Second Language Certification, Alternative Education, Gamification, Online Instructional Design, and others.

The program serves as a means for current educators to achieve the required PDE 24 post-baccalaureate credits for Instructional II licensure, while growing knowledge and skills in a concentration of study that best aligns to current career goals. In recent years, the program has seen an increase in enrollment from professionals in the medical education profession seeking to learn more about curriculum, supervision, instruction, evaluation, and leadership.

NOTE: This program has been offered at Bloomsburg and has very beneficial for the University, Colleges across students, and students.

Degree Designation
Graduate

Student Outcomes
Acquire and apply knowledge of qualitative and quantitative research
Apply data driven decisions through action research
Acquire and apply knowledge of curriculum design, development, evaluation, modification, and types of curriculum
Acquire knowledge of federal, state, and local laws and regulations for school operations
Acquire and apply knowledge of leadership and ethics
Acquire knowledge of effective stewardship of various resources: financial, time, human capital, etc.
Additional outcomes are based upon the concentration chosen by the student.

DANC-Minor - Dance Minor

General

Program Title
Dance Minor

Program Code
DANC-Minor

Campuses
Bloomsburg Campus

College
College of Arts, Humanities, Education and Social Sciences

Department
Music, Theatre, and Dance

Program Description
The Dance Minor program consists of 21 credits. The credits cover a broad range of topics aimed at developing technique, exploring the history of the form, expanding performance skills, engaging with multi-cultural forms, and practicing the craft of dance-making. The program invites students to actively grow their knowledge of current and contemporary practices, philosophies, and allows for specialized student interests to emerge through independent studies. The program seeks to develop the student physically, intellectually, emotionally and artistically through a broad range of approaches including: coursework; performance-based experiences; mentorship of approved projects; individualized attention and feedback; applied experiences such as choreographic studies and collaborative projects; leadership opportunities and teaching development; guest artists and varied master classes.

Degree Designation
Undergraduate

Student Outcomes
When students have finished their minor, when paired with an appropriate major, they would be especially prepared to enter into such fields as dance teaching, graduate studies in physical therapy or movement therapy, nursing, K-12 arts education, or other body related areas of work. Additionally, students pursuing degrees in Theatre Arts would gain more skills for successful transition into the competitive marketplace. All students, especially those pursuing business, professional, or legal careers, would gain applicable skills in the areas of body language, poise, posture, and confidence. Students would gain tools for healthy living, an increased understanding of the body available as a tool for social change, and an appreciation for varied body types and cultures, as displayed through the global expression of body language and dance.

College
College of Health, Science, & Technology

Department
Math/Computer Sci/Dig Forensic

Program Description
The Applied Computer Science program combines elements of Lock Haven's existing successful programs with an additional track in Web Development. The Applied Computer Science program will have a common core of classes and the following three tracks.
• Data Science
• Mobile and Game Application Development
• Web Development

Degree Designation
Undergraduate

Student Outcomes
Three to five years after graduation, our Applied computer science alumni will be:
1. be professionally employed in the computing field
2. communicate and collaborate effectively in a team environment
3. continue to grow professionally by adapting to new technologies and assuming leadership responsibilities

Applied Computer Science Learning Outcomes
Students will be able to
1. Demonstrate strong problem-solving skills using technology appropriate to the problem domain.
2. Design, implement, and evaluate a computing-based solution to meet a given set of computing requirements in the context of the program's discipline.
3. Communicate effectively
4. Recognize professional responsibilities and make informed and equitable judgments in computing practice based on legal and ethical principles.
5. Function effectively as a member or leader of a team engaged in activities appropriate to the program track.

DFCS-BS-Major - Digit Forensics Cybersecurity

General

Program Title
Digit Forensics Cybersecurity

Program
Digit Forensics Cybersecurity

Program Code
DFCS-BS-Major

Degree Designation
Bachelor of Science

Campuses
Bloomsburg Campus

College
College of Health, Science, & Technology

Department
Math/Computer Sci/Dig Forensic

Program Description
The Digital Forensics and Cybersecurity program provides students the knowledge and skills to acquire, analyze and authenticate digital evidence. The curriculum emphasizes the location and structure of digital evidence, the techniques needed to extract and correlate digital evidence, and the reporting of results. Graduates will be prepared for careers in digital forensics or a related area or to pursue an advanced degree in a field of computing or information technology.

Our program allows students to study all aspects of cybersecurity. Strictly speaking, forensics is purely investigative (reactive) and security is purely preventive (proactive). In the cyber realm, these have considerable overlap. We integrate all aspects of cybersecurity and digital forensics.

We offer the only digital forensics and cybersecurity bachelor's degree in the Pennsylvania State System of Higher Education and serve as Pennsylvania's Center for Digital Forensics. Our graduates are working in law enforcement, homeland security agencies, law firms and private companies.

Degree Designation
Undergraduate

Student Outcomes
(1) Utilize operating system commands and utilities to examine processes and to store and access data at the file system level.

(2) Use Digital Forensics Software to analyze storage media.

(3) Apply a systematic, investigative process to acquire and analyze digital evidence using specialized software, automated and manual techniques.

(4) Write reports and present digital forensic and cybersecurity findings in a professional or courtroom setting.

(5) Design, secure and examine networks utilizing various tools and techniques.

Program Title
Visual Arts - Digital Media

Program Code
DIGI-BA-Concentration

Degree Designation
Bachelor of Arts

Campuses
Bloomsburg Campus, LockHaven Campus, Mansfield Campus

College
College of Arts, Humanities, Education and Social Sciences

Department
Visual Arts

Program Description
The Bachelor of Arts in Visual Arts will offer students a NASAD accredited liberal arts degree in Visual Arts with a choice of concentration in multiple areas: Painting; Drawing; Fabric Design; Printmaking; Graphic Design; Sculpture; Photography; Digital Media; Ceramics and Art History.

Degree Designation
Undergraduate

Student Outcomes
NASAD (National Association of Schools of Art and Design - accrediting body for Visual Arts) Required competencies required of Liberal Arts Degrees in Visual Arts:

Students graduating with BA in Visual Arts degree with concentrations in Painting; Drawing; Fabric Design; Printmaking; Sculpture; Photography; Digital Media; and Ceramics upon graduation, students must possess:
a. A developed visual sensitivity.

b. The technical skills, perceptual development, and understanding of principles of visual
organization sufficient to achieve basic visual communication and expression in one or more media.

c. Ability to make workable connections between concept and media.

d. Some familiarity with the works and intentions of major artists/designers and movements of the past and the present, both in the Western and non-Western worlds.

5. Students should understand the nature of contemporary thinking on art and design, and have gained at least a rudimentary discernment of quality in design projects and works of art.

Students graduating with BA in Visual Arts degree with concentrations in Graphic Design upon graduation, students must possess:
a. Technical skills, perceptual development, and understanding of design and other principles of visual organization sufficient to achieve basic visual communication using one or more media associated with design.

b. Basic ability to demonstrate how relationships among design principles and the material
qualities of objects are incorporated into the production of design work, and how they contribute in terms of use and interpretation.

c. Functional knowledge of how the design of communication, products, environments, systems, and services both reflects and shapes various aspects of the context in which they are produced.

d. Understanding of the various levels at which design problems can be formulated and
addressed, and the ability to discern observable or potential consequences of specific design action in large, complex systems.

e. Ability to identify differences among audiences/users for design, and an understanding of how audience/user values and behaviors are reflected in the design of communications, products, environments, and services.

f. Understanding of design process, including abilities to consider probable or potential future conditions, think divergently in the generation of multiple solutions,

and use design principles and elements of the design process to converge on ideas and results that are effective in realizing project purposes.

g. Awareness of the critical perspectives in the evaluation of design, including the history of ideas about the role of design in culture and of ideas informing design practice over time.

h. For students emphasizing design scholarship, the ability to use overview knowledge of design practice, history, theory, criticism, and technology and the tools and techniques of research, scholarship, and communication in the production of scholarly analytical work about design.

Students graduating with BA in Visual Arts degree with concentrations in Art History upon graduation, students must possess:
a. A general knowledge of the monuments and principal artists of all major art periods of the past, including a broad understanding of the art of the twentieth century and acquaintance with the art history of non-Western cultures. This knowledge should be augmented by study in greater depth and precision of several cultures and periods in the history of art and concentration in at least one area to the advanced seminar level. Study at the advanced level should include theory, analysis, and criticism.

b. A general knowledge of world history.

c. Knowledge of the tools and techniques of scholarship. Active research and the writing of analytical and critical essays should continue throughout the program.

d. Functional knowledge of the creative process. Normally, this is accomplished through one or more foundation or other studio courses; however, there are many methods of ensuring this competence.

Visual Arts BFA - Drawing

Program Code
DRAW-BFA-Concentration

Degree Designation
Bachelor of Fine Arts

Campuses
Bloomsburg Campus

College
College of Arts, Humanities, Education and Social Sciences

Department
Visual Arts

Program Description
The Bachelor of Fine Arts in Visual Arts will offer students a NASAD accredited professional degree in Visual Arts with a choice of concentration in multiple areas: and (BU/LHU/MU) Art History and Graphic Design; (BU only) Painting; Drawing; Fabric Design; Printmaking; Sculpture; Photography; (LHU/MU only) 2D Media; 3D Media.

Degree Designation
Undergraduate

Student Outcomes
NASAD (National Association of Schools of Art and Design - accrediting body for Visual Arts) Required competencies required of Professional Degrees in Visual Arts:

Students graduating with BFA in Visual Arts degree must possess:
1. Studio Studies:Practice, and experiences in studio subjects are of prime importance in the preparation of students for professional careers in art and design. The excellence of the creative work produced by students is the best determinant of the adequacy of the studio studies offered by an institution. Studio work begins at the freshman level and extends with progressively greater intensity throughout the degree program. Creative work includes, but is not limited to, conceptualization, process, product, and critique.
Irrespective of major or specialization, students must:

a. Gain functional competence with principles of visual organization, including the ability to work with visual elements in two and three dimensions; color theory and its applications; and drawing.

b. Present work that demonstrates perceptual acuity, conceptual understanding, and technical facility at a professional entry level in their chosen field(s).

c. Become familiar with the historical achievements, current major issues, processes, and
directions of their field(s).

d. Be afforded opportunities to exhibit their work and to experience and participate in critiques and discussions of their work and the work of others.

e. Students engage in independent study at the advanced level that includes appropriate supervision and evaluation upon completion.

2. Art History Studies: Student must gain competency in Art/Design History, Theory, and Criticism. Through comprehensive courses in the history of
art/design, students must:

a. Learn to analyze works of art/design from both Western and non-Western cultures perceptively and to evaluate them critically.

b. Develop an understanding of the common elements and vocabulary of art/design and of the interaction of these elements, and be able to employ this knowledge in analysis.

c. Acquire the ability to place works of art/design in historical, cultural, and stylistic contexts.

3. Technology. Students must acquire a working knowledge of technologies and equipment applicable to their area(s) of specialization.

4. Synthesis. While synthesis is a lifetime process, by the end of undergraduate studies students should be able to work independently on a variety of art and/or

design problems by combining, as appropriate to the issue, their capabilities in studio, analysis, history, and technology.

5. Results: Upon completion of the Visual Arts BFA degree program:
a. Students must demonstrate achievement of professional, entry-level competence in the major area of specialization, including significant technical mastery, capability to produce work and solve professional problems independently, and a coherent set of artistic/intellectual goals that are evident in their work.

b. Students must demonstrate their competence by developing a body of work for evaluation in the major area of study. A senior project or final presentation in the major area is required.

3. Students must have the ability to form and defend value judgments about art and design and to communicate art/design ideas, concepts, and requirements to professionals and laypersons related to the practice of the major field. They are able to work collaboratively as appropriate to the area(s) of specialization.

DSTC-BA-Concentration - Theatre - Design/Technology

General

Program Title
Theatre - Design/Technology

Program Code
DSTC-BA-Concentration

Degree Designation
Bachelor of Arts

Campuses
Bloomsburg Campus

College
College of Arts, Humanities, Education and Social Sciences

Department
Music, Theatre, and Dance

Program Description
This program is designed to allow Commonwealth University to continue the National Association of Schools of Theatre accreditation held by BU prior to integration. The Theatre major was identified in the program array as one being housed at the BU campus location.

The mission of the Division of Theatre and Dance is to provide a strong undergraduate education in the theory and practice of theatre and dance, to support the University's general education curriculum, and to enhance the cultural life of the campus community. The Division's goal is to develop students' working knowledge and application of historical and contemporary theories and practices in performance, design and technology, and dramatic and critical literature. We strive to develop artists who are imaginative critical thinkers and effective communicators producing art that celebrates humanity and challenges complacency.

The Theatre & Dance Strategic Plan outlines 4 main areas of focus:
1. Academic Excellence

In line with the fundamental mission of the academy, the Division of Theatre and Dance seeks to promote a thorough understanding of theory and practice in our artistic disciplines.

Toward this end, we encourage students to explore both historical foundations and current innovations affecting these pursuits.

This philosophy is in keeping with the ideas and approaches to arts education advocated for by our accrediting body: "Professionals know from personal experience that art, though dependent on talent, inspiration, and creativity, requires much more to function as a significant spiritual and educational force. Talent without skills, inspiration without knowledge, and creativity without technique count for little but lost potential."

2. Artistic Quality

The Division of Theatre and Dance seeks to support artistic excellence in the work of both students and faculty, on campus and beyond the limits of the academy.

This philosophy is in keeping with the ideas and approaches to arts education advocated for by our accrediting body: "Dance, music, theatre, and the visual arts are professions requiring talent, knowledge, skill, and dedication. Professional artists have created some of man's highest achievements. Yet, artists need no license to practice: employment and success depend almost entirely on competence demonstrated through audition or portfolio review."

3. Cultural Enhancement & Diversification of the Campus & Broader Community

The Division of Theatre and Dance seeks to offer a range of theatre and dance genres and styles and to broaden community access to, and attendance at, these events.

4. Public Awareness

The Division of Theatre and Dance has a history of excellent instruction resulting in both program and graduate success. Part of our efforts will be dedicated toward communicating that excellence to the broader community.

Degree Designation
Undergraduate

Student Outcomes
There are five primary student learning outcomes for the major:

History/Criticism/Literature: Graduates of the program will recognize and be able to communicate trends in theatre history, dramatic structure, dramatic styles associated with various periods, and characteristics of the work of important theatre practitioners.

Knowledge of Design Process: Graduate of the program will have a working knowledge of the theatrical design process and the basic skills necessary to develop initial design ideas, research and present the design ideas, and collaboratively integrate them into an initial design concept presentation.

Knowledge of Acting: Graduates of the program will have a working knowledge of the practice of acting and the basic skills for performance.

Rehearsal, Construction, and Performance: Graduates of the program will demonstrate a working knowledge of appropriate rehearsal, construction, and performance practices through application in theatrical disciplines in a collaborative production setting.

Specific Theatrical Discipline: Graduates of the program will demonstrate appropriate skills for future personal and professional success in a specific theatrical discipline or area.

EASS-BSED-Concentration - Secondary Education - Earth and Space Science

General

Program Title
Secondary Education - Earth and Space Science

Program Code
EASS-BSED-Concentration

Degree Designation
Bachelor of Science in Education

Campuses
Bloomsburg Campus, Mansfield Campus, LockHaven Campus

College
College of Arts, Humanities, Education and Social Sciences

Department
K-12, HPE, Mid Level & Sec Ed

Program Description
In accordance with the Pennsylvania Department of Education (PDE), this professional preparation degree program enables teacher education candidates to meet Science content competencies by taking courses required within the Earth and Space Science Bachelor's degree program. In addition, these teacher candidates will demonstrate pedagogical knowledge and competence in their knowledge of teaching inquiry based laboratory experiences and the fundamental concepts of science to school students grades 7-12. This program aligns with "Next Generation Science Standards" developed by the National Science Teaching Association (NSTA) and program competencies outlined by the Council for Accreditation of Education Preparation (CAEP).

Degree Designation
Undergraduate

Student Outcomes
Learning Outcome 1: Secondary level education earth and space science teacher candidates demonstrate pedagogical knowledge and content area competence, including basic principles of the nature of science, scientific method and inquiry based laboratory experiences. As well as the fundamentals earth science and space science for teaching students in grades 7-12.
Learning Outcome 2:

ECCA-CESB-Major - Early Child Curr & Assessment

General

Program Title
Certificate in Curr & Assessment for Early Child

Program
Early Child Curr & Assessment

Program Code
ECCA-CESB-Major

Degree Designation
CESB

Campuses
Bloomsburg Campus, LockHaven Campus, Mansfield Campus

College
College of Arts, Humanities, Education and Social Sciences

Department
Early Childhood Education and Exceptionality Programs

Program Description
Students must receive the Sub-Baccalaureate Certificate in Early Childhood Development, Education, and Family before they are eligible to earn this Certificate. This pre-requisite certificate includes the 6 credits of pre-requisite coursework making this sub-baccalaureate degree 9 credits rather than 15.

To receive this Certificate, students will complete 3 courses (9 credits). The courses are ECED210, ECED230, and ECED220 (see background info for graphic). All three courses are part of the baccularеate program in PreK-Grade 4/Early Childhood Education and would also stack into the AAs in ECE when it is proposed. These courses will give students a foundation in observation and assessment as well as curriculum methods (literacy, mathematics, science, and social studies) for young children prior to 1st grade.

The hope is that this certificate will draw in new student enrollment from individuals currently working in Head Start, child care, and PreK Counts classrooms who need to undertake additional education/training to meet requirements of their employers.

Many of those working in birth-PreK settings are eligible for tuition assistance through the T.E.A.C.H. Early Childhood scholarship program and the Rising STARS Tuition Assistance Program. In addition, for those wishing to use these three courses toward the CDA credential, there is a State CDA Assessment Fee Voucher Program to cover the cost of applying.

Degree Designation
Undergraduate

Student Outcomes
The Pennsylvania Key, a partner of the Pennsylvania Office of Child Development and Early Learning, has identified specific competencies that all early learning professionals should have. These include Knowledge Area (K2) Curriculum and Learning Experiences, and Knowledge Area (K4) Assessment. The three courses that are part of this certificate align perfectly with these Professional Development Knowledge Areas and thus will fit well with the professional development plans of those working in pre-elementary settings.

College
College of Arts, Humanities, Education and Social Sciences

Department
Early Childhood Education and Exceptionality Programs

Program Description
To receive this certificate, students will complete 3 courses (9 credits). The courses are ECED110, ECED120, and CHLS345. All three courses stack into the current bacalaureate degree certification program in PreK-Grade 4/Early Childhood Education and would also stack into the Applied Associates degree in ECE should it be approved in the future. These courses will give students a foundation in the field of Early Childhood Education and serve as prerequisites to a number of other courses in the ECE baccularеate course of study.

Many of those working in birth-PreK settings are eligible for tuition assistance through the T.E.A.C.H. Early Childhood scholarship program and the Rising STARS Tuition Assistance Program. In addition, for those wishing to use these three courses toward the CDA credential, there is a State CDA Assessment Fee Voucher Program to cover the cost of applying.

The hope is that this certificate will draw in new student enrollment from individuals currently working in Head Start, child care, and PreK Counts classrooms who need to undertake additional education/training to meet requirements of their employers.

Degree Designation
Undergraduate

Student Outcomes
The Pennsylvania Key, a partner of the Pennsylvania Office of Child Development and Early Learning, has identified specific competencies that all early learning professionals should have. These include: Knowledge Area (K1) Child Growth and Development; Knowledge Area (K2) Curriculum and Learning Experiences; Knowledge Area (K3) Families, Schools and Communikty Collaboration and Partnerships; Knowledge Area (K4) Assessment; and Knowledge Area (K6) Professionalism and Leadership. The three courses that are part of this certificate align perfectly with these Professional Development Knowledge Areas and thus will fit well with the professional development plans of those working in pre-elementary settings.

Students who complete this certificate will be eligible to apply for the Child Development Associate (CDA) credential. The CDA is a nationally recognized credential for those working in birth-PreK educational and care settings. It is offered through the Council for Professional Recognition.

ECEC-BS-Concentration - Ecology & Environ Conservation

General

Program Title
Ecology & Environ Conservation

Program Code
ECEC-BS-Concentration

Degree Designation
Bachelor of Science

Campuses
Bloomsburg Campus, LockHaven Campus, Mansfield Campus

College
Science and Technology

Department
Biology

Program Description
The Bachelor of Science Program in Biology provides a rigorous background in biology, chemistry, physics, and mathematics. The Ecology and Environmental Conservation track tailors the core requirements and electives to emphasize skill development in ecology, field biology, and environmental sciences. Students who complete this track will be prepared for careers in environmental protection, natural resource management, and conservation with state and federal agencies and conservation organizations.

Degree Designation
Undergraduate

Student Outcomes
1. Demonstrate knowledge and comprehension in five core concepts of biology at varying scales (molecules to ecosystems)
2. Demonstrate the ability to apply critical, analytical, and integrative thinking to biological problems
3. Apply the scientific method to design and conduct biological research, including analyzing and interpreting biological data
4. Demonstrate skill and proficiency using appropriate scientific methods and instruments
5. Clearly communicate biological ideas with scientists and the general public in both written and oral form
6. Demonstrate the ability to select and use technology appropriate to the work of the discipline.
7. Apply biological knowledge to understand and propose solutions to complex environmental problems

Early Childhood Education

Program Description
Undergraduate bachelors degree coursework required for PA teacher certification in grades Prekindergarten through Four

Degree Designation
Undergraduate

Student Outcomes
1a. Knowing and understanding young children's characteristics and needs, from birth through age 8.
b. Knowing and understanding the multiple influences on development and learning
c. Using developmental knowledge to create healthy, respectful, supportive, and challenging learning environments for young children
2a. Knowing about and understanding family and community characteristics
b. Supporting and empowering families and communities through respectful, reciprocal relationships.
c. Involving families and communities in their children's development and learning.
3a. Understanding the goals, benefits, and uses of assessment – including its use in development of appropriate goals, curriculum, and teaching strategies for children
b. Knowing about and using observation, documentation, and other appropriate assessment tools and approaches, including the use of technology in documentation, assessment and data collection.
c. Understanding and practicing responsible assessment to promote positive outcomes for each child, including the use of assistive technology for children with disabilities.
d. Knowing about assessment partnerships with families and with professional colleagues to build effective learning environments
4a. Understanding positive relationships and supportive interactions as the foundation of their work with young children
b. Knowing and understanding effective strategies and tools for early education, including appropriate uses of technology
c. Using a broad repertoire of developmentally appropriate teaching /learning approaches
d. Reflecting on own practice to promote positive outcomes for each child
5a. Understanding content knowledge and resources in academic disciplines: language and literacy; the arts – music, creative movement, dance, drama, visual arts; mathematics; science, physical activity, physical education, health and safety; and social studies.
b. Knowing and using the central concepts, inquiry tools, and structures of content areas or academic disciplines
c. Using own knowledge, appropriate early learning standards, and other resources to design, implement, and evaluate developmentally meaningful and challenging curriculum for each child.

Program
Economics

Program Code
ECON-BA-Major

Degree Designation
Bachelor of Arts

Campuses
Bloomsburg Campus, LockHaven Campus, Mansfield Campus

College
Zeigler College of Business

Department
Business, Innovation, and Technology

Program Description
The Economics program offers three tracks of General Economics, Business Economics and Political Economics under a single major.

The General Economics Track: is designed to prepare students for Economic research and consulting. Students develop models of specific markets, collect and work with data, summarize and present information, and conduct research, interpret the results and present and report them. This track is often used by students who are interested in graduate study in Economics.

In addition, an economics major is one of many paths to a law program. Many career in law involve economic decisions.

Degree Designation
Undergraduate

Student Outcomes
The Economics curriculum offers a systematic study of the economic activities of firms, households, and government. The core of the curriculum enables students to master basic principles of economics, develop analytical skills, and interpret economic phenomena. The learning goals and outcomes for all tracks are as follows:

1) Outline a variety of economic theories; describe their assumptions; and state their predictions.
2) Apply an economic model; and collect, summarize, and explain data.
3) Assess an argument about a current economic, social, and political issue; formulate and test a hypothesis; and interpret the results.
4) Discuss original interpretations of an economic analysis, and support an argument based on relevant literature.

ECON-BSBA-Concentration - International Business - Economics

General

Program Title
International Business - Economics

Program Code
ECON-BSBA-Concentration

Degree Designation
Bachelor of Science in Business Administration

Campuses
Bloomsburg Campus, LockHaven Campus, Mansfield Campus

College
Zeigler College of Business

Department
Management

Program Description
The international business program is uniquely designed with a qualitative liberal arts foundation, a business core, an interdisciplinary IB core including a short-term faculty-led study abroad opportunity, and an Economics specialization that provides students with analytical skills to interpret economic phenomena in the international environment in addition to the required business core and IB major knowledge, which increases their job marketability after graduation. Our program strives to meet relevant industry and professional competencies to ensure rigorous attainment of necessary knowledge, skills, and abilities.

Degree Designation
Undergraduate

Student Outcomes
Students who complete the program will be able to:
• Acquire knowledge, skills, and abilities to conduct business in an international setting;
• Recognize the complexity of international business through course work and participation in the study abroad program;
• Develop an appreciation of cultural diversity;
• Apply functional expertise in managing multi-national business enterprises;
• Analyze the challenges expatriates may face in a foreign environment such as security, food, language, cultural and climatic adjustment, medical practices, diversity of ethical practices, diversity of political ideologies, and religious beliefs;
• Build flexibility in dealing with logistics of international travel;
• Demonstrate willingness to learn and show geocentric values and non-ethnocentric disposition.
• Apply economic knowledge and skills in international business setting.

General

Program Title
Economics Minor

Program Code
ECON-Minor

Campuses
Bloomsburg Campus, LockHaven Campus, Mansfield Campus

College
Zeigler College of Business

Department
Business, Innovation, and Technology

Program Description
The Economics program offers a minor in Economics which is designed to provide a strong Economics background. The minor is often used by students who already have a major, and use economics minor to complement their own major; and/or further their education in economics with the aim of exploring the possibility of a major in economics or having the opportunity to pursue a further study or career in economics.

Degree Designation
Undergraduate

Student Outcomes
The Economics curriculum offers a systematic study of the economic activities of firms, households, and government. The core of the curriculum enables students to master basic principles of economics, develop analytical skills, and interpret economic phenomena. The learning goals and outcomes for economics minor are as follows:

1) Outline a variety of economic theories; describe their assumptions; and state their predictions.
2) Apply an economic model; and collect, summarize, and explain data.

College
College of Education and Human Studies

Department
Middle Level/Secondary/K-12 Ed

Program Description
In accordance with the Pennsylvania Department of Education (PDE), this professional preparation minor program enables teacher education candidates to demonstrate pedagogical knowledge and competence in educational technology which includes educational technology foundations, E-Learning, multimedia/digital video, technologies for K-12 online teaching, website design, and field experience (application) in grades K-12. All course requirements also align to competencies/standards determined by the International Society for Technology in Education (ISTE).

Degree Designation
Undergraduate

Student Outcomes
SLO1: K-12 education teacher candidates demonstrate pedagogical knowledge and content area competence in integrating educational technology across curriculum.
SLO2: K-12 education teacher candidates identify, describe, and apply emerging technologies in teaching and learning environments.
Learning Outcome 3:
K-12 education teacher candidates plan, design, and assess effective learning environments and experiences.

Learning Outcome 4:
K-12 education teacher candidates implement curriculum methods and strategies that use technology to maximize student learning.

Learning Outcome 5:
K-12 education teacher candidates develop technology-enabled assessment and evaluation strategies.

Learning Outcome 6:
K-12 education teacher candidates compare and contrast social, ethical, and legal issues surrounding technology.

Electronics & Engineering Tech

Program Code
EETC-BS-Major

Degree Designation
Bachelor of Science

Campuses
Bloomsburg Campus

College
College of Health, Science, & Technology

Department
Phys and Env Sci and Engr

Program Description
Our ABET accredited Electronics Engineering Technology (EET) program is broadly based in core areas of electrical engineering, with an emphasis on the analysis, design, development, and testing of electrical/electronic systems. Systems integration using both hardware and software is a strength of the program. It is a rigorous program that is ABET accredited since 2005.

A six-month full-time cooperative experience in industry is a key component and an attractive feature of the program. The program is supported by an active Industrial Advisory Board (IAB), consisting of representatives from multiple area industries. Our graduates are highly sought after by industries in Pennsylvania and beyond.

The home campus for the EET program will be Bloomsburg. However, students at LHU and MU can start the EET program at their home institution as a freshman or sophomore. Starting the junior year, students will continue with the EET major by taking discipline-specific courses at BU.

The EET program educational objectives (PEOs) are to produce graduates that are prepared for:
1. Career fields associated with the research, integration, programming, and application of technology to design, analyze, develop, manufacture, modify, operate, and maintain contemporary electrical and electronic products and systems.
2. Career advancement and continuing professional development.
3. Understanding the importance of communication in a technical environment, and the overall societal context within which their contributions take place.

Degree Designation
Undergraduate

Student Outcomes
The EET program uses the ABET Criterion-3 Student Outcomes (a-through-k) as the program student outcomes, and they are listed below.

a. Ability to select and apply the knowledge, techniques, skills, and modern tools of the discipline to broadly-defined engineering technology activities
b. Ability to select and apply a knowledge of mathematics, science, engineering, and technology to engineering technology problems that require the application of principles and applied procedures or methodologies
c. Ability to conduct standard tests and measurements; to conduct, analyze, and interpret experiments; and to apply experimental results to improve processes
d. Ability to design systems, components, or processes for broadly-defined engineering technology problems appropriate to program educational objectives
e. Ability to function effectively as a member or leader on a technical team
f. Ability to identify, analyze, and solve broadly-defined engineering technology problems
g. Ability to apply written, oral, and graphical communication in both technical and nontechnical environments; and an ability to identify and use appropriate technical literature
h. Understanding of the need for and an ability to engage in self-directed continuing professional development
i. Understanding of and a commitment to address professional and ethical responsibilities including a respect for diversity
j. Knowledge of the impact of engineering technology solutions in a societal and global context
k. Commitment to quality, timeliness, and continuous improvement

Program Title
Middle Level English/Language Arts (4-8)

Program Code
ELA4-BSED-Concentration

Degree Designation
Bachelor of Science in Education

Campuses
Bloomsburg Campus, LockHaven Campus, Mansfield Campus

College
College of Arts, Humanities, Education and Social Sciences

Department
K-12, HPE, Mid Level & Sec Ed

Program Description
In accordance with the Pennsylvania Department of Education (PDE), this professional preparation degree program enables teacher education candidates to meet English content competencies for grades 4-8 by taking courses required within the English Bachelors degree program. This professional program focuses on an English concentration while providing three “generalist” or supporting academic content areas in Math, general science, and Social Studies. The Professional Core courses, competencies and experiences for the grade 4-8 teacher preparation program have been designed to address the broad set of issues, knowledge and competencies that are relevant to middle level teaching and learning. The program therefore prepares teachers who will be able to ensure students’ mastery of academic standards and the content assessment anchors. This program aligns with standards outlined by the Association for Middle Level Education (AMLE). Successful graduates of this program will be certified to teach English at the 4-8 grade level.

Degree Designation
Undergraduate

Student Outcomes
Learning Outcome 1:
Middle Level education teacher candidates demonstrate pedagogical knowledge and content area competence, including foundations in reading research, word level instruction, text level comprehension, reading - writing connection, instructional approaches and materials, and assessment in literacy.

Learning Outcome 2:
Middle Level education teacher candidates understand the major concepts, principles, theories, and research related to adolescent development and provide opportunities that support student development and learning.

Learning Outcome 3:
Middle Level education teacher candidates understand and use the central concepts, tools of inquiry, standards, research and structures of content to plan and implement curriculum that develops student competence in subject matter.

Learning Outcome 4:
Middle Level education teacher candidates understand and use the major concepts, principles, theories, and research related to data-driven instruction and assessment, and they employ a variety of strategies for a developmentally appropriate climate to meet the varying abilities and learning styles of learners.

Learning Outcome 5:
Middle Level education teacher candidates will demonstrate understanding the complexities of teaching in grades 4-8, and engage in professional development to continually improve their practices and behaviors.

Learning Outcome 6:
Middle Level education teacher candidates will apply culturally relevant practices to embrace diversity, provide opportunities for student equity, and practice inclusivity.

Program Description
The Department of Media and Journalism prepares students to learn how to continually adapt to an ever-changing and evolving media environment. This is achieved through the development of such skills as storytelling, information literacy, the ability to create media using the latest technology as well as how their role in the media connects to society at large, core skills necessary to effectively use media to reach desired audiences.

Degree Designation
Undergraduate

Student Outcomes
Narrative Skills - Students will apply knowledge of storytelling skills to produce effective stories and strategic communication in multiple forms and contexts specific to their chosen area of concentration in mass media/communication.

Information Literacy - Students will demonstrate the ability to find, critically evaluate, and legally and ethically use information sources using appropriate methods and technologies.

Media Literacy - Students will develop the ability to access, analyze, evaluate and create media. This includes the technical and aesthetic skills and knowledge of the technology required to produce various media.

Civic Engagement - Students will demonstrate knowledge and application of the mass media's role in a democracy as well as in an increasingly diverse and globalized society.

EMRM-CESB-Major - Emergent Media

General

Program Title
Emergent Media Certificate

Program
Emergent Media

Program Code
EMRM-CESB-Major

Degree Designation
CESB

Campuses
Bloomsburg Campus, LockHaven Campus, Mansfield Campus

College
College of Arts, Humanities, Education and Social Sciences

Department
Comm, Media and Journalism

Program Description
A minor in Emergent Media in Mass Communications provides students in disciplines outside of the major with a broad background in emergent media and its functional uses. The program will enable students to develop a strong foundation in emerging media, particularly in the areas of new communication technologies, website development and design, and visual communications within a mass communications context. In today's media-centric world employers are looking for individuals with multiple skills in the latest media use and design, media literacy, and web design and development.

Degree Designation
Undergraduate

Student Outcomes
Students, after successful completion of program coursework, participation in extracurricular activities and engagement with program advisors, will be able to:
1. The student will describe how traditional and emerging media have influenced the communications field.
2. The student will apply professionally competent knowledge by producing and maintaining various multimedia content.
3. The student will demonstrate knowledge of social communication theories, principles, concepts, and methods through digital image creation and use.
4. The student will apply ethical and legal communication skills, theories and policies when communicating with the mass public.

Completion Requirements

ENGE-Minor - Environmental Geoscience Minor

General

Program Title
Environmental Geoscience Minor

Program Code
ENGE-Minor

Campuses
Bloomsburg Campus, LockHaven Campus, Mansfield Campus

College
College of Science and Technology

Department
Environ, Geog & Geol Sciences (EGGS)

Program Description
The Environmental Geoscience minor is a blend of geography, geology, and environmental science that allows students to explore their interest in the different Earth "spheres" (atmosphere, biosphere, hydrosphere, geosphere) and study ways to prevent, mitigate, manage, and remediate the impacts of human-Earth System interactions. The minor provides added expertise to students interested in graduate school or careers related to water, soil, and the environment such as environmental law, environmental planning, environmental policy, international relations, and green supply chain management.

Degree Designation
Undergraduate

Student Outcomes
Students in the EG minor should 1) Demonstrate comprehension of basic principles in the primary areas of knowledge in geography or geosciences, 2) Use relevant tools and instruments in a lab and/or field setting to collect and analyze data pertinent to geographical or geological problem solving, 3) Evaluate and interpret both quantitative and qualitative data for problem solving, and 4) Communicate graphically, orally and in writing. Students in the minor will demonstrate their achievement of these outcomes in discipline-appropriate assessments.

General

Program Title
Professional Writing Minor

Program Code
ENGL-Minor

Campuses
Bloomsburg Campus, Mansfield Campus, LockHaven Campus

College
College of Arts, Humanities, Education and Social Sciences

Department
Languages, Literature & Writing

Program Description
The Professional and Technical Writing minor has been in the array of minors at Bloomsburg University since 2008, and it includes classes that are used by a variety of disciplines to further develop students professional and technical writing skills

The Professional and Technical Writing minor will support a variety of disciplines in providing additional development of students' professional and technical writing skills. This reactivation will bring the minor into compliance with the various programs and courses that have been revised through the integration of Bloomsburg, Lock Haven, and Mansfield campuses into Commonwealth University

Student learning outcomes:
- Engage with varied stakeholder groups in a rhetorically effective manner.
- Demonstrate effective writing and document design usable across disciplines.
- Demonstrate expertise in digital communication across of variety of mediums by developing successful and usable artifacts through classroom and experiential learning situations.
- Gain writing expertise that will expand students' abilities within their major and their future career.

General

Program Title
Entrepreneurial Innovation Minor

Program Code
ENIN-Minor

Campuses
Bloomsburg Campus, LockHaven Campus, Mansfield Campus

College
Zeigler College of Business

Department
Management

Program Description
The Entrepreneurial Innovation minor is designed to complement a student's chosen major by adding the knowledge and skills necessary for creating and innovating their own business or within any industry. The Entrepreneurial Innovation Minor consists of 18 credits of required courses.

Degree Designation
Undergraduate

Student Outcomes
Students who complete the program will be able to:
1. Evaluate business opportunities using applied design, creativity and innovation.
2. Propose ideas to manage innovation and entrepreneurship within your own business or in any industry.
3. Implement innovation and entrepreneurial techniques using best practices.
4. Apply entrepreneurial planning and communication styles in various environments.

6. Compete for in-demand supply chain careers in global business environments.

ENPH-BS-Major - Engineering Physics

Program Title
Engineering Physics

Program
Engineering Physics

Program Code
ENPH-BS-Major

Degree Designation
Bachelor of Science

Campuses
Bloomsburg Campus

College
College of Health, Science, & Technology

Department
Phys and Env Sci and Engr

Program Description
This Engineering Physics track is designed for students to first gain a rigorous background in physics, engineering and mathematics so that they can apply this knowledge to solve engineering problems. This degree targets workforce development for a wide variety of industrial settings that require critical thinking and problem solving skills. Graduates of this program will be prepared for the research, integration, programming and application of physics and technology to design, analyze, develop, manufacture, modify, operate and maintain instruments and machines commonly found throughout the Commonwealth of Pennsylvania.

This Engineering Physics 3 + 2 track is designed for students to first gain a rigorous background in physics, engineering and mathematics so that they can then enter Penn State University in their fourth and fifth year to complete a specific engineering degree. The students will earn two degrees, a B. S. in Engineering Physics from Commonwealth University, and then one of eighteen possible Engineering degrees from Penn State University. The rigor of this program is such that it is open only to new freshman students.

Degree Designation
Undergraduate

Student Outcomes
SLO's for the Engineering Physics BS
1. Demonstrate foundational knowledge in Physics, Mathematics, Chemistry and Engineering at Commonwealth University so that a broad range of engineering problems can be solved in industry.
2. Clearly communicate engineering information with scientists, engineers and the general public in both written and oral form.
3. Function effectively as a member or leader on a technical team
4. Understand the need for and an ability to engage in self-directed continuing professional development
5. Understand the need of and a commitment to address professional and ethical responsibilities.
6. Demonstrate the knowledge of the impact of engineering solutions in a societal and global context.

SLO's for 3 + 2 Engineering

1. Demonstrate foundational knowledge in Physics, Mathematics, Chemistry and Engineering at Commonwealth University so that one of eighteen possible specific Engineering degrees can be earned at Penn State University.
2. Demonstrate the ability to apply critical, analytical, and integrative thinking to solve engineering problems.
3. Clearly communicate engineering information with scientists, engineers and the general public in both written and oral form.
4. Function effectively as a member or leader on a technical team
5. Understand the need for and an ability to engage in self-directed continuing professional development
6. Understand the need of and a commitment to address professional and ethical responsibilities.
7. Demonstrate the knowledge of the impact of engineering solutions in a societal and global context

Exercise Science

Program
Exercise Science

Program Code
EXER-BS-Major

Degree Designation
Bachelor of Science

Campuses
Bloomsburg Campus, LockHaven Campus

College
College of Health, Science, & Technology

Department
Rehabilitation Sciences

Program Description
The mission of the CUP Exercise Science Program is to promote optimal health and well-being in the physically active population by providing educational opportunities to prepare qualified undergraduate students for a professional career in Exercise Science. The Exercise Science Program is structured according to competencies and proficiency domains designated by the American College of Sports Medicine. We are committed to providing quality learning experience both in classroom and in the laboratory or practical setting. We have well equipped laboratory and teaching facilities supported by internship and educational research to provide these services.
The CUP Exercise Science Program seeks to enhance student learning through a variety of interactive and problem-solving experiences that mandate the student demonstrate cognitive understanding of the health sciences, work with diverse individuals and populations, and perform specific skills and techniques. The development of competent Exercise Science professionals is based on a program of curricular experiences that require students to demonstrate and apply their knowledge, skills, and attributes in their internship as well as professional setting.
The purpose of this program is to prepare well-rounded students. Successful students will be able to design safe and effective exercise prescriptions, and conduct individual exercise programs, fitness testing, and health education for athletes, low to moderate risk individuals, individuals with controlled diseases, and individuals in special populations (i.e., pregnancy, hypertension, and diabetes mellitus). In addition, this program aims to produce students that are committed to academic excellence, are socially responsible, and have demonstrated cultural sensitivity.
We are committed to evaluating the Exercise Science Program regularly to ensure that our students are receiving the highest quality education possible. Furthermore, we are committed to staying abreast of the ongoing changes in our profession in order to keep our students current in our evolving field. The B.S (Exercise Science) program is currently accredited through the Commission on Accreditation of Allied Health Education Programs (CAAHEP), which is the largest programmatic accreditor in the health sciences field. Accreditation provides recognition for a high-quality Exercise Science curriculum, resources, and faculty by measuring them against agreed-upon standards and evaluating that the program is meeting these standards on an annual basis.
Finally, the CUP Exercise Science Program aspires to be a program of recognized excellence. We strive to establish this program as a leader in undergraduate Exercise Science professional preparation.

Degree Designation
Undergraduate

Student Outcomes
To provide a quality program leading to a Bachelor of Science degree in Exercise Science.
To provide curriculum consistent with the core courses recommended by the American College of Sports Medicine and the National Strength and Conditioning Association in preparation for national certification examinations.
To provide a curriculum that integrates personal and practical skills to produce entry-level competence in any field of exercise science.
To provide students opportunities for work-related experience within the health and fitness field.
To provide quality academic instruction, satisfaction, and learning experiences to student graduates.
To prepare students to procure entry-level employment in the health / fitness / wellness field, or continue formal education in schools offering advanced degrees in health-related graduate programs.
To provide an academic curriculum that engages students with hands on experiences and individual support to foster student retention.
To provide faculty and staff who possess the knowledge, training, and skills necessary to provide an environment conducive for teaching and learning.
To provide students with quality advising and counseling to promote timely and efficient progression through the program.
To graduate confident, competent students who will be able to successfully compete in the marketplace.

FABD-BA-Concentration - Visual Arts BA - Fabric Design

General

Program Title
Visual Arts BA - Fabric Design

Program Code
FABD-BA-Concentration

Degree Designation
Bachelor of Arts

Campuses
Bloomsburg Campus, LockHaven Campus, Mansfield Campus

College
College of Arts, Humanities, Education and Social Sciences

Department
Visual Arts

Program Description
The Bachelor of Arts in Visual Arts will offer students a NASAD accredited liberal arts degree in Visual Arts with a choice of concentration in multiple areas: Painting; Drawing; Fabric Design; Printmaking; Graphic Design; Sculpture; Photography; Digital Media; Ceramics and Art History.

Degree Designation
Undergraduate

Student Outcomes
NASAD (National Association of Schools of Art and Design - accrediting body for Visual Arts) Required competencies required of Liberal Arts Degrees in Visual Arts:

Students graduating with BA in Visual Arts degree with concentrations in Painting; Drawing; Fabric Design; Printmaking; Sculpture; Photography; Digital Media; and Ceramics upon graduation, students must possess:
a. A developed visual sensitivity.

b. The technical skills, perceptual development, and understanding of principles of visual
organization sufficient to achieve basic visual communication and expression in one or more media.

c. Ability to make workable connections between concept and media.

d. Some familiarity with the works and intentions of major artists/designers and movements of the past and the present, both in the Western and non-Western worlds.

5. Students should understand the nature of contemporary thinking on art and design, and have gained at least a rudimentary discernment of quality in design projects and works of art.

Students graduating with BA in Visual Arts degree with concentrations in Graphic Design upon graduation, students must possess:
a. Technical skills, perceptual development, and understanding of design and other principles of visual organization sufficient to achieve basic visual communication using one or more media associated with design.

b. Basic ability to demonstrate how relationships among design principles and the material
qualities of objects are incorporated into the production of design work, and how they contribute in terms of use and interpretation.

c. Functional knowledge of how the design of communication, products, environments, systems, and services both reflects and shapes various aspects of the context in which they are produced.

d. Understanding of the various levels at which design problems can be formulated and
addressed, and the ability to discern observable or potential consequences of specific design action in large, complex systems.

e. Ability to identify differences among audiences/users for design, and an understanding of how audience/user values and behaviors are reflected in the design of communications, products, environments, and services.

f. Understanding of design process, including abilities to consider probable or potential future conditions, think divergently in the generation of multiple solutions,

and use design principles and elements of the design process to converge on ideas and results that are effective in realizing project purposes.

g. Awareness of the critical perspectives in the evaluation of design, including the history of ideas about the role of design in culture and of ideas informing design practice over time.

h. For students emphasizing design scholarship, the ability to use overview knowledge of design practice, history, theory, criticism, and technology and the tools and techniques of research, scholarship, and communication in the production of scholarly analytical work about design.

Students graduating with BA in Visual Arts degree with concentrations in Art History upon graduation, students must possess:
a. A general knowledge of the monuments and principal artists of all major art periods of the past, including a broad understanding of the art of the twentieth century and acquaintance with the art history of non-Western cultures. This knowledge should be augmented by study in greater depth and precision of several cultures and periods in the history of art and concentration in at least one area to the advanced seminar level. Study at the advanced level should include theory, analysis, and criticism.

b. A general knowledge of world history.

c. Knowledge of the tools and techniques of scholarship. Active research and the writing of analytical and critical essays should continue throughout the program.

d. Functional knowledge of the creative process. Normally, this is accomplished through one or more foundation or other studio courses; however, there are many methods of ensuring this competence.

FABD-BFA-Concentration - Visual Arts BFA - Fabric Design

General

Program Title
Visual Arts BFA - Fabric Design

Program Code
FABD-BFA-Concentration

Degree Designation
Bachelor of Fine Arts

Campuses
Bloomsburg Campus

College
College of Arts, Humanities, Education and Social Sciences

Department
Visual Arts

Program Description
The Bachelor of Fine Arts in Visual Arts will offer students a NASAD accredited professional degree in Visual Arts with a choice of concentration in multiple areas: and (BU/LHU/MU) Art History and Graphic Design; (BU only) Painting; Drawing; Fabric Design; Printmaking; Sculpture; Photography; (LHU/MU only) 2D Media; 3D Media.

Degree Designation
Undergraduate

Student Outcomes
NASAD (National Association of Schools of Art and Design - accrediting body for Visual Arts) Required competencies required of Professional Degrees in Visual Arts:

Students graduating with BFA in Visual Arts degree must possess:
1. Studio Studies:Practice, and experiences in studio subjects are of prime importance in the preparation of students for professional careers in art and design. The excellence of the creative work produced by students is the best determinant of the adequacy of the studio studies offered by an institution. Studio work begins at the freshman level and extends with progressively greater intensity throughout the degree program. Creative work includes, but is not limited to, conceptualization, process, product, and critique.
Irrespective of major or specialization, students must:

a. Gain functional competence with principles of visual organization, including the ability to work with visual elements in two and three dimensions; color theory and its applications; and drawing.

b. Present work that demonstrates perceptual acuity, conceptual understanding, and technical facility at a professional entry level in their chosen field(s).

c. Become familiar with the historical achievements, current major issues, processes, and
directions of their field(s).

d. Be afforded opportunities to exhibit their work and to experience and participate in critiques and discussions of their work and the work of others.

e. Students engage in independent study at the advanced level that includes appropriate supervision and evaluation upon completion.

2. Art History Studies: Student must gain competency in Art/Design History, Theory, and Criticism. Through comprehensive courses in the history of
art/design, students must:

a. Learn to analyze works of art/design from both Western and non-Western cultures perceptively and to evaluate them critically.

b. Develop an understanding of the common elements and vocabulary of art/design and of the interaction of these elements, and be able to employ this knowledge in analysis.

c. Acquire the ability to place works of art/design in historical, cultural, and stylistic contexts.

3. Technology. Students must acquire a working knowledge of technologies and equipment applicable to their area(s) of specialization.

4. Synthesis. While synthesis is a lifetime process, by the end of undergraduate studies students should be able to work independently on a variety of art and/or

design problems by combining, as appropriate to the issue, their capabilities in studio, analysis, history, and technology.

5. Results: Upon completion of the Visual Arts BFA degree program:
a. Students must demonstrate achievement of professional, entry-level competence in the major area of specialization, including significant technical mastery, capability to produce work and solve professional problems independently, and a coherent set of artistic/intellectual goals that are evident in their work.

b. Students must demonstrate their competence by developing a body of work for evaluation in the major area of study. A senior project or final presentation in the major area is required.

3. Students must have the ability to form and defend value judgments about art and design and to communicate art/design ideas, concepts, and requirements to professionals and laypersons related to the practice of the major field. They are able to work collaboratively as appropriate to the area(s) of specialization.

General

Program Title
Finance Minor

Program Code
FIN-Minor

Campuses
Bloomsburg Campus, LockHaven Campus, Mansfield Campus

College
Zeigler College of Business

Department
Business, Innovation, and Technology

Program Description
The minor in Finance is intended to complement a student's primary major and designed to provide non-finance students with the knowledge, skills, and competencies needed for success in major areas of finance. The program will be open to all non-finance students, both business or non-business, and will develop students' abilities to make managerial and strategic financial decisions and add value to any company or organization.

Degree Designation
Undergraduate

Student Outcomes
Students who complete the program will be able to:
1. Describe the financial markets and financial investment instruments.
2. Evaluate a firm's financial health using financial statement analysis.
3. Value financial instruments and apply the skills in investment decision-making.
4. Solve capital budgeting issues and apply the results in capital investment decisions.

FINA-BSBA-Concentration - International Business - Finance

General

Program Title
International Business - Finance

Program Code
FINA-BSBA-Concentration

Degree Designation
Bachelor of Science in Business Administration

Campuses
Bloomsburg Campus, LockHaven Campus, Mansfield Campus

College
Zeigler College of Business

Department
Management

Program Description
The international business program is uniquely designed with a qualitative liberal arts foundation, a business core, an interdisciplinary IB core including a short-term faculty-led study abroad opportunity, and a finance specialization that provides students with finance skills in addition to the required business core and IB major knowledge, which increases their job marketability after graduation. Our program strives to meet relevant industry and professional competencies to ensure rigorous attainment of necessary knowledge, skills, and abilities.

Degree Designation
Undergraduate

Student Outcomes
Students who complete the program will be able to:
• Acquire knowledge, skills, and abilities to conduct business in an international setting;
• Recognize the complexity of international business through course work and participation in the study abroad program;
• Develop an appreciation of cultural diversity;
• Apply functional expertise in managing multi-national business enterprises;
• Analyze the challenges expatriates may face in a foreign environment such as security, food, language, cultural and climatic adjustment, medical practices, diversity of ethical practices, diversity of political ideologies, and religious beliefs;
• Build flexibility in dealing with logistics of international travel;
• Demonstrate willingness to learn and show geocentric values and non-ethnocentric disposition.
• Apply finance knowledge and skills in international business setting.

Finance

Program Code
FINA-BSBA-Major

Degree Designation
Bachelor of Science in Business Administration

Campuses
Bloomsburg Campus, LockHaven Campus, Mansfield Campus

College
Zeigler College of Business

Department
Business, Innovation, and Technology

Program Description
BSBA Finance program covers investment, corporate financial management, financial institutions and banking, real estate finance, and risk management and insurance.

The Finance curriculum is designed to help students (future financial professionals) acquire strong knowledge of finance theories, current finance issues, and empirical application skills. Through the classroom teaching and our experiential learning opportunities, students develop the critical thinking, problem solving, financial leadership, and professional or technical skills needed for their future professional careers.

Degree Designation
Undergraduate

Student Outcomes
Students completing BSBA Finance program will be able to

1. Achieve a firm understanding of financial concepts, models, theories in investments, corporate financial management, and capital markets.
2. Enhance the problem-solving and empirical application skills of financial analysis tools and techniques in Finance.
3. Discuss the global financial environment and the effect of global influences on the financial decision-making process.

FINP-MSN-Concentration - Nursing MSN Family/Individual Nurse Pract

General

Program Title
Nursing MSN Family/Individual Nurse Pract

Program Code
FINP-MSN-Concentration

Degree Designation
Master of Science in Nursing

Campuses
Bloomsburg Campus

College
College of Health, Science, & Technology

Department
Nursing - Graduate

Program Description
The Family/Individual Across the Lifespan Nurse Practitioner program has full and part time completion options. The program has met the American Nurses Credentialing Center's (ANCC) and American Association of Nurse Practitioner's (AANP) certification eligibility educational requirements. The patient population focus for the Family Nurse Practitioner (FNP) program includes all ages across the lifespan. Our FNP graduates will have the capabilities to practice in community and hospital based primary care clinics, schools, government health centers, urgent care and skilled care settings, among other health care settings.

Degree Designation
Graduate

Student Outcomes
1. Apply, integrate & synthesize scientific knowledge from nursing and related fields to provide comprehensive primary care services across diverse settings for the improvement of health of individuals throughout the lifespan.

2. Develop advanced skills in critical thinking and clinical reasoning to provide holistic developmentally appropriate and evidenced based health care practices to care for individuals and families.

3. Maximize effective communication skills, interprofessional collaboration, and patient care technology to plan and provide culturally competent, compassionate, holistic care through patient education, health promotion, and prevention of acute and chronic illnesses.

4. Generate and translate research findings as a basis for clinical decision making to transform health care.

5. Cultivate personal qualities and ethical behavior that emulates the accountability and disposition of the Family nurse practitioner.

6. Appraise established and emerging principles of improvement science in implementation, and evaluation of quality and safety as core nursing practice values to minimize risk of harm.

7. Influence equitable healthcare outcomes for populations of all ages through collaborative efforts with community partners resulting in population level health promotion, prevention and disease management

Program Description
BSBA Finance with Specialization in Personal Financial Planning covers personal investment, retirement planning, risk management and insurance, estate planning, personal taxation.

The Personal Financial Planning curriculum is designed to help students (future financial planners and financial professionals) acquire strong knowledge of finance theories, current finance issues, and empirical application skills. Through the classroom teaching and our experiential learning opportunities, students develop the critical thinking, problem solving, financial leadership, and professional or technical skills needed for their future professional careers.

Degree Designation
Undergraduate

Student Outcomes
Students completing BSBA Finance w/ Specialization in Personal Financial Planning program will be able to

11. Achieve a firm understanding of basic components of personal financial planning - personal investment, retirement planning, risk management and insurance, estate planning, personal taxation etc.
2. Enhance the skills to develop customized financial plans tailored to personalized needs to help achieve financial independence and security.
3. Gain the knowledge and skills needed to acquire relevant certification(s) and pursue careers in personal financial planning - personal taxation, risk management and insurance, personal investment, retirement planning, and estate planning.

FREN-BA-Concentration - Languages & Cultures - French Studies

General

Program Title
Languages & Cultures - French Studies

Program Code
FREN-BA-Concentration

Degree Designation
Bachelor of Arts

Campuses
Bloomsburg Campus, LockHaven Campus, Mansfield Campus

College
College of Arts, Humanities, Education and Social Sciences

Department
Languages, Literature & Writing

Program Description
The languages and cultures program combines general education, professional education, and language-specific courses with multiple field experiences in diverse communities. The Bachelor of Arts in Languages and Cultures prepares students for teaching, graduate study in languages and cultures, research, professional work, as well as service in government, nonprofits, or business. Our graduates are particularly valued for their multilingual and cross-cultural knowledge. B.A. in Languages and Cultures curriculum allows students to focus on either one or two foreign languages, including the option to combine their major with other disciplines as they work with advisers to plan for their future careers. The course work leads majors to explore cultural traditions and historical developments in various parts of the world, and to pursue applied vocabulary and practices that they can use in real-world situations locally, nationally, and globally. Special effort is made to develop intercultural communication competence. All our majors are strongly encouraged to complete a minor or a second major in another field. Concentrations are offered in Arabic, Chinese, French, Russian and East European Studies, Spanish, and Spanish Translation and Interpretation. Minors are offered in Arabic, Chinese, French, German and Central European Studies, Latin American Studies, Russian and East European Studies, and Spanish.

Degree Designation
Undergraduate

Student Outcomes
Communication (Communicate in Languages Other Than English)

Standard 1.1: Students engage in conversations, provide and obtain information, express feelings and emotions, and exchange opinions.
Standard 1.2: Students understand and interpret written and spoken language on a variety of topics.
Standard 1.3: Students present information, concepts, and ideas to an audience of listeners or readers on a variety of topics.

Cultures (Gain Knowledge and Understanding of Other Cultures)

Standard 2.1: Students demonstrate an understanding of the relationship between the practices and perspectives of the culture studied.
Standard 2.2: Students demonstrate an understanding of the relationship between the products and perspectives of the culture studied.

Connections (Connect with Other Disciplines and Acquire Information)

Standard 3.1: Students reinforce and further their knowledge of other disciplines through the foreign language.
Standard 3.2: Students acquire information and recognize the distinctive viewpoints that are only available through the foreign language and its cultures.

Comparisons (Develop Insight into the Nature of Language and Culture)

Standard 4.1: Students demonstrate understanding of the nature of language through comparisons of the language studied and their own.
Standard 4.2: Students demonstrate understanding of the concept of culture through comparisons of the cultures studied and their own.

Communities (Participate in Multilingual Communities at Home & Around the World)

Standard 5.1: Students use the language both within and beyond the school setting.
Standard 5.2: Students show evidence of becoming life-long learners by using the language for personal enjoyment and enrichment.

FREX-Minor - Fraud Examination Minor

General

Program Title
Fraud Examination Minor

Program Code
FREX-Minor

Campuses
Bloomsburg Campus

College
Zeigler College of Business

Department
Business, Innovation, and Technology

Program Description
The Minor in Fraud Examination is an interdisciplinary program designed to help students develop the tools necessary for a career in the fraud examination field. The Minor includes classes in Criminal Justice, Forensics, Fraud Investigation, Fraud Examination, and Legal Aspects.

Degree Designation
Undergraduate

Student Outcomes
Students completing the program will be able to:
1. Recognize the elements of fraud and the various types of fraud.
2. Identify fraud schemes and the related symptoms (red flags) of fraud.
3. Understand procedures in fraud investigations and examinations.
4. Recognize the legal aspects of a fraud investigation or examination.

GEOG-Minor - Geography Minor

General

Program Title
Geography Minor

Program Code
GEOG-Minor

Campuses
Bloomsburg Campus, LockHaven Campus, Mansfield Campus

College
College of Health, Science, & Technology

Department
Environ, Geog & Geol Sciences (EGGS), Phys and Env Sci and Engr

Program Description
The Geography Minor provides students with an understanding of the physical and human/cultural world from a spatial and temporal perspective, and an ability to understand interaction between the two. Students analyze and generate maps and charts for geospatial applications, and have the flexibility to focus on either natural or human landscape analysis through the availability of a range of electives.

Degree Designation
Undergraduate

Student Outcomes
Students will 1) demonstrate a comprehension of core concepts of geographic thought (spatial and temporal; physical, and human landscapes, and interaction between the two), 2) utilize discipline-specific methods to analyze geographic issues, 3) obtain, evaluate, and generate quantitative and qualitative spatial and temporal data, and 4) communicate geographic information with maps and charts, and in writing, using appropriate methods and terminology.

Program Title
Geography & Planning

Program Code
GEOP-BS-Concentration

Degree Designation
Bachelor of Science

Campuses
Bloomsburg Campus

College
College of Health, Science, & Technology

Department
Phys and Env Sci and Engr

Program Description
The Geography and Environmental Planning concentration prepares students for careers in urban and rural planning and assessment; geographic information science, remote sensing, cartography and surveying; natural resource management and outdoor recreation; conservation and ecology; local, regional and international economic and geopolitical relations; and environmental and geographic consulting. Students in this concentration study ways to analyze, manage, and forecast spatial intracacies of cultural, temporal, and environmental interactions.

Degree Designation
Undergraduate

Student Outcomes
Students in all EGGS concentrations should 1) Demonstrate comprehension of basic principles in the primary areas of knowledge in geography or geosciences, 2) Use relevant tools and instruments in a lab and/or field setting to collect and analyze data pertinent to geographical or geological problem solving, 3) Evaluate and interpret both quantitative and qualitative data for problem solving, and 4) Communicate graphically, orally and in writing. Students in each concentration demonstrate their achievement of these outcomes in discipline-appropriate assessments.

GERT-MSN-Concentration - Nursing MSN - Gerontology

General

Program Title
Nursing MSN - Gerontology

Program Code
GERT-MSN-Concentration

Degree Designation
Master of Science in Nursing

Campuses
Bloomsburg Campus

College
Health Professions

Department
Nursing - Graduate

Program Description
The Adult Gerontology Primary Care Nurse Practitioner program has full and part time completion options. The program has met the American Nurses Credentialing Center's (ANCC) and American Association of Nurse Practitioner's (AANP) certification eligibility educational requirements. The patient population focus for the Adult Gerontology Primary Care Nurse Practitioner (AGPCNP) includes adolescents (above 12 years of age), young to middle age adults and older adults. Our AGPCNP graduates will have the capabilities to practice in community and hospital based primary care clinics, in patient™s homes, in sub-acute/skilled nursing facilities, and in long-term care settings. The AGPCNP works inter-professionally with other members of the health care team..

Degree Designation
Graduate

Student Outcomes
1. Apply, integrate & synthesize scientific knowledge from nursing and related fields to provide comprehensive primary care services across diverse settings for the improvement of health for the adult and older adult.

2. Develop advanced skills in critical thinking and clinical reasoning to provide holistic developmentally appropriate and evidenced based health care practices to care for the adult and older adult client.

3. Maximize effective communication skills, interprofessional collaboration, and patient care technology to plan and provide culturally competent, compassionate, holistic care through patient education, health promotion, and prevention of acute and chronic illnesses.

4. Generate and translate research findings as a basis for clinical decision making to transform health care.

5. Cultivate personal qualities and ethical behavior that emulates the accountability and disposition of the Adult-Gerontology Primary Care nurse practitioner.

6. Appraise established and emerging principles of improvement science in implementation, and evaluation of quality and safety as core nursing practice values to minimize risk of harm.

7. Influence equitable healthcare outcomes for the adult and older adult population through collaborative efforts with community partners resulting in population level health promotion, prevention and disease management

GGIS-BS-Concentration - Geography-GIS

General

Program Title
Geography-GIS

Program Code
GGIS-BS-Concentration

Degree Designation
Bachelor of Science

Campuses
Bloomsburg Campus

College
Science and Technology

Program Description
The Department of Environmental, Geographical and Geological Sciences (EGGS) proposes the creation of a new concentration to package existing geographic information system (GIS), cartography, and computing courses into a coherent concentration. The new concentration builds upon the success of our existing minor in Spatial Analysis and GIS. It will (1) provide a track that will meet the growing demands of employers for GIScience and Technology (GIS&T) graduates, and (2) provide a track that will more effectively reflect, and adapt to, the changing role of geospatial technology and theory moving forward. The proposed concentration integrates existing EGGS courses that focus on GIS and spatial analysis with Mathematical and Digital Sciences (MADS) courses that explore the design of reliable software systems. In this manner, the proposed concentration addresses a growing need in the GIS&T domain to develop skilled workers who understand GIS as more than a basic off-the-shelf software package. The concentration will provide an opportunity for geography students to enhance their technical skills, and an opportunity for computer science students to enhance their understand of GIS and spatial analysis for a rapidly evolving marketplace. The direct integration of these domains is also unique amongst the undergraduate degrees offered regionally, and by our sister institutions.

Degree Designation
Undergraduate

Student Outcomes
• Students will demonstrate comprehension of basic principles in the primary areas of knowledge in geography or geosciences.
• Students will be able to use up-to-date technology, and laboratory and research equipment pertinent to geographical or geological problem solving.
• Students will demonstrate an ability to collect, evaluate, and interpret both quantitative and qualitative data for problem solving.
• Students will be able to apply geographic or geologic knowledge to solve environmental problems in both human and natural realms.
• Students will be able to use GIS to manage and present data, and to solve problems in geography and geology.

Completion Requirements

Degree Map and Course Sequencing Plan
004_ImpactStatement - CS.docx, Program Tracking Sheet_GIS And Spatial Analysis Major_signed.pdf, EGGS_GIS Program Course Checklist Sequencing.xlsx, 004_ImpactStatement - Philosophy.pdf, 004_ImpactStatement - GD.docx, RE_ impact statement_from_MADS_for_EGGS.pdf, 004_ImpactStatement - Instructional Technology.docx, 004_ImpactStatement - Physics.docx

GIS-Minor - GIS and Spatial Analysis Minor

General

Program Title
GIS and Spatial Analysis Minor

Program Code
GIS-Minor

Campuses
Bloomsburg Campus, LockHaven Campus, Mansfield Campus

College
College of Health, Science, & Technology

Department
Phys and Env Sci and Engr

Program Description
The spatial analysis of data using digital imagery, maps and databases is now a ubiquitous component of many professions. To conduct such analyses, GIS software and technology are used by municipal planning agencies, emergency personnel, environmental and urban-oriented NGO/non-profit organizations, as well as numerous government agencies, businesses, and educational institutions. The principles, methods, and technologies of this field have been fully adopted by environmental scientists, planners, geographers and geoscientists. It is now common for other professions to need expertise in these principles and methods. In fact, GISs perfectly complement and are often a required tool in most academic and professional domains that have traditionally used maps to analyze spatial data. Using existing courses, we propose to package them in a coherent minor program to meet this demand. This minor will complement the existing geology and geography minors within the major, and provide a straightforward method for majors in EGG and other departments on campus to acquire and display their background in GIS.

Degree Designation
Undergraduate

Student Outcomes
After successful completion of the program coursework, students will be able to:
• Explain the fundamental theories of geographic information science and correlate them to the data models and procedures underlying geospatial technologies.
• Acquire GIS datasets from primary and secondary sources, and prepare them for use in GIS, remote sensing, or cartographic analysis.
• Identify problems of a geographic nature and the requisite method, or set of procedures needed to address the issue.
• Design and carry out or manage a GIS-based or remote sensing-based independent project.
• Evaluate qualitative/quantitative uncertainty and limitations of data.
• Produce a clear, presentable cartographic product that addresses a geospatial issue.

General

Program Title
Visual Arts BA - Graphic Design

Program Code
GRAP-BA-Concentration

Degree Designation
Bachelor of Arts

Campuses
Bloomsburg Campus, LockHaven Campus, Mansfield Campus

College
College of Arts, Humanities, Education and Social Sciences

Department
Visual Arts

Program Description
The Bachelor of Arts in Visual Arts will offer students a NASAD accredited liberal arts degree in Visual Arts with a choice of concentration in multiple areas: Painting; Drawing; Fabric Design; Printmaking; Graphic Design; Sculpture; Photography; Digital Media; Ceramics and Art History.

Degree Designation
Undergraduate

Student Outcomes
NASAD (National Association of Schools of Art and Design - accrediting body for Visual Arts) Required competencies required of Liberal Arts Degrees in Visual Arts:

Students graduating with BA in Visual Arts degree with concentrations in Painting; Drawing; Fabric Design; Printmaking; Sculpture; Photography; Digital Media; and Ceramics upon graduation, students must possess:
a. A developed visual sensitivity.

b. The technical skills, perceptual development, and understanding of principles of visual
organization sufficient to achieve basic visual communication and expression in one or more media.

c. Ability to make workable connections between concept and media.

d. Some familiarity with the works and intentions of major artists/designers and movements of the past and the present, both in the Western and non-Western worlds.

5. Students should understand the nature of contemporary thinking on art and design, and have gained at least a rudimentary discernment of quality in design projects and works of art.

Students graduating with BA in Visual Arts degree with concentrations in Graphic Design upon graduation, students must possess:
a. Technical skills, perceptual development, and understanding of design and other principles of visual organization sufficient to achieve basic visual communication using one or more media associated with design.

b. Basic ability to demonstrate how relationships among design principles and the material
qualities of objects are incorporated into the production of design work, and how they contribute in terms of use and interpretation.

c. Functional knowledge of how the design of communication, products, environments, systems, and services both reflects and shapes various aspects of the context in which they are produced.

d. Understanding of the various levels at which design problems can be formulated and
addressed, and the ability to discern observable or potential consequences of specific design action in large, complex systems.

e. Ability to identify differences among audiences/users for design, and an understanding of how audience/user values and behaviors are reflected in the design of communications, products, environments, and services.

f. Understanding of design process, including abilities to consider probable or potential future conditions, think divergently in the generation of multiple solutions,

and use design principles and elements of the design process to converge on ideas and results that are effective in realizing project purposes.

g. Awareness of the critical perspectives in the evaluation of design, including the history of ideas about the role of design in culture and of ideas informing design practice over time.

h. For students emphasizing design scholarship, the ability to use overview knowledge of design practice, history, theory, criticism, and technology and the tools and techniques of research, scholarship, and communication in the production of scholarly analytical work about design.

Students graduating with BA in Visual Arts degree with concentrations in Art History upon graduation, students must possess:
a. A general knowledge of the monuments and principal artists of all major art periods of the past, including a broad understanding of the art of the twentieth century and acquaintance with the art history of non-Western cultures. This knowledge should be augmented by study in greater depth and precision of several cultures and periods in the history of art and concentration in at least one area to the advanced seminar level. Study at the advanced level should include theory, analysis, and criticism.

b. A general knowledge of world history.

c. Knowledge of the tools and techniques of scholarship. Active research and the writing of analytical and critical essays should continue throughout the program.

d. Functional knowledge of the creative process. Normally, this is accomplished through one or more foundation or other studio courses; however, there are many methods of ensuring this competence.

GRAP-BFA-Concentration - Visual Arts BFA - Graphic Design

General

Program Title
Visual Arts BFA - Graphic Design

Program Code
GRAP-BFA-Concentration

Degree Designation
Bachelor of Fine Arts

Campuses
Bloomsburg Campus, LockHaven Campus, Mansfield Campus

College
College of Arts, Humanities, Education and Social Sciences

Department
Visual Arts

Program Description
ne Arts in Visual Arts will offer students a NASAD accredited professional degree in Visual Arts with a choice of concentration in multiple areas: and (BU/LHU/MU) Art History and Graphic Design; (BU only) Painting; Drawing; Fabric Design; Printmaking; Sculpture; Photography; (LHU/MU only) 2D Media; 3D Media.

Degree Designation
Undergraduate

Student Outcomes
NASAD (National Association of Schools of Art and Design - accrediting body for Visual Arts) Required competencies required of Professional Degrees in Visual Arts:

Students graduating with BFA in Visual Arts degree must possess:
1. Studio Studies:Practice, and experiences in studio subjects are of prime importance in the preparation of students for professional careers in art and design. The excellence of the creative work produced by students is the best determinant of the adequacy of the studio studies offered by an institution. Studio work begins at the freshman level and extends with progressively greater intensity throughout the degree program. Creative work includes, but is not limited to, conceptualization, process, product, and critique.
Irrespective of major or specialization, students must:

a. Gain functional competence with principles of visual organization, including the ability to work with visual elements in two and three dimensions; color theory and its applications; and drawing.

b. Present work that demonstrates perceptual acuity, conceptual understanding, and technical facility at a professional entry level in their chosen field(s).

c. Become familiar with the historical achievements, current major issues, processes, and
directions of their field(s).

d. Be afforded opportunities to exhibit their work and to experience and participate in critiques and discussions of their work and the work of others.

e. Students engage in independent study at the advanced level that includes appropriate supervision and evaluation upon completion.

2. Art History Studies: Student must gain competency in Art/Design History, Theory, and Criticism. Through comprehensive courses in the history of
art/design, students must:

a. Learn to analyze works of art/design from both Western and non-Western cultures perceptively and to evaluate them critically.

b. Develop an understanding of the common elements and vocabulary of art/design and of the interaction of these elements, and be able to employ this knowledge in analysis.

c. Acquire the ability to place works of art/design in historical, cultural, and stylistic contexts.

3. Technology. Students must acquire a working knowledge of technologies and equipment applicable to their area(s) of specialization.

4. Synthesis. While synthesis is a lifetime process, by the end of undergraduate studies students should be able to work independently on a variety of art and/or

design problems by combining, as appropriate to the issue, their capabilities in studio, analysis, history, and technology.

5. Results: Upon completion of the Visual Arts BFA degree program:
a. Students must demonstrate achievement of professional, entry-level competence in the major area of specialization, including significant technical mastery, capability to produce work and solve professional problems independently, and a coherent set of artistic/intellectual goals that are evident in their work.

b. Students must demonstrate their competence by developing a body of work for evaluation in the major area of study. A senior project or final presentation in the major area is required.

3. Students must have the ability to form and defend value judgments about art and design and to communicate art/design ideas, concepts, and requirements to professionals and laypersons related to the practice of the major field. They are able to work collaboratively as appropriate to the area(s) of specialization.

Program Description
The Associate of Applied Science in Healthcare Professions is a degree program designed to enable credentialed allied health professionals who lack an academic degree to complete a program of study that leads to an associate degree. An option is also included for entry level students who lack a healthcare credential.
The goals of the Associate of Applied Science in Healthcare Professions are to:
- provide seamless academic progression for students
- expand personal and professional development
- offer an accessible, affordable, and flexible program of study to meet the academic needs of nontraditional students and allied health professionals

Degree Designation
Undergraduate

Student Outcomes
1. Describe the basic concepts and knowledge necessary for a career in an allied health field.
2. Communicate effectively and professionally in a healthcare environment.
3. Develop essential skills obtained through general education that prepare for a healthcare career.

Completion Requirements

History

Program Code
HIST-BA-Major

Degree Designation
Bachelor of Arts

Campuses
Bloomsburg Campus, LockHaven Campus, Mansfield Campus

College
College of Arts, Humanities, Education and Social Sciences

Department
History, Poli Sci & Philosophy

Program Description
The History discipline examines human experiences in their context (time and place). As the American Historical Association notes, historians make "the past accessible; it informs and preserves collective memory; it is essential to active citizenship." The practice of history requires ethical and sophisticated use of evidence that are traces of the past and analysis of interpretations over time. Historical practice requires us to learn a variety of perspectives and, given the incomplete records, we must accept that "knowledge is provisional and causal explanations of the past are complex." (AHA Statement of Standards)

Degree Designation
Undergraduate

Student Outcomes
Students build historical knowledge to interpret the context and impact of the past
Students explain multiplicity of perspective and causation in History and display empathy toward people in their historical context.
Students identify, summarize, appraise, and synthesize other scholars' historical arguments.
Students develop critical research methods by creating historical questions, developing research strategies to answer them, collecting, organizing, and evaluating varying types of historical evidence.
Students effectively communicate historical arguments and narratives through a variety of media by using arguments and evidence, synthesizing and interpreting the past ethically, and exhibiting understanding of conventions of the discipline.

Program Description
The Health Communication Minor is designed to prepare students with the communication knowledge and skills to work in a health-related field. Students will complete courses that focus on development of communication skills, research methodology, and theory in the health communication field.

Degree Designation
Undergraduate

Student Outcomes
Students who complete the minor will meet all of the following program learning outcomes:

1. Students will integrate theory, research, and practice in health communication contexts.
2. Students will exhibit social responsibility and professionalism in their communicative interactions with others in health contexts.
3. Students will display the communication skills necessary to engage in competent human relational interaction in multiple health contexts.

Program Description
This Health and Physical Education minor in Coaching is a collaboration with Sport Management faculty to offer students courses to strengthen their marketability as coaches and to provide a theoretical foundation for students to be successful coaching children, youth, adults and in collegiate and interscholastic athletics.

Degree Designation
Undergraduate

Student Outcomes
SLO 1: Achieve competency in at least one type of tactical sport (invasion sport, net sport, target sport, fielding and striking sport).

SLO 2: Plan and implement progressive and sequential athletic practice tasks that address diverse needs of all athletes.

SLO 3: Evaluate the changing dynamics of the practice and competition environment and adjust tasks and/or plans as needed to enhance athletes' progress.

SLO 4: Describe the historical, philosophical, societal, and social perspectives of sport.

Program Code
HRMG-BSBA-Concentration

Degree Designation
Bachelor of Science in Business Administration

Campuses
Bloomsburg Campus, LockHaven Campus, Mansfield Campus

College
Zeigler College of Business

Department
Management

Program Description
The international business program is uniquely designed with a qualitative liberal arts foundation, a business core, an interdisciplinary IB core including a short-term faculty-led study abroad opportunity, and a human resource management specialization that provides students with human resource management skills in addition to the required business core and IB major knowledge, which increases their job marketability after graduation. Our program strives to meet relevant industry and professional competencies to ensure rigorous attainment of necessary knowledge, skills, and abilities.

Degree Designation
Undergraduate

Student Outcomes
Students who complete the program will be able to:
• Acquire knowledge, skills, and abilities to conduct business in an international setting;
• Recognize the complexity of international business through course work and participation in the study abroad program;
• Develop an appreciation of cultural diversity;
• Apply functional expertise in managing multi-national business enterprises;
• Analyze the challenges expatriates may face in a foreign environment such as security, food, language, cultural and climatic adjustment, medical practices, diversity of ethical practices, diversity of political ideologies, and religious beliefs;
• Build flexibility in dealing with logistics of international travel;
• Demonstrate willingness to learn and show geocentric values and non-ethnocentric disposition.
• Apply human resource management knowledge and skills in international business setting.

HYDR-Minor - Hydrology Minor

General

Program Title
Hydrology Minor

Program Code
HYDR-Minor

Campuses
Bloomsburg Campus, LockHaven Campus, Mansfield Campus

College
College of Health, Science, & Technology

Department
Phys and Env Sci and Engr

Program Description
The Hydrology Minor provides students the opportunity to acquire a core set of courses that focuses on surface and groundwater quantity, quality, and management. When combined with an additional degree in the sciences and other courses, a student with a Hydrology Minor may apply for licensure as a hydrologic technician or professional hydrologist (P.H.). Students in this concentration focus on surface and subsurface hydrologic and geochemical processes and explore methods of hydrologic data collection and interpretation.

Degree Designation
Undergraduate

Student Outcomes
Students with a Hydrology Minor should 1) Demonstrate comprehension of basic principles in the primary areas of knowledge such as the identification and characterization of earth materials and the processes operating at or beneath the Earth's surface. 2) Use relevant tools and instruments in a lab and/or field setting to collect geological data both on the surface and in the subsurface. 3) Evaluate, analyze and interpret both quantitative and qualitative data for geological problem solving. 4) Communicate graphically, orally and in writing.

IDT-Minor - Immersive Technology Minor

General

Program Title
Immersive Technology Minor

Program Code
IDT-Minor

Campuses
Bloomsburg Campus, LockHaven Campus, Mansfield Campus

College
Zeigler College of Business

Department
Business, Innovation, and Technology

Program Description
The creation of the minor was driven by technological changes facing our society. Knowledge surrounding immersive and interactive technologies are increasingly required by employers when hiring new employees. Augmented and Virtual Reality are two of "the eight essential technologies that matter most for business today" (Price Waterhouse Cooper). Commonwealth University students in any major will gain essentials skills in these technologies and be able to relate them to their major. The minor adds immersive and interactive technology skills like virtual reality to the background of students from several possible areas.

Degree Designation
Undergraduate

Student Outcomes
The student outcomes include:
- Appraise trends in immersive technologies, tools, and challenges.
- Examine immersive technology applications for their usefulness in application areas.
- Design virtual and augmented reality applications for use in instructional technology and other areas.

Program Description
This program prepares students for personal and professional success in the ever changing worlds of instructional technology and technical leadership and to promote the effective use of technology as a tool for innovation, knowledge acquisition, training and education. Instructional Technology is a diverse field with opportunities for individuals in a variety of eclectic roles; all centered on the process of creating web-based instruction. The need for instructional technologists is growing; specifically, the amount of information created every year and the need for more and more learning drive the need for instructional technologists, as does the constantly changing technology field.
Instructional technology can involve the study of the use of the following types of media:
• Games and Simulations
• Web 2.0 Technologies
• Virtual Worlds
• Audio and Video-based instruction
• Web-based courses and Classes
• Evaluation of Online Instructional Efforts
• Mobile Learning

Degree Designation
Graduate

Student Outcomes
The department currently assesses student success of the Student Learning Outcomes (SLOs) at the graduate level using mean grades for associated classes.

SLO 1: Theory, Research, and Practice
Apply principles of theory, research, and best practices to design training solutions.

SLO 2: Presentation Skills
Create and deliver effective presentations using a combination of text and mixed multimedia.

SLO 3: Training Design Skills
Determine the best methods to deliver training and design effective training for specific needs.

SLO 4: Technology Development Skills
Develop technology solutions using a variety of authoring and media software.

SLO 5: Team Work Skills
Use communication and project management skills to create training solutions effectively as a team.

Program Description
The Association to Advance Collegiate Schools of Business (AACSB) accredited Information Technology (IT) and Analytics BSBA Specialization is to prepare students to strategically evaluate and implement information technology resources of an organization. The program emphasizes the digital tools and knowledge to transform, innovate, and impact business strategy.

Degree Designation
Undergraduate

Student Outcomes
The student learning outcomes include the following:
1. Develop business acumen through completion of the BSBA business core.
2. Examine the procedural design and development of business applications.
3. Appraise IT and analytics trends, tools, and challenges.
4. Apply emerging technologies and methods to manage and exploit the value of structures and unstructured data.
5. Analyze strategic innovation in the interface between websites and databases.
6. Examine analytics techniques to transform data into insights.
7. Demonstrate project management techniques and applications for information systems, healthcare, finance and business projects.

INFO-MSN-Concentration - Informatics

General

Program Title
Informatics

Program Code
INFO-MSN-Concentration

Degree Designation
Master of Science in Nursing

Campuses
Bloomsburg Campus

College
College of Health, Science, & Technology

Department
Nursing - Graduate

Program Description
Nursing Informatics is the application of informatics and information technology to deliver healthcare services. The integration of technology and the management of information facilitates data integration into clinical and business decision-making. This program supports registered nurses to utilize healthcare informatics within various healthcare settings. This collaborative degree offers a 42 credit Master of Science Degree in Nursing (MSN) with a focus on Nursing Informatics. The program prepares students to become world ready nurse leaders, informatics specialists, or educators. Bloomsburg University's MSN program requires 12 credits of MSN Core courses and 30 credits in the information technology management (ITM), and Informatics courses.

Degree Designation
Graduate

Student Outcomes
1. Demonstrate the skills necessary to integrate technology and use information systems to support evidence-based decision-making.
2. Analyze current regulations and practices around healthcare and clinical data.
3. Perform data analysis and report writing related to both patient and/or system outcomes.
4. Analyze workflow processes in various clinical settings in order to improve the healthcare delivery process.
5. Manage communications and relationships between system developer and interprofessional clinical users to support system and patient outcomes.

Program Description
The Association to Advance Collegiate Schools of Business (AACSB) accredited Master of Science in Information Technology degree program responds to the rapid and dynamic technology changes and challenges that businesses encounter. The proposed program focuses on the practical theories (knowledge), skills, and abilities of how information technology affects corporate strategy and operations. Specifically, the program aims to implement best practices consistent with current information technology principles supported by key information technology metrics and decomposition models: apply technology solutions to increase effectiveness and efficiency: build effective global project management teams: develop, manage and store information technology to assure quality and value of information; and analyze and synthesize data to identify possible business opportunities and problems.

Degree Designation
Graduate

Student Outcomes
The Master of Science in Information Technology Program is designed to develop, analyze and synthesize data to identify possible business opportunities, solve problems and recognize innovation.

To accomplish this goal, students outcomes include:
1. Apply technology solutions to increase effectiveness and efficiency of an organization
2. Implement best practices consistent with current information technology principles and supported by key information technology metrics and decomposition business
3. Monitor and manage information technology to assure quality and value of information within an organization
4. Develop management and soft skills needed to build effective global project management teams

Campuses
Bloomsburg Campus

College
Arts, Social Sci & Humanities

Department
Music, Theatre, and Dance

Program Description
This program is designed to allow Commonwealth University to continue the National Association of Schools of Theatre accreditation held by BU prior to integration. The Theatre major was identified in the program array as one being housed at the BU campus location.

The mission of the Division of Theatre and Dance is to provide a strong undergraduate education in the theory and practice of theatre and dance, to support the University's general education curriculum, and to enhance the cultural life of the campus community. The Division's goal is to develop students' working knowledge and application of historical and contemporary theories and practices in performance, design and technology, and dramatic and critical literature. We strive to develop artists who are imaginative critical thinkers and effective communicators producing art that celebrates humanity and challenges complacency.

The Theatre & Dance Strategic Plan outlines 4 main areas of focus:
1. Academic Excellence

In line with the fundamental mission of the academy, the Division of Theatre and Dance seeks to promote a thorough understanding of theory and practice in our artistic disciplines.

Toward this end, we encourage students to explore both historical foundations and current innovations affecting these pursuits.

This philosophy is in keeping with the ideas and approaches to arts education advocated for by our accrediting body: "Professionals know from personal experience that art, though dependent on talent, inspiration, and creativity, requires much more to function as a significant spiritual and educational force. Talent without skills, inspiration without knowledge, and creativity without technique count for little but lost potential."

2. Artistic Quality

The Division of Theatre and Dance seeks to support artistic excellence in the work of both students and faculty, on campus and beyond the limits of the academy.

This philosophy is in keeping with the ideas and approaches to arts education advocated for by our accrediting body: "Dance, music, theatre, and the visual arts are professions requiring talent, knowledge, skill, and dedication. Professional artists have created some of man's highest achievements. Yet, artists need no license to practice: employment and success depend almost entirely on competence demonstrated through audition or portfolio review."

3. Cultural Enhancement & Diversification of the Campus & Broader Community

The Division of Theatre and Dance seeks to offer a range of theatre and dance genres and styles and to broaden community access to, and attendance at, these events.

4. Public Awareness

The Division of Theatre and Dance has a history of excellent instruction resulting in both program and graduate success. Part of our efforts will be dedicated toward communicating that excellence to the broader community.

Degree Designation
Undergraduate

Student Outcomes
There are five primary student learning outcomes for the major:

History/Criticism/Literature: Graduates of the program will recognize and be able to communicate trends in theatre history, dramatic structure, dramatic styles associated with various periods, and characteristics of the work of important theatre practitioners.

Knowledge of Design Process: Graduate of the program will have a working knowledge of the theatrical design process and the basic skills necessary to develop initial design ideas, research and present the design ideas, and collaboratively integrate them into an initial design concept presentation.

Knowledge of Acting: Graduates of the program will have a working knowledge of the practice of acting and the basic skills for performance.

Rehearsal, Construction, and Performance: Graduates of the program will

demonstrate a working knowledge of appropriate rehearsal, construction, and performance practices through application in theatrical disciplines in a collaborative production setting.

Specific Theatrical Discipline: Graduates of the program will demonstrate appropriate skills for future personal and professional success in a specific theatrical discipline or area.

Campuses
Bloomsburg Campus

College
College of Health, Science, & Technology

Department
Rehabilitation Sciences

Program Description
The Department of Communication Sciences & Disorders at Commonwealth University-Bloomsburg is one of the few programs in the United States to offer an Intraoperative Neurophysiological Monitoring (IONM) training program and our graduates are highly sought by various IONM providers nationwide. Currently, the approved as a residential program that require all students to come to Bloomsburg to enroll in the program. This limits program enrollment as it is prohibitive for many individuals to relocate to complete the three-semester program. The program frequently receives inquiries about enrolling in the program via distant education. To address this need and increase program enrollment, the department developed a non-clinical track for the IONM program. All of the non-clinical courses have been approved by the UCC. The program prepares students with the foundational knowledge and skills that are applicable for patient service. The IONM post-baccalaureate certificate program bridges the gaps between increasing demand of qualified technologists and lack of formal educational programs in the IONM field. Individuals who successfully complete the program will be eligible to apply for technologists position at IONM companies and hospitals. The program's curriculum has been approved by the UCC for face to face, online, and multi modal presentation, no additional courses are required, and not additional resources are needed to offer the non-clinical IONM track. The Provost and Dean of the College of Health Professions have reviewed this proposal and request approval from the UCC to initiate the non-clinical track within the IONM program for Fall 2024.

Degree Designation
Graduate

Student Outcomes
Upon graduation, students will be

1. able to follow biomedical safety standard.
2. able to place electrodes at the appropriate anatomical site to acquire responses.
3. able to differentiate between normal and abnormal neurophysiologic responses
4. eligible as an entry-level IONM technologists after brief on-board training by employers.

ITAN-Minor - Information Technology and Analytics Minor

General

Program Title
Information Technology and Analytics Minor

Program Code
ITAN-Minor

Campuses
Bloomsburg Campus, LockHaven Campus, Mansfield Campus

College
Zeigler College of Business

Department
Tech/Analytic/Work Force Learn

Program Description
The Association to Advance Collegiate Schools of Business (AACSB) accredited Minor in Information Technology prepares students to strategically evaluate and implement information technology resources of an organization. The program emphasizes the digital tools and knowledge to transform, innovate, and impact business strategy.

Degree Designation
Undergraduate

Student Outcomes
The student outcomes include:
- Appraise IT and analytics trends, tools, and challenges.
- Examine analytics techniques to transform data into insights.
- Evaluate emerging technologies and methods for a comprehensive cybersecurity management plan.

JOUR-BA-Concentration - Media & Journalism - Journalism

General

Media & Journalism - Journalism

Program Code
JOUR-BA-Concentration

Degree Designation
Bachelor of Arts

Campuses
Bloomsburg Campus, LockHaven Campus, Mansfield Campus

College
College of Arts, Humanities, Education and Social Sciences

Department
Comm, Media and Journalism

Program Description
The Department of Media and Journalism prepares students to learn how to continually adapt to an ever-changing and evolving media environment. This is achieved through the development of such skills as storytelling, information literacy, the ability to create media using the latest technology as well as how their role in the media connects to society at large, core skills necessary to effectively use media to reach desired audiences.

Degree Designation
Undergraduate

Student Outcomes
Narrative Skills - Students will apply knowledge of storytelling skills to produce effective stories and strategic communication in multiple forms and contexts specific to their chosen area of concentration in mass media/communication.

Information Literacy - Students will demonstrate the ability to find, critically evaluate, and legally and ethically use information sources using appropriate methods and technologies.

Media Literacy - Students will develop the ability to access, analyze, evaluate and create media. This includes the technical and aesthetic skills and knowledge of the technology required to produce various media.

Civic Engagement - Students will demonstrate knowledge and application of the mass media's role in a democracy as well as in an increasingly diverse and globalized society.

General

Program Title
Latin American Studies Minor

Program Code
LATN-Minor

Campuses
Bloomsburg Campus, LockHaven Campus, Mansfield Campus

College
College of Arts, Humanities, Education and Social Sciences

Department
Languages, Literature & Writing

Program Description
The languages and cultures program combines general education, professional education, and language-specific courses with multiple field experiences in diverse communities. The Bachelor of Arts in Languages and Cultures prepares students for teaching, graduate study in languages and cultures, research, professional work, as well as service in government, nonprofits, or business. Our graduates are particularly valued for their multilingual and cross-cultural knowledge. B.A. in Languages and Cultures curriculum allows students to focus on either one or two foreign languages, including the option to combine their major with other disciplines as they work with advisers to plan for their future careers. The course work leads majors to explore cultural traditions and historical developments in various parts of the world, and to pursue applied vocabulary and practices that they can use in real-world situations locally, nationally, and globally. Special effort is made to develop intercultural communication competence. All our majors are strongly encouraged to complete a minor or a second major in another field. Concentrations are offered in Arabic, Chinese, French, Russian and East European Studies, Spanish, and Spanish Translation and Interpretation. Minors are offered in Arabic, Chinese, French, German and Central European Studies, Latin American Studies, Russian and East European Studies, and Spanish.

Degree Designation
Undergraduate

Student Outcomes
Communication (Communicate in Languages Other Than English)

Standard 1.1: Students engage in conversations, provide and obtain information, express feelings and emotions, and exchange opinions.
Standard 1.2: Students understand and interpret written and spoken language on a variety of topics.
Standard 1.3: Students present information, concepts, and ideas to an audience of listeners or readers on a variety of topics.

Cultures (Gain Knowledge and Understanding of Other Cultures)

Standard 2.1: Students demonstrate an understanding of the relationship between the practices and perspectives of the culture studied.
Standard 2.2: Students demonstrate an understanding of the relationship between the products and perspectives of the culture studied.

Connections (Connect with Other Disciplines and Acquire Information)

Standard 3.1: Students reinforce and further their knowledge of other disciplines through the foreign language.
Standard 3.2: Students acquire information and recognize the distinctive viewpoints that are only available through the foreign language and its cultures.

Comparisons (Develop Insight into the Nature of Language and Culture)

Standard 4.1: Students demonstrate understanding of the nature of language through comparisons of the language studied and their own.
Standard 4.2: Students demonstrate understanding of the concept of culture through comparisons of the cultures studied and their own.

Communities (Participate in Multilingual Communities at Home & Around the World)

Standard 5.1: Students use the language both within and beyond the school setting.
Standard 5.2: Students show evidence of becoming life-long learners by using the language for personal enjoyment and enrichment.

LAWL-Minor - Legal Studies Minor

General

Program Title
Legal Studies Minor

Program Code
LAWL-Minor

Campuses
Bloomsburg Campus, LockHaven Campus, Mansfield Campus

College
Zeigler College of Business

Department
Business, Innovation, and Technology

Program Description
The legal studies minor gives students in any major the opportunity to explore an interest in the law.

Degree Designation
Undergraduate

Student Outcomes
Students completing this program should be able to:

1. Identify sources of American law and basic principles of key substantive areas such as tort, contract, criminal, constitutional, and property law.
2. Identify relationships between Law and Society, Law and Government, Law and Business, and Law and Science.

LEHR-MBA-Concentration - MBA Leadership and Human Resources

General

Program Title
MBA Leadership and Human Resources

Program Code
LEHR-MBA-Concentration

Degree Designation
Master of Business Administration

Campuses
Bloomsburg Campus, LockHaven Campus, Mansfield Campus

College
Zeigler College of Business

Program Description
The Zeigler College of Business Master of Business Administration Program provides students with a comprehensive educational experience that will prepare current and future business leaders with the knowledge and skills to be influential responsible citizens that perform in every industry.

Degree Designation
Graduate

Student Outcomes
1) Leadership Emergence.
Develop an understanding of an effective leader's critical characteristics and procedures with a group of individuals as they attain a shared goal.

2) Cultural Literacy.
Examine the importance of cultural capital and act as an authentic citizen of change with the ability to participate confidently in cultural spaces.

3) Business Innovations.
Investigate opportunities within the business process to promote organizational relevance and value creation.

4) Adaptability and Problem Solving.
Illustrate the use of adaptable managerial methods to determine the best course of action to solve problems effectively.

5) Analysis and Evaluation.
Utilize data and the application of systems to identify, assess, define, and solve problems across functional areas of business.

Program Code
LEPA-BA-Concentration

Degree Designation
Bachelor of Arts

Campuses
Bloomsburg Campus, LockHaven Campus, Mansfield Campus

College
College of Arts, Humanities, Education and Social Sciences

Department
Comm, Media and Journalism

Program Description
Communication Studies is a discipline that involves the investigation and practice of face-to-face, small group, organizational, public, print, and mediated messages. Effective communication has long been recognized as the hallmark of an educated person and is vital to social and career success. The U.S. Department of Labor identifies listening, speaking, creative thinking, decision making, problem solving, reasoning, self-esteem, sociability, self-management, and integrity as qualities for outstanding job performance. Majoring in Communication Studies develops all these skills.

Degree Designation
Undergraduate

Student Outcomes
Upon graduation, students in all three concentration areas will be able to:

1. Present effective and appropriate messages in multiple communication modalities and contexts.
2. Integrate theory, research, and practice in a variety of communication contexts.
3. Exhibit social responsibility and professionalism in their communicative interactions with others.
4. Implement leadership knowledge and skills in a variety of contexts.
5. Display the communication skills necessary to engage in competent human relational interaction in multiple contexts.

MAT4-BSED-Concentration

Degree Designation
Bachelor of Science in Education

Campuses
Bloomsburg Campus, LockHaven Campus, Mansfield Campus

College
College of Arts, Humanities, Education and Social Sciences

Department
K-12, HPE, Mid Level & Sec Ed

Program Description
In accordance with the Pennsylvania Department of Education (PDE), this professional preparation degree program enables teacher education candidates to meet Math content competencies for grades 4-8 by taking courses required within the Math department. This professional program focuses on a Math concentration while providing three “generalist” or supporting academic content areas in Social Studies, general science, and English. The Professional Core courses, competencies and experiences for the grade 4-8 teacher preparation program have been designed to address the broad set of issues, knowledge and competencies that are relevant to middle level teaching and learning. The program therefore prepares teachers who will be able to ensure students’ mastery of academic standards and the content assessment anchors. This program aligns with standards outlined by the Association for Middle Level Education (AMLE). Successful graduates of this program will be certified to teach Math at the 4-8 grade level.

Degree Designation
Undergraduate

Student Outcomes
Learning Outcome 1:
Middle Level education teacher candidates demonstrate pedagogical knowledge and content area competence, including arithmetic and basic algebra; functions and graphs; geometry and measurement; data, probability, and statistical concepts; number theory; and application of mathematical understanding.

Learning Outcome 2:
Middle Level education teacher candidates understand the major concepts, principles, theories, and research related to adolescent development and provide opportunities that support student development and learning.

Learning Outcome 3:
Middle Level education teacher candidates understand and use the central concepts, tools of inquiry, standards, research and structures of content to plan and implement curriculum that develops student competence in subject matter.

Learning Outcome 4:
Middle Level education teacher candidates understand and use the major concepts, principles, theories, and research related to data-driven instruction and assessment, and they employ a variety of strategies for a developmentally appropriate climate to meet the varying abilities and learning styles of learners.

Learning Outcome 5:
Middle Level education teacher candidates will demonstrate understanding the complexities of teaching in grades 4-8, and engage in professional development to continually improve their practices and behaviors.

Learning Outcome 6:
Middle Level education teacher candidates will apply culturally relevant practices to embrace diversity, provide opportunities for student equity, and practice inclusivity.

Mathematics

Program Code
MATH-BS-Major

Degree Designation
Bachelor of Science

Campuses
Bloomsburg Campus, LockHaven Campus, Mansfield Campus

College
College of Health, Science, & Technology

Department
Math/Computer Sci/Dig Forensic

Program Description
This mathematics degree is designed to prepare students for graduate work in mathematical sciences while providing a strong liberal arts education. Most students who enter this program plan to attend graduate school, but some may enter the job market after graduation.

The applied mathematics track is designed to prepare students to use mathematical, computational, and communication skills in solving real-world problems in the areas of manufacturing, business, economics, engineering, and other science fields. This tract will allow us to recruit and graduate students who are interested in entering the workforce in a position that requires problem-solving abilities, logical thinking capabilities and computational skills. Secondary Education students can use this track to earn degree in their content area. Math Secondary Education students automatically satisfy the outside area sequence of courses.

Degree Designation
Undergraduate

Student Outcomes
Knowledge of Mathematics
Students will be able to solve problems in areas of calculus, algebra, probability, and statistics.

Reasoning
Students will be able to reason through and prove mathematical statements through logical arguments.

Communication
Students will be able to communicate mathematical principles and ideas with clarity and coherence.

Technology
Students will be proficient in a major computer programming language.

Application
Students will be able to apply mathematical knowledge, computations, and techniques to solve real-world problems in various fields of study.

Program Title
Biomedical Sciences - Medical Genomics & Counseling

Program Code
MDGC-BS-Concentration

Degree Designation
Bachelor of Science

Campuses
Bloomsburg Campus, LockHaven Campus, Mansfield Campus

College
College of Health, Science, & Technology

Department
Biological and Health Sciences

Program Description
The Bachelor of Science in Biomedical Sciences provides a rigorous background in biology, chemistry, physics, and mathematics. This program will meet the needs of students planning to enter a variety of graduate schools in biomedical sciences, entrance into a NAACLS accredited medical laboratory science program, and those seeking employment in healthcare and government agencies. Students may choose to specialize in one of the six concentrations: medical genomics and counseling, medical laboratory science, pre-physician assistant/associate, pre-medical sciences, pre-pharmacy, and pre-physical therapy.

Degree Designation
Undergraduate

Student Outcomes
1. describe the cellular basis of life.

2. describe the molecular and microbial mechanisms underlying human disease.

3. describe the integration between animal form and function.

4. describe the molecular biology of the gene and central dogma.

5. communicate using the conventions of biomedical sciences.

6. utilize biomedical laboratory tools and techniques to design experiments and analyze data.

7. prepare for admission to genetic counseling programs.

Program Description
The mission of the Medical Imaging Program is to develop competent, entry-level Medical Imaging Technologists who consistently provide appropriate, high-quality imaging services to individuals, families, and communities; who do so in a professional, compassionate, and ethical manner; and who embrace ongoing professional development. The Medical Imaging program prepares professionals in diverse health care environments with awareness of global health issues. The academic and clinical foundation in the curriculum develops graduates with professional flexibility and adaptability to assume prominent roles.

Degree Designation
Undergraduate

Student Outcomes
At the completion of the Medical Imaging Program, the student till:
Demonstrate clinical competence by producing high-quality diagnostic medical images, and employing safety practices pertinent to medical imaging.
Utilize effective communication skills appropriate to the healthcare environment.
Employ critical thinking and problem-solving skills during professional practice by adapting to changing patient needs during the performance of radiographic procedures, and implementing corrective actions as needed to improve image quality.

Program Code
MGMT-BSBA-Concentration

Degree Designation
Bachelor of Science in Business Administration

Campuses
Bloomsburg Campus, LockHaven Campus, Mansfield Campus

College
Zeigler College of Business

Department
Management

Program Description
The Management Concentration curriculum is designed to address the demands faced by today's management professionals. Students develop the critical thinking, problem solving, and technical skills needed to enter an array of management or business fields. Our program strives to meet relevant industry and professional competencies to ensure rigorous attainment of necessary knowledge, skills, and abilities.

Degree Designation
Undergraduate

Student Outcomes
Students who complete the program will be able to:
1. Apply the fundamental concepts for the people-oriented and analytical/technical aspects of managing an organization in a domestic or international setting.
2. Evaluate how management plans integrate with a successful business strategy.
3. Analyze how management creates organizational structures.
4. Evaluate the leadership imperatives faced by managers in global environments.
5. Determine how control mechanisms are deployed by managers to drive and assess business performance.
6. Compete for in-demand management careers in global business environments.

General

Program Title
MBA Marketing

Program Code
MKTG-MBA-Concentration

Degree Designation
Master of Business Administration

Campuses
Bloomsburg Campus, LockHaven Campus, Mansfield Campus

College
Zeigler College of Business

Program Description
The Zeigler College of Business Master of Business Administration Program provides students with a comprehensive educational experience that will prepare current and future business leaders with the knowledge and skills to be influential responsible citizens that perform in every industry.

Degree Designation
Graduate

Student Outcomes
1) Leadership Emergence.
Develop an understanding of an effective leader's critical characteristics and procedures with a group of individuals as they attain a shared goal.

2) Cultural Literacy.
Examine the importance of cultural capital and act as an authentic citizen of change with the ability to participate confidently in cultural spaces.

3) Business Innovations.
Investigate opportunities within the business process to promote organizational relevance and value creation.

4) Adaptability and Problem Solving.
Illustrate the use of adaptable managerial methods to determine the best course of action to solve problems effectively.

5) Analysis and Evaluation.
Utilize data and the application of systems to identify, assess, define, and solve problems across functional areas of business.

Program Code
MLED-Minor

Campuses
Bloomsburg Campus, LockHaven Campus, Mansfield Campus

College
College of Arts, Humanities, Education and Social Sciences

Department
K-12, HPE, Mid Level & Sec Ed

Program Description
In accordance with the Pennsylvania Department of Education (PDE), this professional preparation degree program enables teacher education candidates to meet professional core competencies within a Bachelors Middle Level Education degree program. This provides "generalist" methodology for teaching English, Math, general science, and Social Studies. The Professional Core courses, competencies and experiences for the grade 4-8 teacher preparation program have been designed to address the broad set of issues, knowledge and competencies that are relevant to middle level teaching and learning. The program therefore prepares teachers who will be able to ensure students' mastery of academic standards and the content assessment anchors. This program aligns with standards outlined by the Association for Middle Level Education (AMLE).
Upon completion of the minor, students will be equipped to pass the Praxis add-on exam for certification in 5th and 6th grade.

Degree Designation
Undergraduate

Student Outcomes
Learning Outcome 1:
Middle Level education teacher candidates demonstrate basic pedagogical knowledge in all four content areas: English, Math, Social Studies, and general Science.

Learning Outcome 2:
Middle Level education teacher candidates understand the major concepts, principles, theories, and research related to adolescent development and provide opportunities that support student development and learning.

Learning Outcome 3:
Middle Level education teacher candidates understand and use the central concepts, tools of inquiry, standards, research and structures of content to plan and implement curriculum that develops student competence in subject matter.

Learning Outcome 4:
Middle Level education teacher candidates understand and use the major concepts, principles, theories, and research related to data-driven instruction and assessment, and they employ a variety of strategies for a developmentally appropriate climate to meet the varying abilities and learning styles of learners.

Learning Outcome 5:
Middle Level education teacher candidates will demonstrate understanding the complexities of teaching in grades 4-8, and engage in professional development to continually improve their practices and behaviors.

Learning Outcome 6:
Middle Level education teacher candidates will apply culturally relevant practices to embrace diversity, provide opportunities for student equity, and practice inclusivity.

Program Code
MOGD-BS-Concentration

Degree Designation
Bachelor of Science

Campuses
Bloomsburg Campus, LockHaven Campus

College
College of Health, Science, & Technology

Department
Math/Computer Sci/Dig Forensic

Program Description
The Applied Computer Science program combines elements of Lock Haven's existing successful programs with an additional track in Web Development. The Applied Computer Science program will have a common core of classes and the following three tracks.
• Data Science
• Mobile and Game Application Development
• Web Development

Degree Designation
Undergraduate

Student Outcomes
Three to five years after graduation, our Applied computer science alumni will be:
1. be professionally employed in the computing field
2. communicate and collaborate effectively in a team environment
3. continue to grow professionally by adapting to new technologies and assuming leadership responsibilities

Applied Computer Science Learning Outcomes
Students will be able to
1. Demonstrate strong problem-solving skills using technology appropriate to the problem domain.
2. Design, implement, and evaluate a computing-based solution to meet a given set of computing requirements in the context of the program's discipline.
3. Communicate effectively
4. Recognize professional responsibilities and make informed and equitable judgments in computing practice based on legal and ethical principles.
5. Function effectively as a member or leader of a team engaged in activities appropriate to the program track.

MUBS-BM-Concentration - Music - Elective Studies in Business

General

Program Title
Music - Elective Studies in Business

Program Code
MUBS-BM-Concentration

Degree Designation
Bachelor of Music

Campuses
Bloomsburg Campus, Mansfield Campus

College
College of Arts, Humanities, Education and Social Sciences

Department
Music, Theatre, and Dance

Program Description
The Bachelor of Arts in Music program provides a broad education in music rather than a heavy concentration on any single area. Students enrolled in this program develop musicianship and performance abilities as well as an intellectual understanding of the arts within the framework of a liberal arts degree. The program is appropriate for undergraduates who wish to major in music irrespective of specific career aspirations. It serves individuals who seek a broad program in general education rather than intense specialization at the undergraduate level.

The Music Business Track combines professional studies in music with a 12-credit concentration in music business topics, including a 120-hour internship in a music industry area in the student's area interest. The 18- to 21-credit business minor gives students an overview of business principles and allows for elective exploration, or focus, in the areas of business administration, management, entrepreneurial innovation, and/or marketing. The internship is normally done during the final semester, or summer, after all other course work has been completed.

Degree Designation
Undergraduate

Student Outcomes
Outcomes for all Music Degrees:
• Students will perform effectively and musically in their primary performance area. This will include proficiency in skills requisite for artistic self-expression, an overview understanding of the relevant repertoire and demonstrated ability to perform from a cross-section of that repertory.
• Students will be fluent in reading music notation, not only as pertains to their primary performance area, but also from full scores, the clefs and transpositions those scores utilize, and contemporary notational techniques.
• Students will utilize analytic techniques to effectively describe the large and small-scale structures of music in such a way as to reveal relevant and important information about the score.
• Students will demonstrate an understanding of the development of western music and listen critically to a varied repertoire of music-effectively describing the use of musical elements and expressive devices using advanced technical vocabulary. These descriptions will include identification of historical periods, genres, and interdisciplinary connections within a historical context.
• Students will perform in ensembles and be effective, musical and constructive members of musical groups. Successful participation in musical ensembles includes leading small and large groups and working with others to create musically coherent performances.
• Students will compose effective musical works that demonstrate an understanding of basic musical elements, including notation, form and harmonic coherence.
• Students will accurately sight-sing and take aural dictation. Students will improvise on instruments and voice melodies, variations and accompaniments.
• Students will communicate effectively in written form.
• Students will demonstrate their proficiency on the piano/keyboard. This includes the ability to prepare works, sight-read, and improvise harmonizations at the keyboard.
• Students will be able to produce a properly documented research paper as a result of their ability to identify, find, understand and evaluate sources.

Program outcomes for BM with Elective Studies in Business

* Students will demonstrate expertise in at least one area of music business studies, chosen from the concentrations of business administration, management, entrepreneurial innovation, or marketing.
* Students will demonstrate direct working experience with at least one music-related business.
* Students will effectively communicate and evaluate critical and current issues involved with the music industry

Program Description
The Bachelor of Music in Music Performance is available in piano, guitar, voice, percussion, and any standard string, brass, and woodwind instrument. Commonwealth University offers this degree to exceptional musicians who are committed to pursuing high achievement in ensemble and solo performance. The Bachelor of Music in Music Performance curriculum prepares young musicians for graduate study in music. For some, this degree may also be used as an opportunity to focus on performance skills in preparation for careers, or further study, in fields outside of music.

Degree Designation
Undergraduate

Student Outcomes
Outcomes for all Music Degrees:
• Students will perform effectively and musically in their primary performance area. This will include proficiency in skills requisite for artistic self-expression, an overview understanding of the relevant repertoire and demonstrated ability to perform from a cross-section of that repertory.

College of Arts, Humanities, Education and Social Sciences

Department
Music, Theatre, and Dance

Program Description
The Bachelor of Music Education program is designed to meet the certification requirements set by the Commonwealth of Pennsylvania. Completion of the music education degree prepares students to teach both vocal and instrumental music at the pre-K through high school levels. Students will have opportunities observe, participate, and teach in school settings prior to student teaching to give them additional experiences in the classroom. The degree concludes with a term of student teaching that includes a professional seminar focusing on resume and cover letter writing, mock interviews, and certification procedures.

Students in this degree will complete a minimum of 50% total credits in music study, 15% in professional courses and no more than 35% in general education as stated by the National Association of Schools of Music (NASM) accreditation requirements.

Degree Designation
Undergraduate

Student Outcomes
Outcomes for all Music Degrees:
• Students will perform effectively and musically in their primary performance area. This will include proficiency in skills requisite for artistic self-expression, an overview understanding of the relevant repertoire and demonstrated ability to perform from a cross-section of that repertory.
• Students will be fluent in reading music notation, not only as pertains to their primary performance area, but also from full scores, the clefs and transpositions those scores utilize, and contemporary notational techniques.

• Students will be able to produce a properly documented research paper as a result of their ability to identify, find, understand and evaluate sources.

Program Outcomes for the Music Education Degree:
• Students will pass and compare favorably to students from other institutions on standardized music tests, graduate and secure professional positions.
• Students who have completed their student teaching will be perceived as prepared for teaching and an asset to the profession by their cooperating teachers.
• Students will be able to demonstrate basic conducting skills in a variety of classroom and ensemble settings.
• Students will be able to demonstrate the ability to sing and play a variety of classroom instruments and also to demonstrate proper playing techniques on varied band and orchestral instruments.
• Students will display a working knowledge of music technology, and how to us it

appropriately in the classroom.
• Students will be able to plan and prepare effective and appropriate music instruction leading to student learning.

Program Title
Music Minor

Program Code
MUSI-Minor

Campuses
Bloomsburg Campus, Mansfield Campus

College
College of Arts, Humanities, Education and Social Sciences

Department
Music, Theatre, and Dance

Program Description
The music technology minor is intended for students outside the music unit that have a strong interest in learning about music and creating music The minor includes an introductory music fundamentals course, one semester of music history, four semesters of applied music lessons and music ensembles, and six credits of music electives by advisement. Students in this minor will gain hands-on experience working with music faculty and music students to build music knowledge and skills.

Degree Designation
Undergraduate

Student Outcomes
* Provide a basic understanding of the concepts, processes, skills, and techniques used in the field of music engagement and performance.

* Offer an area of study, complementary to many non-music major fields of study, which will add a breadth and depth of perspective.

* Give students a broader level of understanding and the resources to think creatively and divergently, and act as conceptual problem solvers.

Program
Museum Conservation

Program Code
MUSM-CESB-Major

Degree Designation
CESB

Campuses
Bloomsburg Campus

College
College of Health, Science, & Technology

Department
Phys and Env Sci and Engr

Program Description
The Museum Conservation certificate provides students majoring in Biology, Earth Sciences or Anthropology, as well as non traditional students in natural history related careers the opportunity to gain practical knowledge of archival and conservation techniques used with collections held by museums, parks and some industries. Students in this concentration focus on the philosophy and methods involved in the preparation and conservation of objects in natural history collections. This would be the only program in the region, and one of the few (if any) in the country that offers this kind focus at the undergraduate level.

Degree Designation
Undergraduate

Student Outcomes
Students with a Museum Conservation certificate should 1) Demonstrate comprehension of basic philosophy and regulatory framework of natural history object collecting and conservation 2) Use relevant techniques materials for the preparation and conservation relevant te specific types of natural history objects. 3) Evaluate, analyze and interpret both quantitative and qualitative problems involved in collection care. 4) Communicate graphically, orally and in writing.

Music, Theatre, and Dance

Program Description
The Bachelor of Music with Emphasis in Music Technology combines professional studies in music with coursework in general music technology, recording, studio production techniques, and a 120-hour internship in a music technology area in the student's area of interest. Additional coursework is drawn from the Communications and Computer Information Science departments in order to develop the student's basic understanding of mass media and relevant computer technologies. The 25-credit music technology component gives students an overview of technology, recording, live sound reinforcement, and studio technique principles. The internship is normally done during the final semester, or summer, after all other course work has been completed.

Degree Designation
Undergraduate

Student Outcomes
Outcomes for all Music Degrees:
• Students will perform effectively and musically in their primary performance area. This will include proficiency in skills requisite for artistic self-expression, an overview understanding of the relevant repertoire and demonstrated ability to perform from a cross-section of that repertory.
• Students will be fluent in reading music notation, not only as pertains to their primary performance area, but also from full scores, the clefs and transpositions those scores utilize, and contemporary notational techniques.
• Students will utilize analytic techniques to effectively describe the large and small-scale structures of music in such a way as to reveal relevant and important information about the score.
• Students will demonstrate an understanding of the development of western music and listen critically to a varied repertoire of music-effectively describing the use of musical elements and expressive devices using advanced technical vocabulary. These descriptions will include identification of historical periods, genres, and interdisciplinary connections within a historical context.
• Students will perform in ensembles and be effective, musical and constructive members of musical groups. Successful participation in musical ensembles includes leading small and large groups and working with others to create musically coherent performances.
• Students will compose effective musical works that demonstrate an understanding of basic musical elements, including notation, form and harmonic coherence.
• Students will accurately sight-sing and take aural dictation. Students will improvise on instruments and voice melodies, variations and accompaniments.
• Students will communicate effectively in written form.
• Students will demonstrate their proficiency on the piano/keyboard. This includes the ability to prepare works, sight-read, and improvise harmonizations at the keyboard.
• Students will be able to produce a properly documented research paper as a result of their ability to identify, find, understand and evaluate sources.

Program outcomes for BM with Emphasis in Music Technology
* Students will knowledgeably discuss the relationship of at least one related field (such as communications, broadcasting, graphic design, and computer science (to the music industry and music technology.
* Students will gain experience and expertise in music technology hardward and software for recording, editing, mising, MIDI sequencing, and notation.
* Students will demonstrate direct working experience with at least one music-related business.
* Students will effectively communicate and evaluate critical and current issues involved with the music industry.

MUTE-Minor - Music Technology Minor

General

Program Title
Music Technology Minor

Program Code
MUTE-Minor

Campuses
Bloomsburg Campus, Mansfield Campus

College
College of Arts, Humanities, Education and Social Sciences

Department
Music, Theatre, and Dance

Program Description
The music technology minor is typically intended for students outside the music department that have a strong interest in audio, music recording, and studio production. The minor includes an introductory music fundamentals course, a six-course sequence of music technology courses, and four credits of music electives by advisement. Students in this minor will gain hands-on experience with professional-level recording and production tools and software, and will gain access to studio facilities for the completion of independent class projects.

Degree Designation
Undergraduate

Student Outcomes
* Students will produce musical sequences, notated music, and audio compositions using a desktop music system or MIDI project studio (e.g., music lab workstations)

* Students will gain hands-on experience with music technology equipment, including microphones, mixers, computer audio interfaces, and signal processors

* Students will apply common synthesis and audio processing techniques in order to create original sounds for use in musical and other audio productions

* Students will record live events and studio tracking sessions using standard recording techniques and microphone placements

* Students will mix complex multi-track projects while applying common signal processing and audio effects using a professional level digital audio workstation (i.e., the Pro Tools HD control room)

Program Code
NAPD-BS-Concentration

Degree Designation
Bachelor of Science

Campuses
Bloomsburg Campus, LockHaven Campus, Mansfield Campus

College
College of Health, Science, & Technology

Department
Phys and Env Sci and Engr

Program Description
The Bachelor of Science Program in Chemistry provides a rigorous background in chemistry, physics, and mathematics. In seeking ACS program approval, this program will provide students experiences in the 5 foundational areas of chemistry (Organic, Inorganic, Physical, Analytical, and Biochemistry), experiences in a majority of upper-divisions of chemistry, and a capstone research/internship experience. The program will meet the needs of students planning to enter the chemical industry field, government chemistry/regulatory areas, professional schools, or graduate or schools in the natural sciences. The Natural Products Option will provide a strong foundational chemistry experience that will be coupled with foundational experience in Biology topics related to plants. These educational experiences provide laboratory and fieldwork competencies that will meet current workforce demands, as well as diverse training for future careers in the fields.

Degree Designation
Undergraduate

Student Outcomes
1. Demonstrate knowledge and comprehension in the five foundational areas of chemistry (Organic, Inorganic, Physical, Analytical, Biochemistry).
2. Demonstrate the ability to apply critical, analytical, and integrative thinking to chemistry problems
3. Apply the scientific method to design and conduct research, including analyzing and interpreting data
4. Access, utilize, communicate information (information literacy) in an ethical and responsible manner.
5. Clearly communicate chemisrty information with scientists and the general public in both written and oral form
6. Understand important safety principles in chemistry laboratories and demonstrate safe use of instrumentation

NATH-Minor - Natural History Minor

General

Program Title
Natural History Minor

Program Code
NATH-Minor

Campuses
Bloomsburg Campus, LockHaven Campus, Mansfield Campus

College
College of Health, Science, & Technology

Department
Biological and Health Sciences

Program Description
Natural history institutions (e.g. Nature Centers, Parks, Zoos, Museums, Aquaria) employ a diverse workforce. They need specialists in information technology, accounting, law enforcement, communication, and human resources. However, all these specialists need to know fundamental natural history in order to effectively interact with staff and materials to contribute to the mission of the organization. The proposed minor in Natural History will provide a foundation in the natural sciences to individuals, who although they may have interested in specializing in majors outside other sciences, which to prepare to work at a natural history institution. Graduates with skill in technology, business, and communications, who know and understand natural history, are the most common request we receive from these potential employers. This minor is meant to fill this need and can be added to any complementing major degree program.

Degree Designation
Undergraduate

Student Outcomes
Upon completion of this minor students will be able to:
1.Demonstrate knowledge of core concepts in biology and how it relates to natural history
2. Demonstrate the ability to apply critical, analytical, and integrative thinking
3. Demonstrate skill using appropriate scientific methods and instruments
4. Clearly communicate ideas and theories related to natural history in both written and oral form.

Program Description
The BA Biology - Natural History option will prepare students for careers in zoos, aquaria, science museums, and environmental education centers. This program includes a strong background in organismal and field biology with supporting coursework in geology and anthropology. The flexibility in this degree allows students to select courses that will prepare them to interact with the public.

Degree Designation
Undergraduate

Student Outcomes
1. Describe and synthesize the five core concepts of biology at varying scales (molecules to ecosystems)
2. Apply critical and analytical thinking to biological problems as it relates to natural history
3. Use the scientific method to design, conduct, and analyze biological research.
4. Demonstrate skill using appropriate scientific methods and instruments
5. Clearly communicate biological ideas as they relate to natural history with scientists and the general public in both written and oral form

Department
Nursing - Graduate

Program Description
The Nursing Administration specialization prepares the graduate to assume a leadership role in nursing administration. Through the development of competence in the multifaceted role as a nurse administrator, students engage in responsible decision-making, innovative problem solving, and development of leadership style designed to be effective in managing an organization. The program emphasizes the acquisition of essential management skills including organizational assessment, budget and accounting, principles of management, information systems and ethical behavior in organizations. As a nurse administrator, students serve in a direct role in impacting the delivery of healthcare for specific populations. Social, ethical and political actions are emphasized to initiative and affect change in regarding the development of healthcare policy.

Degree Designation
Graduate

Student Outcomes
1. Articulate a vision for nursing administration in the context of healthcare organizations and complex healthcare delivery systems
2. Identify leadership models used in nursing leadership that assume risk-taking behaviors to enhance quality healthcare and compare the specific roles of organizational managers and leaders.
3. Implement team-building strategies that create partnerships and collaboration across healthcare disciplines, identify marketing strategies and establish advocacy for healthcare consumers in order to establish or propose solutions to a health issue.
4. Utilize advanced analytical critical thinking, problem solving, communication skills and ethical decision making to manage change, resolve conflict and enhance quality healthcare.
5. Articulate methods to use resources effectively for cost-effective quality outcomes to include human, fiscal and environmental resources, information and communication technology as well as social and healthcare policy.

Program Description
Bloomsburg's Doctor of Nursing Practice (DNP) program offers specializations in advanced practice and nurse executive. The advanced practice track prepares nurse leaders to apply advanced practice skills at the highest level of clinical practice. The focus of the program is practice-oriented investigation in the clinical setting. The nurse executive program track prepares students for leadership and executive nursing roles at the highest level. Both specializations emphasize health education, leadership, research application, and analysis of health care outcomes in a variety of clinical and administrative environments.

Degree Designation
Doctorate

Student Outcomes
The program will prepare advanced practice and nursing leaders as scholars skilled in patient-centered care, intra-professional collaboration, evidence-based practice, quality improvement, policy advocacy, and improved use of informatics and technology. Students will be prepared to assume a highter level of responsibility and leadership in nursing and health care, with the ultimate goal of improving the health care delivery system of the nation.

Nursing ASN

Program
Nursing

Program Code
NURS-ASN-Major

Degree Designation
Associate in Science of Nursing

Campuses
LockHaven Campus

College
College of Health, Science, & Technology

Department
Nursing - Undergraduate

Program Description
A common goal of our faculty is to graduate outstanding students who are ready and able to provide excellent nursing care and services using theory and evidence based practice. The program prepares our students to make judgments and carry out nursing care based on critical thinking and research based knowledge for health promotion and maintenance, prevention of disease, and rehabilitation. Nursing is a dynamic career with many opportunities. Registered nursing is a prime occupation for job and professional growth. RNs are always in demand in Pennsylvania and in other states.

Degree Designation
Undergraduate

Student Outcomes
Commonwealth University Associate of Science in Nursing Program prepares the graduate to:
1. Provide nursing care across the lifespan, adapted to the health care consumer's physiological, socio-cultural, developmental, and spiritual dimensions of health. (Patient-Centered Care)

Nursing

Program Code
NURS-BSN-Major

Degree Designation
Bachelor of Science in Nursing

Campuses
Bloomsburg Campus, LockHaven Campus, Mansfield Campus

College
College of Health, Science, & Technology

Department
Nursing - Undergraduate

Program Description
The Bachelor in Science of Nursing concentration prepares students for entry career into professional nursing. The educational process which integrates the concepts from the liberal arts and sciences prepares professional nurses at the baccalaureate level emphasizing critical thinking, clinical judgment, and disparate experiences and perspectives. The program emphasizes the acquisition of knowledge, skills and the formulation of professional attitudes through the development of competence in the multifaceted role as a professional nurse.

Degree Designation
Undergraduate

Student Outcomes
Students in the BSN program should: 1). Integrate, translate, and apply established and evolving theoretical and empirical professional nursing knowledge and ways of knowing, including a foundation in the arts, sciences, and humanities. 2). Demonstrate and apply person- and family-centered, evidence-based, and respectful nursing care by employing clinical judgment and problem-solving skills that meet the needs of individuals, families, and communities using a compassionate, holistic approach across the lifespan.
3). Integrate traditional and nontraditional community resources, including industry, academia, and local government entities to provide equitable and inclusive care across the healthcare delivery continuum to prevent disease and injury, account for social influences on health, improve health outcomes and promote wellness among individuals, families, groups, and communities to improve population health outcomes.
4). Critically appraise, translate, apply and disseminate nursing knowledge to improve health care outcomes for diverse patient populations. 5). Incorporate established and emerging quality improvement and safety science that minimizes risk of harm to patients and providers through both system effectiveness and individual performance.
6).Apply core professional nursing values to intentionally collaborate and effectively communicate with patients, families, communities, other stakeholders, and the health care team to optimize care, enhance the healthcare experience, and strengthen outcomes.
7). Coordinate resources effectively in complex health care systems (micro, meso, and macro) to provide safe, quality, and equitable care to diverse populations. 8). Use information and communication technologies and informatics processes to manage and improve the delivery of safe, high-quality nursing care, gathering data and information related to health care services and evidence-based practice in accordance with best practice and professional and regulatory standards.9).Demonstrate accountability, perspective, collaborative disposition, and comportment in the development of a sustainable professional nursing identity that reflects the values and characteristics of nursing practice.10).Participates in activities and self-reflection that fosters professionalism, personal health, resilience, and well-being, contributes to lifelong learning, and supports the acquisition of nursing expertise and the assertion of leadership.

Program
Nutrition

Program Code
NUTR-BS-Major

Degree Designation
Bachelor of Science

Campuses
Bloomsburg Campus, LockHaven Campus, Mansfield Campus

College
College of Health, Science, & Technology

Department
Biological and Health Sciences

Program Description
Graduates of this program have two options: 1) to obtain an Accreditation Council for Education in Nutrition and Dietetics (ACEND) accredited internship in order to become a Registered Dietitian, or (2) to obtain an entry level job.

The mission of the Commonwealth University Didactic Program in Dietetics (DPD) at Mansfield University is to provide graduates with the evidence-based knowledge and skills foundational to supervised practice leading to eligibility for the Commission for Dietetic Registration (CDR) credentialing exam to become Registered Dietitian Nutritionists (RDN). The program also prepares graduates to become Dietetic Technicians, Registered (DTR) and to pursue entry-level careers in foodservice management, community nutrition; and/or to attend graduate school in a complex and changing global society.

Degree Designation
Undergraduate

Student Outcomes
Program Student Learning Objectives:

Demonstrate the ability to use and interpret current research in developing knowledge of nutrition, sports nutrition, and dietetic practice.

Demonstrate the ability to use oral and written communications effectively as individuals and in group settings requiring collaboration and teamwork.

Demonstrate problem-solving and critical thinking skills related to medical nutrition therapy.

Demonstrate their ability to apply management principles using problem-solving and critical thinking skills in hypothetical practice situations.

Exhibit understanding of public policy and its effects on health care systems.

Demonstrate the ability to develop nutrition prescriptions for a variety of individuals and groups nutrition therapy.

Program Goal #1 – The DPD program will provide quality didactic instruction that prepares graduates to apply for acceptance into accredited supervised practice programs.

Objective 1.1: At least 80% of students complete program requirements within six years (150% of planned program length). The data will be retrieved from the retention records from the Registrar's Office.

Objective 1.2: At least 40 percent of program graduates apply for admission to a supervised practice program prior to or within 12 months of graduation. The data will be retrieved from faculty members who write letters of recommendation and through discussions with graduates.

Objective 1.3: Of program graduates who apply to a supervised practice program, at least 60 percent are admitted within 12 months of graduation. The data will be retrieved through emails, discussions with graduates, and D&D Digital Match reports.

Objective 1.4: The program's one-year pass rate (graduates who pass the registration exam within one year of first attempt) on the CDR credentialing exam for dietitian nutritionists is at least 80%. The data will be retrieved from Pearson VUE Data for CDR Exam.

Objective 1.5: Within 12 months of graduation, 75% of the graduates' supervisors who complete a survey will agree or strongly agree that the graduates are prepared for their current position (e.g., Supervised Practice, Graduate Program, or

Employment). The data will be retrieved from the graduate surveys.

Objective 1.6: Within 12 months of graduation, 75% of the graduates who complete a survey will agree or strongly agree that they are prepared for their current position (e.g., Supervised Practice, Graduate Program, or Employment). The data will be retrieved from the graduate surveys.

Program Goal #2 – The DPD program will provide quality didactic instruction that prepares graduates for acceptance into graduate or pre-professional school, or entry-level careers in nutrition or a related field.

Objective 2.1: At least 75% of graduate or pre-professional school applicants will be accepted into graduate or pre-professional school within 12 months of graduating from the program. The data will be retrieved from faculty members who write letters of recommendation and through discussions with graduates.

Objective 2.2: At least 75% of graduates seeking employment will be employed in a nutrition or health-related field within 12 months of graduating from the program. The data will be retrieved from faculty members who write letters of recommendation and through discussions with graduates.

NUTR-Minor - Nutrition Minor

General

Program Title
Nutrition Minor

Program Code
NUTR-Minor

Campuses
Bloomsburg Campus, LockHaven Campus, Mansfield Campus

College
College of Health, Science, & Technology

Department
Biological and Health Sciences

Program Description
The nutrition minor provides the student with a strong background in nutrition as related to the student's field of study. The minor is especially suited to students in health care fields other than nutrition, including students who wish to work with eating disordered individuals, future educators and coaches, future journalists, and anyone else who may need a strong background in nutrition.

Degree Designation
Undergraduate

Student Outcomes
Program Objectives:
Promote nutrition knowledge among non-nutrition majors
Promote basic knowledge of foods among non-nutrition majors

Program Learning Outcomes:
Students are able to
Apply professional guidelines to a practice scenario
Use the nutrition care process to make decisions, to identify nutrient related problems, and determine and evaluate nutrition interventions.
Develop food and nutrient interventions to affect change and enhance wellness in diverse individuals and groups
Develop an educational session or program / educational strategy for a target population

ORCM-BA-Concentration - Communication Studies - Organizational Communication

Program Title
Communication Studies - Organizational Communication

Program Code
ORCM-BA-Concentration

Degree Designation
Bachelor of Arts

Campuses
Bloomsburg Campus, LockHaven Campus, Mansfield Campus

College
College of Arts, Humanities, Education and Social Sciences

Department
Comm, Media and Journalism

Program Description
Communication Studies is a discipline that involves the investigation and practice of face-to-face, small group, organizational, public, print, and mediated messages. Effective communication has long been recognized as the hallmark of an educated person and is vital to social and career success. The U.S. Department of Labor identifies listening, speaking, creative thinking, decision making, problem solving, reasoning, self-esteem, sociability, self-management, and integrity as qualities for outstanding job performance. Majoring in Communication Studies develops all these skills.

Degree Designation
Undergraduate

Student Outcomes
Upon graduation, students in all three concentration areas will be able to:

1. Present effective and appropriate messages in multiple communication modalities and contexts.
2. Integrate theory, research, and practice in a variety of communication contexts.
3. Exhibit social responsibility and professionalism in their communicative interactions with others.
4. Implement leadership knowledge and skills in a variety of contexts.
5. Display the communication skills necessary to engage in competent human relational interaction in multiple contexts.

Program Description
This program provides a multidisciplinary, human-focused education designed to offer meaningful, application-based, and experiential learning opportunities so graduates possess the knowledge and skills to advance the health of individuals and populations in a complex and changing global society. The Bachelor of Science in Health Science Pre-Physician Assistant 3+2 program is based on an articulation agreement with the Master of Science in Health Science Physician Assistant Studies. Students who meet the academic requirements identified in the articulation agreement are guaranteed admission into the Master of Science in Physician Assistant Studies Program. 30 seats are reserved for students on the LH campus.

Degree Designation
Undergraduate

Student Outcomes
Upon program completion, students will:
1. Demonstrate general knowledge of human anatomy and physiology in both healthy and disease states.

2. Apply critical thinking skills when making evidence-informed/evidence-based decisions.

3. Demonstrate entry-level communication skills including written, verbal, and affect skills specific to their proposed professional setting.

Program Code
PANT-BA-Concentration

Degree Designation
Bachelor of Arts

Campuses
Bloomsburg Campus, LockHaven Campus, Mansfield Campus

College
College of Arts, Humanities, Education and Social Sciences

Department
Visual Arts

Program Description
The Bachelor of Arts in Visual Arts will offer students a NASAD accredited liberal arts degree in Visual Arts with a choice of concentration in multiple areas: Painting; Drawing; Fabric Design; Printmaking; Graphic Design; Sculpture; Photography; Digital Media; Ceramics and Art History.

Degree Designation
Undergraduate

Student Outcomes
NASAD (National Association of Schools of Art and Design - accrediting body for Visual Arts) Required competencies required of Liberal Arts Degrees in Visual Arts:

Students graduating with BA in Visual Arts degree with concentrations in Painting; Drawing; Fabric Design; Printmaking; Sculpture; Photography; Digital Media; and Ceramics upon graduation, students must possess:
a. A developed visual sensitivity.

b. The technical skills, perceptual development, and understanding of principles of visual
organization sufficient to achieve basic visual communication and expression in one or more media.

c. Ability to make workable connections between concept and media.

d. Some familiarity with the works and intentions of major artists/designers and movements of the past and the present, both in the Western and non-Western worlds.

5. Students should understand the nature of contemporary thinking on art and design, and have gained at least a rudimentary discernment of quality in design projects and works of art.

Students graduating with BA in Visual Arts degree with concentrations in Graphic Design upon graduation, students must possess:
a. Technical skills, perceptual development, and understanding of design and other principles of visual organization sufficient to achieve basic visual communication using one or more media associated with design.

b. Basic ability to demonstrate how relationships among design principles and the material
qualities of objects are incorporated into the production of design work, and how they contribute in terms of use and interpretation.

c. Functional knowledge of how the design of communication, products, environments, systems, and services both reflects and shapes various aspects of the context in which they are produced.

d. Understanding of the various levels at which design problems can be formulated and
addressed, and the ability to discern observable or potential consequences of specific design action in large, complex systems.

e. Ability to identify differences among audiences/users for design, and an understanding of how audience/user values and behaviors are reflected in the design of communications, products, environments, and services.

f. Understanding of design process, including abilities to consider probable or potential future conditions, think divergently in the generation of multiple solutions,

and use design principles and elements of the design process to converge on ideas and results that are effective in realizing project purposes.

g. Awareness of the critical perspectives in the evaluation of design, including the history of ideas about the role of design in culture and of ideas informing design practice over time.

h. For students emphasizing design scholarship, the ability to use overview knowledge of design practice, history, theory, criticism, and technology and the tools and techniques of research, scholarship, and communication in the production of scholarly analytical work about design.

Students graduating with BA in Visual Arts degree with concentrations in Art History upon graduation, students must possess:
a. A general knowledge of the monuments and principal artists of all major art periods of the past, including a broad understanding of the art of the twentieth century and acquaintance with the art history of non-Western cultures. This knowledge should be augmented by study in greater depth and precision of several cultures and periods in the history of art and concentration in at least one area to the advanced seminar level. Study at the advanced level should include theory, analysis, and criticism.

b. A general knowledge of world history.

c. Knowledge of the tools and techniques of scholarship. Active research and the writing of analytical and critical essays should continue throughout the program.

d. Functional knowledge of the creative process. Normally, this is accomplished through one or more foundation or other studio courses; however, there are many methods of ensuring this competence.

Visual Arts

Program Description
The Bachelor of Fine Arts in Visual Arts will offer students a NASAD accredited professional degree in Visual Arts with a choice of concentration in multiple areas: and (BU/LHU/MU) Art History and Graphic Design; (BU only) Painting; Drawing; Fabric Design; Printmaking; Sculpture; Photography; (LHU/MU only) 2D Media; 3D Media.

Degree Designation
Undergraduate

Student Outcomes
NASAD (National Association of Schools of Art and Design - accrediting body for Visual Arts) Required competencies required of Professional Degrees in Visual Arts:

Students graduating with BFA in Visual Arts degree must possess:
1. Studio Studies:Practice, and experiences in studio subjects are of prime importance in the preparation of students for professional careers in art and design. The excellence of the creative work produced by students is the best determinant of the adequacy of the studio studies offered by an institution. Studio work begins at the freshman level and extends with progressively greater intensity throughout the degree program. Creative work includes, but is not limited to, conceptualization, process, product, and critique.
Irrespective of major or specialization, students must:

a. Gain functional competence with principles of visual organization, including the ability to work with visual elements in two and three dimensions; color theory and its applications; and drawing.

b. Present work that demonstrates perceptual acuity, conceptual understanding, and technical facility at a professional entry level in their chosen field(s).

c. Become familiar with the historical achievements, current major issues, processes, and
directions of their field(s).

d. Be afforded opportunities to exhibit their work and to experience and participate in critiques and discussions of their work and the work of others.

e. Students engage in independent study at the advanced level that includes appropriate supervision and evaluation upon completion.

2. Art History Studies: Student must gain competency in Art/Design History, Theory, and Criticism. Through comprehensive courses in the history of
art/design, students must:

a. Learn to analyze works of art/design from both Western and non-Western cultures perceptively and to evaluate them critically.

b. Develop an understanding of the common elements and vocabulary of art/design and of the interaction of these elements, and be able to employ this knowledge in analysis.

c. Acquire the ability to place works of art/design in historical, cultural, and stylistic contexts.

3. Technology. Students must acquire a working knowledge of technologies and equipment applicable to their area(s) of specialization.

4. Synthesis. While synthesis is a lifetime process, by the end of undergraduate studies students should be able to work independently on a variety of art and/or

design problems by combining, as appropriate to the issue, their capabilities in studio, analysis, history, and technology.

5. Results: Upon completion of the Visual Arts BFA degree program:
a. Students must demonstrate achievement of professional, entry-level competence in the major area of specialization, including significant technical mastery, capability to produce work and solve professional problems independently, and a coherent set of artistic/intellectual goals that are evident in their work.

b. Students must demonstrate their competence by developing a body of work for evaluation in the major area of study. A senior project or final presentation in the major area is required.

3. Students must have the ability to form and defend value judgments about art and design and to communicate art/design ideas, concepts, and requirements to professionals and laypersons related to the practice of the major field. They are able to work collaboratively as appropriate to the area(s) of specialization.

Degree Designation
ND

Campuses
Bloomsburg Campus, LockHaven Campus, Mansfield Campus

College
No College Designated

Department
Early Childhood Education and Exceptionality Programs

Program Description
The post-baccalaureate program allows individuals who already hold a bachelor's degree to complete the requirements to earn teaching certification. Candidates will receive the same high quality, hands-on learning but will not need to seek a second degree.

Degree Designation
Undergraduate

Student Outcomes
1a. Knowing and understanding young children's characteristics and needs, from birth through age 8.
b. Knowing and understanding the multiple influences on development and learning
c. Using developmental knowledge to create healthy, respectful, supportive, and challenging learning environments for young children
2a. Knowing about and understanding family and community characteristics
b. Supporting and empowering families and communities through respectful, reciprocal relationships.
c. Involving families and communities in their children's development and learning.
3a. Understanding the goals, benefits, and uses of assessment – including its use in development of appropriate goals, curriculum, and teaching strategies for children
b. Knowing about and using observation, documentation, and other appropriate assessment tools and approaches, including the use of technology in documentation, assessment and data collection.
c. Understanding and practicing responsible assessment to promote positive outcomes for each child, including the use of assistive technology for children with disabilities.
d. Knowing about assessment partnerships with families and with professional colleagues to build effective learning environments
4a. Understanding positive relationships and supportive interactions as the foundation of their work with young children
b. Knowing and understanding effective strategies and tools for early education, including appropriate uses of technology
c. Using a broad repertoire of developmentally appropriate teaching /learning approaches
d. Reflecting on own practice to promote positive outcomes for each child
a5. Understanding content knowledge and resources in academic disciplines: language and literacy; the arts – music, creative movement, dance, drama, visual arts; mathematics; science, physical activity, physical education, health and safety; and social studies.
b. Knowing and using the central concepts, inquiry tools, and structures of content areas or academic disciplines
c. Using own knowledge, appropriate early learning standards, and other resources to design, implement, and evaluate developmentally meaningful and challenging curriculum for each child.

Department
Media and Journalism

Program Description
The Department of Media and Journalism prepares students to learn how to continually adapt to an ever-changing and evolving media environment. This is achieved through the development of such skills as storytelling, information literacy, the ability to create media using the latest technology as well as how their role in the media connects to society at large, core skills necessary to effectively use media to reach desired audiences.

Degree Designation
Undergraduate

Student Outcomes
Narrative Skills - Students will apply knowledge of storytelling skills to produce effective stories and strategic communication in multiple forms and contexts specific to their chosen area of concentration in mass media/communication.

Information Literacy - Students will demonstrate the ability to find, critically evaluate, and legally and ethically use information sources using appropriate methods and technologies.

Media Literacy - Students will develop the ability to access, analyze, evaluate and create media. This includes the technical and aesthetic skills and knowledge of the technology required to produce various media.

Civic Engagement - Students will demonstrate knowledge and application of the mass media's role in a democracy as well as in an increasingly diverse and globalized society.

College of Health, Science, & Technology

Department
Rehabilitation Sciences

Program Description
The mission of the CUP Exercise Science Program is to promote optimal health and well-being in the physically active population by providing educational opportunities to prepare qualified undergraduate students for a professional career in Exercise Science. The Exercise Science Program is structured according to competencies and proficiency domains designated by the American College of Sports Medicine. We are committed to providing quality learning experience both in classroom and in the laboratory or practical setting. We have well equipped laboratory and teaching facilities supported by internship and educational research to provide these services.
The CUP Exercise Science Program seeks to enhance student learning through a variety of interactive and problem-solving experiences that mandate the student demonstrate cognitive understanding of the health sciences, work with diverse individuals and populations, and perform specific skills and techniques. The development of competent Exercise Science professionals is based on a program of curricular experiences that require students to demonstrate and apply their knowledge, skills, and attributes in their internship as well as professional setting.
The purpose of this program is to prepare well-rounded students. Successful students will be able to design safe and effective exercise prescriptions, and conduct individual exercise programs, fitness testing, and health education for athletes, low to moderate risk individuals, individuals with controlled diseases, and individuals in special populations (i.e., pregnancy, hypertension, and diabetes mellitus). In addition, this program aims to produce students that are committed to academic excellence, are socially responsible, and have demonstrated cultural sensitivity.
We are committed to evaluating the Exercise Science Program regularly to ensure that our students are receiving the highest quality education possible. Furthermore, we are committed to staying abreast of the ongoing changes in our profession in order to keep our students current in our evolving field. The B.S (Exercise Science) program is currently accredited through the Commission on Accreditation of Allied Health Education Programs (CAAHEP), which is the largest programmatic accreditor in the health sciences field. Accreditation provides recognition for a high-quality Exercise Science curriculum, resources, and faculty by measuring them against agreed-upon standards and evaluating that the program is meeting these standards on an annual basis.
Finally, the CUP Exercise Science Program aspires to be a program of recognized excellence. We strive to establish this program as a leader in undergraduate Exercise Science professional preparation.

Degree Designation
Undergraduate

Student Outcomes
To provide a quality program leading to a Bachelor of Science degree in Exercise Science.
To provide curriculum consistent with the core courses recommended by the American College of Sports Medicine and the National Strength and Conditioning Association in preparation for national certification examinations.
To provide a curriculum that integrates personal and practical skills to produce entry-level competence in any field of exercise science.
To provide students opportunities for work-related experience within the health and fitness field.
To provide quality academic instruction, satisfaction, and learning experiences to student graduates.
To prepare students to procure entry-level employment in the health / fitness / wellness field, or continue formal education in schools offering advanced degrees in health-related graduate programs.
To provide an academic curriculum that engages students with hands on experiences and individual support to foster student retention.
To provide faculty and staff who possess the knowledge, training, and skills necessary to provide an environment conducive for teaching and learning.
To provide students with quality advising and counseling to promote timely and efficient progression through the program.
To graduate confident, competent students who will be able to successfully compete in the marketplace.

Program Description
The Professional Communication Minor is designed to prepare students to engage in the communication skills necessary to succeed in their future careers. Students will complete courses that are specifically geared toward developing communication skills that are valued in a variety of workplaces and organizations.

Degree Designation
Undergraduate

Student Outcomes
Students who complete the Professional Communication Minor will meet the following program outcomes:
1. Students will present effective and appropriate messages in professional contexts.
2. Students will integrate theory, research, and practice in professional contexts.
3. Students will exhibit social responsibility in their communication with others in professional contexts.
4.Stuents will implement leadership knowledge and skills in professional contexts.

PERF-BA-Concentration - Theatre - Performance

General

Program Title
Theatre - Performance

Program Code
PERF-BA-Concentration

Degree Designation
Bachelor of Arts

Campuses
Bloomsburg Campus

College
College of Arts, Humanities, Education and Social Sciences

Department
Music, Theatre, and Dance

Program Description
This program is designed to allow Commonwealth University to continue the National Association of Schools of Theatre accreditation held by BU prior to integration. The Theatre major was identified in the program array as one being housed at the BU campus location.

The mission of the Division of Theatre and Dance is to provide a strong undergraduate education in the theory and practice of theatre and dance, to support the University's general education curriculum, and to enhance the cultural life of the campus community. The Division's goal is to develop students' working knowledge and application of historical and contemporary theories and practices in performance, design and technology, and dramatic and critical literature. We strive to develop artists who are imaginative critical thinkers and effective communicators producing art that celebrates humanity and challenges complacency.

The Theatre & Dance Strategic Plan outlines 4 main areas of focus:
1. Academic Excellence

In line with the fundamental mission of the academy, the Division of Theatre and Dance seeks to promote a thorough understanding of theory and practice in our artistic disciplines.

Toward this end, we encourage students to explore both historical foundations and current innovations affecting these pursuits.

This philosophy is in keeping with the ideas and approaches to arts education advocated for by our accrediting body: "Professionals know from personal experience that art, though dependent on talent, inspiration, and creativity, requires much more to function as a significant spiritual and educational force. Talent without skills, inspiration without knowledge, and creativity without technique count for little but lost potential."

2. Artistic Quality

The Division of Theatre and Dance seeks to support artistic excellence in the work of both students and faculty, on campus and beyond the limits of the academy.

This philosophy is in keeping with the ideas and approaches to arts education advocated for by our accrediting body: "Dance, music, theatre, and the visual arts are professions requiring talent, knowledge, skill, and dedication. Professional artists have created some of man's highest achievements. Yet, artists need no license to practice: employment and success depend almost entirely on competence demonstrated through audition or portfolio review."

3. Cultural Enhancement & Diversification of the Campus & Broader Community

The Division of Theatre and Dance seeks to offer a range of theatre and dance genres and styles and to broaden community access to, and attendance at, these events.

4. Public Awareness

The Division of Theatre and Dance has a history of excellent instruction resulting in both program and graduate success. Part of our efforts will be dedicated toward communicating that excellence to the broader community.

Degree Designation
Undergraduate

Student Outcomes
There are five primary student learning outcomes for the major:

History/Criticism/Literature: Graduates of the program will recognize and be able to communicate trends in theatre history, dramatic structure, dramatic styles associated with various periods, and characteristics of the work of important theatre practitioners.

Knowledge of Design Process: Graduate of the program will have a working knowledge of the theatrical design process and the basic skills necessary to develop initial design ideas, research and present the design ideas, and collaboratively integrate them into an initial design concept presentation.

Knowledge of Acting: Graduates of the program will have a working knowledge of the practice of acting and the basic skills for performance.

Rehearsal, Construction, and Performance: Graduates of the program will demonstrate a working knowledge of appropriate rehearsal, construction, and performance practices through application in theatrical disciplines in a collaborative production setting.

Specific Theatrical Discipline: Graduates of the program will demonstrate appropriate skills for future personal and professional success in a specific theatrical discipline or area.

PFP-Minor - Personal Financial Planning Minor

General

Program Title
Personal Financial Planning Minor

Program Code
PFP-Minor

Campuses
Bloomsburg Campus, LockHaven Campus, Mansfield Campus

College
Zeigler College of Business

Department
Business, Innovation, and Technology

Program Description
The minor in Personal Financial Planning (PFP) is intended to complement a student's primary major, and designed to provide non-finance students with an overview of the principles of financial planning and processes that can be used to help individuals to achieve financial independence and security, and also with the knowledge, skills, and competencies needed for success in financial services industry. It will be open to all non-PFP students, both business or non-business.

Degree Designation
Undergraduate

Student Outcomes
Students who complete the program will be able to:
1. Discuss the importance of wise financial planning and tax planning.
2. Evaluate alternative financial institutions, financial services, and consumer credit.
3. Analyze major consumer purchasing strategies and how to manage risk and insurance for the assets, properties, and life.
4. Describe the fundamentals of retirement planning and estate planning processes.

PGEO-BS-Concentration - Professional Geology

General

Program Title
Professional Geology

Program Code
PGEO-BS-Concentration

Degree Designation
Bachelor of Science

Campuses
Bloomsburg Campus

College
College of Health, Science, & Technology

Department
Phys and Env Sci and Engr

Program Description
The Professional Geology concentration prepares students for certification and licensure as a professional geologist (P.G.). Students in this concentration focus on surface and subsurface geological processes and explore methods of geological data collection and interpretation. Careers in Professional Geology focus in areas such as hydrogeology, natural hazard mitigation, environmental contamination cleanup, construction/infrastructure site suitability and energy/mineral resource exploration and development. Courses within the curriculum are related to the content domains that required knowledge for the professional geology licensure examination.

Degree Designation
Undergraduate

Student Outcomes
Students within the Professional Geology concentration should 1) Demonstrate comprehension of basic principles in the primary areas of knowledge such as the identification and characterization of earth materials and the processes operating at or beneath the Earth's surface. 2) Use relevant tools and instruments in a lab and/or field setting to collect geological data both on the surface and in the subsurface. 3) Evaluate, analyze and interpret both quantitative and qualitative data for geological problem solving. 4) Communicate graphically, orally and in writing.

PHED-Minor - Public Health Education Minor

General

Program Title
Public Health Education Minor

Program Code
PHED-Minor

Campuses
Bloomsburg Campus, LockHaven Campus, Mansfield Campus

College
College of Health, Science, & Technology

Department
Phys and Env Sci and Engr

Program Description
The Minor in Public Health provides students with knowledge and skills for improving health from a public health perspective. Many professions work in the public health arena, including, but not limited to, health education specialists, physicians, nurses, social workers, pharmacists, physician assistants, sanitarians, environmental health specialists, first responders, health communication specialists, and nutritionists. Many health-related professions are moving from an individual-level perspective to a community-level perspective.

Degree Designation
Undergraduate

Student Outcomes
Students completing the minor will be able to:
Describe the function and value of public health activities for advancing population health.
Examine health concerns from a population health perspective.
Apply public health principles in health profession settings.

PHIL-Minor - Philosophy Minor

General

Program Title
Philosophy Minor

Program Code
PHIL-Minor

Campuses
Bloomsburg Campus, LockHaven Campus, Mansfield Campus

College
College of Arts, Humanities, Education and Social Sciences

Department
History, Poli Sci & Philosophy

Program Description
Philosophy is a discipline central to the liberal arts and humanities. Familiarity with some of its most important topics and questions forms a vital feature of undergraduate education. The aim of the Philosophy Minor is thus to acquaint students with philosophical work concerning, for example, the nature of reality, the possibility of knowledge, and the character of the good life. The course array of the Philosophy Minor is specifically tailored to achieve this objective.

Degree Designation
Undergraduate

Student Outcomes
Students will achieve meaningful familiarity with topics in metaphysics, epistemology, and ethics through the completion of courses whose utility is directly relevant to virtually any of the Major offerings of CUP. Students will also master the basics of critical thinking applicable to any field of study.

PHLE-BS-Concentration - Public Health Education

General

Program Title
Public Health Education

Program Code
PHLE-BS-Concentration

Degree Designation
Bachelor of Science

Campuses
Bloomsburg Campus, Mansfield Campus

College
College of Health, Science, & Technology

Department
Biological and Health Sciences

Program Description
The Department of Health and Exercise Science provides a multidisciplinary, human-focused education designed to offer meaningful, application-based, and experiential learning opportunities so graduates possess the knowledge and skills to advance the health of individuals and populations in a complex and changing global society. The Bachelor of Science in Health Science Pre-Professional Program is designed to prepare students for entry into a variety of healthcare-related graduate programs..

Degree Designation
Undergraduate

Student Outcomes
Upon program completion, students will:
1. Demonstrate general knowledge of human anatomy and physiology in both healthy and disease states.

2. Apply critical thinking skills when making evidence-informed/evidence-based decisions.

3. Demonstrate entry-level communication skills including written, verbal, and affect skills specific to their proposed professional setting.

College
College of Health, Science, & Technology

Department
Nursing - Graduate

Program Description
Our program options prepare the graduate in either public health nursing or school health nursing. The program specialization is designed to prepare the graduate to promote and protect the health of the population using knowledge from nursing, social, and public health sciences. PHNs engage in population-focused practice and apply public health concepts of prevention at the individual, family and community level. Students engage in the competent use of the nursing process to assess and diagnose health problems of populations and aggregates in order to design programs to facilitate optimal wellness.

Degree Designation
Graduate

Student Outcomes
Students develop competence in the multifaceted role of a specialist and use their advanced knowledge, responsible decision-making, innovative problem solving and communication to promote change in the community. They engage in the competent use of the nursing process to diagnose the health problems of special populations to design programs to facilitate optimal wellness within the community environment, and improve the delivery of health care, health education, early detection and screening and prevention services. Students will engage in social, ethical and political actions to influence and initiate change in health care policy in order to promote community health.

PHOT-BA-Concentration - Visual Arts BA - Photography

General

Program Title
Visual Arts BA - Photography

Program Code
PHOT-BA-Concentration

Degree Designation
Bachelor of Arts

Campuses
Bloomsburg Campus, LockHaven Campus, Mansfield Campus

College
College of Arts, Humanities, Education and Social Sciences

Department
Visual Arts

Program Description
The Bachelor of Arts in Visual Arts will offer students a NASAD accredited liberal arts degree in Visual Arts with a choice of concentration in multiple areas: Painting; Drawing; Fabric Design; Printmaking; Graphic Design; Sculpture; Photography; Digital Media; Ceramics and Art History.

Degree Designation
Undergraduate

Student Outcomes
NASAD (National Association of Schools of Art and Design - accrediting body for Visual Arts) Required competencies required of Liberal Arts Degrees in Visual Arts:

Students graduating with BA in Visual Arts degree with concentrations in Painting; Drawing; Fabric Design; Printmaking; Sculpture; Photography; Digital Media; and Ceramics upon graduation, students must possess:
a. A developed visual sensitivity.

b. The technical skills, perceptual development, and understanding of principles of visual
organization sufficient to achieve basic visual communication and expression in one or more media.

c. Ability to make workable connections between concept and media.

d. Some familiarity with the works and intentions of major artists/designers and movements of the past and the present, both in the Western and non-Western worlds.

5. Students should understand the nature of contemporary thinking on art and design, and have gained at least a rudimentary discernment of quality in design projects and works of art.

Students graduating with BA in Visual Arts degree with concentrations in Graphic Design upon graduation, students must possess:
a. Technical skills, perceptual development, and understanding of design and other principles of visual organization sufficient to achieve basic visual communication using one or more media associated with design.

b. Basic ability to demonstrate how relationships among design principles and the material
qualities of objects are incorporated into the production of design work, and how they contribute in terms of use and interpretation.

c. Functional knowledge of how the design of communication, products, environments, systems, and services both reflects and shapes various aspects of the context in which they are produced.

d. Understanding of the various levels at which design problems can be formulated and
addressed, and the ability to discern observable or potential consequences of specific design action in large, complex systems.

e. Ability to identify differences among audiences/users for design, and an understanding of how audience/user values and behaviors are reflected in the design of communications, products, environments, and services.

f. Understanding of design process, including abilities to consider probable or potential future conditions, think divergently in the generation of multiple solutions,

and use design principles and elements of the design process to converge on ideas and results that are effective in realizing project purposes.

g. Awareness of the critical perspectives in the evaluation of design, including the history of ideas about the role of design in culture and of ideas informing design practice over time.

h. For students emphasizing design scholarship, the ability to use overview knowledge of design practice, history, theory, criticism, and technology and the tools and techniques of research, scholarship, and communication in the production of scholarly analytical work about design.

Students graduating with BA in Visual Arts degree with concentrations in Art History upon graduation, students must possess:
a. A general knowledge of the monuments and principal artists of all major art periods of the past, including a broad understanding of the art of the twentieth century and acquaintance with the art history of non-Western cultures. This knowledge should be augmented by study in greater depth and precision of several cultures and periods in the history of art and concentration in at least one area to the advanced seminar level. Study at the advanced level should include theory, analysis, and criticism.

b. A general knowledge of world history.

c. Knowledge of the tools and techniques of scholarship. Active research and the writing of analytical and critical essays should continue throughout the program.

d. Functional knowledge of the creative process. Normally, this is accomplished through one or more foundation or other studio courses; however, there are many methods of ensuring this competence.

Program Description
The Bachelor of Fine Arts in Visual Arts will offer students a NASAD accredited professional degree in Visual Arts with a choice of concentration in multiple areas: and (BU/LHU/MU) Art History and Graphic Design; (BU only) Painting; Drawing; Fabric Design; Printmaking; Sculpture; Photography; (LHU/MU only) 2D Media; 3D Media.

Degree Designation
Undergraduate

Student Outcomes
NASAD (National Association of Schools of Art and Design - accrediting body for Visual Arts) Required competencies required of Professional Degrees in Visual Arts:

Students graduating with BFA in Visual Arts degree must possess:
1. Studio Studies:Practice, and experiences in studio subjects are of prime importance in the preparation of students for professional careers in art and design. The excellence of the creative work produced by students is the best determinant of the adequacy of the studio studies offered by an institution. Studio work begins at the freshman level and extends with progressively greater intensity throughout the degree program. Creative work includes, but is not limited to, conceptualization, process, product, and critique.
Irrespective of major or specialization, students must:

a. Gain functional competence with principles of visual organization, including the ability to work with visual elements in two and three dimensions; color theory and its applications; and drawing.

b. Present work that demonstrates perceptual acuity, conceptual understanding, and technical facility at a professional entry level in their chosen field(s).

c. Become familiar with the historical achievements, current major issues, processes, and
directions of their field(s).

d. Be afforded opportunities to exhibit their work and to experience and participate in critiques and discussions of their work and the work of others.

e. Students engage in independent study at the advanced level that includes appropriate supervision and evaluation upon completion.

2. Art History Studies: Student must gain competency in Art/Design History, Theory, and Criticism. Through comprehensive courses in the history of
art/design, students must:

a. Learn to analyze works of art/design from both Western and non-Western cultures perceptively and to evaluate them critically.

b. Develop an understanding of the common elements and vocabulary of art/design and of the interaction of these elements, and be able to employ this knowledge in analysis.

c. Acquire the ability to place works of art/design in historical, cultural, and stylistic contexts.

3. Technology. Students must acquire a working knowledge of technologies and equipment applicable to their area(s) of specialization.

4. Synthesis. While synthesis is a lifetime process, by the end of undergraduate studies students should be able to work independently on a variety of art and/or

design problems by combining, as appropriate to the issue, their capabilities in studio, analysis, history, and technology.

5. Results: Upon completion of the Visual Arts BFA degree program:
a. Students must demonstrate achievement of professional, entry-level competence in the major area of specialization, including significant technical mastery, capability to produce work and solve professional problems independently, and a coherent set of artistic/intellectual goals that are evident in their work.

b. Students must demonstrate their competence by developing a body of work for evaluation in the major area of study. A senior project or final presentation in the major area is required.

3. Students must have the ability to form and defend value judgments about art and design and to communicate art/design ideas, concepts, and requirements to professionals and laypersons related to the practice of the major field. They are able to work collaboratively as appropriate to the area(s) of specialization.

Program Code
PHSN-MSN-Concentration

Degree Designation
Master of Science in Nursing

Campuses
Bloomsburg Campus

College
College of Health, Science, & Technology

Department
Nursing - Graduate

Program Description
Our program options prepare the graduate in either public health nursing or school health nursing. The program specialization is designed to prepare the graduate to promote and protect the health of the population using knowledge from nursing, social, and public health sciences. PHNs engage in population-focused practice and apply public health concepts of prevention at the individual, family and community levels. Students engage in the competent use of the nursing process to assess and diagnose health problems of populations and aggregates to design programs to faciliate optimal wellness.

Degree Designation
Graduate

Student Outcomes
MSN Public Health Program Goals
1. Integrate, translate, and apply scientific knowledge from nursing and related fields for improved health outcomes across diverse populations
2. Develop advanced leadership, communication, and critical reasoning skills to provide evidence-based, holistic, equitable, developmentally, and culturally appropriate healthcare to diverse populations
3. Influence equitable healthcare outcomes for individuals, families and populations through collaborative efforts with community partners resulting in population level health promotion, prevention and disease management
4. Analyze the impact of health policy on the planning and delivery of care within a variety of populations
5. Employ a system's-thinking clinical approach in advocating for change and the creation of policies that will improve the health of all populations

Program Title
Physician Assistant

Program
Physician Assistant

Program Code
PHYA-MHS-Major

Degree Designation
Master of Health Science

Campuses
LockHaven Campus

College
College of Health, Science, & Technology

Department
Biological and Health Sciences

Program Description
The Physician Assistant Program is a two-year, entry-level, clinical degree granting the Master of Health Science in Physician Assistant Studies. The PA Program curriculum consists of a didactic phase and a clinical phase, each lasting 12 months. The didactic year follows a modular design in which concepts regarding organ systems and medical specialties are covered in blocks of instruction lasting approximately one to three weeks each. The clinical year consists of 9 five-week rotations in various medical disciplines and settings. The PA Program holds "Accreditation - Continued" status with the Accreditation Review Commission on Education for the Physician Assistant.

Degree Designation
Graduate

Student Outcomes
Students completing the PA Program curriculum will gain knowledge of medical conditions including anatomy and physiology, pathophysiology, clinical presentation, diagnostics, and treatments including pharmacology. Furthermore, students will develop clinical skills including history taking and physical exam skills, suturing, splinting and casting, injections, venipuncture, etc. Upon completion of the Program, graduates are eligible to sit for the Physician Assistant National Certifying Examination (PANCE).

Counseling & Educational Lead

Program Description
Bloomsburg University has had the PDE approved PA Supervisor of Curriculum and Instruction Certification Graduate program since 2005, and this proposal is to continue the program in the new Commonwealth University. The program is fully on-line and currently has students from across the Commonwealth.

This program prepares students for a PK-12 PA Administrative I Supervisor of Curriculum and Instruction Licensure through a Masters of Education in Educational Leadership program. Students complete coursework to gain knowledge and skills in effective leadership, research, ethics, systems, data driven decisions, law, finance, and demonstrate these competencies through the required PDE internship experiences.

Degree Designation
Graduate

Student Outcomes
Apply knowledge of qualitative and quantitative research
Apply data driven decisions and action research
Demonstrate knowledge of effective building leadership; strategic, cultural, and systems leadership, leadership for learning, professional and community leadership, leadership and advocacy for students with learning disabilities
Compare and contrast research based best practices for instruction, supervision, and federal programs
Demonstrate knowledge of curriculum design, development, evaluation, modification, and types of curriculum
Demonstrate knowledge of federal, state, and local laws and regulations for school operations
Demonstrate knowledge of district level leadership and ethics
Apply knowledge of school improvement initiatives including: student achievement, professional development, teacher and non-instructional educators, and reporting regulations on improvement
Demonstrate knowledge of effective stewardship of various resources: financial, time, human capital, etc.
Demonstrate knowledge of andragogy, career stages, induction, mentoring, and tenure, and differentiated supervision

Department
Early Childhood Education

Program Description
The Department of Early Childhood Education seeks approval of the Certificate in Playwork. Playwork is a well-respected, professional field that draws upon a variety of disciplines including anthropology, child study, civics, drama, human development, pedagogy, physical education, psychology, and sociology. The field's rich history dates back to the beginning of the 20th century, when Normal Schools throughout America, including Bloomsburg University, offered The Normal Course in Play, a curriculum for training playground and recreation workers. All normal school students were required to study play and its significance to both the individual and larger community. The main purposes for instituting The Normal Course in Play were to make community recreation vital, to give the spirit of play value as a philosophy of life, and to provide a conception of the scope of play and its influence throughout the lifespan.

Currently playwork has a strong presence throughout Europe and Asia with a reemerging footprint in America. The field has developed from a need to compensate for the loss of natural play spaces and a reduction in the freedom afforded to children to play. Playwork is about providing children with access to rich play environments where adults playworkers support children's natural play inclinations. In today's society, many parents are hesitant to let their children play outside without the presence of an adult. Professional playworkers meet that need by supporting and facilitating children's play.

The certificate in Playwork would be the first of its kind in America and in the PASSHE System. The certificate in Playwork actualized through an international collaboration between faculty from Bloomsburg University and Leeds Beckett University in the United Kingdom. Leeds Beckett University offers the premier Playwork degree training program in the world. Both Leeds Beckett University, and Skills Active, the premier Playwork certifying body in the United Kingdom have endorsed the Bloomsburg University certificate in Playwork.

Through completion of the course sequence, student will learn to explain the origins, aims, and methods of playwork; apply playwork principles to planning, organizing, implementing, and evaluating play provision for children; explore children's changing allocation, navigation, and construction of place, space, and time; and learn and apply the complex knowledge, skills, and professional dispositions required of effective playworkers. The success/effectiveness of the proposed minor in playwork will be measured annually through an exit survey and by meeting program recruitment goals.

In addition, due to its multidisciplinary nature and emerging presence in America, the certificate in Playwork will appeal to a wide variety of undergraduate majors across various colleges as well as non-degree students and potentially improve their marketability. To gauge the level of interest in the certificate in Playwork, the Office of Planning and Assessment distributed an online survey to a random sample of 1,519 students across the College of Science and Technology, College of Education, and College of Liberal Arts. One hundred percent of respondents indicated that they were interested in learning more about the proposed Playwork minor, while 88 percent indicated they would consider enrolling in the minor. Overall, the respondents exhibited a high level of interest in the proposed Playwork certificate program.

The 100% online delivery model allows for a 102% (of the in-state tuition rate) for undergraduate students and 110% (of the in-state tuition rate) for graduate students which is a significant reduction from the current 250% (of the in-state tuition rate) for both undergraduate and graduate programs.

The United States Department of Labor, Bureau of Labor Statistics tracks occupational employment and wages each year. National estimates for recreation workers in 2016 (those conducting recreation activities with groups in public, private, or volunteer agencies or recreation facilities) include 336,880 jobs with a mean hourly wage of $13.09 and a mean annual wage of $27,230. In 2016, Pennsylvania employed approximately 13,000 recreation workers with a mean annual wage of $27,380.

We propose that students earn a grade of C or better in the six required courses to count toward completion of the certificate.

Degree Designation
Undergraduate

Student Outcomes
Through completion of the course sequence, student will learn to explain the origins, aims, and methods of playwork; apply playwork principles to planning, organizing, implementing, and evaluating play provision for children; explore children's changing allocation, navigation, and construction of place, space, and time; and learn and apply the complex knowledge, skills, and professional dispositions required of effective playworkers.

Economics - Political Economics

Program Code
POEC-BA-Concentration

Degree Designation
Bachelor of Arts

Campuses
Bloomsburg Campus, LockHaven Campus, Mansfield Campus

College
Zeigler College of Business

Department
Business, Innovation, and Technology

Program Description
The Economics program offers three tracks of General Economics, Business Economics and Political Economics under a single major.

Political Economics: is designed to prepare students for Government and not-for-profits. Students learn about a variety of economic and political theories; how to assess an argument about a current economic, social, and political issue; and how to discuss and support an argument based on relevant literature. This track is often used by students who are interested in civil and/or foreign services, local/state/federal government jobs, international agencies and not-for-profits.

In addition, an economics major is one of many paths to a law program. Many career in law involve economic decisions.

Degree Designation
Undergraduate

Student Outcomes
The Economics curriculum offers a systematic study of the economic activities of firms, households, and government. The core of the curriculum enables students to master basic principles of economics, develop analytical skills, and interpret economic phenomena. The learning goals and outcomes for all tracks are as follows:

1) Outline a variety of economic theories; describe their assumptions; and state their predictions.
2) Apply an economic model; and collect, summarize, and explain data.
3) Assess an argument about a current economic, social, and political issue; formulate and test a hypothesis; and interpret the results.
4) Discuss original interpretations of an economic analysis, and support an argument based on relevant literature.

Program Code
POGL-BSBA-Concentration

Degree Designation
Bachelor of Science in Business Administration

Campuses
Bloomsburg Campus, LockHaven Campus, Mansfield Campus

College
Zeigler College of Business

Department
Management

Program Description
The international business program is uniquely designed with a qualitative liberal arts foundation, a business core, an interdisciplinary IB core including a short-term faculty-led study abroad opportunity, and a Policy and Globalization specialization that provides students with skills necessary to engage in the globalized political world in addition to the required business core and IB major knowledge, which increases their job marketability after graduation. Our program strives to meet relevant industry and professional competencies to ensure rigorous attainment of necessary knowledge, skills, and abilities.

Degree Designation
Undergraduate

Student Outcomes
Students who complete the program will be able to:
• Acquire knowledge, skills, and abilities to conduct business in an international setting;
• Recognize the complexity of international business through course work and participation in the study abroad program;
• Develop an appreciation of cultural diversity;
• Apply functional expertise in managing multi-national business enterprises;
• Analyze the challenges expatriates may face in a foreign environment such as security, food, language, cultural and climatic adjustment, medical practices, diversity of ethical practices, diversity of political ideologies, and religious beliefs;
• Build flexibility in dealing with logistics of international travel;
• Demonstrate willingness to learn and show geocentric values and non-ethnocentric disposition.
• Apply policy and globalization knowledge and skills in international business setting.

College
College of Arts, Humanities, Education and Social Sciences

Department
History, Poli Sci & Philosophy

Program Description
Our political science program develops the knowledge, skills, and ability to engage the political world through critical thinking, communication, and research. While many students choose our general program curriculum, students also have the opportunity to select a concentration in pre-law, international affairs, or US politics/public administration.

As part of the general degree or any of the concentrations, we ensure that students gain an essential understanding of US Politics, Comparative Politics, International Relations, and Political Ideologies. We as faculty value individual interaction with our majors through relatively small classes (15-40 students) and highly individualized advising that includes helping students explore a wide range of career opportunities. High-achieving students may also enroll in the Honors College.

Our program requires students to complete an internship experience, study abroad, or a thesis. Professional internships provide excellent real-world experience, and we have internships in Washington D.C., Harrisburg, and each local campus; we can even assist students with developing internships in their hometowns. An experience overseas broadens your horizons and helps develop your inter-cultural skills. A thesis experience provides the opportunity to expand your research skills under close faculty supervision.

Studies in political science builds skills and conveys knowledge that allows you to analyze political phenomena across a wide range of contexts. The wide variety of political science courses prepare you for active citizenship; professional careers in government, international affairs, business and nongovernmental organizations; and advanced studies in law, public administration, political science and other fields.

Degree Designation
Undergraduate

Student Outcomes
Knowledge: Expressing knowledge in the areas of study within the discipline of political science
Information Literacy: Implements skills of locating, evaluating, and effectively using political information and research
Communication: Displays effective communication skills in both written and oral communication
Citizenship: Expresses awareness of civic engagement and decision-making

Program Description
The Bachelor of Science in Biomedical Sciences provides a rigorous background in biology, chemistry, physics, and mathematics. This program will meet the needs of students planning to enter a variety of graduate schools in biomedical sciences, entrance into a NAACLS accredited medical laboratory science program, and those seeking employment in healthcare and government agencies. Students may choose to specialize in one of the six concentrations: medical genomics and counseling, medical laboratory science, pre-physician assistant/associate, pre-medical sciences, pre-pharmacy, and pre-physical therapy.

Degree Designation
Undergraduate

Student Outcomes
Upon completion of this degree program, students will be able to:

1. describe the cellular basis of life.

2. describe the molecular and microbial mechanisms underlying human disease.

3. describe the integration between animal form and function.

4. describe the molecular biology of the gene and central dogma.

5. communicate using the conventions of biomedical sciences.

6. utilize biomedical laboratory tools and techniques to design experiments and analyze data.

7. prepare for admission to PharmD programs

Program Code
PRNM-BA-Concentration

Degree Designation
Bachelor of Arts

Campuses
Bloomsburg Campus, LockHaven Campus, Mansfield Campus

College
College of Arts, Humanities, Education and Social Sciences

Department
Visual Arts

Program Description
The Bachelor of Arts in Visual Arts will offer students a NASAD accredited liberal arts degree in Visual Arts with a choice of concentration in multiple areas: Painting; Drawing; Fabric Design; Printmaking; Graphic Design; Sculpture; Photography; Digital Media; Ceramics and Art History.

Degree Designation
Undergraduate

Student Outcomes
NASAD (National Association of Schools of Art and Design - accrediting body for Visual Arts) Required competencies required of Liberal Arts Degrees in Visual Arts:

Students graduating with BA in Visual Arts degree with concentrations in Painting; Drawing; Fabric Design; Printmaking; Sculpture; Photography; Digital Media; and Ceramics upon graduation, students must possess:
a. A developed visual sensitivity.

b. The technical skills, perceptual development, and understanding of principles of visual
organization sufficient to achieve basic visual communication and expression in one or more media.

c. Ability to make workable connections between concept and media.

d. Some familiarity with the works and intentions of major artists/designers and movements of the past and the present, both in the Western and non-Western worlds.

5. Students should understand the nature of contemporary thinking on art and design, and have gained at least a rudimentary discernment of quality in design projects and works of art.

Students graduating with BA in Visual Arts degree with concentrations in Graphic Design upon graduation, students must possess:
a. Technical skills, perceptual development, and understanding of design and other principles of visual organization sufficient to achieve basic visual communication using one or more media associated with design.

b. Basic ability to demonstrate how relationships among design principles and the material
qualities of objects are incorporated into the production of design work, and how they contribute in terms of use and interpretation.

c. Functional knowledge of how the design of communication, products, environments, systems, and services both reflects and shapes various aspects of the context in which they are produced.

d. Understanding of the various levels at which design problems can be formulated and
addressed, and the ability to discern observable or potential consequences of specific design action in large, complex systems.

e. Ability to identify differences among audiences/users for design, and an understanding of how audience/user values and behaviors are reflected in the design of communications, products, environments, and services.

f. Understanding of design process, including abilities to consider probable or potential future conditions, think divergently in the generation of multiple solutions,

and use design principles and elements of the design process to converge on ideas and results that are effective in realizing project purposes.

g. Awareness of the critical perspectives in the evaluation of design, including the history of ideas about the role of design in culture and of ideas informing design practice over time.

h. For students emphasizing design scholarship, the ability to use overview knowledge of design practice, history, theory, criticism, and technology and the tools and techniques of research, scholarship, and communication in the production of scholarly analytical work about design.

Students graduating with BA in Visual Arts degree with concentrations in Art History upon graduation, students must possess:
a. A general knowledge of the monuments and principal artists of all major art periods of the past, including a broad understanding of the art of the twentieth century and acquaintance with the art history of non-Western cultures. This knowledge should be augmented by study in greater depth and precision of several cultures and periods in the history of art and concentration in at least one area to the advanced seminar level. Study at the advanced level should include theory, analysis, and criticism.

b. A general knowledge of world history.

c. Knowledge of the tools and techniques of scholarship. Active research and the writing of analytical and critical essays should continue throughout the program.

d. Functional knowledge of the creative process. Normally, this is accomplished through one or more foundation or other studio courses; however, there are many methods of ensuring this competence.

PRNM-BFA-Concentration - Visual Arts BFA - Printmaking

General

Program Title
Visual Arts BFA - Printmaking

Program Code
PRNM-BFA-Concentration

Degree Designation
Bachelor of Fine Arts

Campuses
Bloomsburg Campus

College
College of Arts, Humanities, Education and Social Sciences

Department
Visual Arts

Program Description
The Bachelor of Fine Arts in Visual Arts will offer students a NASAD accredited professional degree in Visual Arts with a choice of concentration in multiple areas: and (BU/LHU/MU) Art History and Graphic Design; (BU only) Painting; Drawing; Fabric Design; Printmaking; Sculpture; Photography; (LHU/MU only) 2D Media; 3D Media.

Degree Designation
Undergraduate

Student Outcomes
NASAD (National Association of Schools of Art and Design - accrediting body for Visual Arts) Required competencies required of Professional Degrees in Visual Arts:

Students graduating with BFA in Visual Arts degree must possess:
1. Studio Studies:Practice, and experiences in studio subjects are of prime importance in the preparation of students for professional careers in art and design. The excellence of the creative work produced by students is the best determinant of the adequacy of the studio studies offered by an institution. Studio work begins at the freshman level and extends with progressively greater intensity throughout the degree program. Creative work includes, but is not limited to, conceptualization, process, product, and critique.
Irrespective of major or specialization, students must:

a. Gain functional competence with principles of visual organization, including the ability to work with visual elements in two and three dimensions; color theory and its applications; and drawing.

b. Present work that demonstrates perceptual acuity, conceptual understanding, and technical facility at a professional entry level in their chosen field(s).

c. Become familiar with the historical achievements, current major issues, processes, and
directions of their field(s).

d. Be afforded opportunities to exhibit their work and to experience and participate in critiques and discussions of their work and the work of others.

e. Students engage in independent study at the advanced level that includes appropriate supervision and evaluation upon completion.

2. Art History Studies: Student must gain competency in Art/Design History, Theory, and Criticism. Through comprehensive courses in the history of
art/design, students must:

a. Learn to analyze works of art/design from both Western and non-Western cultures perceptively and to evaluate them critically.

b. Develop an understanding of the common elements and vocabulary of art/design and of the interaction of these elements, and be able to employ this knowledge in analysis.

c. Acquire the ability to place works of art/design in historical, cultural, and stylistic contexts.

3. Technology. Students must acquire a working knowledge of technologies and equipment applicable to their area(s) of specialization.

4. Synthesis. While synthesis is a lifetime process, by the end of undergraduate studies students should be able to work independently on a variety of art and/or

design problems by combining, as appropriate to the issue, their capabilities in studio, analysis, history, and technology.

5. Results: Upon completion of the Visual Arts BFA degree program:
a. Students must demonstrate achievement of professional, entry-level competence in the major area of specialization, including significant technical mastery, capability to produce work and solve professional problems independently, and a coherent set of artistic/intellectual goals that are evident in their work.

b. Students must demonstrate their competence by developing a body of work for evaluation in the major area of study. A senior project or final presentation in the major area is required.

3. Students must have the ability to form and defend value judgments about art and design and to communicate art/design ideas, concepts, and requirements to professionals and laypersons related to the practice of the major field. They are able to work collaboratively as appropriate to the area(s) of specialization.

PRSC-Minor - Public Relations Strategic Communications Minor

General

Program Title
Public Relations Strategic Communications Minor

Program Code
PRSC-Minor

Campuses
Bloomsburg Campus, LockHaven Campus, Mansfield Campus

College
College of Arts, Humanities, Education and Social Sciences

Department
Comm, Media and Journalism

Program Description
The Public Relations Minor allows for core, foundation, production and capstone experiences for enrolled students. The minor encompasses a required three-credit core of MEDIA 110: Introduction to Mass Communications and a required six-credit foundation including MEDIA 251: Public Relations Theory and Practice and MEDIA 352: Public Relations Tactics. Based on interests and desired skills, students may further choose from six required credits of production, selecting from MEDIA 271: Video Production 1, MEDIA 220: Introduction to Multimedia, MEDIA 230: Newswriting, or MEDIA 280: Introduction to Visual Communications. The minor will culminate with a required capstone experience, allowing students to select three credits from MEDIA 455: Public Relations Cases and Problems, MEDIA 475: Public Relations Workshop, or MEDIA 497: Internship.

This minor appeals to students outside of the department and potentially outside the College of Liberal Arts. Students who major in Media and Journalism cannot minor in Public Relations. Instead, this program provides options for students across campus including those in the College of Business, the College of Science and Technology. Requests for a minor of this type have arrived from students in various majors across campus.

Degree Designation
Undergraduate

Student Outcomes
Narrative Skills - Students will apply knowledge of storytelling skills to produce effective stories and strategic communication in multiple forms and contexts specific to their chosen area of concentration in mass media/communication.

Information Literacy - Students will demonstrate the ability to find, critically evaluate, and legally and ethically use information sources using appropriate methods and technologies.

Media Literacy - Students will develop the ability to access, analyze, evaluate and create media. This includes the technical and aesthetic skills and knowledge of the technology required to produce various media.

Civic Engagement - Students will demonstrate knowledge and application of the mass media's role in a democracy as well as in an increasingly diverse and globalized society.

The Commission on Public Relations Education underscores that undergraduate programs should emphasize and strengthen writing and communication skills associated with other important skills such as storytelling, editing, and media relations by offering students exercises or experiences that stimulate writing and communication skills across a variety of format, genres and styles and for diverse communication purposes and situations.

PRSM-BSBA-Major - Prof Sales and Marketing

General

Program Title
BSBA Prof Sales and Marketing

Program
Prof Sales and Marketing

Program Code
PRSM-BSBA-Major

Degree Designation
Bachelor of Science in Business Administration

Campuses
Bloomsburg Campus

College
Zeigler College of Business

Department
Business, Innovation, and Technology

Program Description
The BSBA in Professional Selling and Marketing degree at Bloomsburg University is unique in the PASSHE system as the only sales and marketing major. Furthermore, the Major is the only one in the state. The Major is designed through keeping in mind that graduates may begin in sales but may have career paths that lead elsewhere. This is illustrated by Goal 2 of the degree program: To prepare students with state-of-the-art selling and marketing knowledge, skills, abilities, and disposition so that they easily attain professional success. According to Manpower Group's Annual Talent Shortage Survey, sales jobs were ranked number two among the hardest jobs to fill in 2019. In fact, the sales industry has been among the top 10 hardest jobs to fill for the past 13 years! (https://salesdrive.info/reason-sales-jobs-difficult-fill/). Why so difficult to fill? Sales is complex as it requires employees to remain consistently up-to-date with sales trends, marketing techniques, technological innovations, and social changes. The BSBA Professional Sales and Marketing is designed to provide a solid educational foundation to launch such a career. The program is recognized by the Sales Education Foundation as a Top Sales Program and holds Full Membership in the University Sales Center Alliance.

Degree Designation
Undergraduate

Student Outcomes
LO 1. Identify and explain the various steps of the personal selling process.
LO 2. Demonstrate effective sales presentations and the professional selling skills needed to deliver them.
LO 3. Explain the process of researching and identifying customer needs, understanding the customer buying behavior and process, consulting with customers, and offering solutions to their needs and problems.
LO 4. Explain the key functions of the sales management process including the recruitment, selection, training, motivation, evaluation and compensation of the sales force.
LO 5. Demonstrate knowledge of the principles of marketing.
LO 6. Apply quantitative marketing techniques.
LO 7. Identify the elements of international marketing.
LO 8. Ability to solve and communicate solutions to applied marketing problems.

General

Program Title
English Professional Writing

Program Code
PRWR-BA-Concentration

Degree Designation
Bachelor of Arts

Campuses
Bloomsburg Campus, LockHaven Campus, Mansfield Campus

College
College of Arts, Humanities, Education and Social Sciences

Department
Languages, Literature & Writing

Program Description
Commonwealth University's Department of English has examined the pre-integration curricula taught at Bloomsburg University, Lock Haven University, and Mansfield University and created a three-track integrated curriculum.

Degree Designation
Undergraduate

Student Outcomes
Students in all tracks will

a. Interpret critically and analytically a range of literatures from different periods and perspectives. (Core Global Lit requirement, Diversity, Author in Context, and Lit and Culture courses, PDE I.C.)
b. Write clearly and effectively in a variety of creative, professional, and/or scholarly contexts. (Core Lit Studies requirement, Power of Language requirement, and Professionalization/Capstone requirement, PDE I.D.)
c. Research effectively using traditional and emerging resources. (Core Lit Studies requirement, upper division courses, and Professionalization/Capstone requirement, PDE I.F.)
d. Demonstrate an understanding of language, grammars, and linguistics. (Core Grammars requirement and Power of Language requirement, PDE I.A)

Department
Psychology

Program Description
The goal of the psychology major is to provide students with a flexible, individualized, and career-focused program that prepares them for immediate placement into a variety of job settings or direct entry into graduate school.

Psychology majors are provided with a broad overview of topics and domains within psychology, knowledge and skills related to research methods in psychology, and deeper knowledge of research, theory, and application. The content domains from which students may select courses include biological, individual differences, cognitive/learning, developmental, applied, and social psychology.

Degree Designation
Undergraduate

Student Outcomes
The Psychology Major curriculum is designed to meet the following student learning outcomes:

Knowledge Base in Psychology: Describe key concepts, principles, and overarching themes in psychology; Develop a working knowledge of psychological content domains; Describe applications of psychology

Scientific Inquiry and Critical Thinking: Use scientific reasoning to interpret psychological phenomena; Demonstrate psychology information literacy; Engage in innovative and integrative thinking and problem solving; Interpret, design, and conduct psychological research; Incorporate sociocultural factors in scientific inquiry.

Ethical and Social Responsibility in a Diverse World: Apply ethical standards to evaluate psychological science and practice; Build and enhance interpersonal relationships; Adopt values that build community at local, national, and global levels

Communication: Demonstrate effective writing for different purposes; Exhibit effective presentation skills for different purposes; Interact effectively with others

Professional Development: Apply psychological content and skills to career goals; Exhibit self-efficacy and self-regulation; Refine project-management skills; Enhance teamwork capacity; Develop meaningful professional direction for life after graduation

Department
Psychology

Program Description
Psychology is a broad field and complements several majors, including health science, criminal justice, social work, business, and education. It is also a practical field and highly valued by potential employers because it provides students (potential employees) with the ability to find needed information (research skills), the ability to think critically
about different options (critical thinking skills), and the ability to consider differing perspectives (diversity skills). The psychology minor requires 18 credit hours to complete.

Degree Designation
Undergraduate

Student Outcomes
Classroom with zoom capability (not required for all classes)
Microphones that allow instructors to walk away from computer while teaching face-to-face and online at the same time
Blackboards and/or whiteboards for instructors

Biological and Health Sciences

Program Description
The Department of Health and Exercise Science provides a multidisciplinary, human-focused education designed to offer meaningful, application-based, and experiential learning opportunities so graduates possess the knowledge and skills to advance the health of individuals and populations in a complex and changing global society. The Bachelor of Science in Health Science Pre-Athletic Training 3+2 program is an Early/Dual Admission Program designed to prepare students for direct entry into the graduate athletic training program on the Lock Haven campus.

Degree Designation
Undergraduate

Student Outcomes
Upon program completion, students will:
1. Demonstrate general knowledge of human anatomy and physiology in both healthy and disease states.

2. Apply critical thinking skills when making evidence-informed/evidence-based decisions.

3. Demonstrate entry-level communication skills including written, verbal, and affect skills specific to their proposed professional setting.

College of Health, Science, & Technology

Department
Biological and Health Sciences

Program Description
The mission of the Radiology Technology program is to integrate Mansfield University's liberal arts emphasis to develop competent entry level diagnostic radiographers. As graduates, these radiographers will possess the expertise necessary to meet the needs of the communities they serve, while providing compassionate, patient-centered care.

Degree Designation
Undergraduate

Student Outcomes
Goals and Student Learning Outcomes
Goal #1: To provide the health care community with competent, entry-level diagnostic radiographers.
1. Students will position patients accurately.
2. Students will align the CR accurately.
3. Students will select optimal exposure factors.
4. Students will apply radiation protection principles.
5. Students will successfully perform diagnostic procedures while under the supervision of staff technologists.

Goal #2: Students will demonstrate appropriate patient communication and education skills.
1. Students will identify themselves and the patient, verify the body part to be imaged, and obtain an accurate history.
2. Students will explain the procedure and process for obtaining the diagnostic report.

Goal #3: Students will demonstrate problem-solving and critical thinking when performing medical procedures.
1. Students will demonstrate critical thinking while performing radiographic procedures.
2. Students will evaluate radiographic images for appropriate positioning and image quality.

Goal #4: Students will demonstrate professionalism.
1. Students will demonstrate professional and ethical conduct.
2. Students will demonstrate professionalism through appropriate attendance and punctuality.

Goal #5: The program will continuously monitor its effectiveness.
1. Students will complete the program.
2. Graduates will pass the ARRT Certification Exam on the first attempt.
3. Graduates pursuing employment will be employed within twelve months after program completion.

Goal #6: The program will promote graduate and employer satisfaction.
1. Graduates will express satisfaction with the training received during the program.
2. Employers will express satisfaction with the performance of the graduate.

Program Description
This program is designed to prepare students for a wide variety of jobs devoted to protecting people and their environment from potential radiation hazards, while making is possible to utilize the beneficial uses of radiation in medicine, energy generation, industry and research. There are few graduates in this field as BU retains the only program of its kind in the Commonwealth of Pennsylvania. This is work force development personified.

Degree Designation
Undergraduate

Student Outcomes
1. Become proficient in the different types of radiation, their sources, and potential health effects and the monitoring of radiation in workplace situations in industry and medicine.
2. Understand the safety regulations and protocols governing radioactive waste disposal, radioactive material transport and safe use of radioactive materials.
3. Understand the effects of radiation on biological systems, the use of dosimetry in the workplace and how to measure correct dosages of radioactive materials.
4. Become proficient in the use of the devices to measure radiation in the workplace and the environment.
5. Design protective measures necessary in different radiological/working environments.
6. Operate the actual instrumentation used to measure alpha, beta and gamma radiation.
7. Describe and evaluate professional duties associated with Radiation and Health Physics, including the keeping to accurate laboratory, medical and clinical records of activities.

General

Program Title
Russian and East European Studies Minor

Program Code
REES-Minor

Campuses
Bloomsburg Campus

College
College of Arts, Humanities, Education and Social Sciences

Department
Languages, Literature & Writing

Program Description
The languages and cultures program combines general education, professional education, and language-specific courses with multiple field experiences in diverse communities. The Bachelor of Arts in Languages and Cultures prepares students for teaching, graduate study in languages and cultures, research, professional work, as well as service in government, nonprofits, or business. Our graduates are particularly valued for their multilingual and cross-cultural knowledge. B.A. in Languages and Cultures curriculum allows students to focus on either one or two foreign languages, including the option to combine their major with other disciplines as they work with advisers to plan for their future careers. The course work leads majors to explore cultural traditions and historical developments in various parts of the world, and to pursue applied vocabulary and practices that they can use in real-world situations locally, nationally, and globally. Special effort is made to develop intercultural communication competence. All our majors are strongly encouraged to complete a minor or a second major in another field. Concentrations are offered in Arabic, Chinese, French, Russian and East European Studies, Spanish, and Spanish Translation and Interpretation. Minors are offered in Arabic, Chinese, French, German and Central European Studies, Latin American Studies, Russian and East European Studies, and Spanish.

Degree Designation
Undergraduate

Student Outcomes
Communication (Communicate in Languages Other Than English)

Standard 1.1: Students engage in conversations, provide and obtain information, express feelings and emotions, and exchange opinions.
Standard 1.2: Students understand and interpret written and spoken language on a variety of topics.
Standard 1.3: Students present information, concepts, and ideas to an audience of listeners or readers on a variety of topics.

Cultures (Gain Knowledge and Understanding of Other Cultures)

Standard 2.1: Students demonstrate an understanding of the relationship between the practices and perspectives of the culture studied.
Standard 2.2: Students demonstrate an understanding of the relationship between the products and perspectives of the culture studied.

Connections (Connect with Other Disciplines and Acquire Information)

Standard 3.1: Students reinforce and further their knowledge of other disciplines through the foreign language.
Standard 3.2: Students acquire information and recognize the distinctive viewpoints that are only available through the foreign language and its cultures.

Comparisons (Develop Insight into the Nature of Language and Culture)

Standard 4.1: Students demonstrate understanding of the nature of language through comparisons of the language studied and their own.
Standard 4.2: Students demonstrate understanding of the concept of culture through comparisons of the cultures studied and their own.

Communities (Participate in Multilingual Communities at Home & Around the World)

Standard 5.1: Students use the language both within and beyond the school setting.
Standard 5.2: Students show evidence of becoming life-long learners by using the language for personal enjoyment and enrichment.

General

Program Title
Real Estate Finance Minor

Program Code
REFN-Minor

Campuses
Bloomsburg Campus, LockHaven Campus, Mansfield Campus

College
Zeigler College of Business

Department
Business, Innovation, and Technology

Program Description
The minor in Real Estate Finance is intended to complement a student's primary major and designed to provide students with the knowledge, skills, and competencies needed for success in real estate industry. The program will be open to all students, both business or non-business, and will guide students through several fundamental courses to elevate their understanding of real estate industry and possibly career opportunity.

Degree Designation
Undergraduate

Student Outcomes
Students who complete the program will be able to:
1. Identify the characteristics of real estate property and the real estate investment framework.
2, Discuss the legal issues in real estate contracts, brokerage, and the agency.
3, Analyze the basic types of real estate analysis and decision-making models.

Program Description
Respiratory Care Program is a full-time, four-year, Bachelor of Science (B.S.) degree program. It is a collaborative program with Commonwealth University's Department of Health and Exercise Sciences and Guthrie Robert Packer Hospital. Students spend the first two years on any of the three Commonwealth University campuses, completing program pre-requisites and general education courses. After meeting the program pre-requisites, students will spend their second two years plus one summer engaging in respiratory specific didactic course, clinical courses and hands on experiences at Robert Packer Hospital in Sayre, PA, where they complete classroom and clinical experience. Students will also have the opportunity to rotate to several other clinical affiliates gaining valuable hands on clinical experiences.

Degree Designation
Undergraduate

Student Outcomes
1. Respiratory care program graduates will demonstrate the clinical knowledge, professional attributes, and interpersonal and inter-professional communication skills relevant to the role of a registered respiratory therapist.
2. Respiratory care program graduates will demonstrate the technical proficiency in all skills necessary to fulfill the role of a registered respiratory therapist.
3. Respiratory care program graduates will demonstrate personal behaviors consistent with professional and employer expectations for a bachelor's degree registered respiratory therapist.
4. To prepare leaders for the field of respiratory care by including curricular content objectives related to the acquisition of skills in management and research.

SAMA-Minor - Safety Management Minor

General

Program Title
Safety Management Minor

Program Code
SAMA-Minor

Campuses
Bloomsburg Campus, LockHaven Campus, Mansfield Campus

College
College of Health, Science, & Technology

Department
Environ, Geog & Geol Sciences (EGGS), Phys and Env Sci and Engr

Program Description
Safety Management is a critical component of most construction, industrial, business and government settings. This minor provides students with basic knowledge and professional skills in safety science and management. Special attention is given to OSHA rules and regulations covering the workplace. Students in this minor receive specific preparation for managing work site safety. Coursework covers material in industrial hygiene, incident investigation, fire safety, and hazardous materials. Students will earn their OSHA 30 and HAZWOPER 40 certification upon completion of the minor.

Degree Designation
Undergraduate

Student Outcomes
Students who complete the Safety Management minor will:
1. Professional Competence: Anticipate, identify, and evaluate hazardous conditions to minimize risk.
2. Professional Decision Making: Develop risk control methods, procedures, and programs.
3. Professional Interaction: Implement and advise others on risk controls and programs.

SCCO-CEPB-Concentration - School Counseling

General

Program Title
School Counseling

Program Code
SCCO-CEPB-Concentration

Degree Designation
CEPB

Campuses
Bloomsburg Campus

College
Education and Human Studies

Program Description
This post master's certificate program is designed for students who have already earned a master's degree in counseling, or a related field, and are seeking:
1. Elementary and Secondary School Counselor (PK-12) certification through the Pennsylvania Department of Education (PDE)
2. Additional credits required for ACT 48 of 1999 requiring all Pennsylvania educators holding Pennsylvania public school certification to participate in ongoing professional education.

Degree Designation
Graduate

Student Outcomes
1. Develop the identity and professional dispositions of a PK-12 school counselor, as outlined by the American School Counselor Association (ASCA) National Model and the Pennsylvania Department of Education (PDE).
2. Develop the competencies needed by professional school counselors to address academic, social-emotional, and career development concerns.

Completion Requirements

SCI4-BSED-Concentration - Middle Level Science (4-8)

General

Program Title
Middle Level Science (4-8)

Program Code
SCI4-BSED-Concentration

Degree Designation
Bachelor of Science in Education

Campuses
Bloomsburg Campus, LockHaven Campus, Mansfield Campus

College
Education and Human Studies

Department
Middle Level/Secondary/K-12 Ed

Program Description
In accordance with the Pennsylvania Department of Education (PDE), this professional preparation degree program enables teacher education candidates to meet Science content competencies for grades 4-8 by taking courses required within the Middle Level Science competency degree program requirements. In addition, these teacher candidates will demonstrate pedagogical knowledge and competence in their knowledge of teaching inquiry based laboratory experiences and the fundamental concepts of science to school students grades 4-8. This program aligns with the "Next Generation Science Standards" developed by teh National Science Teaching ASssociation (NSTA) and program competencies outlined by the Council for Accreditation of Education Preparation (CAEP).

Degree Designation
Undergraduate

Student Outcomes
Learning Outcome 1:
Middle Level education teacher candidates demonstrate pedagogical knowledge and content area competence, including arithmetic and basic algebra; functions and graphs; geometry and measurement; data, probability, and statistical concepts; number theory; and application of mathematical understanding.

Learning Outcome 2:
Middle Level education teacher candidates understand the major concepts, principles, theories, and research related to adolescent development and provide opportunities that support student development and learning.

Learning Outcome 3:
Middle Level education teacher candidates understand and use the central concepts, tools of inquiry, standards, research and structures of content to plan and implement curriculum that develops student competence in subject matter.

Learning Outcome 4:
Middle Level education teacher candidates understand and use the major concepts, principles, theories, and research related to data-driven instruction and assessment, and they employ a variety of strategies for a developmentally appropriate climate to meet the varying abilities and learning styles of learners.

Learning Outcome 5:
Middle Level education teacher candidates will demonstrate understanding the complexities of teaching in grades 4-8, and engage in professional development to continually improve their practices and behaviors.

Learning Outcome 6:
Middle Level education teacher candidates will apply culturally relevant practices to embrace diversity, provide opportunities for student equity, and practice inclusivity.

SCM-Minor - Supply Chain Management Minor

General

Program Title
Supply Chain Management Minor

Program Code
SCM-Minor

Campuses
Bloomsburg Campus, LockHaven Campus, Mansfield Campus

College
Zeigler College of Business

Department
Management

Program Description
The Supply Chain Management minor is designed to complement a student's chosen major by adding the knowledge and skills necessary for careers in operations, purchasing, logistics, warehousing, and supply chain planning. The SCM Minor consists of 18 credits of required courses along with three prerequisite courses. Students with a business major can complete the SCM Minor in 18 credits (due to the prerequisite courses being required for their major); students with a major other than business will have to take 27 credits.

Degree Designation
Undergraduate

Student Outcomes
Students who complete the program will be able to:
1. Evaluate how to manage supply chain resources, processes, and relationships.
2. Identify best practices consistent with key supply chain principles and supply chain metrics.
3. Apply decision-making processes to a variety of supply chain issues.
4. Analyze supply chain flows for improvement opportunities.

SCMG-BSBA-Concentration - International Business - Supply Chain Management

General

Program Title
International Business - Supply Chain Management

Program Code
SCMG-BSBA-Concentration

Degree Designation
Bachelor of Science in Business Administration

Campuses
Bloomsburg Campus, LockHaven Campus, Mansfield Campus

College
Zeigler College of Business

Department
Management

Program Description
The Supply Chain Management major curriculum is designed to address the demands faced by today's supply chain professionals. Students develop the critical thinking, problem solving, and technical skills needed to enter an array of SCM fields including logistics, operations, sourcing, and planning. Our program is externally benchmarked to relevant industry and professional organization competencies to ensure rigorous attainment of necessary knowledge, skills, and abilities.

Degree Designation
Undergraduate

Student Outcomes
Students who complete the program will be able to:
1. Evaluate supply chain resources, processes, and relationships to ensure effective and efficient satisfaction of each participant's value proposition.
2. Propose ideas to manage the flows of materials, services, information, and capital from basic producers through the supply chain to end users.
3. Implement best practices consistent with key supply chain principles and supported by analysis of key supply chain metrics and decomposition models.
4. Apply decision-making processes, using real-time analysis of data derived from business IT systems, to supply chain initiatives.
5. Lead within the cross-functional and inter-organizational reality of modern supply chains.
6. Compete for in-demand supply chain careers in global business environments.

Counseling & Educational Lead

Program Description
Bloomsburg University has had the PDE approved PA Principal Certification Graduate program since 2005, and this proposal is to continue the program in the new Commonwealth University. The program is fully on-line and currently has students from across the Commonwealth.

This program prepares students for a PK-12 PA Administrative I School Principal Licensure through a Masters of Education in Educational Leadership program. Students complete coursework to gain knowledge and skills in effective leadership, research, ethics, systems, data driven decisions, law, finance, and demonstrate these competencies through the required PDE internship experiences.

Degree Designation
Graduate

Student Outcomes
Apply knowledge of qualitative and quantitative research
Apply data driven decisions through action research
Apply knowledge of effective building leadership; strategic, cultural, and systems leadership, leadership for learning, professional and community leadership, leadership and advocacy for students with learning disabilities
Compare and contrast research based best practices for instruction, supervision, and school safety
Demonstrate knowledge of federal, state, and local laws and regulations for school operations
Demonstrate knowledge of school and leadership ethics
Demonstrate knowledge of school improvement initiatives including: student achievement, professional development, teacher and non-instructional educators, culture, climate, and reporting regulations on improvement
Demonstrate knowledge of effective stewardship of various resources: financial, time, human capital, etc.

SCUL-BA-Concentration - Visual Arts BA - Sculpture

General

Program Title
Visual Arts BA - Sculpture

Program Code
SCUL-BA-Concentration

Degree Designation
Bachelor of Arts

Campuses
Bloomsburg Campus, LockHaven Campus, Mansfield Campus

College
Arts, Social Sci & Humanities

Department
Visual Arts

Program Description
The Bachelor of Arts in Visual Arts will offer students a NASAD accredited liberal arts degree in Visual Arts with a choice of concentration in multiple areas: Painting; Drawing; Fabric Design; Printmaking; Graphic Design; Sculpture; Photography; Digital Media; Ceramics and Art History.

Degree Designation
Undergraduate

Student Outcomes
NASAD (National Association of Schools of Art and Design - accrediting body for Visual Arts) Required competencies required of Liberal Arts Degrees in Visual Arts:

Students graduating with BA in Visual Arts degree with concentrations in Painting; Drawing; Fabric Design; Printmaking; Sculpture; Photography; Digital Media; and Ceramics upon graduation, students must possess:
a. A developed visual sensitivity.

b. The technical skills, perceptual development, and understanding of principles of visual
organization sufficient to achieve basic visual communication and expression in one or more media.

c. Ability to make workable connections between concept and media.

d. Some familiarity with the works and intentions of major artists/designers and movements of the past and the present, both in the Western and non-Western worlds.

5. Students should understand the nature of contemporary thinking on art and design, and have gained at least a rudimentary discernment of quality in design projects and works of art.

Students graduating with BA in Visual Arts degree with concentrations in Graphic Design upon graduation, students must possess:
a. Technical skills, perceptual development, and understanding of design and other principles of visual organization sufficient to achieve basic visual communication using one or more media associated with design.

b. Basic ability to demonstrate how relationships among design principles and the material
qualities of objects are incorporated into the production of design work, and how they contribute in terms of use and interpretation.

c. Functional knowledge of how the design of communication, products, environments, systems, and services both reflects and shapes various aspects of the context in which they are produced.

d. Understanding of the various levels at which design problems can be formulated and
addressed, and the ability to discern observable or potential consequences of specific design action in large, complex systems.

e. Ability to identify differences among audiences/users for design, and an understanding of how audience/user values and behaviors are reflected in the design of communications, products, environments, and services.

f. Understanding of design process, including abilities to consider probable or potential future conditions, think divergently in the generation of multiple solutions,

and use design principles and elements of the design process to converge on ideas and results that are effective in realizing project purposes.

g. Awareness of the critical perspectives in the evaluation of design, including the history of ideas about the role of design in culture and of ideas informing design practice over time.

h. For students emphasizing design scholarship, the ability to use overview knowledge of design practice, history, theory, criticism, and technology and the tools and techniques of research, scholarship, and communication in the production of scholarly analytical work about design.

Students graduating with BA in Visual Arts degree with concentrations in Art History upon graduation, students must possess:
a. A general knowledge of the monuments and principal artists of all major art periods of the past, including a broad understanding of the art of the twentieth century and acquaintance with the art history of non-Western cultures. This knowledge should be augmented by study in greater depth and precision of several cultures and periods in the history of art and concentration in at least one area to the advanced seminar level. Study at the advanced level should include theory, analysis, and criticism.

b. A general knowledge of world history.

c. Knowledge of the tools and techniques of scholarship. Active research and the writing of analytical and critical essays should continue throughout the program.

d. Functional knowledge of the creative process. Normally, this is accomplished through one or more foundation or other studio courses; however, there are many methods of ensuring this competence.

SCUL-BFA-Concentration - Visual Arts BFA - Sculpture

General

Program Title
Visual Arts BFA - Sculpture

Program Code
SCUL-BFA-Concentration

Degree Designation
Bachelor of Fine Arts

Campuses
Bloomsburg Campus

College
Arts, Social Sci & Humanities

Department
Visual Arts

Program Description
The Bachelor of Fine Arts in Visual Arts will offer students a NASAD accredited professional degree in Visual Arts with a choice of concentration in multiple areas: and (BU/LHU/MU) Art History and Graphic Design; (BU only) Painting; Drawing; Fabric Design; Printmaking; Sculpture; Photography; (LHU/MU only) 2D Media; 3D Media.

Degree Designation
Undergraduate

Student Outcomes
NASAD (National Association of Schools of Art and Design - accrediting body for Visual Arts) Required competencies required of Professional Degrees in Visual Arts:

Students graduating with BFA in Visual Arts degree must possess:
1. Studio Studies:Practice, and experiences in studio subjects are of prime importance in the preparation of students for professional careers in art and design. The excellence of the creative work produced by students is the best determinant of the adequacy of the studio studies offered by an institution. Studio work begins at the freshman level and extends with progressively greater intensity throughout the degree program. Creative work includes, but is not limited to, conceptualization, process, product, and critique.
Irrespective of major or specialization, students must:

a. Gain functional competence with principles of visual organization, including the ability to work with visual elements in two and three dimensions; color theory and its applications; and drawing.

b. Present work that demonstrates perceptual acuity, conceptual understanding, and technical facility at a professional entry level in their chosen field(s).

c. Become familiar with the historical achievements, current major issues, processes, and
directions of their field(s).

d. Be afforded opportunities to exhibit their work and to experience and participate in critiques and discussions of their work and the work of others.

e. Students engage in independent study at the advanced level that includes appropriate supervision and evaluation upon completion.

2. Art History Studies: Student must gain competency in Art/Design History, Theory, and Criticism. Through comprehensive courses in the history of
art/design, students must:

a. Learn to analyze works of art/design from both Western and non-Western cultures perceptively and to evaluate them critically.

b. Develop an understanding of the common elements and vocabulary of art/design and of the interaction of these elements, and be able to employ this knowledge in analysis.

c. Acquire the ability to place works of art/design in historical, cultural, and stylistic contexts.

3. Technology. Students must acquire a working knowledge of technologies and equipment applicable to their area(s) of specialization.

4. Synthesis. While synthesis is a lifetime process, by the end of undergraduate studies students should be able to work independently on a variety of art and/or design problems by combining, as appropriate to the issue, their capabilities in studio,

analysis, history, and technology.

5. Results: Upon completion of the Visual Arts BFA degree program:
a. Students must demonstrate achievement of professional, entry-level competence in the major area of specialization, including significant technical mastery, capability to produce work and solve professional problems independently, and a coherent set of artistic/intellectual goals that are evident in their work.

b. Students must demonstrate their competence by developing a body of work for evaluation in the major area of study. A senior project or final presentation in the major area is required.

3. Students must have the ability to form and defend value judgments about art and design and to communicate art/design ideas, concepts, and requirements to professionals and laypersons related to the practice of the major field. They are able to work collaboratively as appropriate to the area(s) of specialization.

Education and Human Studies

Department
Middle Level/Secondary/K-12 Ed

Program Description
In accordance with the Pennsylvania Department of Education (PDE), this professional preparation degree program enables teacher education candidates to receive social studies content area courses similar to attaining a BA in History. In addition to history, these teacher candidates will also demonstrate pedagogical knowledge and competence in teaching geography, civics and government, economics, anthropology, psychology, and sociology to students in grades 7-12.

Degree Designation
Undergraduate

Student Outcomes
Learning Outcome 1:
Secondary education teacher candidates demonstrate pedagogical knowledge and content area competence in teaching history, geography, civics and government, economics, anthropology, and sociology to students in grades 7-12.
Learning Outcome 2:

SESU-CEPB-Concentration - Special Education*Supervisory

General

Program Title
Special Education*Supervisory

Program Code
SESU-CEPB-Concentration

Degree Designation
CEPB

Campuses
Bloomsburg Campus

College
Education and Human Studies

Program Description
This graduate program includes the courses with competencies from Pennsylvania Department of Education and the Council for Exceptional Children for the Special Education Supervisory Certification. This leadership certificate is intended for students who have minimum of a bachelors degree in a related field of study and meet specific qualifications for the state (e.g., pass the certification test, teach for five years in the field). There are five courses and six credits of internship (that meet the state requirement for capstone hours).

Degree Designation
Graduate

Student Outcomes
Student outcomes are aligned with the Pennsylvania Department of Education and Council for Exceptional Children and include but is not limited to:
- demonstrate central concepts of organizational leadership, tools of research and inquiry, and principles of evidence-based instruction
- apply effective communication strategies with various stakeholders
- contributes to school effectiveness by collaborating with professionals and families, shares community resources, and works as an advocate to improve the outcomes of students with disabilities.
- utilizes a variety of assessment tools to inform the diagnostic process and supports the outcomes of students with disabilities.
- complies with the special education law and applies the law as intended to support students and families with disabilities and as a representative of the school agency.

Sociology

Program Code
SOCI-BA-Major

Degree Designation
Bachelor of Arts

Campuses
Bloomsburg Campus, LockHaven Campus, Mansfield Campus

College
Arts, Social Sci & Humanities

Department
Anthro/Crim Justice/Sociology

Program Description
We propose a Bachelor of Arts in Sociology at Commonwealth University. It is a rigorous major developed with guidance from the American Sociological Association. Students will understand and be able to apply the "sociological imagination." They will know that features of social life are social constructions built over time with concrete social action. Students will additionally be equipped with a core set of social science methods skills and theoretical perspectives and concepts from specific substantive areas of sociological inquiry. Sociology majors will be well-prepared to enter the workforce in a variety of fields. They will also be well-prepared also to pursue graduate education in sociology or a number of other disciplines (e.g., public health, business, social work).

Degree Designation
Undergraduate

Student Outcomes
Successful sociology students will be able to:
1. Use the sociological imagination to understand how social conditions shape and guide individuals, communities, and the course of history.
2. Understand and analyze social life as a social construction guided by shared and negotiated meanings that impact action and social interaction.
3. Use theories and concepts to understand social science data, social and political issues, and substantive areas of sociological inquiry.
4. Synthesize and/or integrate sociological knowledge (e.g., evidence, literature, concepts, and theories) into coherent arguments, hypotheses, or statements.
5. Develop a research question, research plan, analyze quantitative or qualitative data, and report results.
6. Use sociological understandings to participate in civic life.

SOCI-Minor - Sociology Minor

General

Program Title
Sociology Minor

Program Code
SOCI-Minor

Campuses
Bloomsburg Campus, LockHaven Campus, Mansfield Campus

College
College of Arts, Social Sciences, and Humanities

Department
Anthro/Crim Justice/Sociology

Program Description
We propose a Minor in Sociology at Commonwealth University. It parallels the major but does not require courses in research methods or statistics, and it does not require a capstone course. Students will understand and be able to apply the "sociological imagination." They will know that features of social life are social constructions built over time with concrete social action. Students with this minor will be more well-prepared to perform in their chosen major and career because of the unique and deeper understanding of human and group behavior that they will bring.

Degree Designation
Undergraduate

Student Outcomes
Successful sociology minors will be able to:
1. Use the sociological imagination to understand how social conditions shape and guide individuals, communities, and the course of history.
2. Understand and analyze social life as a social construction guided by shared and negotiated meanings that impact action and social interaction.
3. Use theories and concepts to understand social science data, social and political issues, and substantive areas of sociological inquiry.

SOIL-Minor - Soil Science Minor

General

Program Title
Soil Science Minor

Program Code
SOIL-Minor

Campuses
Bloomsburg Campus

College
College of Science and Technology

Department
Environ, Geog & Geol Sciences (EGGS)

Program Description
There is a growing need for qualified soil scientists in PA (and nationwide) due to increased land development, environmental regulations, and degradation of critically important soil resources. The Soil Science minor gives students a well-rounded background in both the theory and applications of soil science in a changing world. The minor is designed to align with educational qualifications needed for post-grads to apply for national certification, which will afford them expanded career opportunities. This shows students a clear path to a rewarding environmental career which is in high demand. Students in the Soil Science minor will gain experience in the field and laboratory, as well as regional and national competitions. This experiential learning will prepare them with the technical and critical thinking skills needed to be a professional soil scientist in academia, government, or private industry.

Degree Designation
Undergraduate

Student Outcomes
-Describe and interpret basic physical, chemical, and biological properties of soils in field and lab.
-Use soil survey and site-specific data to interpret soil suitability for land use.
-Identify and classify soils according to standard methods and communicate soils information to a variety of audiences.
-Explain soil ecosystem services and the use of soil as a natural resource.
Recommend strategies for soil conservation and improvement of soil health and sustainability.

SOS4-BSED-Concentration - Middle Level - Social Studies (4-8)

General

Program Title
Middle Level - Social Studies (4-8)

Program Code
SOS4-BSED-Concentration

Degree Designation
Bachelor of Science in Education

Campuses
Bloomsburg Campus, LockHaven Campus, Mansfield Campus

College
Education and Human Studies

Department
Middle Level/Secondary/K-12 Ed

Program Description
In accordance with the Pennsylvania Department of Education (PDE), this professional preparation degree program enables teacher education candidates to meet Social Studies content competencies for grades 4-8 by taking courses required within the history and social science departments. This professional program focuses on a Social Studies concentration while providing three "generalist" or supporting academic content areas in Math, general science, and English. The Professional Core courses, competencies and experiences for the grade 4-8 teacher preparation program have been designed to address the broad set of issues, knowledge and competencies that are relevant to middle level teaching and learning. The program therefore prepares teachers who will be able to ensure students' mastery of academic standards and the content assessment anchors. This program aligns with standards outlined by the Association for Middle Level Education (AMLE). Successful graduates of this program will be certified to teach Social Studies at the 4-8 grade level.

Degree Designation
Undergraduate

Student Outcomes
Learning Outcome 1:
Middle Level education teacher candidates demonstrate pedagogical knowledge and content area competence, including history, geography, civics and government, economics, anthropology, psychology and sociology.

Learning Outcome 2:
Middle Level education teacher candidates understand the major concepts, principles, theories, and research related to adolescent development and provide opportunities that support student development and learning.

Learning Outcome 3:
Middle Level education teacher candidates understand and use the central concepts, tools of inquiry, standards, research and structures of content to plan and implement curriculum that develops student competence in subject matter.

Learning Outcome 4:
Middle Level education teacher candidates understand and use the major concepts, principles, theories, and research related to data-driven instruction and assessment, and they employ a variety of strategies for a developmentally appropriate climate to meet the varying abilities and learning styles of learners.

Learning Outcome 5:
Middle Level education teacher candidates will demonstrate understanding the complexities of teaching in grades 4-8, and engage in professional development to continually improve their practices and behaviors.

Learning Outcome 6:
Middle Level education teacher candidates will apply culturally relevant practices to embrace diversity, provide opportunities for student equity, and practice inclusivity.

Program Code
SOWK-BSW-Major

Degree Designation
Bachelor of Science of Social Work

Campuses
Bloomsburg Campus, LockHaven Campus, Mansfield Campus

College
Education and Human Studies

Department
Social Work

Program Description
Our social work program is designed to prepare students for baccalaureate level generalist social work practice with liberal arts foundation and a focus on critical thinking. Opportunities are provided for the student to gain social work knowledge, values, ethics, and skills to work with client systems of all types and sizes. An emphasis is placed on an appreciation for human diversity, advocacy, oppression, and a strong commitment to environmental, economic and social justice. Students are prepared through courses to engage in the social change process through the interface with the community.

Social Work Program Goals are as follows:

Provide a rigorous curriculum that integrates social work values and ethics and serves as the foundation for generalist social work practice with clients, client systems and social programs in multicultural environments.
Promote civic engagement and a commitment to advocacy to support human rights and social and economic justice.
Prepare students with an understanding of human development and behavior in the social environment that focuses on both human diversity variables and the interrelationships of individuals, family, groups, organizations, and communities for assessment of strengths and needs in practice situations.
Provide field education that enhances the student's ability to develop critical thinking and that integrates theory and practice with specific attention to awareness of diversity, research-informed practice, practice-informed research, self-reflection and life-long learning.
Provide opportunities for professional development and continued education in the social work profession

Degree Designation
Undergraduate

Student Outcomes
All Council on Social Work Education accredited programs measure and report student learning outcomes. Students are assessed on their mastery of the nine competencies listed below that comprise the accreditation standards of the Council on Social Work Education. These competencies are dimensions of social work practice that all social workers are expected to master during their professional training. A measurement benchmark is set by the social work programs for each competency. At Commonwealth University the benchmark is 80%. An assessment score at or above that benchmark is considered by the program to represent mastery of that particular competency.

CSWE 2022 Competencies:

Competency 1: Demonstrate Ethical and Professional Behavior.
a. make ethical decisions by applying the standards of the National Association of Social Workers Code of Ethics, relevant laws and regulations, models for ethical decision making, ethical conduct of research, and additional codes of ethics within the profession as appropriate to the context;
b. demonstrate professional behavior; appearance; and oral, written, and electronic communication;
c. use technology ethically and appropriately to facilitate practice outcomes; and
d. use supervision and consultation to guide professional judgment and behavior
Competency 2: Advance Human Rights and Social, Racial, Economic, and Environmental Justice.
a. advocate for human rights at the individual, family, group, organizational, and community system levels; and
b. engage in practices that advance human rights to promote social, racial, economic, and environmental justice.
Competency 3: Engage Anti-Racism, Diversity, Equity, and Inclusion (ADEI) in Practice
a. demonstrate anti-racist and anti-oppressive social work practice at the individual, family, group, organizational, community, research, and policy levels; and
b. demonstrate cultural humility by applying critical reflection, self-awareness, and selfregulation to manage the influence of bias, power, privilege, and values in working with clients and constituencies, acknowledging them as experts of their own lived experiences.
Competency 4: Engage in Practice-Informed Research and Research-Informed Practice

a. apply research findings to inform and improve practice, policy, and programs; and
b. identify ethical, culturally informed, anti-racist, and anti-oppressive strategies that address inherent biases for use in quantitative and qualitative research methods to advance the purposes of social work. Competency
5: Engage in Policy Practice
a. use social justice, anti-racist, and anti-oppressive lenses to assess how social welfare policies affect the delivery of and access to social services; and
b. apply critical thinking to analyze, formulate, and advocate for policies that advance human rights and social, racial, economic, and environmental justice.
Competency 6: Engage with Individuals, Families, Groups, Organizations, and Communities
a. apply knowledge of human behavior and person-in-environment, as well as interprofessional conceptual frameworks, to engage with clients and constituencies; and
b. use empathy, reflection, and interpersonal skills to engage in culturally responsive practice with clients and constituencies.
Competency 7: Assess Individuals, Families, Groups, Organizations, and Communities
a. apply theories of human behavior and person-in-environment, as well as other culturally responsive and interprofessional conceptual frameworks, when assessing clients and constituencies; and
b. demonstrate respect for client self-determination during the assessment process by collaborating with clients and constituencies in developing a mutually agreed-upon plan.
Competency 8: Intervene with Individuals, Families, Groups, Organizations, and Communities
a. engage with clients and constituencies to critically choose and implement culturally responsive, evidence-informed interventions to achieve client and constituency goals; and
b. incorporate culturally responsive methods to negotiate, mediate, and advocate with and on behalf of clients and constituencies.
Competency 9: Evaluate Practice with Individuals, Families, Groups, Organizations, and Communities
a. select and use culturally responsive methods for evaluation of outcomes; and
b. critically analyze outcomes and apply evaluation findings to improve practice effectiveness with individuals, families, groups, organizations, and communities.

General

Program Title
Child Welfare Minor

Program Code
SOWK-ChildWelfare-Minor

Campuses
Bloomsburg Campus, LockHaven Campus, Mansfield Campus

College
College of Education and Human Studies

Department
Social Work

Program Description

The child welfare minor is designed for students interested in better understanding the care and protection of children in today's society. It introduces students to issues specific to children and families, from developmental, environmental, and social work perspectives. It is an appropriate minor for any student who will be working in roles that involve protecting vulnerable children.

Degree Designation
Undergraduate

Student Outcomes
The following are the Student Learning Outcomes for the Child Welfare Minor. The curriculum is designed to introduce students to basic knowledge skills and abilities required to work with or recognize issues surrounding vulnerable children and families. Learners will be able to describe process of assessment, intervention, and evaluation of practice with vulnerable children and families. Learners will be able to explain how professional values and ethics influence the decision-making process in child

Social Work

Program Description
The Master in Social Work is a two year (60 credits) Council on Social Work Education accredited professional training program that prepares students to enter the workforce as licensed master social workers. The program includes coursework and learning goals aligned with the Council on Social Work Education's Core Competencies and includes extensive field work as a part of the curriculum. An Advanced Standing option (36 credits)is available for qualifying students with a BSW.

Degree Designation
Graduate

Student Outcomes
The Student learning outcomes are provided by the Council for Social Work Education (CSWE) 2015 Educational Standards.

Competency 1–Demonstrate Ethical and Professional Behavior
a. Make ethical decisions by applying the standards of the NASW Code of Ethics, relevant laws and regulations, models for ethical decision-making, ethical conduct of research, and additional codes of ethics as appropriate to context
b. Use reflection and self-regulation to manage personal values and maintain professionalism in practice situations
c. Demonstrate professional demeanor in behavior; appearance; and oral, written, and electronic communication
d. Use technology ethically and appropriately to facilitate practice outcomes
e. Use supervision and consultation to guide professional judgment and behavior.

Competency 2- Engage Diversity and Difference in Practice (EPAS 2.1.2)
a. Apply and communicate understanding of the importance of diversity and difference in shaping life experiences in practice at the micro, mezzo, and macro levels
b. Present themselves as learners and engage clients and constituencies as experts of their own experiences
c. Apply self-awareness and self-regulation to manage the influence of personal biases and values in working with diverse clients and constituencies

Competency 3- Advance Human Rights and Social, Economic and Environmental Justice (EPAS 2.1.3)
a. Apply their understanding of social, economic, and environmental justice to advocate for human rights at the individual and system levels
b. Engage in practices that advance social, economic, and environmental justice.

Competency 4- Engage in Practice-Informed Research and Research-Informed Practice (EPAS 2.1.4)
a. Apply critical thinking to engage in analysis of quantitative and qualitative research methods and research findings
b. Use and translate research evidence to inform and improve practice, policy, and service delivery
c. Use and translate research evidence to inform and improve practice, policy, and service delivery.

Competency 5- Engage in Policy Practice (EPAS 2.1.5)
a. Identify social policy at the local, state, and federal level that impacts well-being, service delivery, and access to social services
b. Assess how social welfare and economic policies impact the delivery of and access to social services
c. Apply critical thinking to analyze, formulate, and advocate for policies that advance human rights and social, economic, and environmental justice

Competency 6- Engage with Individuals, Families, Groups, Organizations, and Communities
a. Apply knowledge of human behavior and the social environment, person-in environment, and other multidisciplinary theoretical frameworks to engage with

clients and constituencies
b. Use empathy, reflection, and interpersonal skills to effectively engage diverse clients and constituencies

Competency 7- Assess Individuals, Families, Groups, Organizations, and Communities (EPAS 2.1.7)
a. Collect and organize data, and apply critical thinking to interpret information from clients and constituencies
b. Apply knowledge of human behavior and the social environment, person-in-environment, and other multidisciplinary theoretical frameworks in the analysis of assessment data from clients and constituencies
c. Develop mutually agreed-on intervention goals and objectives based on the critical assessment of strengths, needs, and challenges within clients and constituencies; and
d. Select appropriate intervention strategies based on the assessment, research knowledge, and values and preferences of clients and constituencies

Competency 8- Intervene with Individuals, Families, Groups, Organizations, and Communities (EPAS 2.1.8)
a. Critically choose and implement interventions to achieve practice goals and enhance capacities of clients and constituencies
b. Apply knowledge of human behavior and the social environment, person-in-environment, and other multidisciplinary theoretical frameworks in interventions with clients and constituencies;
c. Use inter-professional collaboration as appropriate to achieve beneficial practice outcomes
d. Negotiate mediate, and advocate with and on behalf of diverse clients and constituencies; and
e. Apply evaluation findings to improve practice effectiveness at the micro, mezzo, and macro levels.

Competency 9- Evaluate Practice with Individuals, Families, Groups, Organizations, and Communities (EPAS 2.1.9)
a. Select and use appropriate methods for evaluation of outcomes
b. Apply knowledge of human behavior and the social environment, person-in-environment, and other multidisciplinary theoretical frameworks in the evaluation of outcomes
c. Critically analyze, monitor, and evaluate intervention and program processes and outcomes; and
d. Apply evaluation findings to improve practice effectiveness at the micro, mezzo, and macro levels.

Degree Designation
Bachelor of Arts

Campuses
Bloomsburg Campus, LockHaven Campus, Mansfield Campus

College
Arts, Social Sci & Humanities

Department
Languages And Cultures

Program Description
The languages and cultures program combines general education, professional education, and language-specific courses with multiple field experiences in diverse communities. The Bachelor of Arts in Languages and Cultures prepares students for teaching, graduate study in languages and cultures, research, professional work, as well as service in government, nonprofits, or business. Our graduates are particularly valued for their multilingual and cross-cultural knowledge. B.A. in Languages and Cultures curriculum allows students to focus on either one or two foreign languages, including the option to combine their major with other disciplines as they work with advisers to plan for their future careers. The course work leads majors to explore cultural traditions and historical developments in various parts of the world, and to pursue applied vocabulary and practices that they can use in real-world situations locally, nationally, and globally. Special effort is made to develop intercultural communication competence. All our majors are strongly encouraged to complete a minor or a second major in another field. Concentrations are offered in Arabic, Chinese, French, Russian and East European Studies, Spanish, and Spanish Translation and Interpretation. Minors are offered in Arabic, Chinese, French, German and Central European Studies, Latin American Studies, Russian and East European Studies, and Spanish.

Degree Designation
Undergraduate

Student Outcomes
Communication (Communicate in Languages Other Than English)

Standard 1.1: Students engage in conversations, provide and obtain information, express feelings and emotions, and exchange opinions.
Standard 1.2: Students understand and interpret written and spoken language on a variety of topics.
Standard 1.3: Students present information, concepts, and ideas to an audience of listeners or readers on a variety of topics.

Cultures (Gain Knowledge and Understanding of Other Cultures)

Standard 2.1: Students demonstrate an understanding of the relationship between the practices and perspectives of the culture studied.
Standard 2.2: Students demonstrate an understanding of the relationship between the products and perspectives of the culture studied.

Connections (Connect with Other Disciplines and Acquire Information)

Standard 3.1: Students reinforce and further their knowledge of other disciplines through the foreign language.
Standard 3.2: Students acquire information and recognize the distinctive viewpoints that are only available through the foreign language and its cultures.

Comparisons (Develop Insight into the Nature of Language and Culture)

Standard 4.1: Students demonstrate understanding of the nature of language through comparisons of the language studied and their own.
Standard 4.2: Students demonstrate understanding of the concept of culture through comparisons of the cultures studied and their own.

Communities (Participate in Multilingual Communities at Home & Around the World)

Standard 5.1: Students use the language both within and beyond the school setting.
Standard 5.2: Students show evidence of becoming life-long learners by using the language for personal enjoyment and enrichment.

Program Description
This minor prepares students with foundational special education knowledge. While this is not a certification program, the courses align with the PDE competencies for special education and provides content focused on identification, assessment, and instruction for students with exceptionalities. Field based experiences are embedded within several of the courses.

Degree Designation
Undergraduate

Student Outcomes
PDE Guidelines for Special Education PK-12 (July 19) outline competencies as follows:
1. Describe the foundations of special education.
2. Develop the academic and functional performance of students with disabilities.
3. Identify individual learning differences and intervene appropriately.
4. Develop the cognitive abilities of diverse learners within a standards aligned system.
5. Provide specially designed instruction to all students.

SPIN-Minor

Campuses
Bloomsburg Campus, LockHaven Campus, Mansfield Campus

College
College of Arts, Social Sciences, and Humanities

Department
Media and Journalism

Program Description
The Sports Information minor prepares students to coordinate communication between athletic departments, student-athletes, and coaches as well as disseminate information to the news media and general public. Students take courses in public relations, media production, and emergent media. Sports information professionals write a variety of communication material, produce audio/video segments, coordinate interviews with the media, compile statistics, and update social media/digital communication.

Degree Designation
Undergraduate

Student Outcomes
Students who complete the Sports Information minor will be able to:
- Develop strategic communication messaging and material to target specific audiences and media.
- Write and produce a variety of communication deliverables such as promotional material, audio/video segments, interviews, and social media/digital communication.
- Identify methods to effectively disseminate information to organizations, media, and the public.

SPLN-MS-MINOR - Speech-Language Pathology & Audiology Minor

General

Program Title
Speech-Language Pathology & Audiology Minor

Program Code
SPLN-MS-MINOR

Campuses
Bloomsburg Campus

College
College of Health Professions

Department
Communication Sci & Disorders

Program Description
The Minor in Speech-Language Pathology and Audiology within the Department of Communication Sciences and Disorders allows students outside the Major of Speech-Language Pathology and Audiology to explore the foundations of the professions of Speech-Language Pathology and Audiology. Individuals enrolled in the minor will be exposed to the basic human communication, the development development of the speech, language, hearing, and the nature of speech, language, hearing, and communication disorders. The additional understanding of the processes involved in speech, language, and hearing is a benefit to early childhood/middle level/secondary and K-12 education, education of the Deaf/Hard of Hearing, and special education majors.

Degree Designation
Undergraduate

Student Outcomes
Students who complete the Minor in Speech-Language Pathology and Audiology will have the following outcomes.
1. Describe basic concepts of human communication
2. Identify/describe the anatomy and physiology of the auditory and oral communication systems
3. Describe the processes involved in the production of speech and language
4. Explain the hearing process
5. Recognize the components of language
6. Identify the roles, responsibilities, and qualifications of professionals and organizations associated with communication disorders
7. Identify characteristics of normal and disordered communication

Management

Program Description
The Sport Management major curriculum is designed with coursework focusing on the business of sport and is complemented by supporting courses in business, management, accounting, computer technology, and sociocultural and behavioral aspects of sport. Graduates are prepared to pursue careers in Marketing, Public Relations, Sales, Sponsorship, Event Planning, Facility Management, Media, Sports Information, Athletic Administration and Coaching in professional, amateur, educational and community sport settings.

Degree Designation
Undergraduate

Student Outcomes
Students who complete the program will be able to:
1. Examine social, psychological, and international foundations of sport.
2. Apply principles of sport management.
3. Examine leadership in sport organizations.
4. Differentiate sport operations management, and event and venue management.
5. Assess sport governance.
6. Discriminate ethics in sport administration.
7. Apply competencies in sport marketing.
8. Examine principles of sport finance.
9. Apply accounting principles and their application to sport organizations.
10. Apply principles of economics and their application to sport organizations.
11. Interpret legal aspects of sport.
12. External experience - Students will complete an external field participation.
13. Explain and categorize all aspects of the day-today operations of professional setting
14. Discriminate the duties, rules, and responsibilities of professionals in the area of external experience.

Program Description
Allows students with an interest in the sport industry to explore and develop foundational skills and knowledge inherent in careers in sport organizations and agencies. The minor will supplement the knowledge and skills from the primary major to enhance professional opportunities in the sport industry. Students will have the opportunity to connect with professionals in the industry and develop a professional network as well as enhancing career opportunities in the field.

Degree Designation
Undergraduate

Student Outcomes
1. Discover and explore career opportunities in the sport industry
2. Articulate the skills and knowledge essential to success in the sport industry.
3. Establish a network of professionals in the industry.
4. Participate in department led experiences that develop the student's professional acumen.

SPNU-BS-Concentration - Sports Nutrition

General

Program Title
Sports Nutrition

Program Code
SPNU-BS-Concentration

Degree Designation
Bachelor of Science

Campuses
Bloomsburg Campus, LockHaven Campus, Mansfield Campus

College
Health Professions

Department
Health and Exercise Science

Program Description
The Sports Nutrition Program is designed for students who seek graduate studies in related fields or who wish to prepare for careers in corporate wellness centers, fitness centers, and university and commercial athletic teams.

Completion of the Sports Nutrition Program prepares students for careers in this rapidly growing field. The program is ideal for students who wish to work with healthy and active individuals and groups, or those who are seeking to develop or rebuild an active, healthy lifestyle.

This program provides a solid foundation for students who wish to study community-based health, wellness, and athletic performance.

Degree Designation
Undergraduate

Student Outcomes
Demonstrate the ability to use and interpret current research in developing knowledge of nutrition, sports nutrition, and dietetic practice.
Demonstrate the ability to use oral and written communications effectively as individuals and in group settings requiring collaboration and teamwork.
Exhibit understanding of public policy and its effects on health care systems.
Demonstrate the ability to develop nutrition prescriptions for a variety of individuals and groups
Assess and make sports-specific recommendations for athletes.

Program Description
The program includes a core of graduate courses (12 credits) and certification courses (30 +capstone credits) that support student application to teaching certification in the area of Special Education PK-12. This program offers students the ability to take the coursework towards Special Education PK-12 teaching certification for either an initial certification, intern certification for students emergency certified in the field, or as an advanced certification to add onto an existing certification.

Degree Designation
Undergraduate

Student Outcomes
Upon completion of this program, students will perform the competencies required by the accrediting bodies; some of which include:
1. Describe major considerations related to identifying individuals with disabilities and assess the individuals properly.
2. Identify and differentiate learner differences within each disability category based on a
student's level of functioning rather than classification.
3. Demonstrate understanding of the legal rights and responsibilities of the teacher for special educational referral and evaluation and the rights and procedural safeguards that students are guaranteed.
4. Demonstrate an understanding of over-representation of minorities in special education so as to not misinterpret behaviors that represent cultural, linguistic differences as indicative of learning problems.
5. Identify and use specialized resources in order to implement specially designed instruction for individuals with disabilities.
6. Recommend and use evidence-based practices validated for specific characteristics of learners and settings.
7. Apply prevention and intervention strategies for individuals at-risk for academic or behavioral failure.

SPPP-Minor

Campuses
Bloomsburg Campus, LockHaven Campus, Mansfield Campus

College
College of Health Professions

Department
Health and Exercise Science

Program Description
The Minor in Sport and Performance Psychology is an 18-credit minor introducing students to the field of sport and performance psychology. Students will study theories related to key concepts including personality, motivation, concentration, and confidence and be introduced to psychological skills training in sport and performance settings. Critical content will be complemented with coursework in related disciplines including exercise science and psychology. The minor will introduce students interested in graduate work to professional discipline of sport and performance psychology.

Degree Designation
Undergraduate

Student Outcomes
Upon successful completion of this program students will be able to:
1. Demonstrate knowledge of the principles of sport and performance psychology.
2. Demonstrate knowledge of psychological skills training acquired through such learning tools as role playing, labs, workshops, and practical applications.
3. Identify the requirements for advanced study in the field of sport and performance psychology.

SPPY-MS-Concentration - Sport Psychology

General

Program Title
Sport Psychology

Program Code
SPPY-MS-Concentration

Degree Designation
Master of Science

Campuses
LockHaven Campus

College
Health Professions

Department
Health and Exercise Science

Program Description
The Master of Sport and Performance Psychology is a 30-credit fully online program allowing students to attend full and part-time with fall, spring and summer starts. As such, the program serves both traditional and non-traditional students from several disciplines in an area of high demand. Graduates can work as Association for Applied Sport Psychology (AASP) Certified Mental Performance Consultant (CMPC) where they educate coaches, athletes, officials, and parents about sport and performance psychology (SPP)enhancement techniques. They may also work as professionals employed in or the liaison to a university athletic department, professionals employed by the Army Center for Performance Enhancement, academic advisors working with student-athletes, fitness consultants or lifestyle coaches. With continued study, they could become clinical psychologists working with athletes in private practice; Clinical Psychology, Counseling Psychology, Social Work and/or Counselor Education faculty that have an opportunity for sport psychology application, or Exercise Science, Kinesiology or Physical Education faculty. The application of SPP principles in settings other than sport and exercise has also been growing steadily. Graduates, therefore, may also work in non-sport settings including medicine, health/wellness and business.

Degree Designation
Graduate

Student Outcomes
1. Dissect and synthesize research to develop a full comprehension of current knowledge base
2. Assess both quantitative and qualitative methods used in existing research and assess findings accordingly
3. Evaluate the influence of key social institutions (gender, race, social class) on sport and exercise experiences, and to integrate these factors in one's professional work
4. Interpret philosophical principles and assess ethical issues related to sport and performance psychology; articulate a professional philosophy regarding engagement in sport and performance settings
5. Formulate a strong understanding of the influence of multiple key psychological factors on sport and exercise experiences
6. Assess lifespan developmental factors that influence sport and exercise participants' experiences, and demonstrate the ability to integrate these factors into one's professional approach
7. Appraise sport/exercise performance issues and propose appropriate mental skills training
8. Structure a mental training program for individuals and groups based on formal needs assessment and lifespan considerations
9. Determine the psychological factors that increase one's risk of injury/ illness and how to prevent these; delineate one's response to injury/illness and appropriate coping measures; and analyze issues and theories of transition, notably athletic retirement
10. Generate a mental skills training plan for an injured athlete or athlete in transition
11. Analyze stress and the interrelationships of stress, health and physical activity.

Tech/Analytic/Work Force Learn

Program Description
Technical Leadership program builds on the expertise one commonly gains from their associate degree program. Technical Leadership program courses add skills in areas such as business communication and collaboration, on-line team leadership, project management, staff training development, workplace diversity, accounting and budgets, inter-cultural communication, and conflict resolution.

There is a need for people who are skilled in their fields and have the ability to work effectively with their supervisors, colleagues and clients. It is a growing trend for technical, service and health care work to be conducted in teams and work-groups. In this rapidly-changing, globalized economy, companies seek technical professionals who are ready to assume leadership roles in project teams, work-groups and service departments. The Technical Leadership program provides the skills one will need to advance in
the field.

Degree Designation
Undergraduate

Student Outcomes
Technical Leadership courses are tightly chosen or designed around the competencies that will enhance the careers of the graduates of the degree completion program. The Student Learning Outcomes (SLOs) for the Commonwealth University core courses of the program are listed below. The program assumes that the students have a solid foundation in a subject area from the associates degree and/or their specialization courses.

SLO 1: Foster and develop trust and group identity among team members to create a team environment that encourages accountability, creativity and innovation while motivating others toward goal accomplishment.
SLO 2: Communicate effectively in professional situations using a variety of methods.
SLO 3: Identify situations where training is required to meet individual, team, department and organization goals; design training and determine the best method to deliver necessary training.
SLO 4: Use communication and project management skills to work effectively as part of a team to create limited-term projects.
SLO 5: Describe the leadership concepts and objectives, management principles, human resource issues, organizational economics, strategic planning, technology integration, product and program development, and accounting principles that affect the functioning of a technology area or department in an organization.

Theatre

Program
Theatre

Program Code
THEA-BA-Major

Degree Designation
Bachelor of Arts

Campuses
Bloomsburg Campus

College
Arts, Social Sci & Humanities

Department
Music, Theatre, and Dance

Program Description
This program is designed to allow Commonwealth University to continue the National Association of Schools of Theatre accreditation held by BU prior to integration. The Theatre major was identified in the program array as one being housed at the BU campus location.

The mission of the Division of Theatre and Dance is to provide a strong undergraduate education in the theory and practice of theatre and dance, to support the University's general education curriculum, and to enhance the cultural life of the campus community. The Division's goal is to develop students' working knowledge and application of historical and contemporary theories and practices in performance, design and technology, and dramatic and critical literature. We strive to develop artists who are imaginative critical thinkers and effective communicators producing art that celebrates humanity and challenges complacency.

The Theatre & Dance Strategic Plan outlines 4 main areas of focus:
1. Academic Excellence

In line with the fundamental mission of the academy, the Division of Theatre and Dance seeks to promote a thorough understanding of theory and practice in our artistic disciplines.

Toward this end, we encourage students to explore both historical foundations and current innovations affecting these pursuits.

This philosophy is in keeping with the ideas and approaches to arts education advocated for by our accrediting body: "Professionals know from personal experience that art, though dependent on talent, inspiration, and creativity, requires much more to function as a significant spiritual and educational force. Talent without skills, inspiration without knowledge, and creativity without technique count for little but lost potential."

2. Artistic Quality

The Division of Theatre and Dance seeks to support artistic excellence in the work of both students and faculty, on campus and beyond the limits of the academy.

This philosophy is in keeping with the ideas and approaches to arts education advocated for by our accrediting body: "Dance, music, theatre, and the visual arts are professions requiring talent, knowledge, skill, and dedication. Professional artists have created some of man's highest achievements. Yet, artists need no license to practice: employment and success depend almost entirely on competence demonstrated through audition or portfolio review."

3. Cultural Enhancement & Diversification of the Campus & Broader Community

The Division of Theatre and Dance seeks to offer a range of theatre and dance genres and styles and to broaden community access to, and attendance at, these events.

4. Public Awareness

The Division of Theatre and Dance has a history of excellent instruction resulting in both program and graduate success. Part of our efforts will be dedicated toward communicating that excellence to the broader community.

Degree Designation
Undergraduate

Student Outcomes
There are five primary student learning outcomes for the major:

History/Criticism/Literature: Graduates of the program will recognize and be able to communicate trends in theatre history, dramatic structure, dramatic styles associated with various periods, and characteristics of the work of important theatre practitioners.

Knowledge of Design Process: Graduate of the program will have a working knowledge of the theatrical design process and the basic skills necessary to develop initial design ideas, research and present the design ideas, and collaboratively integrate them into an initial design concept presentation.

Knowledge of Acting: Graduates of the program will have a working knowledge of the practice of acting and the basic skills for performance.

Rehearsal, Construction, and Performance: Graduates of the program will

demonstrate a working knowledge of appropriate rehearsal, construction, and performance practices through application in theatrical disciplines in a collaborative production setting.

Specific Theatrical Discipline: Graduates of the program will demonstrate appropriate skills for future personal and professional success in a specific theatrical discipline or area.

Department
Math/Computer Sci/Dig Forensic

Program Description
The Applied Computer Science program combines elements of Lock Haven's existing successful programs with an additional track in Web Development. The Applied Computer Science program will have a common core of classes and the following three tracks.
• Data Science
• Mobile and Game Application Development
• Web Development

Degree Designation
Undergraduate

Student Outcomes
Three to five years after graduation, our Applied computer science alumni will be:
1. be professionally employed in the computing field
2. communicate and collaborate effectively in a team environment
3. continue to grow professionally by adapting to new technologies and assuming leadership responsibilities

Applied Computer Science Learning Outcomes
Students will be able to
1. Demonstrate strong problem-solving skills using technology appropriate to the problem domain.
2. Design, implement, and evaluate a computing-based solution to meet a given set of computing requirements in the context of the program's discipline.
3. Communicate effectively
4. Recognize professional responsibilities and make informed and equitable judgments in computing practice based on legal and ethical principles.
5. Function effectively as a member or leader of a team engaged in activities appropriate to the program track.

WGSS-Minor - Women, Gender, and Sexuality Studies Minor

General

Program Title
Women, Gender, and Sexuality Studies Minor

Program Code
WGSS-Minor

Campuses
Bloomsburg Campus, LockHaven Campus, Mansfield Campus

College
Interdisciplinary

Department
Interdisciplinary Studies

Program Description
Women, Gender, and Sexuality Studies minor relies on multi-disciplinary approaches to the study of women and the social, cultural, and historical constructions of gender and sexuality, particularly as they intersect with race, ethnicity, class, culture, religion, and nation. Students will take at least one foundational course and courses from other disciplines with at least one of those serving as a capstone experience.

Degree Designation
Undergraduate

Student Outcomes
1) Gender and Sexuality in Society: Students will describe and analyze the construction of gender and sexuality culturally, politically, and historically, and as it relates to various identity categories including but not limited to race, class, culture, ethnicity, age, and disability.
2) Critical Reasoning: Students will identify and explain concepts relevant to identity formation, applying those concepts to the representations of gender and sexuality in society.
3) Critical Analysis: Students will identify and analyze multicultural social and environmental issues from the perspectives of gender and sexuality both in the United States and in the global contexts.
4) Diversity: Students will recognize the historical and cultural roots of inequality and respond to the need for social justice. Emphasis will be given to the representation of women as a gender category and its place in the development of this field of study.

ACCT110 - Accounting for Supervisors

General

Course Long Title
Accounting for Supervisors

Course Subject Code
ACCT

Course Number
110

Department
Accounting & Business Law

Academic Level (Course Level)
Undergraduate

Course Description
Provides practical applications of accounting information useful to supervisory level personnel, with limited knowledge of the theoretical foundation. The course content presents a brief overview of financial statements and their components. The course provides an investigation into the use of managerial accounting, including topics such as cost accumulation, product costing, budgets, and evaluation procedures. Important to the supervisors are the influences on them and their subordinates resulting from the creation and use of accounting information.

ANTH300 - Archaeological Theory and Practice

General

Course Long Title
Archaeological Theory and Practice

Course Subject Code
ANTH

Course Number
300

Department
Anthro/Crim Justice/Sociology

Academic Level (Course Level)
Undergraduate

Course Description
Explores the historical and modern theoretical foundations of archaeology. Students read and discuss original contributions to the field and learn how archaeologists collect and interpret their data. Students will learn how archaeological research informs contemporary social issues, such as climate change, socioeconomic inequality, race and ethnicity, gender identity, decolonization, and consumerism. The ethics of archaeological representation and cultural heritage are also discussed.

ARAB101 - Elementary Arabic I

General

Course Long Title
Elementary Arabic I

Course Subject Code
ARAB

Course Number
101

Department
Languages And Cultures

Academic Level (Course Level)
Undergraduate

Course Description
Initiates students' development of the four language skills (speaking, listening, reading, writing) required to use the Arabic language in a communicative context. Anticipated proficiency upon successful completion of the course is the Novice-Mid sublevel (based upon the American Council on the Teaching of Foreign Languages). Introduces students to features of Arabic and Middle Eastern cultures that are associated with the targeted communicative activities.

ARAB102 - Elementary Arabic II

General

Course Subject Code
ARAB

Course Number
102

Department
Languages And Cultures

Academic Level (Course Level)
Undergraduate

Course Description
Develops communicative language proficiency at the Novice-High and Intermediate-Low sublevels (according to ACTFL proficiency scale) as well as develops the ability to understand and appreciate Arabic-speaking cultures. A communicative method is applied to develop the four language skills (reading, writing, speaking, and listening) in an intercultural content. This includes the use of authentic audio-visual materials introducing the Arabic-speaking world, situational communicative practice in listening, speaking, reading and writing, and laboratory activities.

ARM331 - US Military Science and History

General

Course Long Title
US Military Science and History

Course Subject Code
ARM

Course Number
331

Department
ARMY

Academic Level (Course Level)
Undergraduate

Course Description
Examines the military heritage of the United States from the colonial period to the late twentieth century. The goal of the course is to develop students' awareness of the relationship of the U.S. military establishment to American society. Further, the course will focus on the evolution of war and strategy and in the progression of military professionalism, with an emphasis of the history and purpose of joint operations, and discuss the role of history and heritage in understanding the Army profession. This is a required course for all cadets seeking a commission.

ART100 - 2-D Design Foundations

General

Course Long Title
2-D Design Foundations

Course Subject Code
ART

Course Number
100

Department
Visual Arts

Academic Level (Course Level)
Undergraduate

Course Description
Develop an understanding of visual communication through the study and application of the elements and principles of design with an introduction to color theory and systems, and their application. Students will gain proficiency in creating two-dimensional compositions with an emphasis on various hands-on media. Studio sessions include extended interaction with various 2-D media, group and individual critique, demonstrations, and lecture.

ART101 - 3-D Foundations

General

Course Long Title
3-D Foundations

Course Subject Code
ART

Course Number
101

Department
Visual Arts

Academic Level (Course Level)
Undergraduate

Course Description
Introduces a basic understanding of the elements of composition and principles of design as applied to the three-dimensional arts. The student will acquire this knowledge by executing a series of projects intended to stimulate visual problem solving. The course will examine the practical application of basic concepts of design in the three -dimensional arts through the investigation of those masterworks which represent and inform core aesthetic concepts in the three-dimensional arts.

Course Description
Explores the methods, materials, and concepts associated with painting from the human form. Students will study and apply design and perceptual strategies to paintings that incorporate the human form as a vehicle for personal expression. Students will study anatomy for artists and paint from live models. Contemporary and historical figure painting will serve as prototypes for the course. Studio sessions include painting, individual and group critique, demonstration, and lecture.

ART250 - Darkroom Photography

General

Course Long Title
Darkroom Photography

Course Subject Code
ART

Course Number
250

Department
Visual Arts

Academic Level (Course Level)
Undergraduate

Course Description
Introduces darkroom photography as a medium of visual expression. Technical emphasis is placed on fundamental camera controls and an introduction to darkroom printing techniques. Aesthetic analysis and theory are discussed. Studio sessions consist of critique, demonstration, lecture, and individual instruction.

ART260 - Printmaking Survey

General

Course Long Title
Printmaking Survey

Course Subject Code
ART

Course Number
260

Department
Visual Arts

Academic Level (Course Level)
Undergraduate

Course Description
Investigates relief, intaglio, silkscreen, and lithographic printmaking as a form of visual communication. Students will be introduced to each of the four printmaking processes, techniques, and the discipline's professional practices. Students are exposed to a variety of subjects, conceptual frameworks, and historical precedents, including non-Western traditions. Studio sessions include extensive work with printmaking materials, individual instruction and group critique, demonstrations, and lectures.

ART276 - Sculpture: Clay & Plaster

General

Course Long Title
Sculpture: Clay & Plaster

Course Subject Code
ART

Course Number
276

Department
Visual Arts

Academic Level (Course Level)
Undergraduate

Course Description
Explores sculptural methods using clay and Plaster as a primary medium. Students will develop sculpting skills using additive and subtractive modeling techniques. Students will develop preliminary sketches and maquettes for each sculpture project. Studio class time includes technical instruction, concept development and lecture, making assigned sculpture projects, group discussion, concept development, in-progress and finished-work critiques. Research for the individual projects is essential for success.tt

ART277 - Sculpture: Composite Materials

General

Course Long Title
Sculpture: Composite Materials

Course Subject Code
ART

Course Number
277

Department
Visual Arts

Academic Level (Course Level)
Undergraduate

Course Description
Explore 3D design and assemblage methods for creating sculptural objects using composite "home building" supplies and related materials. Construction materials may include, but are not limited to, plywood, milled lumber products, concrete, conduit, PVC Pipe, sheet metal and assorted hardware. Students learn a wide variety of construction techniques while repurposing nontraditional materials into figurative and non-figurative sculptural forms. Studio class time includes instruction and demonstrations, sculpture development, group and individual critiques, and 3D concept-building skills.

ARTH110 - Understanding Art

General

Course Long Title
Understanding Art

Course Subject Code
ARTH

Course Number
110

Department
Visual Arts

Academic Level (Course Level)
Undergraduate

Course Description
Introduces students to art both past and present. Essential ideas of art are examined in concrete terms using examples from diverse times and cultures. The course stresses the understanding that art is a universal human creative impulse. The course pedagogy emphasizes investigation, development and application of an aesthetic language enabling the student to respond to, analysis, and critique works of art, both conceptually and formally, by studying its ever-expanding aesthetic and cultural contexts.

ARTH253 - History of Fiber and Fashion

General

Course Long Title
History of Fiber and Fashion

Course Subject Code
ARTH

Course Number
253

Department
Visual Arts

Academic Level (Course Level)
Undergraduate

Course Description
Examines the history of global fashion from the ancient world to the 21st century, organized around the materials employed to construct clothing. Different fibers and their relative characteristics will be studied, as well as the impact their production has had on regional and global economies and the ecological concerns associated with mass textile production. Haute couture, the ethical use of animal products and human resources, and the relationship between Nationalism and folk costume are discussed.

ARTH257 - History of the Art Market

General

Course Long Title
History of the Art Market

Course Subject Code
ARTH

Course Number
257

Department
Visual Arts

Academic Level (Course Level)
Undergraduate

Course Description
Surveys the history and evolution of the art market, from the Renaissance through the present day. The social and historical context of collecting will be examined, as will the role and influence of market participants, from artists and commercial galleries to art dealers, museums, auction houses and individual collectors. Special emphasis will be given to notions of art as a commodity, both cultural and financial, and to the theory and practice of art appraisal.

ASLI325 - Advanced ASL Linguistics

General

Course Subject Code
ASLI

Course Number
325

Department
Exceptionality Programs

Academic Level (Course Level)
Undergraduate

Course Description
Applies and builds upon fundamentals of linguistics. American Sign Language (ASL) and English both have at least twelve distinct tenses. The approach that these two languages utilize for the various tenses are quite different. This course uses a compare and contrast approach of English and American Sign Language syntax. Upon the foundation laid in ASL Linguistics, this course aids in increasing the students' ability to achieve dynamic equivalence between ASL and English.

ATHT500 - Fundamentals of Athletic Training

General

Course Long Title
Fundamentals of Athletic Training

Course Subject Code
ATHT

Course Number
500

Department
Health and Exercise Science

Academic Level (Course Level)
Graduate

Course Description
Provides athletic training students foundational knowledge in healthcare delivery systems, health education, communication, and emergency care. This course also focuses on identifying injury risk and preventing injury and illness.

Instructional Method / Attendance Policy
Face to Face, Face to Face

Grade Modes
Credit/No Credit, Academic Forgivness, Pass/Fail, Standard Letter

ATHT504 - Admin & Org of Athletic Trg

General

Course Subject Code
ATHT

Course Number
504

Department
Health and Exercise Science

Academic Level (Course Level)
Graduate

Course Description
Provides an in-depth analysis of the issues, policies, and procedures involved with the organization and administration of athletic training in various practice settings. This course evaluates allied health care professions, facility design, standard operating procedures, emergency action plans, budgeting, and health care services, as well as the organizations and documents that affect the profession of athletic training.

Prerequisite

Any of the following requirements

Fulfill ANY of the following requirements:

A minimum grade of 'D-' in Course ATHT573

Earn a minimum grade (GR) of D- in the following:

- ATHT573 - Therapeutic Interventions 2

OR

A minimum grade of 'D-' in Course ATTR673

Earn a minimum grade (GR) of D- in the following:

Additional Comments:

ATHT515 - Current Issues in Athletic Trg

General

Course Subject Code
ATHT

Course Number
515

Department
Health and Exercise Science

Academic Level (Course Level)
Graduate

Course Description
Analyzes the ever-changing factors that affect the athletic training profession. Students will evaluate continuing education options, analyze employment recruiting and retention practices, and review state and federal legislative efforts. Students will also be exposed to the associations and agencies that regulate the profession and the governing documents that they publish.

General

Course Subject Code
ATHT

Course Number
553

Department
Health and Exercise Science

Academic Level (Course Level)
Graduate

Course Description
Provides athletic training students opportunities to develop clinical skills in real-life situations under the direct supervision of a clinical preceptor. This course is the first of four clinical courses. Students will learn clinical skills in an intercollegiate or interscholastic clinical practice setting. The skills developed by the students focus on the accreditation standards learned in the classroom the previous semester. Students complete a minimum of 120 hours of clinical experience within the course.

Department
Biochem/Chem/Engineer/Physics [BiCEP]

Academic Level (Course Level)
Undergraduate

Course Description
Introduces clinical nursing students to the biology, metabolism, classifications, ecology, genetics and evolution of microbes. Emphasis is placed on the role of bacteria in human health and disease, control of microbial growth, and antimicrobial resistance. The laboratory includes techniques in handling, isolation, cultivation, staining, identification, and control of microorganisms. Intended for students in the Nursing program and will not satisfy a core requirement for a BS degree in Biology.

Course Number
330

Department
Biology

Academic Level (Course Level)
Undergraduate

Course Description
An in-depth study of cellular chemicals, molecular genetics, cellular functions, and cellular communication. Laboratory experiments give theoretical and hands-on experience in molecular techniques, such as gel electrophoresis, DNA isolation, restriction digestion, DNA purity and quantification, probe hybridization and detection, and Polymerase Chain Reaction (PCR).

BIO4451 - Practicum in Biology

General

Course Long Title
Practicum in Biology

Course Subject Code
BIO

Course Number
4451

Department
Biology

Academic Level (Course Level)
Undergraduate

Course Description
The practicum in biology provides students the opportunity to apply knowledge and skills in the biological sciences while working with a public or private agency involved in aspects of applied biology. The practical experience thus acquired both supplements and reinforces the more academic aspects of biology stressed in the classroom.

Grade Modes
Credit/No Credit, Academic Forgivness, Pass/Fail, Standard Letter

BIO4492 - Research in Biological Systems I

General

Course Long Title
Research in Biological Systems I

Course Subject Code
BIO

Course Number
4492

Department
Biology

Academic Level (Course Level)
Undergraduate

Course Description
The first semester of an intensive capstone research experience in a selected biological system. Students pursue an original research project mentored and evaluated by the biology faculty.

Grade Modes
Credit/No Credit, Academic Forgivness, Pass/Fail, Standard Letter

General

Course Long Title
Cells, Genes, and Molecules

Course Subject Code
BIOL

Course Number
100

Department
Biology

Academic Level (Course Level)
Undergraduate

Course Description
Presents basic concepts and unifying themes of biological science from the cellular, genetic and molecular levels. This course discusses how biological data and ideas affect our lives.

BIOL101A - Human Biology Laboratory

General

Course Subject Code
BIOL

Course Number
101A

Department
Biology

Academic Level (Course Level)
Undergraduate

Course Description
Presents concepts and unifying themes in biology relating to humans. This course teaches students how to apply knowledge from lecture to situations concerning the nature of science, human body organization, form, and function, interrelationships between humans and the environment, and human health-related issues. Not applicable to majors in biology or biomedical sciences. Two hours of lab per week.

BIOL102 - Ecology and Evolution

General

Course Long Title
Ecology and Evolution

Course Subject Code
BIOL

Course Number
102

Department
Biology

Academic Level (Course Level)
Undergraduate

Course Description
Presents the scientific method, Mendelian genetics, evolution, ecology, and current environmental issues. Introduces the theories that determine heredity and evolution and how those in turn drive ecological relationships at many scales. This course also explores scientific methodology in the evaluation of scientific problems and processes.

Grade Modes

BIOL103 - Biodiversity and Conservation

General

Course Long Title
Biodiversity and Conservation

Course Subject Code
BIOL

Course Number
103

Department
Biology

Academic Level (Course Level)
Undergraduate

Course Description
Presents scientific and societal perspectives of the current global mass extinction crisis. Introduces the field of conservation biology and practices of conserving all levels of biodiversity for human and non-human benefit. This course explores patterns of past and current biodiversity, processes that produce biodiversity and the processes that lead to natural and anthropogenic extinction events.

BIOL104 - Backyard Biology: Citizen Science

General

Course Long Title
Backyard Biology: Citizen Science

Course Subject Code
BIOL

Course Number
104

Department
Biology

Academic Level (Course Level)
Undergraduate

Course Description
An introduction to fundamental principles and concepts of biological science relative to current environmental degradation. It provides students with an understanding of how humans have touched and altered nature by evaluating how plants and ecosystems respond. Students will apply cognitive skills to evaluate environmental responses using the scientific method and learn how to be a citizen scientist using crowdsourced data. Labs will utilize the relationship among plants, water, and soils found within their homes and backyards.

BIOL211 - Cell Biology

General

Course Long Title
Cell Biology

Course Subject Code
BIOL

Course Number
211

Department
Biology

Academic Level (Course Level)
Undergraduate

Course Description
Examines the structure and function of the cell and its organelles. Emphasis is placed on the general principles and processes by which all cells function; including metabolism, signaling, cell cycle, cell movement and interactions. Laboratory components emphasize the use of basic cell and molecular techniques to experimentally measure cellular processes and properties.

BIOL263 - Field Botany

General

Course Long Title
Field Botany

Course Subject Code
BIOL

Course Number
263

Department
Biology

Academic Level (Course Level)
Undergraduate

Course Description
Survey and identification of the flora of Pennsylvania, with an emphasis on the non-woody vascular plants. Course will cover techniques for identifying, classifying, collecting and preserving plants. Students will become familiar with terms used to describe diagnostic plant traits, and will be proficient at using taxonomic and dichotomous keys. Students will create portfolios and contribute to the campus herbarium collections. Projects will illustrate taxonomy, ecology, and habitats of the specimens in local areas.

Medical Microbiology

Course Subject Code
BIOL

Course Number
345

Department
Biology

Academic Level (Course Level)
Undergraduate

Course Description
Expands on concepts in microbiology and cell biology to provide a further understanding of microorganisms and their role in human disease. A systems-based approach will be used to examine the epidemiology, pathogenesis, diagnosis, and treatment of disease-causing pathogens. Host defenses to infection will also be covered. The laboratory component is included to provide a working knowledge of a variety of clinical tests that are used to identify microorganisms.

BIOL431 - Mycology

General

Course Long Title
Mycology

Course Subject Code
BIOL

Course Number
431

Department
Biology

Academic Level (Course Level)
Undergraduate

Course Description
Investigates mushrooms, molds, mycotoxins and human mycoses. This course introduces the student to fungal ecology, fungal classification, molecular systematics, and an overview of emerging animal and human pathogens. The course utilizes hands-on student-driven, inquiry-based practices. Students will use data analysis and research tools to investigate fungal morphogenesis; learn molecular diagnostics and culture techniques; and study ecological relationships of mushrooms inhabiting forest ecosystems.

Course Description
Introduces the student to the anatomy, physiology, behavior, ecology, evolution, and taxonomy of fishes. This course will provide students with an introduction to the biology and taxonomy of fishes. Lectures will emphasize evolution and classification of major fish lineages, general fish anatomy and physiology, natural history, and conservation. Labs will concentrate on sampling techniques, identification, and life history of local and regional ichthyofauna.

BIOL442 - Advanced Virology

General

Course Long Title
Advanced Virology

Course Subject Code
BIOL

Course Number
442

Department
Biology

Academic Level (Course Level)
Undergraduate

Course Description
Examines the common strategies viruses employ to infect diverse hosts as well as the unique characteristics of viral pathogenesis in the human host. Topics will focus on the molecular events in the infection and replication of viruses in prokaryotic and eukaryotic cells, how viruses cause disease in humans, the host response to virus infection, and the control of viruses infecting humans. Viruses infecting other organisms, including insects and plants will be examined.

BIOL460 - PA Plants,Animals & Nat Hist

General

Course Subject Code
BIOL

Course Number
460

Department
Biology

Academic Level (Course Level)
Undergraduate

Course Description
Surveys the variety of living things in Pennsylvania by focusing on the evolutionary history, taxonomy, life histories, diversity, and ecological value of a variety of representative and biologically important groups of organisms. The impacts of human interactions with organisms are studied throughout the course. The course emphasizes identification of plant and animal species, habitat needs, and their influence on the economic and social life of humans.

Course Description
Entails a study of the neuronal, hormonal, and evolutionary foundations of animal behavior in vertebrate and invertebrate taxa. Behaviors such as feeding, communication, mating, and caring for offspring are discussed. Emphasis is placed on the use of the scientific method to discover principles of animal behavior, the appropriate design of animal behavior experiments, and the analysis of data.

Academic Level (Course Level)
Undergraduate

Course Description
Explores the fundamentals of cancer development and progression. Topics include cancer cell proliferation, growth factors, and the cell cycle, apoptosis and cell survival, DNA damage and repair, oncogenes, tumor suppressor genes, and genetic and epigenetic changes that lead to tumor formation. Tumor-host interactions including tumor neovascularization, invasion and metastasis, the tumor microenvironment, and tumor immunology will be covered. Lastly, this course will explore the histopathology, screening, diagnosis, and therapeutic treatments currently available to cancer patients.

Department
Biology

Academic Level (Course Level)
Graduate

Course Description
Investigates mushrooms, molds, mycotoxins and human mycoses. This course introduces the student to fungal ecology, fungal classification, molecular systematics, and an overview of emerging animal and human pathogens. The course utilizes hands-on, student-driven, inquiry-based practices. Students will use data analysis and research tools to investigate fungal morphogenesis; learn molecular diagnostics and culture techniques; and study ecological relationships of mushrooms inhabiting forest ecosystems.

BIOL532 - Ornithology

General

Course Long Title
Ornithology

Course Subject Code
BIOL

Course Number
532

Department
Biology

Academic Level (Course Level)
Graduate

Course Description
Surveys biology of birds including anatomy, physiology, behavior, ecology and other aspects. There are lecture, laboratory, and field components to this course. Instruction will include identification of regional birds by site, vocalization, and habitat preference.

Grade Modes
Credit/No Credit, Academic Forgivness, Pass/Fail, Standard Letter

BIOL533 - Ichthyology

General

Course Long Title
Ichthyology

Course Subject Code
BIOL

Course Number
533

Department
Biology

Academic Level (Course Level)
Graduate

Course Description
Introduces the student to the anatomy, physiology, behavior, ecology, evolution, and taxonomy of fishes. This course will provide students with an introduction to the biology and taxonomy of fishes. Lectures will emphasize evolution and classification of major fish lineages, general fish anatomy and physiology, natural history, and conservation. Labs will concentrate on sampling techniques, identification, and life history of local and regional ichthyofauna.

BIOL534 - Herpetology

General

Course Long Title
Herpetology

Course Subject Code
BIOL

Course Number
534

Department
Biology

Academic Level (Course Level)
Graduate

Course Description
Examines the biology, evolution, ecology, behavior, and reproduction of amphibians (salamanders, frogs, caecilians) and reptiles (lizards, snakes, tuatara, turtles, crocodilians). Laboratory sessions focus on survey methods, identification, and habitats of amphibians and reptiles. Emphasis is placed on the use of the scientific method, the appropriate design of experiments, and the analysis of data.

BIOL535 - Conservation Genetics

General

Course Long Title
Conservation Genetics

Course Subject Code
BIOL

Course Number
535

Department
Biology

Academic Level (Course Level)
Graduate

Course Description
Introduces students to the application of genetic data for the conservation and management of natural resources. Emphasis will be placed on the use of molecular genetic methods to define management or conservation units and prioritizing these units for conservation delivery. The course will also explore how evolutionary forces shape genetic diversity and why this is important for conservation and sustainability of natural resources.

Environmental Policy and Regulations

Course Subject Code
BIOL

Course Number
538

Department
Biology

Academic Level (Course Level)
Graduate

Course Description
Presents significant United States Federal and Pennsylvania legislation and regulations pertinent to the study, protection and management of our biological resources. The legislation and rulemaking processes relevant to environmental issues will be investigated. The biological basis for resource management decisions and the role of the scientist in advocating, writing and implementing environmental legislation and regulations will be examined in detail.

General

Course Long Title
Human Dimensions in Fisheries Management

Course Subject Code
BIOL

Course Number
539

Department
Biology

Academic Level (Course Level)
Graduate

Course Description
Introduces students to the interaction of people and benefits derived from their use of aquatic resources. The course involves the biological, ecological, economic and sociological components of aquatic systems that provides aesthetic and other non-tangible benefits to people as well as fish for consumption. The course is designed to fulfill three credits of the human dimension requirement for certification by The American Fisheries Society.

BIOL542 - Advanced Virology

General

Course Long Title
Advanced Virology

Course Subject Code
BIOL

Course Number
542

Department
Biology

Academic Level (Course Level)
Graduate

Course Description
Examines the common strategies viruses employ to infect diverse hosts as well as the unique characteristics of viral pathogenesis in the human host. Topics will focus on the molecular events in the infection and replication of viruses in prokaryotic and eukaryotic cells, how viruses cause disease in humans, the host response to virus infection, and the control of viruses infecting humans. Viruses infecting other organisms, including insects and plants will be examined.

General

Course Long Title
Directed Study in Biology

Course Subject Code
BIOL

Course Number
591

Department
Biology

Academic Level (Course Level)
Graduate

Course Description
Provides the opportunity students to apply the scientific method and learn the techniques of scientific research, data collection, and analysis by engaging in an individualized graduate-level program of research under the supervision of a faculty member. The research will culminate in a scholarly report written by the student, and the results will be presented at a scientific meeting or other appropriate venue.

BLGY115 - Concepts in Biology 2

General

Course Long Title
Concepts in Biology 2

Course Subject Code
BLGY

Course Number
115

Department
Biology

Academic Level (Course Level)
Undergraduate

Course Description
Presents key biological concepts in an evolutionary framework. Topics include plant form and function: population, community, and ecosystem ecology; evolution (including population genetics, macroevolution, and human evolution); and an introduction to principles of systematics. Laboratory work emphasizes application of biological principles, experimental design, observation, data collection, analysis, and interpretation as well as written and oral communication skills. This course is the second in a sequence of two introductory core courses for Biology majors. Three hours of lecture and three hours of lab per week.

BLGY298 - Internship in Medical Imaging

General

Course Subject Code
BLGY

Course Number
298

Department
Biology

Academic Level (Course Level)
Undergraduate

Course Description
Offers an opportunity for students majoring in Medical Imaging to participate in a 120-hour internship in a hospital or clinical site. Students will explore the various modalities of medical imaging through hands on experience. Students will have the opportunity to learn more about the medical imaging profession as they are mentored by various hospital personnel including medical imaging technologist, nurses, and physicians. Students will have many opportunities to demonstrate responsible citizenship as they interact with both patients and hospital personnel. An internship program open only to those students majoring in Medical Imaging.

BLGY302 - Health Care Practicum

General

Course Long Title
Health Care Practicum

Course Subject Code
BLGY

Course Number
302

Department
Biology

Academic Level (Course Level)
Undergraduate

Course Description
Provides an opportunity for students to apply knowledge and utilize skills from Biology 301 (Introduction to Health Care Practice) in a clinical setting. Biology 302 is a 400 hour clinical experience in which students will be integrated into a health care team and function as nursing assistants. Biology 302 is the second course in a two-course sequence and is to be completed during the summer immediately following enrollment in Biology 301. This is an elective for B.S. Health Sciences majors. Not offered every semester.

Department
Biology

Academic Level (Course Level)
Undergraduate

Course Description
Presents the science of preserving biodiversity and sustaining the earth. The course draws on and synthesizes information from the fields of ecology, evolution, genetics, philosophy, economics, sociology and political science. Emphasis is placed on the development of strategies for preserving populations, species, biological communities and entire ecosystems in the face of growing human populations and their impact on the environment. The course brings scientific principles and theory to bear on problems of management for preserving the richness of life on earth. This course is an elective for Biology majors. Three hours of seminar per week. Not offered every semester.

Tech/Analytic/Work Force Learn

Academic Level (Course Level)
Graduate

Course Description
Introduces students to research in business fields, with a focus on business education, including Accounting, Business Law, Career Development, Communication, Economics, Personal Finance, Entrepreneurship, Information Technology, International Business, Management and Marketing, or any other competencies. Students will research a particular field and develop a research proposal and research report that includes a purpose, literature review, delimitations, ethical considerations, method, limitations, key findings, discussion, conclusion, reference list and appendices as needed.

General

Course Long Title
Community Government Association (CGA) President

Course Subject Code
CCLE

Course Number
301

Department
Athletics

Academic Level (Course Level)
Undergraduate

Course Description
Provides the Community Government Association (CGA) President, the elected leader of the student body at Bloomsburg University, the opportunity to learn more regarding communication and citizenship by representing Bloomsburg University at Trustee meetings, PASSHE meetings and Town of Bloomsburg government meetings. The CGA President is an officer of Honeysuckle Student Holdings, Inc., the Kehr Union Governing Board and the Student Recreation Center Governing Board. The CGA President has fiscal responsibility for the operating budget of CGA, Inc. CGA President serves for a term of one academic year and will receive General Education points once. Prerequisites: Elected as CGA President. This course earns one GEP toward Goal 1 Communication and one GEP toward Goal 10 Citizenship in general education.

General

Course Long Title
Introductory Chemistry

Course Subject Code
CHE

Course Number
101

Department
Biochem/Chem/Engineer/Physics [BiCEP]

Academic Level (Course Level)
Undergraduate

Course Description
Presents an introduction to chemistry for students with little or no previous chemical background. Develops the principles of chemistry from the ground level with an approach to meet the needs of students for general education and allied health emphasis including nursing. This course is not intended to be a beginning course for science majors. Prerequisites: Three Hours Lecture Per week.

General

Course Long Title
Chemistry of Air, Water, and Earth

Course Subject Code
CHEM

Course Number
100

Department
Biochem/Chem/Engineer/Physics [BiCEP]

Academic Level (Course Level)
Undergraduate

Course Description
Introduces chemistry concepts to non-science majors. Students will learn chemistry concepts that are important to being an educated member of our society through the context of understanding the chemistry of; the air we breathe, the water we drink, and the resources we extract from the earth to produce food, energy, and plastics. The course satisfies 3 credits of the Natural World general education requirement and is taught through a combination of lecture and in-class activities.

General

Course Long Title
Toxins & Poisons

Course Subject Code
CHEM

Course Number
102

Department
Biochem/Chem/Engineer/Physics [BiCEP]

Academic Level (Course Level)
Undergraduate

Course Description
Introduces the field of toxicology and the basic chemical and biochemical foundations of poisons and toxins to non-science majors. Uses real world examples and historic/current events to demonstrate how the field of toxicology has impacted human history, medicine, and safety. Introduces key terminology, safety considerations, interpretation of data, basic chemistry foundations, and applied mathematics (including algebra). 3 hours of lecture per week. The course satisfies 3 credits of the Natural World general education requirement.

General

Course Long Title
How Drugs Work

Course Subject Code
CHEM

Course Number
105

Department
Biochem/Chem/Engineer/Physics [BiCEP]

Academic Level (Course Level)
Undergraduate

Course Description
Outlines the mechanisms by which drugs exert their effects on the body. Discussion of molecular structures of drugs and their targets. Highlights aspects of various diseases and the ways different drug classes modify physiology. Using chemistry and biochemistry to appreciate the structures and behavior of atoms and molecules and the building blocks of the body this course aims to understand how drugs work. The course satisfies 3 credits of the Natural World general education requirement.

General

Course Long Title
Physiological Chemistry 1: General Chemistry

Course Subject Code
CHEM

Course Number
116

Department
CHEM

Academic Level (Course Level)
Undergraduate

Course Description
Presents an introduction to physiological chemistry, with emphasis on general chemistry principles, for Nursing and Nutrition majors, as well as General Education. This course introduces basic general chemistry principles and surveys relevant biomolecules. Topics include measurements in chemistry, atomic structure, chemical bonding, simple reactions and balancing, solutions, equilibrium, acids/bases, and gases. Laboratory focuses on critical thinking, laboratory skill development, and exposure to common general chemical laboratory techniques.

CHEM117 - Physiological Chemistry 2: Organic & Biological Chemistry

General

Course Long Title
Physiological Chemistry 2: Organic & Biological Chemistry

Course Subject Code
CHEM

Course Number
117

Department
Biochem/Chem/Engineer/Physics [BiCEP]

Academic Level (Course Level)
Undergraduate

Course Description
Builds upon the foundations of CHEM116 to introduce organic chemistry as it applies to biological chemistry. Emphasizes common organic reactions, structure and function relationships, and physiological functions of organic chemistry with an emphasis on bio-organic-molecules. Topics includes bonding, structure, nomenclature, functional group properties as applied to biomolecules, and reactivities of functional groups. Recitation will focus on applied thinking skills and predicting organic reactivities.

General

Course Long Title
General Chemistry 1

Course Subject Code
CHEM

Course Number
121

Department
Biochem/Chem/Engineer/Physics [BiCEP]

Academic Level (Course Level)
Undergraduate

Course Description
Introduces and develops qualitative and quantitative concepts in chemistry essential for further study in chemistry and applications to other science disciplines. Topics include: atomic and periodic properties, stoichiometry, the mole, chemical compound types and properties, chemical reaction types, molecular structure and properties, physical properties of states of matter, bonding theories, thermodynamics, and gas laws. 3 hours lecture and 3 hours of laboratory per week.

Grade Modes

General

Course Long Title
Condensed Organic Chemistry

Course Subject Code
CHEM

Course Number
231

Department
Biochem/Chem/Engineer/Physics [BiCEP]

Academic Level (Course Level)
Undergraduate

Course Description
Provides an integrated lecture and lab course covering aliphatic, aromatic, alkyl halide, alcohol, thiol, ether, amine, and carbonyl compounds for Health & Exercise Sciences, Ecology & Environmental, and Marine Biology majors. The properties of organic compounds are explored from the perspectives of functional groups, chemical reactivity, stereochemistry, energy changes, and reaction mechanisms.

CHEM251 - Nutritional Biochemistry

General

Course Long Title
Nutritional Biochemistry

Course Subject Code
CHEM

Course Number
251

Department
Biochem/Chem/Engineer/Physics [BiCEP]

Academic Level (Course Level)
Undergraduate

Course Description
Explores the molecular basis of biochemistry of nutrition at the interface between chemical processes, biological functions, and nutritional metabolism. Life processes are chemical in nature, involving interactions between atoms, ions, and molecules, and are consistent with the chemical foundation learned in pre-requisite courses. Major topics include fuel management, the organization and control of metabolic pathways, and the structures, properties, and functions of proteins, carbohydrates, lipids, and nucleic acids and their role in metabolism.

CHEM341 - Quantitative Analysis

General

Course Long Title
Quantitative Analysis

Course Subject Code
CHEM

Course Number
341

Department
Biochem/Chem/Engineer/Physics [BiCEP]

Academic Level (Course Level)
Undergraduate

Course Description
Introduces the fundamental principles of chemical analysis and advanced chemical equilibria. Students will define chemical problems, select appropriate methods of analysis considering practical sample requirements, validate methods used, collect and interpret data, and report findings to an appropriate statistical level of confidence. Proper use of scientific instrumentation and precision glassware will be performed. This course contains 3 hours of lecture and in-person 3 hour laboratory component per week.

CHEM492 - Chemistry Research 1

General

Course Long Title
Chemistry Research 1

Course Subject Code
CHEM

Course Number
492

Department
Biochem/Chem/Engineer/Physics [BiCEP]

Academic Level (Course Level)
Undergraduate

Course Description
Conduct advanced hypothesis-driven and hands-on experiential learning in a chemistry research setting under the mentorship of a faculty member. Students will survey the relevant scientific literature, develop a research plan, and initiate an experiential learning project related to a chemistry scientific problem. Approximately 120 hours per semester.

Grade Modes

CHIN101 - Elementary Chinese I

General

Course Long Title
Elementary Chinese I

Course Subject Code
CHIN

Course Number
101

Department
Languages And Cultures

Academic Level (Course Level)
Undergraduate

Course Description
Initiates students development of the four language skills (speaking, listening, reading, writing) required to use the Chinese language in a communicative context. Anticipated proficiency upon successful completion of the course is the Novice-Mid sublevel (based upon the American Council on the Teaching of Foreign Languages). Introduces students to features of Chinese and Far Eastern cultures that are associated with the targeted communicative activities.

Grade Modes
Credit/No Credit, Academic Forgivness, Pass/Fail, Standard Letter

CHIN102 - Elementary Chinese II

General

Course Subject Code
CHIN

Course Number
102

Department
Languages And Cultures

Academic Level (Course Level)
Undergraduate

Course Description
Develops communicative language proficiency at the Novice-High and Intermediate-Low sublevels (according to ACTFL proficiency scale) as well as develops the ability to understand and appreciate Chinese-speaking cultures. A communicative method is applied to develop the four language skills (speaking, listening, reading, writing) in an intercultural content. This includes the use of authentic audio-visual materials introducing the Chinese-speaking world, situational communicative practice in listening, speaking, reading and writing, and laboratory activities.

CHM1101 - Introductory Chemistry

General

Course Long Title
Introductory Chemistry

Course Subject Code
CHM

Course Number
1101

Department
Biochem/Chem/Engineer/Physics [BiCEP]

Academic Level (Course Level)
Undergraduate

Course Description
A treatment of fundamental principles for non-science majors. Does not meet degree requirements for chemistry or biology majors.

Grade Modes
Credit/No Credit, Academic Forgivness, Pass/Fail, Standard Letter

Course Fees
FC02 - 45

Additional Comments:

CMHC562 - Children & Adolescent Couns

General

Course Subject Code
CMHC

Course Number
562

Department
Counseling & Educational Lead

Academic Level (Course Level)
Graduate

Course Description
Introduces students to children and adolescent counseling. Common disorders and issues for this population will be analyzed along with an overview of evidence-based interventions, strategies, and approaches to working with children, adolescents and their parents/guardians. Focus will be on integration of parents/guardians and other interagency personnel who are directly involved with children and adolescents. Ethical and legal considerations for counselors will be emphasized.

CMHC570 - Trauma & Crisis Counseling

General

Course Subject Code
CMHC

Course Number
570

Department
Counseling & Educational Lead

Academic Level (Course Level)
Graduate

Course Description
Addresses trauma-causing events, disasters, and crises on diverse populations across the lifespan. Identification, conceptualization, and assessment techniques for individuals impacted by crises, disasters, and other trauma-causing events will be emphasized. In addition, students will explore the principles of crisis intervention, diagnosis, theories and models of intervention to enhance individual, family, group, and community resilience. They will also emphasize the need for clinical mental health agencies, emergency management systems, and other crisis interventions teams to address self-care.

CMSC125 - Fund of Web Development

General

Course Subject Code
CMSC

Course Number
125

Department
Math/Computer Sci/Dig Forensic

Academic Level (Course Level)
Undergraduate

Course Description
Introduces students to web development using the full web development stack. Students will learn the basics of HTML, CSS, client-side scripting, server-side scripting, and interfacing with a database. The basics will be applied to developing a client-server web application.

Instructional Method / Attendance Policy
Face to Face, Face to Face

Grade Modes
Credit/No Credit, Academic Forgivness, Pass/Fail, Standard Letter

Any of the following requirements

Fulfill ANY of the following requirements:

A minimum grade of 'D-' in Course CMSC115

Earn a minimum grade (UG) of D- in the following:

- CMSC115 - Python Programming

OR

A minimum grade of 'D-' in Course CS121

Earn a minimum grade (UG) of D- in the following:

OR

A minimum grade of 'D-' in Course CMSC120

Earn a minimum grade (UG) of D- in the following:

- CMSC120 - Object-Oriented Program Java

OR

A minimum grade of 'D-' in Course CS115

Earn a minimum grade (UG) of D- in the following:

Additional Comments:

CMSC130 - Graphical User Interfaces Java

General

Course Subject Code
CMSC

Course Number
130

Department
Math/Computer Sci/Dig Forensic

Academic Level (Course Level)
Undergraduate

Course Description
Extends the study of object-oriented programming initiated in CMSC120. This course focuses on the core principles of inheritance and polymorphism as applied in Java. Topics include abstraction and encapsulation, interface types, event handling, graphical user interfaces, inheritance, polymorphism, exceptions, and I/O streams.

CMSC230 - Advanced Java

General

Course Subject Code
CMSC

Course Number
230

Department
Math/Computer Sci/Dig Forensic

Academic Level (Course Level)
Undergraduate

Course Description
Increases the student's breadth and flexibility as a programmer and is a prerequisite for most 300 and 400 level courses in computer science. CS230 emphasizes object-oriented programming and design. Topics include: recursive programming, generic programming, database programming, concurrent programming, network programming, web programming with servlets, Java Server Paces and XML. The course completes our department's coverage of the Java programming language. Prerequisite: CMSC 130 Graphical User Interfaces in Java

CMSC310 - Software Development Methods

General

Course Subject Code
CMSC

Course Number
310

Department
Math/Computer Sci/Dig Forensic

Academic Level (Course Level)
Undergraduate

Course Description
Introduces students to various software development project management methodologies. Topics include the development of user and system requirements, analysis of work and data flow, implementation and verification. The primary focus will be on agile methods. Students will complete a several iterations of a team-based software development project.

General

Course Long Title
Computer Ethics, Social Impact and Security

Course Subject Code
CMSC

Course Number
320

Department
Math/Computer Sci/Dig Forensic

Academic Level (Course Level)
Undergraduate

Course Description
Presents an introduction to the security, ethical and social issues that emerge from the widespread use of technology in our global society along with important computer security implications. The course acquaints computer science students with the implications of the laws, issues and professional codes of ethics in the context of their future careers. Computer security concepts, problems and solutions will be discussed.

CMSC460 - Internet Programming

General

Course Subject Code
CMSC

Course Number
460

Department
Math/Computer Sci/Dig Forensic

Academic Level (Course Level)
Undergraduate

Course Description
Presents programming topics important in both front-end and back-end web programming. Client-Server architecture is emphasized and Web Services applications topics are covered. Students will complete JavaScript and PHP based programming project using different Internet programming principles and techniques. Topics covered will include: Internet and web protocols, client-server architectures, HTML5, CSS, JavaScript, PHP and AngulasJS. Security and encryption are also covered if time permits.

Grade Modes
Academic Forgivness, Pass/Fail, Standard Letter, Transfer

CMSC480 - Object-Oriented Software Engineering

General

Course Long Title
Object-Oriented Software Engineering

Course Subject Code
CMSC

Course Number
480

Department
Math/Computer Sci/Dig Forensic

Academic Level (Course Level)
Undergraduate

Course Description
Presents object-oriented software development techniques that allow a group of programmers to successfully complete a large software development project. Teams of three to five students complete a large software project that starts with understanding user requirements and finishes with a presentation of their final solution.

Course Description
Explores normal language acquisition in children from age five years through adolescence and the effects of language disorders on academic performance, especially literacy skills. Principles and methods of curriculum-based assessment and intervention are presented. Cultural and educational issues are addressed.

Grade Modes
Credit/No Credit, Academic Forgivness, Pass/Fail, Standard Letter

CMSD565 - Motor Speech Disorders

General

Course Long Title
Motor Speech Disorders

Course Subject Code
CMSD

Course Number
565

Department
Communication Sci & Disorders

Academic Level (Course Level)
Graduate

Course Description
Explores motor speech disorders across all ages. The course addresses the typical motor control and motor execution aspects of speech production and covers the etiologies of, assessment of, and treatments appropriate for various forms of motor speech impairments. It covers the importance of team interventions for the assessment and treatment of motor speech disorders.

CMSD566 - Clinical Practicum in SLP II

General

Course Subject Code
CMSD

Course Number
566

Department
Communication Sci & Disorders

Academic Level (Course Level)
Graduate

Course Description
Builds on skills of clinical management developed in CMSD558 (formerly CSD558) to meet the Professional Practice Competencies and to serve individuals with communication and swallowing disorders in the Bloomsburg University Speech, Language and Hearing Clinic and off-campus contracted sites. Students further develop necessary knowledge and skills in preparation for their field experiences in the professional community and do so with greater independence.

Simple Requisites

Any of the following requirements
Type
Prerequisite

Any of the following requirements

Fulfill ANY of the following requirements:

A minimum grade of 'D-' in Course CMSD558

Earn a minimum grade (GR) of D- in the following:

- CMSD558 - Clinical Practicum in SLP I

OR

A minimum grade of 'D-' in Course CSD558

Earn a minimum grade (GR) of D- in the following:

Additional Comments:

CMSD568 - Voice and Resonance Disorders

General

Course Long Title
Voice and Resonance Disorders

Course Subject Code
CMSD

Course Number
568

Department
Communication Sci & Disorders

Academic Level (Course Level)
Graduate

Course Description
Provides an overview of the diagnosis and clinical management of functional, organic, and resonance voice disorders and, an overview of craniofacial disorders with emphasis on cleft lip and/or palate and velopharyngeal inadequacy (VPI). The focus of this course is on the perceptual and acoustic analysis of voice disorders, as well as a physiological view of voice therapy. Procedures for diagnosis and treatment of voice and resonance disorders and related management issues will be discussed.

CMSD570 - Cognitive Based Language Disorders

General

Course Long Title
Cognitive Based Language Disorders

Course Subject Code
CMSD

Course Number
570

Department
Communication Sci & Disorders

Academic Level (Course Level)
Graduate

Course Description
Explores various aspects of cognitive based disorders resulting from disease (such as Alzheimer's disease) and traumatic brain injury in children and adults. Introduces evidence-based methods to evaluate, treat/manage, and participate as an interdisciplinary team member working with individuals with cognitive, communication and related disorders resulting from these etiologies.

CMSD572 - Augment Comm & Autism Spect

General

Course Subject Code
CMSD

Course Number
572

Department
Communication Sci & Disorders

Academic Level (Course Level)
Graduate

Course Description
Explores augmentative and alternative communication (AAC) modalities and assistive technologies for individuals with significant disabilities of speaking and writing. Students acquire skills in evaluation, intervention, and prescription of AAC for diverse disability populations across the life span. Introduces students to the disorder of autism, its behavioral and communication characteristics, and considerations for assessment, intervention, and transition planning for this population.

Additional Comments:

CMSD580 - Neurosci of Comm and Swallow

General

Course Subject Code
CMSD

Course Number
580

Department
Communication Sci & Disorders

Academic Level (Course Level)
Graduate

Course Description
Examines the organization of the nervous system and its function in speech, language, cognition, and swallowing. The course also provides a general overview of disorders of speech, language, cognition and swallowing in children and adults that are affected by diseases, trauma, and neurological disorders. Medical testing including CT scan, MRI, and functional imaging are discussed.

General

Course Long Title
Disorders of Feeding and Swallowing

Course Subject Code
CMSD

Course Number
581

Department
Communication Sci & Disorders

Academic Level (Course Level)
Graduate

Course Description
Explores the anatomy, physiology, and neurological controls of the swallowing process in children and adults. Discusses the impact of various disease processes on the neurological and structural components of the swallow. Introduces procedures of evaluation of swallowing disorders, determination of objectives for patient management, and selection and implementation of therapeutic interventions for dysphagia across the life span. Emphasizes case management, interdisciplinary team interaction, and professional communication skills.

General

Course Long Title
Research in Communication Disorders

Course Subject Code
CMSD

Course Number
582

Department
Communication Sci & Disorders

Academic Level (Course Level)
Graduate

Course Description
Discusses research methods, research design and statistical analysis procedures typically used in communication sciences and disorders. Uses clinical and non-clinical research literature to address questions related to diagnosis and treatment in speech-language pathology. Emphasizes the clinical application of research findings and translation of research into evidence-based practice.

General

Course Long Title
School Field Experience in Speech-Language Pathology

Course Subject Code
CMSD

Course Number
584

Department
Communication Sci & Disorders

Academic Level (Course Level)
Graduate

Course Description
Links academic content and theory to clinical practice and extends preparation of graduate students in all aspects of clinical management in a school setting (PreK-12). Graduate students provide services to school-aged students with communication and swallowing disorders at external sites within the professional community. Between CSD584 and CSD586, Medical Field Experience, students earn approximately 250 clinical clock hours toward certification in speech-language pathology as required by the American Speech-Language-Hearing Association through supervised clinical experiences.

CMSD600 - Diagnostic Audiology I: Assessment of Auditory Sensitivity and Speech Perception

General

Course Long Title
Diagnostic Audiology I: Assessment of Auditory Sensitivity and Speech Perception

Course Subject Code
CMSD

Course Number
600

Department
Communication Sci & Disorders

Academic Level (Course Level)
Doctoral

Course Description
Presents methods to determine auditory sensitivity via air conduction, bone conduction, and the sound field audiometry as well as the procedures for assessment of speech perception. Provide the background to interpret test results to identify the presence, degree, and type of hearing loss. Explores the equipment and procedural variables that can affect test results.

General

Course Long Title
Aural Rehabilitation for Adults

Course Subject Code
CMSD

Course Number
601

Department
Communication Sci & Disorders

Academic Level (Course Level)
Doctoral

Course Description
Introduces evidence based clinical practice guidelines that are utilized in aural rehabilitation of adults. Examines hearing loss interventions and management, amplification, auditory training, speech/lip-reading, auditory-visual integration, effective communication strategies, assistive technology, post-secondary transition, and psychosocial and vocational issues.

Course Long Title
Diagnostic Audiology II: Acoustic immittance, site of lesion and psuedohypacusis

Course Subject Code
CMSD

Course Number
605

Department
Communication Sci & Disorders

Academic Level (Course Level)
Doctoral

Course Description
Explores middle ear measures and a variety of site of lesion tests. The course will cover acoustic immittance measures including tympanometry and acoustic reflex measures for detection of middle ear disorders and site of lesions tests to differentiate cochlear versus retrocohlear pathology. Methods for the detection of nonorganic hearing loss will be presented.

CMSD631 - Neuroscience for Audiologists

General

Course Long Title
Neuroscience for Audiologists

Course Subject Code
CMSD

Course Number
631

Department
Communication Sci & Disorders

Academic Level (Course Level)
Doctoral

Course Description
Explains the fundamental knowledge of neuroscience related to audiologic practice. Examine how neurons differ at the molecular and cellular levels. Focus on the electrophysiological, molecular, cellular, and anatomical bases of auditory, visual, and somatosensory systems and the related human disorders in the context of audiological practice.

Grade Modes

General

Course Long Title
Clinical and Physiological Methods in Audiology

Course Subject Code
CMSD

Course Number
635

Department
Communication Sci & Disorders

Academic Level (Course Level)
Doctoral

Course Description
Analyzes electrophysiologic techniques used to assess nerve integrity and identification of cochlear, retrocochlear, and brainstem dysfunction and pathology. Review of theories and clinical applications of electrocochleography and auditory evoked potentials.

Instructional Method / Attendance Policy
Face to Face, Face to Face

CMSD636 - Professional Ethics & Cultural Diversity

General

Course Long Title
Professional Ethics & Cultural Diversity

Course Subject Code
CMSD

Course Number
636

Department
Communication Sci & Disorders

Academic Level (Course Level)
Doctoral

Course Description
Discusses issues related to ethical development and practice in the field of audiology as well as multicultural awareness and diversity sensitivity. Explore the code of ethics and the scope of practice for audiology as set by the governing bodies in audiology. Explain an ethical dilemma; rights of an audiology patient, and reimbursement/ funding issues related to the field of audiology.

CMSD637 - Medical Audiology

General

Course Long Title
Medical Audiology

Course Subject Code
CMSD

Course Number
637

Department
Communication Sci & Disorders

Academic Level (Course Level)
Doctoral

Course Description
Explains basic and advanced principles in medical diagnostic audiology including anatomy and physiology of the auditory/vestibular systems, disorders of the auditory/vestibular systems, radiology and functional brain imaging, pharmacology, genetics, medical treatment, and diagnosis. Review clinical considerations centered around medical audiology. Discuss the importance of appropriate referrals and multidisciplinary intervention team approach.

General

Course Long Title
Clinical Externship/Residency I

Course Subject Code
CMSD

Course Number
638

Department
Communication Sci & Disorders

Academic Level (Course Level)
Doctoral

Course Description
Applies theory and evidence-based practice in a real-world setting under close supervision by certified and licensed professionals at various off-campus clinical settings. Students are exposed to a greater variety of procedures, interventions, therapies, counseling, devices, equipment, and report writing with a more diverse patient population. This is the first off-campus experience to expand knowledge and skill that results in well-rounded, high-quality, independent professionals.

General

Course Long Title
Evaluation and Management of Balance Disorders I

Course Subject Code
CMSD

Course Number
639

Department
Communication Sci & Disorders

Academic Level (Course Level)
Doctoral

Course Description
Explains the anatomy and physiology of the vestibular systems. Presents techniques used in a standard (electro) video nystagmography evaluations. Introduces knowledge regarding balance assessments. Understand the symptomatology of a patient. Explain the best clinical practice guidelines for balance testing, patient management, and test interpretations.

Instructional Method / Attendance Policy

CMSD640 - Auditory Implantable Devices

General

Course Long Title
Auditory Implantable Devices

Course Subject Code
CMSD

Course Number
640

Department
Communication Sci & Disorders

Academic Level (Course Level)
Doctoral

Course Description
Explores the audiologist's role in implantable auditory system devices. This course will present the concepts required to effectively assess and manage these devices that include cochlear anatomy/neuroanatomy, biological safety, medical evaluation, audiological evaluation/intervention, surgical aspects, implant design, mapping strategies, benefits/risks/ethical issues. Introduce mapping parameters, T & C levels, electrode balance, input dynamic range, maximum dynamic range, compliance, and pulse width.

General

Course Long Title
Evaluation and Management of Balance Disorders-II

Course Subject Code
CMSD

Course Number
649

Department
Communication Sci & Disorders

Academic Level (Course Level)
Doctoral

Course Description
Explores causes of vestibular and balance disorders to determine and understanding the techniques of more advanced assessments to allow the professional to assist in the treatment of the patient. Provide the instruction in the techniques and interpretation of more advanced vestibular and balance tests. Present the etiologies of various vestibular and balance disorders to understand the techniques available in the treatment and management of the patient.

Functional Human Neuroanatomy

Course Subject Code
CMSD

Course Number
651

Department
Communication Sci & Disorders

Academic Level (Course Level)
Doctoral

Course Description
Explains the knowledge of functional human neuroanatomy. Familiarizes the students with the anatomy and physiology of nervous system and the correlation between the relevant anatomical structures and IONM practice. Focuses on clinical vignettes to facilitate the IONM interpretation and memorization of essential neuroanatomic information. Prepares students with the knowledge and skills required to pursue Certificate of IONM.

General

Course Long Title
Clinical Neurophysiology: Evoked Potential and Electromyography

Course Subject Code
CMSD

Course Number
652

Department
Communication Sci & Disorders

Academic Level (Course Level)
Graduate

Course Description
Explains clinical neurophysiology of motor and sensory systems. Familiarizes the students with the clinical neurophysiologic examine modalities used in IONM practice: Nerve conduction study (NCS), Electromyography (EMG), Somatosensory evoked potentials (SSEP), auditory evoked potentials (ABR), visual evoked potentials (VEP), motor evoked potentials (MEP). Prepares students with the knowledge and skills required to pursue Certificate of IONM within CSD graduate program.

General

Course Long Title
Clinical Neurophysiology: Electroencephalography and Biophysics

Course Subject Code
CMSD

Course Number
654

Department
Communication Sci & Disorders

Academic Level (Course Level)
Doctoral

Course Description
Explains the knowledge of electroencephalography (EEG) and biophysical basis of clinical electrophysiological instrumentation. Familiarizes students with the EEG techniques used for brain monitoring and protection. Focuses on the biophysical basis of clinical electrophysiological equipment use and trouble-shooting techniques. Prepares students with the knowledge and skills required to pursue Certificate of IONM within CSD graduate program.

COMM100 - Introduction to Communication

General

Course Long Title
Introduction to Communication

Course Subject Code
COMM

Course Number
100

Department
Communication Studies

Academic Level (Course Level)
Undergraduate

Course Description
Emphasizes the process of communication in public speaking, group, and interpersonal job interview situations. Students develop skills that allow them to construct well-supported, organized speeches that are delivered using appropriate verbal and nonverbal control. In addition, students study and practice effective interpersonal and group communication.

Grade Modes

General

Course Long Title
Communication Perspectives in Stress and Coping

Course Subject Code
COMM

Course Number
151

Department
Communication Studies

Academic Level (Course Level)
Undergraduate

Course Description
Introduces students to a nuanced understanding of stress from a communication perspective and a range of communication-based strategies for managing and coping with stressful experiences. Throughout this course, students will engage with communication-centered theories of stress and coping to learn the facets of ?stress? such as definitions of stress, the different categories of stressors, and the common contexts in which college-aged students experience stress. Additionally, students will learn about communication strategies for coping with stress.

COMM200 - Intercultural Communication

General

Course Long Title
Intercultural Communication

Course Subject Code
COMM

Course Number
200

Department
Communication Studies

Academic Level (Course Level)
Undergraduate

Course Description
Explores communication in cultural contexts. Students will be exposed to general principles for communication across cultures, both international and domestic, with the goal of becoming competent communicators. In addition to dealing with "international" contacts, the course will explore "co-cultural" variations--that is, similarities and differences of individuals within the United States, and cultural differences and similarities transnationally in race, gender, sexual orientation, class, etc.

COMM412 - Nonverbal Communication

General

Course Long Title
Nonverbal Communication

Course Subject Code
COMM

Course Number
412

Department
Communication Studies

Academic Level (Course Level)
Undergraduate

Course Description
Examines the impact of nonverbal communication on the communication process. Attention is given to research on aspects of communication outside of spoken language such as personal space, body language, eye contact, touch, and characteristics of the voice. Applications of these concepts to various contexts such as power, persuasion, work environments, and interpersonal relationships are discussed.

COMM435 - Studies in Propaganda

General

Course Long Title
Studies in Propaganda

Course Subject Code
COMM

Course Number
435

Department
Communication Studies

Academic Level (Course Level)
Undergraduate

Course Description
Explores the relationshiphistorically and theoreticallybetween persuasion and propaganda, as well as the founding and development of public relations. As forms of mass persuasion, propaganda and publicity wield tremendous influence over human beings while walking uneasily among thorny ethical questions and problems. This course considers the commonalities, distinctions, and overlaps from 1900 to the present to make sense of communication on a mass scale. It is primarily designed for Communication Studies majors and minors.

CRJU300 - Juvenile Justice

General

Course Subject Code
CRJU

Course Number
300

Department
Anthro/Crim Justice/Sociology

Academic Level (Course Level)
Undergraduate

Course Description
Examines the major components and legal history of the juvenile justice system in the United States. Emphasis is placed on major components of the juvenile justice system including; law enforcement, prosecution, courts, and corrections. Additional emphasis is placed on historical origins, philosophy of juvenile justice, theories of delinquency, and contemporary reforms in juvenile justice. An overview of the legal framework in which the juvenile justice system operates highlights differences between adult and juvenile case processing.

General

Course Long Title
Criminal Justice Ethics

Course Subject Code
CRJU

Course Number
304

Department
Anthro/Crim Justice/Sociology

Academic Level (Course Level)
Undergraduate

Course Description
Examines prominent moral and ethical issues faced by criminal justice practitioners in the fields of policing, law, corrections, and research. Emphasis will be placed on the application of moral and ethical theories to decision making. Students will conduct detailed examinations and evaluations of ethical issues and apply various theories, codes, and cannons to arrive at moral and ethical decisions.

Department
Anthro/Crim Justice/Sociology

Academic Level (Course Level)
Undergraduate

Course Description
Examines the underlying philosophies and justifications for punishment in the United States. The course also explores historical and social development of punishment justifications, as well as their philosophical influences. The course shows how a persons personal beliefs about punishment translates into support for certain justifications, which influences attitudes regarding punishment, sentencing, and the purpose of prison, as well as why people commit crimes. The course will also demonstrate how punishment justifications influence contemporary punishment practices.???

CRJU311 - Restorative Justice

General

Course Subject Code
CRJU

Course Number
311

Department
Anthro/Crim Justice/Sociology

Academic Level (Course Level)
Undergraduate

Course Description
??Emphasizes bringing the victim, offender, and community together to repair harm caused by criminal behavior. Restorative Justice is an alternate way to view the purpose of the criminal justice system and potentially adjust practices to mitigate the harmful effects of the traditional, adversarial approach to criminal justice. The course explores values and principles of restorative justice, presents alternate methods of achieving justice, and discusses potential ways to integrate restorative practices into the existing penological framework.?

CSA505 - Professional Helping in College Student Affairs

General

Course Long Title
Professional Helping in College Student Affairs

Course Subject Code
CSA

Course Number
505

Department
Counseling & Educational Lead

Academic Level (Course Level)
Graduate

Course Description
Exposes students to components of professional helping with a focus on the college student and their setting. Incorporating active use of helping skills through role playing, students will apply a three-stage helping model to interactions with college students. In addition, students will examine student mental health disorders, culturally responsive helping, reflective practice, crisis counseling, and legal and ethical issues. Primarily an in-person course, some sessions may be offered via distance education.

CSA521 - Student Development Theory

General

Course Long Title
Student Development Theory

Course Subject Code
CSA

Course Number
521

Department
Counseling & Educational Lead

Academic Level (Course Level)
Graduate

Course Description
Examines and critiques college student development theories and how the college experience shapes the formation of one's identity. In keeping with our scholar-practitioner model, this course also applies these theories and models to current college students and considers their use in student affairs administration. This course is foundational to the Educational Leadership and College Student Affairs graduate program and aligns with the Council for the Advancements of Standards.

General

Course Long Title
Foundations and Functions of College Student Affairs

Course Subject Code
CSA

Course Number
522

Department
Counseling & Educational Lead

Academic Level (Course Level)
Graduate

Course Description
Provides a comprehensive introduction to the field of college student affairs and its role in American higher education. This course examines the underpinnings of the college student affairs profession specifically, and higher education generally, including history, philosophy, roles, and functions. Students will also explore institutional and student demographics; analyze the influence of mission, curriculum, and organizational type on the nature of student affairs work; and consider essential partnerships with stakeholders in CSA work.

CSA530 - Special Topics in Higher Education

General

Course Long Title
Special Topics in Higher Education

Course Subject Code
CSA

Course Number
530

Department
Counseling & Educational Lead

Academic Level (Course Level)
Graduate

Course Description
Provides graduate students with in-depth instruction and student research within selected areas of interest not available in other courses. Topics may include a continuation of coursework beyond what is offered in a selected course or an intensive look at a topic such as Title IX, campus safety, higher education governance crises, equity and access to education, under-represented populations, and multicultural competence. Requires extensive reading and development of the students' ideas on the topic, and expression of those ideas in written and oral form. Students may take this course up to two times with different topics.

CSD564 - Craniofacial Disorder

General

Course Long Title
Craniofacial Disorder

Course Subject Code
CSD

Course Number
564

Department
Communication Sci & Disorders

Academic Level (Course Level)
Graduate

Course Description
This course provides an overview of craniofacial disorders with emphasis on cleft lip and/or palate and velopharyngeal inadequacy (VPI). An understanding of anatomy and physiology of the craniofacial complex, embryological development, and etiological factors are presented. The effects of cleft lip and/or palate and VPI on speech, hearing, and language are described. Procedures for diagnosis and treatment of communication disorders and related management issues will be discussed. Prerequisite: Graduate Enrollment in Speech Pathology. Three hours lecture per week.

DANC110 - Dance History: A World Survey

General

Course Subject Code
DANC

Course Number
110

Department
Music, Theatre, and Dance

Academic Level (Course Level)
Undergraduate

Course Description
Explores dance from both historic and contemporary times while spanning the international dance globe. This lecture-based course examines the work of multiple communities, artists, and companies that forever changed the world. Students gain an awareness of how various cultures added to the development of dance and life as we know it today, and tools for how to view and analyze varied movement. Explorations include learning fun basic dance steps, and group presentation topics of interest.

DANC115 - Ballet & Jazz I

General

Course Subject Code
DANC

Course Number
115

Department
Music, Theatre, and Dance

Academic Level (Course Level)
Undergraduate

Course Description
Explores the fundamentals of jazz and ballet dance from an artistic, intellectual, and physical approach. Students will gain an understanding of the historical figures, techniques, traditions, and terminology associated with each style, and experience the broad range of physical attributes while performing each unique form. Students will gain creative tools transferable to all career paths, and work collaboratively alongside peers crafting mini-dances, while developing life-long practices for healthy living.

DANC215 - Modern I/II

General

Course Subject Code
DANC

Course Number
215

Department
Music, Theatre, and Dance

Academic Level (Course Level)
Undergraduate

Course Description
Explores the medium of modern dance. Through progressive warm-ups, traveling movement patterns, exposure to varied techniques, and center combinations, students physically experience how the body becomes an instrument of expression, consciousness, and a tool for self-development. This course empowers students to obtain a deeper relationship to self, build stronger mental clarity of vast concepts such as space, weight, and time, reveals the relationship between physics and anatomical principles, and explores powerhouse artists within the field. *Prior exposure to dance is required. Instructor approval will be given during the first week of classes to determine appropriate placement. Students may have completed DANC 115 or have previous non-Commonwealth University studio experience in ballet, modern or jazz dance techniques.

DANC225 - Choreography I

General

Course Subject Code
DANC

Course Number
225

Department
Music, Theatre, and Dance

Academic Level (Course Level)
Undergraduate

Course Description
Explores the process of making contemporary dance works in the studio setting. Through an artistic, intellectual, and physical lens, students will experience/practice multiple approaches to the craft of dance making. Improvisational structures, text analysis, discussions, choreographic studies and varied assignments will empower students to develop the breadth of their choreographic voice while actively engaging in the process of creation. Students will participate in feedback sessions, both evaluating and de-constructing the work of all peers.*Prior exposure to dance is required. Instructor approval will be given during the first week of classes to determine appropriate placement. Students may have completed DANC 115 or have previous non-Commonwealth University studio experience in ballet, modern or jazz dance techniques.

DANC315 - Jazz II

General

Course Subject Code
DANC

Course Number
315

Department
Music, Theatre, and Dance

Academic Level (Course Level)
Undergraduate

Course Description
Explores jazz dance from an artistic, intellectual and physical approach. Students will experience multiple styles ranging from lyrical to Broadway to hip-hop/funk through various exercises and choreographic studies, while focusing on the development of expressive performance skills. Additionally, the life and work of the master jazz artist Bob Fosse will be examined in-depth through films, classroom-based discussions, and repertoire. *Prior exposure to jazz, modern or ballet dance technique is required. Instructor approval will be given during the first week of classes to determine appropriate course placement. DANC 115 or non-Commonwealth University studio training is acceptable.

DANC325 - Ballet II

General

Course Subject Code
DANC

Course Number
325

Department
Music, Theatre, and Dance

Academic Level (Course Level)
Undergraduate

Course Description
Explores ballet dance from an artistic, intellectual and physical approach. Through exposure to floor-barre, standing barre, traveling and center-based exercises, students will gain a greater sense of alignment, anatomical principles, musicality, terminology, and self-awareness. Additionally, through studying the repertoire of professional ballet companies, students will be able to recognize the elements that define classical versus contemporary ballet dance, and the importance of both to the dance landscape. *Prior exposure to ballet dance is required. Instructor approval will be given during the first week of classes to determine appropriate placement. Students may have completed DANC 115 or have previous non-Commonwealth University studio experience in ballet technique.

DANC350 - Ensemble

General

Course Subject Code
DANC

Course Number
350

Department
Music, Theatre, and Dance

Academic Level (Course Level)
Undergraduate

Course Description
Provides a mentored forum for the development of student choreography, research, design work, and/or practical dance production experiences. Choreographers submit project proposals for approval and are paired with cast members and designers as appropriate. Most projects appear in the annual dance minor concert, which offers multiple hands-on production stage crew experiences and jobs. The course focuses on developing artistry, technique, leadership skills, collaborative voices, and/or the skills/knowledge required for successful public performances of dance works.

DATS310 - Databases for Big Data

General

Course Long Title
Databases for Big Data

Course Subject Code
DATS

Course Number
310

Department
Math/Computer Sci/Dig Forensic

Academic Level (Course Level)
Undergraduate

Course Description
Continues the material of CS150, Principles of Database Design. Students learn advanced topics in SQL programming. The course also covers basic concepts, practices, and challenges of big data and distributed analytics computing. Topics include SQL stored procedures and functions, creating triggers and handling exceptions in SQL, Hadoop, MapReduce, related software, and enhanced approaches such as Spark and big data machine learning. The course is intended for students studying data science, computer science, applied computer science, mathematics or statistics.

DATS410 - Machine Learning

General

Course Long Title
Machine Learning

Course Subject Code
DATS

Course Number
410

Department
Math/Computer Sci/Dig Forensic

Academic Level (Course Level)
Undergraduate

Course Description
Introduces modern machine learning. Machine learning is an active and growing field that is the basis of modern data mining and big data techniques. The course aims at the balance of the theoretical versus practical spectrum. The course covers the concepts behind several machine learning algorithms without going deeply into the mathematics. Students will gain practical experience applying machine learning using Python and related modules. Applications include pattern recognition and artificial intelligence, making the course valuable to students interested in data science, engineering, and intelligent agent applications.

General

Course Long Title
Advanced Data Science

Course Subject Code
DATS

Course Number
420

Department
Math/Computer Sci/Dig Forensic

Academic Level (Course Level)
Undergraduate

Course Description
Presents Data Science techniques that allow data scientists to successfully complete projects to draw conclusions from big datasets. Students complete a project that starts with "data wrangling" (collecting, cleaning and organizing data). They use techniques learned in the prerequisite classes (Data Visualization, Machine Learning and Databases for Big Data or Advanced Python) to complete the project. The project culminates in a final report and presentation.

DGFR511 - Cybersecurity Compliance and Legal Issues for Healthcare Professionals

General

Course Long Title
Cybersecurity Compliance and Legal Issues for Healthcare Professionals

Course Subject Code
DGFR

Course Number
511

Department
Math/Computer Sci/Dig Forensic

Academic Level (Course Level)
Graduate

Course Description
Applies information and resources necessary for professionals within the healthcare industry to develop a working knowledge of the cybersecurity as it relates to the legal, privacy, and compliance environments facing US based healthcare organizations. Students will build an understanding of the complexities of these compliance and legal obligations by examining the general foundation of applicable laws and industry standards that apply across most organizations.

ECED105 - Becoming a Teacher Leader

General

Course Long Title
Becoming a Teacher Leader

Course Subject Code
ECED

Course Number
105

Department
Early Childhood Education

Academic Level (Course Level)
Undergraduate

Course Description
Introduces students to the ethical, professional and leadership requirements of the field of Early Childhood Education. Exploration of the field's history provides the basis for development of a personal philosophy of education. Students also explore the importance of cultural competence and collaboration with peers and families in the implementation of effective educational programs. Technology is utilized to explore these areas. Designed for those currently working in early childhood settings.

ECED110 - Child Development: Birth to Early Adolescence

General

Course Long Title
Child Development: Birth to Early Adolescence

Course Subject Code
ECED

Course Number
110

Department
Early Childhood Education

Academic Level (Course Level)
Undergraduate

Course Description
Studies and explores child development with focus on related cognitive process from prenatal age to adolescence. Candidates will develop knowledge, skills, & competencies in a comprehensive range of developmental domains: physical, cognitive, language, social-emotional, self-regulation, and executive function. Other topics include the needs of young children and family/community influences. Candidates will learn developmentally appropriate practices to include educational contexts, assessment, and classroom applications; the use of data-driven research about young children; and identification with young childhood education including professional organizations (PDE, NAEYC, & ACEI).

ECON121 - Principles of Macroeconomics

General

Course Long Title
Principles of Macroeconomics

Course Subject Code
ECON

Course Number
121

Department
Economics and Finance

Academic Level (Course Level)
Undergraduate

Course Description
Develops concepts and tools related to Macroeconomics such as the nature of economic problems, national income accounting and its determination, business cycle and economic growth, monetary and fiscal policies. The course introduces students to the behavior of the economy as a whole, and its interaction with international markets through trade, investment, and capital flow; and it reviews schools of thought in Macroeconomics with differing views on how the markets and market-participates operate.

ECON122 - Principles of Microeconomics

General

Course Long Title
Principles of Microeconomics

Course Subject Code
ECON

Course Number
122

Department
Economics and Finance

Academic Level (Course Level)
Undergraduate

Course Description
Develops conceptions and methods related to Microeconomics principles to study individuals and firms' decision-making process, and behavior under different market conditions. Students analyze the rationale behind individuals and firms' decision-making process and how they behave under different market conditions, apply the concepts to study the outcomes under different market structures, and evaluate the societal significance and efficiencies under different market structures, and study the impact of government taxation and regulation on markets' efficiencies.

ECON150 - Intro to Health Economics

General

Course Subject Code
ECON

Course Number
150

Department
Economics and Finance

Academic Level (Course Level)
Undergraduate

Course Description
Introduces the basic principles of economics and their application to health care policy issues. The goal of the course is to provide registered nurses, and students in fields related to health sciences such as speech pathology, audiology, gerontology, psychology, and public health the foundational knowledge of economics to help them better understand the policies that shape health reform and the implications for patients, nurses, practitioners, and health care.

ECON156 - Business and Economics Mathematics

General

Course Long Title
Business and Economics Mathematics

Course Subject Code
ECON

Course Number
156

Department
Economics and Finance

Academic Level (Course Level)
Undergraduate

Course Description
Presents an introduction to the mathematical tools frequently employed in Business and Economics. Topics include use of algebraic expressions to translate Business and Economic concepts into mathematical formulas; application and graph of special functions to study Business and Economic models; and the use of the time value of money in these models. Concepts covered in the course are always related back to the important Business and Economics models or principles.

General

Course Long Title
Business and Economics Mathematics Recitation

Course Subject Code
ECON

Course Number
156A

Department
Economics and Finance

Academic Level (Course Level)
Undergraduate

Course Description
Helps students be more successful in understanding how mathematics can be used to design, evaluate, and solve quantitative problems related to Business and Economics. This is an introductory mathematics course required to be taken simultaneously with Business and Economics Mathematics. Not open to students with placement test or SAT score high enough to place out of Intermediate Algebra (ENRICH 90).

ECON256 - Business and Economics Statistics I

General

Course Long Title
Business and Economics Statistics I

Course Subject Code
ECON

Course Number
256

Department
Economics and Finance

Academic Level (Course Level)
Undergraduate

Course Description
Studies statistical applications used in Business and Economic studies. Topics include the organization and presentation of Business and Economic data and application of commonly used descriptive, correlation and inferential statistical procedures related to Business and Economic research. The course introduces students to database management software, and use the software to retrieve Business and Economics data from various sources, tabulate or graphically present data, and conduct descriptive and inferential statistical analysis.

EDTC500 - Technology for Teaching and Learning

General

Course Long Title
Technology for Teaching and Learning

Course Subject Code
EDTC

Course Number
500

Department
Middle Level/Secondary/K-12 Ed

Academic Level (Course Level)
Graduate

Course Description
Introduces students to educational technology with a focus on instructional design, computer productivity tools, multimedia, web-based tools, apps, and many other current educational technology topics. The methodologies and materials used in the course are updated each semester according to current trends, practices, and research in the field of educational technology.

EGG450 - Field Experience in Environmental Science

General

Course Long Title
Field Experience in Environmental Science

Course Subject Code
EGG

Course Number
450

Department
Environ, Geog & Geol Sciences (EGGS)

Academic Level (Course Level)
Undergraduate

Course Description
Provides capstone and intensive field and/or laboratory training in the use of equipment and techniques in environmental science, including hydrology, hydrogeology, soils, geoscience, marine science, geochemistry, and/or ecology. Students are expected to read, summarize, and present background information on sites of interest; to measure and record field observations; and to analyze and report the results of the experience in one or more oral, graphical, or written reports. Field experience is integral and vital to the course. Additional fees may be required to cover room, board, field equipment, and transportation in the field. Course meets all day (8am - 4 pm) five to seven days a week for three to six weeks.

EGGS100 - Introduction to Environmental Science

General

Course Long Title
Introduction to Environmental Science

Course Subject Code
EGGS

Course Number
100

Department
Environ, Geog & Geol Sciences (EGGS)

Academic Level (Course Level)
Undergraduate

Course Description
Provides students with the scientific principles, concepts, and methodologies required to understand the interrelationships of the natural world, to identify and analyze environmental problems both natural and human-made, to evaluate the risks associated with these problems, and to examine alternative solutions for mitigating and/or preventing them. Out-of-class fieldtrip with a modest fee may be required.

General

Course Long Title
Physical Geography

Course Subject Code
EGGS

Course Number
101

Department
Environ, Geog & Geol Sciences (EGGS)

Academic Level (Course Level)
Undergraduate

Course Description
Explores Earth's principal spheres (atmosphere, lithosphere, hydrosphere, and biosphere) and their interactions with each other through time and space. Major areas of study are atmospheric and oceanic circulation, dynamics of climate, tectonic processes, and soil systems. Natural resource use and connections between humans and the physical landscape are also consistent themes.

General

Course Long Title
Management of Cannabis as a Natural Resource

Course Subject Code
EGGS

Course Number
110

Department
Environ, Geog & Geol Sciences (EGGS)

Academic Level (Course Level)
Undergraduate

Course Description
Introduces students to fundamentals of cannabis across history, culture, and industry. The course will cover Law and Policy, briefly explore medical cannabis, and discuss the cultivation process and life cycle of the plant. It will discuss the environmental challenges of growing the plant and best techniques to grow, harvest, process, and store the plant. Focus on cannabis management and what that could mean for global climate change will be discussed.

EGGS111 - Earth Science

General

Course Long Title
Earth Science

Course Subject Code
EGGS

Course Number
111

Department
Environ, Geog & Geol Sciences (EGGS)

Academic Level (Course Level)
Undergraduate

Course Description
Introduces the Earth-system processes in the context of astronomy, meteorology, geology, and oceanography. This course examines the Earth's relationship to the Sun, Moon, and planets in the solar system. The Earth's major processes, including the hydrologic cycle, the rock cycle, plate tectonics, global wind circulation, ocean circulation, global climatic phenomena, and human-induced changes in the environment are examined through lectures and hands-on classroom investigations.

EGGS115 - Nature Study and Creative Expression

General

Course Long Title
Nature Study and Creative Expression

Course Subject Code
EGGS

Course Number
115

Department
Environ, Geog & Geol Sciences (EGGS)

Academic Level (Course Level)
Undergraduate

Course Description
Focuses on historic and contemporary views of nature expressed through literature and other creative works. Student build competencies in the comprehension, analysis, and interpretation of primary environmental literature and other creative expressions. Students produce their own literary and creative expressions via direct observation of the natural world. As a natural extension of these activities, the course examines our relationships to the land and its inhabitants, as well as the ethical dimensions of contemporary environmental problems.
